Yet, there is no question that the earth resources program is one of the great opportunities to make space pay its way; that opportunity is before us now, and if not acted upon soon, it may disappear. The real currency in which to measure its benefits is current knowledge of global conditions, not the specific value of a given crop forecast or pollution assessment. It seems to me that what is needed is a simple declaration that the United States will continue to provide repetitive global multispectral data to all users at a reasonable charge. I believe experimentation on a shoestring has gone as far as it can—and as far as it need—to prove the next step to be worthwhile. That step requires only an act of courage, not necessarily an act of Congress, to begin a real turn in the tide of benefits.

Another class of new applications not yet at the same point of self-evident readiness for operational consideration is the entire field of public service telecommunications, those services that do not attract the commercial sector because of risks, costs and un-unified clienteles. This broad field encompasses such possibilities as national and regional emergency broadcasts, education and public information, emergency beacon location, direct broadcast, citizen-band expansion, data or library access and even the Dick Tracy personal wrist radio intercommunication systems.

CHALLENGE FROM ABROAD

There is no question but that space is probably the only feasible technical approach. But, by and large, NASA has not pursued a focused R&D program in civil telecommunications for the past several years, since it appeared this was now well within the scope of the private sector. Yet, we see a growing overseas competition in areas where the United States has traditionally been a leader; high power transmitters, low-cost space systems, efficient small receivers, effective use of very high frequencies—these are becoming the province of other national industries such as the Japanese, the Germans, and the Canadians.

I believe that our national telecommunications technology capabilities are still the greatest in the world today; unexercised, however, those capabilities can rapidly fade from sight. It seems to me a very real policy option before the country is the selection of a few new services to be pursued, at least through a full-scale demonstration phase. These demonstrations would provide the focus and regain our leadership in practical total systems development for the economic delivery of important services. . . .

The third class of significant future space applications is one directly related to the space shuttle's capacity for easy repetitive access to space: it is the use of the space environment. . . . We foresee here great op-

portunities for the development and processing of new materials, components and products, chemical, biological, or physical, that can add enormously to the national economy and standard of living.

Yet, there are the seeds of a future dilemma here. Free enterprise is the logical source of marketable invention, together with the proprietary protection of patents, copyrights and trade secrets that makes investment risk worthwhile. If the government dominates the scene even in an area as new as space manufacturing, under today's policies there is a real possibility that it would create a noncompetitive economic environment leading to that loss of national energy we have seen in other societies where free enterprise lost its freedom. Current policy requires that federally funded advances be made impartially available to all for further exploitation or use. There are some cost-sharing schemes that permit retention by the participant of some of the fruits of his investment; but there are, however, no real incentives for the high-cost, high-risk investments associated with pioneering in a whole new economic dimension. . . .

SOLAR POWER OPPORTUNITY

The last example of a space applications area surrounded by unresolved policy issues is perhaps the most controversial, the furthest off in the future, and yet the most significant for societal survival; it is the large-scale exploitation of solar radiation for generating terrestrially consumed electrical power. Here the clientele is clear: all America uses electricity delivered through public or private utilities. Here the promise is clear: a new non-polluting, environmentally acceptable, virtually inexhaustible energy source. Here the problem is also clear: cost. At present, we are certain our present technology can build a space solar power plant and its ground receivers, and that we can produce gigawatts of electrical power on a routine basis. What we are uncertain of is the real cost per kilowatt—in comparison to the real costs of all other energy options—when all factors are taken in consideration.

It would take half a generation anyway to test a solar power system in the full systems context of operational, routine, reliable energy delivery. How much dare the nation risk, in terms of money for investigation of alternative systems, or in terms of foreclosing options that may, in hindsight, have been the most preferable? Paper studies have their limits, economic analyses are constrained by future assumptions, crises have a way of forcing instant, if not necessarily correct, decisions.

NASA's most critical job is to find a meaningful middle way—at less than "all-up" prices—that still provides adequate answers. The next decade holds a thousand policy challenges in the area of space applications, but the decisions on whether to exploit the sun for electrical power may dominate them all.

BYELORUSSIA'S RIGHTS VIOLATED FOR 59 YEARS

Mr. ZORINSKY. Mr. President, today marks the 59th anniversary of the Declaration of Independence of the Byelorussian Democratic Republic, a nation which was overtaken by the Union of Soviet Socialist Republics less that 1 year after its independence and was forced to accept a new unwanted government.

Since the inauguration of President Carter, the world has been alerted to violations of human, national, and religious rights more strongly than in any time in recent memory. Byelorussia has suffered the denial of choice and endured an unwanted government for nearly 59 years, a violation of rights which we hold to be universal principles. We must continue to speak out concerning these violations, in Eastern Europe and wherever in the world they may happen.

Let us use this day as a time to once again reaffirm the American commitment to these rights and to human rights around the globe.

BYELORUSSIAN INDEPENDENCE DAY

Mr. WILLIAMS. Mr. President, today marks the 59th anniversary of the Proclamation of Independence of the Byelorussian Democratic Republic. On March 25, 1918, the Byelorussian people proclaimed their independence from 350 years of foreign rule.

The history of the Byelorussian people dates back to the eighth century A.D.

In the 16th century A.D. Byelorussia enjoyed a "Golden Age," characterized by a great tolerance for religious and political difference, and an advanced legal system that was a forerunner of much of the West's modern legal doctrine. Toward the end of the 16th century, however, foreign domination settled on the country, from which it would not emerge until 1918. In that year, the Byelorussians declared their freedom and looked forward to controlling their own lives and their country's future.

Yet the realization of their long-held dream disappeared once more after the briefest periods. Following the end of the First World War, Byelorussian Independence fell victim to the revolutionary upheaval in Russia, and in 1920, it was consolidated into the Soviet Union. Still the Byelorussian people held fast to their national spirit and their deep belief in democratic principles. The people refused to accept their foreign oppressors. Uprisings occurred at the end of 1920, and again in 1922, but they failed.

In 1944, at the end of the Second World War, the Byelorussian people found another opportunity to renew their independence. They convened an All-Byelorussian Congress, quickly reapproved their declaration of independence, and elected a Byelorussian Central Council. Unfortunately, once again, their hopes were shattered with the return of Soviet occupation.

Byelorussia has remained under the harsh control of the Soviet Union since 1944. But despite the Soviet policy of assimilation and deculturalization they have retained their independent spirit and their own national identity, and they have remained strong in their faith that their cause shall one day prevail.

It is with great pride that I join the Americans of Byelorussian descent in the commemoration of today's important anniversary in expressing the hope that some day very soon the Byelorussian people will enjoy the blessings of democracy for which they have fought and prayed and to which all are devoted.

THE POLITICS OF ECONOMIC INTERDEPENDENCE

Mr. PERCY. Mr. President, I was asked recently to contribute an article to a business information publication reflecting my thoughts on the issue of world economic interdependence. The discussion in the article has been made very timely by the recent economic talks held by Vice President MONDALE on his around the world trip and the plans for President Carter's economic summit meeting in London in early May. In summary, my beliefs on economic interdependence are:

First, only through the increased international economic interdependence can the world achieve the level of economic wealth and well-being its people desire;

Second, the long-term economic benefits of interdependence outweigh the short-term economic adjustment problems although the latter must be solved in a politically acceptable manner;

Third, economic interdependence must be seen in the long-term historical context of the evolution of our industrial society rather than be evaluated on the short-term prospective of economic mercantilism or protectionism; and

Fourth, the key to the rate of growth of interdependence, and the key to the major economic problems facing the non-Communist industrial states, is the restoration of a healthy rate of economic growth in the world economy.

Mr. President, in the hopes of stimulating debate on this issue before President Carter leaves for London and sharing my own views with my colleagues, I ask unanimous consent that my article, which appeared in a top management report of the International Management and Development Institute, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE POLITICS OF ECONOMIC INTERDEPENDENCE

(By Hon. CHARLES H. PERCY)

The growth of economic interdependence since World War II has been the result of a new industrial structure encouraged by international institutions designed to promote the movement of economic goods across national boundaries.

The process of world economic integration could only be reversed with severe economic hardship in the most advanced industrial nations. How rapidly integration continues will depend on the balance of domestic and international political forces. These political aspects of economic interdependence will, in the near future, slow but not stop further world economic integration.

LONG-TERM VS. SHORT-TERM RESULTS

The argument for more economic interdependence rests on the belief that international economic specialization and integration provide the United States and some other countries with maximum efficient utilization of their economic resources. In such a system, all countries have the capability of developing comparative advantages in the utilization of capital, raw materials and labor. Advocates of economic integration see the United States, in particular, benefiting from accelerated world economic growth. As a major exporter of raw materials and high-technology products, the U.S. economy gains from demand generated by economic growth in other geographic regions Furthermore, because other countries can produce certain goods at relatively lower costs than the United States, imports in an interdependent world economy are anti-inflationary.

But these are long-term economic results A number of interest groups in the United States, mainly organized labor, have shorter-term economic interests to satisfy. They see

economic interdependence resulting in a loss of U.S. jobs. They fear that foreign labor, in conjunction with U.S. capital, management and technology, will produce goods that will be imported into the United States to the detriment of domestic employment.

A second argument used against economic integration is that it redistributes national income from those who receive income from wages to those who receive income from capital. The argument is that capital is scarce in the world; and because capital is less plentiful abroad than in the United States, it receives greater returns when invested abroad and gives its owners greater income. Simultaneously, the productivity of American workers is seen as reduced because the capital is not invested in the United States. Therefore, it is argued, capital flows abroad should be halted and interdependence restricted.

A third argument centers on the capability of central governments to manage such a large integrated economy. It appears to many that the U.S. Government manages our economy only with great difficulty. They question how far the United States should commit itself to interdependence if we, as a Government, have difficulty managing our own economy. They ask, rhetorically, how we can manage an international economy three times the size of the U.S. economy.

Critics point out that during the last recession the major industrial economies were on the same business cycle. This was the first time since World War II that such a phenomenon existed. The result was a higher boom and a deeper recession than we had experienced in the past. Economic interdependence is seen by critics as eliminating the offsetting business cycles of the post-World War II period which provided some self-regulating capability to the world economy. They want a return to a simpler world or, at least, a halt in further steps toward more economic integration.

Economic interdependence is valuable because it expands economic wealth throughout the world. By expanding wealth, economic interdependence expands the probability of our having the economic resources to achieve our social objectives. In advocating this policy, I do not disparage the points raised by its critics. But these criticisms must be examined and answered in the context of the evolution of international economics rather than in the short-term framework of economic mercantilism or protectionism.

INTERDEPENDENCE IN THE UNITED STATES

The United States began its economic life with local and regional markets, supplemented by trade with Europe and other continents. With the advent of the national railroad system, a national market emerged. The increasingly efficient use of resources, labor, and capital rapidly expanded the economic wealth of the United States. National markets produced national corporations, which in turn produced national trusts and monopolies that came to dominate U.S. business.

This structural change in U.S. business organization brought a political response in the Sherman Antitrust Act of 1890, the first attempt to guide the structure of the economic system, based on the belief that competition serves the national welfare better than trusts and monopolies. This structural reform is, of course, still in effect.

The global or multinational corporations, which came to prominence after World War II, provided a totally new industrial organization. Encouraged by more open national markets, cheaper transportation, and the freer flow of international capital and goods corporations in the United States, Europe, and Japan devised global strategies for organizing resources and selling products. As in the case of national corporations, more efficiency was achieved and more wealth was created.

Today's economic debate concerns how to structure this new world economic strength, and how to divide the economic "spoils" of this new world organization. New wealth is being claimed by the home countries of the corporations, the host countries of the investments, and the multinational corporations themselves, along with labor unions through collective bargaining with the corporations.

THE COSTS OF ECONOMIC READJUSTMENTS

Economic interdependence assumes readjustment in national economies. In economic theory, this readjustment is termed painless because labor is assumed to have perfect mobility. But workers know better. Economic readjustment potentially means unemployment for both management and labor in many affected industries—a social cost which, to the extent it cannot be eliminated, should at least be tempered by adjustment assistance and programs to encourage re-training and geographic mobility of workers.

Over the last 40 years, the United States has experienced major economic readjustments in the movement of the textile industry from the Northeast to the South, the migration out of Appalachia as the coal mines were mechanized, and rural to urban migration. This harshness need not be repeated on an international scale, nor do the personal costs need to be so high. We must anticipate the readjustments and devise programs to lower the costs to individuals. But we should not halt changes in industrial organization that bring increased wealth throughout the world.

The same logic prevails on the issue of who benefits when U.S. capital flows abroad to more productive uses. Why prevent this wealth? If we determine that income redistribution occurs in the United States because of U.S. investment abroad, and that this is an undesirable outcome, then we should redistribute such income by taxing it and transferring it to those damaged by overseas investment. It should not be a national policy to stop the efficient production of wealth because we do not find the resulting income distribution desirable.

COORDINATED INTERNATIONAL MANAGEMENT

The issue of international economic management is a difficult problem. The primary factor necessitating economic coordination is the predominance of U.S. production and the U.S. domestic market in the world economy.

Coordinated management means sacrificing some national policy freedom for the greater good of the whole. But there is no easy way to make economic interdependence an operation concept among sovereign nations.

Yet we have seen a beginning in this process in the economic summit conferences in France in November 1975, and in Puerto Rico in June 1976. In the past two years, the non-Communist world has effectively reformed its monetary system and is renegotiating its trading system at the multilateral trade negotiations in Geneva. Economic coordination is now taking place through the Organization of Economic Cooperation and Development (OECD) in Paris, and through the Group of 10, a loose-knit organization of the largest nations.

The critics of economic interdependence will agree that the United States must trade for goods and raw materials essential to our economy and not produced domestically. An outstanding example is our estimated 40 percent reliance on imported oil. Many will also argue for a U.S. balance of trade surplus because it represents a stimulus to the U.S. economy and creates jobs. Organized labor favored open world markets for many years after World War II. It was only after the economies of Japan and Western Europe were rebuilt and became competitive with ours that a large proportion of organized labor turned protectionist.

Implicit in this protectionist attitude is the parochial belief that the United States can, to some degree, remain economically self-sufficient and independent of the world economic situation. But we cannot. As we consume our own national resources, supplies from abroad become progressively more attractive. To have the foreign exchange to buy abroad, the United States must sell goods abroad. Our needs and the desire to sustain our standard of living force us into a growing reliance on foreign supplies and foreign markets.

In addition, the major partners in our national security alliance—Europe and Japan—require economic interdependence. Japan is almost void of raw materials and energy, and Europe is heavily dependent on the importation of both. Therefore, in fostering a policy to construct a more interdependent world, the United States recognizes its own needs and those of its closest allies. Economic interdependence has meaningful political security ramifications well beyond U.S. domestic politics.

POLITICS OF ECONOMIC INTERDEPENDENCE

The politics of world economic interdependence are exceedingly complex. We are talking about integrating a myriad of political and economic systems into one economic system that can efficiently ration the supply of economic resources on an international basis among competing users. While it is an oversimplification, this problem can be seen as one of integrating four different institutional systems, each with its own structure of industrial organization.

There is, first, the United States, with its non-collusive oligopolistic structure associated with minimal government involvement in corporate decision making. Then competing with this system in international markets are three other major systems: (a) the European system of recognized, legitimate, collusive cartels that operate with a minimal amount of government involvement; (b) the Japanese system of government-sanctioned cartels with governmental "administrative" guidance; and (c) the state trading systems of the Communist bloc countries, which in most cases are state monopolies run in close coordination with central government economic policies.

These four institutional systems have different objectives in terms of production units and government policy. Yet all compete in the same world market. It is not surprising that there are major conflicts among the surprising that there are major conflicts among the national interests involved. What is surprising is how relatively well these problems are handled among the nations with these various structures.

While the national economic synthesis is far from perfect among the industrialized democracies, there are continuing national interests that favor negotiated settlements of differences. These ameliorating interests are not prevalent between industrial democracies and less developed countries or between industrial democracies and Communist bloc countries. Economic friction between blocs of countries is more visible, and rhetoric more strident.

Economic discussions between industrial nations and less developed countries are under way in the Conference on International Economic Cooperation (CIEC) in Paris and in the United Nations Conference on Trade and Development (UNCTAD). The basic contention of the less developed countries is that the international economic system based on a market structure is inequitable and favors industrial nations over raw materials producers.

The real issue concerns international re-

source transfers and economic development in less developed countries. Industrial nations have not provided economic aid to less developed countries at e ective levels. As a result, the rhetoric of industrial nations in terms of official development assistance is no longer believed. And the less developed countries, for their own interests, wish to change the market price structure so they receive more economic resources. They see the OPEC nations as prime examples of less developed countries taking advantage of the price system to transfer economic wealth for development purposes.

INTEGRATION BETWEEN EAST AND WEST

East-West economic integration is much more difficult. It is not a matter of politics following economics, but of economics following politics. Economics in East-West diplomacy is used within the context of détente as a mechanism to achieve political goals. This fact adds complex overtones to the entire area of economic integration.

An example of this political complexity was the 1974 Trade Act and the important role in that piece of legislation of what became known as the Jackson Amendment. The Jackson Amendment tied the growth of East-West trade to the emigration of Jews from the U.S.S.R. This was an emotion-filled issue that caused severe political tension between the United States and the Soviet Union.

In the United States the politics of interdependence operate on two interrelated levels:

1. *Straight U.S. domestic politics.* There is a divergence of interests between groups in our society that benefit from the long-term evolution of interdependence and groups that consider economic adjustment caused by growing interdependence undesirable Compromises will and are being made. When adequate government programming is too expensive or too difficult to relieve the personal costs of readjustment, then the growth of interdependence will have to be slowed. This is happening in sectors where "voluntary" import agreements have been negotiated, or where adjustment relief has been sought because of heavy import pressure. These arrangements will delay but will not permanently impede the continuing growth of economic interdependence.

2. *International Diplomacy.* The second level of politics is diplomatic. It concerns relations between our close economic allies in Europe and Japan; the North-South dialogue between the non-Communist industrial world and the less developed world; and East-West trade in the perspective of détente with the U.S.S.R. Each of these aspects of economic interdependence will have to be negotiated carefully. In the first two cases, negotiations are stalled because low levels of economic growth have created domestic political obstacles to compromise. In the area of East-West trade, political diplomacy will have to proceed further before economic relations with the Communist bloc countries can be broadened.

U.S. domestic politics and progress in international economic diplomacy indicate a slackening in the rate of growth of economic integration as experienced over the last two decades. The most prevalent common depressant is the slow rate of economic growth. Slow growth necessitates longer periods of economic adjustment. Pressure for more rapid adjustment during periods of slow growth results in increased political pressure to impede the integration process. The rate of growth in economic interdependence has a direct relation to economic growth, and its growth rate will be restored only when growth is restored in the world economy.

REMEDY FOR RESTORING GROWTH

The key question facing the industrial democracies is how to restore this growth. The effort to restore the growth should not be for reasons of fostering more interdependence; that will come as a by-product of growth. We need growth to employ people and to fully use the potential of the economic resources our society has available. Low growth means 7 to 8 percent unemployment and billions of dollars lost each year.

There are only three countries in the world that have the economic strength to stimulate growth—Germany, Japan and the United States. However, acting independently, neither Germany nor Japan have large enough economies relative to the world to pull up growth rates. The United States might have this capacity, but it would risk a return to double-digit inflation acting alone. What is needed is a cooperative trinational effort to stimulate economic recovery in the OECD countries.

Any attempt at such a cooperative recovery will be short-lived if two policy decisions are not made prior to this effort.

1. That the three healthy economies be willing to finance the world recovery with large enough current account deficits on their balance of payments to absorb the OPEC current account surpluses. This will allow the growth stimulus to ripple out of the three domestic economies and stimulate the world economy.

2. That there be an international energy policy. Any sustained OECD growth at an average of 5 or 6 percent will cause an oil shortage in the mid-1980's. Any such shortage will put the industrial nations back on their financial knees. The greatest user of energy in the world is the United States. Therefore, it is we who must have the political will to put into place stringent energy controls. Until this is done, other industrial countries have no reason to sacrifice, and the possibility for sustained growth will be severely compromised.

A stringent U.S. energy policy stands as the first order of business for rebuilding the world growth rate. Closely linked to it will be a willingness by the Big Three to accept current account deficits and cooperative programs to stimulate their domestic economies. None of this will be easy. The political hurdles are many. We face the task for the first time in history of how to translate political economy into an operational policy of economic interdependence.

SPEECH BY JUDGE JAMES PLEMON COLEMAN OF MISSISSIPPI

Mr. STENNIS. Mr. President, in the February 1977 issue of the Journal of Mississippi History, there was reprinted in full a particularly moving speech by Mississippi's distinguished former Governor, James Plemon Coleman, now a judge on the Fifth Circuit Court of Appeals. The occasion for Judge Coleman's remarks was the official Mississippi celebration of the Bicentennial, which was held on the 4th of July, 1976, at Jefferson College, Washington, Adams County, Miss. It was here that Mississippi's first constitution, the one under which the State came into the Union in 1817 as the 20th State, was written. Judge Coleman delivered the principal address. The occasion was honored by the presence of many Mississippi citizens and other dignitaries.

I personally found Judge Coleman's speech to be inspirational and relevant to the times in which we live. He paints a clear picture of the type of ideals on which our Nation was founded and of the character of the Founding Fathers who held these ideals. The speech further serves as a clarion call for America to face the challenges before us and to meet the need—I dare say necessity—of capturing the visions, ideals, and courage of 1776, and of insisting that these ideals be actively striven for by the political leaders of today as well as by the people of all groups.

Judge Coleman is eminently qualified in every phase of State as well as national government. He has served Mississippi in every branch of the State government as a district attorney, circuit judge, supreme court judge, attorney general, member of the house of representatives, and Governor of the State of Mississippi.

Mississippi has produced few statesmen of such outstanding ability as Judge Coleman and none to exceed him. I ask unanimous consent, Mr. President, that the text of his speech be printed in the RECORD in order that his counsel might be preserved and given wide circulation throughout the Nation.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE ADDRESS OF JUDGE JAMES PLEMON COLEMAN OF MISSISSIPPI

If Philadelphia is the cradle of American independence, which it is, then it is altogether fitting and proper that these ceremonies should be held today in the area where our beloved State likewise had its beginnings.

It was here, on the fifteenth day of August, 1817, in the forty-second year of the independence of the United States, that the delegates from the counties of Adams, Amite, Claiborne, Franklin, Greene, Hancock, Jackson, Jefferson, Lawrence, Marion, Pike, Warren, Wayne, and Wilkinson adopted Mississippi's first Constitution and we became the twentieth state in the Nation. Washington was the first capital of Mississippi.

Many years before the remainder of Mississippi was opened for settlement, this area had already progressed to an advanced state of civilization, inhabited in many instances by wealthy people, occuping imposing homes, and pursuing an enlightened role in public affairs.

In many respects, the years 1795 to 1817 represent a kind of golden age in which these inhabitants quickly laid the foundation upon which Mississisippi came to be built and upon which for 159 years it has endured.

It is also a source of genuine satisfaction that these ceremonies are being held on the grounds of Jefferson College, named for the author of the Declaration of Independence. Its charter in 1802, while Mississippi was yet only a territory of the United States, and fifteen years before statehood, stands as a continuing remainder that our forebearers, even in those early days, appreciated the value of an education in the enrichment of human life, in the enhancement of human usefulness, and as the very handmaiden of progress itself.

Thus, we may correctly assert that South and Southwest Mississippi provided the cradle for our State and likewise provided the Mississippi cradle for that most useful instrumentality of freedom, the education of the human mind.

We who are alive today have been granted a most unusual privilege. Not only do we celebrate 200 years of American freedom but we are living witnesses to the beginning of the third hundred years of that freedom, with their great challenges, opportunities, and responsibilities.

Two hundred years ago fifty-six men signed, although not all at the same time, a document which history recognizes as one of the greatest documents of all time. In fact, it must be said that this writing, which flowed from the head and the hand of a thirty-two-year old, red haired Virginian,

stands as one of the lofty mountain peaks in any recitation of human accomplishment.

The document which Jefferson wrote and which those fifty-six men signed is the Declaration of Independence.

Speaking directly to the King, whose role as a monarch had never before been disputed, these fifty-six men fearlessly declared:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are Life, Liberty, and the Pursuit of Happiness. That to secure these rights, governments are now instituted among men, . . ."

It is sometimes forgotten that the Declaration did not stop with a declaration of the rights of free men. It also drew limits against unfettered power in the hands of governments. In words that will never die it declared that "Governments derive their just powers from the consent of the governed."

One rarely hears it mentioned that this Declaration was unanimously adopted. In these days of strife, of dissension, and of widespread forays for power and personal advantage—when disagreement seems to be the rule rather than the exception—a great lesson we may learn from the Declaration of Independence is that in a time of towering stress and acute personal danger our forefathers could and did act together, emphatically, unanimously, on one accord. What a lesson for those of us who are here in 1976.

More than that, we should never for a moment forget what these fifty-six men had to say when they came to the close of the Declaration.

"And for the support of this Declaration, with a firm reliance on the protection of divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor."

I am afraid that today we generally forget that even if they had not said it this is exactly what these men were doing. Plainly stated, they were laying their lives and all of their material possessions squarely on the line. It was a long shot, against overwhelming odds, and if the cause had failed they would promptly have been hanged as traitors and their property confiscated. They knew that, and it did not stop them for a moment. In 1776 it was a common saying that these men "had signed their own death warrants."

When the first signer, John Hancock, put his name on the dotted line he wrote in a large hand, so that King George the Third could read without his spectacles.

Benjamin Franklin, who had lived in England for many years as a representative of the Colony of Pennsylvania said, "Now we shall all have to hang together or we most assuredly shall hang separately"—that is, one at a time, as the British caught them.

How many of us today will take a stand which we know we ought to take for the common good if it is likely to *cost* something, even something far less than our lives or our property? Most regrettably the policy seems to be to avoid such risks, even when inspired or commanded by a noble cause.

Who were these men who were brave enough in 1776 to bring forth, as Abraham Lincoln said, *"A new nation—conceived in liberty"?*

Some of them were as young as twenty-six; others were as old as seventy. The majority were in their thirties and forties. A few were the richest men in the Colonies. Charles Carroll had 10,000 acres of land. Men like Carter Braxton were immensely wealthy.

Some of the signers were poor. Samuel Adams' friends had to buy him some clothes and donate the necessary money that he might attend the Continental Congress. George Taylor had come to America as an indentured servant, bound by his own contract for a term of years. Ten of the signers had as many as ten children. Only two were bachelors.

Half of the signers were lawyers, one fourth were farmers or planters, and four were doctors.

I would like to point out that women played a highly sacrificial role in the attainment of American independence.

Francis Lewis of New York was a signer of the Declaration. The British burned his home. They took his wife prisoner. Her sufferings while in prison caused her death.

John Hart of New Jersey was another signer. He was driven to the woods. When he got out he learned that his wife had died, and his children were scattered.

George Clymer's wife and children hid in the woods while the British vandalized their home.

William Hooper had his home destroyed and for ten months he was separated from his wife while both were refugees.

I shall briefly mention what happened to some of the other signers.

Dr. Barton and Dr. Hall say their homes burned to the ground and their property destroyed. They lived to serve as governors of their states.

Abraham Clark had two sons captured by the British.

When Thomas Nelson Jr.'s house at Yorktown was occupied by the British under Cornwallis he ordered his soldiers to knock it down with cannon fire. He was never able to rebuild it.

Richard Stockton of New Jersey was one of the ablest lawyers in America. He was captured by the British, his home destroyed, he was kept in prison until his health was gone, and he died at the age of thirty-eight.

Thomas Heyward, Arthur Middleton, Edward Rutledge, and George Walton were captured and put in prison far from home, at St. Augustine.

I shall not take the time to read the long roll of homes destroyed, of signers who were reduced from riches to poverty. I have made my point—the Declaration of Independence was not born of a picnic; it was born of the blood, sweat, and tears of those brave enough to sign it and support it—men and women who were willing to pledge their lives, their fortunes, and their sacred honor that those who came after them might govern themselves in an independent nation.

My purpose here today is to remind you that our free country today confronts no problem, however complicated, that could not be solved with about ten per cent of the sacrifice and suffering that our forebears of 1776 were willing to endure, not to save a great nation already in existence, as we now enjoy, but to bring forth a new nation which yet had it all to do.

Stephen Hopkins of Rhode Island was a very old man. He had the palsy. When he signed the Declaration of Independence he said: "My hand trembles, but my heart does not." Like "Remember the Alamo" or "We have met the enemy and he is ours," I propose this as our motto for our next hundred years—"My hand trembles, but my heart does not."

Now, what are some of the problems we face at the outset of this new century of freedom?

It took until 1850 for the world to attain a population of one billion.

It took eighty years to reach its second billion (1930).

It took only thirty years to reach the third billion (1960).

It took just sixteen years to arrive at four billion (1976).

It is estimated that in thirteen years (1989) we shall have our fifth billion.

Living space—food—are among the stresses that we ourselves are destined to see. It is inevitable that "push" is going to come to "shove."

In one year—1975—750,000,000 people in this world went from a free form of government to a dictatorship in some form. So, 2,000,000 people have been losing their fundamental liberties every day. That equals the total population of all of Mississippi.

Right on our doorsteps, in our own hemisphere, in all of South America there are only two nations not under a dictatorship.

Only 600,000,000 people in the world live in a free society. Nearly half of these free people are in the United States. Three billion people live under dictatorships of one kind or another.

We who enjoy the blessings of freedom are outnumbered by more than four to one.

This sad state of affairs mocks the words of the Declaration of Independence that "governments derive their just powers from the consent of the governed." We are struck in the face with the fact that we in America are *right now*, among the *last* high priests of freedom. To use the words of Thomas Jefferson, "This is a fire bell in the night." Will the fire bell arouse us from our slumbers?

In Sweden a self-employed farmer, doctor, lawyer, or businessman has to pay all of his yearly income above $35,000 to the government. What he makes below $35,000 is also heavily taxed. "Oh," we may say, "That is Sweden." It may or may not be out of order to remind ourselves that in 1929 federal taxes took 5% of our gross national product; today federal taxes take 25%. Stated another way, we are now working three months of the year for the federal tax collector. This is not the collector's fault. He simply collects what a majority of the Congress thinks it has to have to meet *our* demands. And those demands have plunged us seven hundred billion dollars in debt.

Now, let us look at Great Britain, our Mother Country, from which we wrested our freedom, and later our great ally, once an empire upon which the sun never set. At the end of World War II it was the second wealthiest nation in northern Europe. Today, thirty years later, the British government takes sixty per cent of the gross national product and it is poorer than any other nation in northern Europe, Ireland alone excepted. This ought to teach us that we cannot rely on the government for our salvation.

Our spiraling crime rate, which nobody seems to understand and for which nobody offers any solution, although there obviously must be solutions, reminds us of what De Tocqueville wrote after his visit to the new nation, called the United States. This is what DeToqueville said:

"I sought for the greatness and genius of America in her commodious harbors and her ample rivers, and it was not there, in the fertile fields and boundless prairies, and it was not there, in her rich mines and her vast world commerce, and it was not there. America is great because she is good, and if America ever ceases to be good, American will cease to be great."

Have we forgotten this? Do we no longer believe this? If so, your freedom dangles on a shockingly thin thread.

What I have come here to tell you is that the next century of American independence is now up to us. The challenges we face, although different in kind and degree, are no less urgent than those once encountered by the brave, resolute, self-sacrificing founders. The critical question is whether we, their successors, shall measure up in the manner and form so clearly demonstrated by them. There is no doubt about our ability to do so. The question is, shall we have the will to do so? Will we say, with Stephen Hopkins, that our hands tremble, but our hearts do not!

I respectfully suggest to this distinguished assemblage that our forefathers are no longer here to save our free heritage. We can no longer "trade" on what our ancestors did. In the world of 1976 we can no longer survive by halfhearted lip service to the sacrifices and dedication of those of another day. We must be the architects of our own salvation or we shall become the authors of our own destruction.

We must make a new declaration of our own and then at all costs we must defend

that declaration. We, *ourselves*, must solemnly resolve that America will not abandon the pursuit of excellence, personal, professional, and in the public service;

That we shall not forget the mighty power of self-reliance, flatly refusing to be led to our own destruction along the line of personal comfort and least resistance;

That no future historian shall ever have a chance to write that we in America were so weakened by the successes born of personal and national strength that we found oblivion by eluding our responsibilities, by playing traitors to our trust, and thus went the way of all the dead nations of the past.

Thomas Jefferson, John Adams, and all of that illustrious company of patriots in 1776, were of the flesh, even as we are. They had almost none of the comforts and conveniences of life that we now demand as a matter of course. Yet, they met the blood curdling challenges of their time, whatever the cost, and we have inherited the benefit. *It did not come free of charge and it cannot be maintained free of charge.*

It simply comes down to this: We must measure up to the promises bought by the blood of countless thousands of men, the tears of unknown thousand of women and even the cries of helpless children.

If the spirit of the people goes wrong, the lessons of history warn us that no Congress can save us, no president can save us.

That in this we shall not fail is the hope for our next hundred years.

We know what we celebrate in 1976.

What do you think America will celebrate in 2076?

In the name of our children and grandchildren, and even as in 1776, the answer is up to you.

POLICIES OF THE CARTER ADMINISTRATION

Mr. BELLMON. Mr. President, like many of my colleagues in the minority party, I have endeavored to withhold criticism of President Carter during the formative stages of his administration.

Observing the actions of the President and his official family over the past 2 months—and most especially during the past few days—I have concluded that the policies emerging from the Carter administration are so contrary to the interests of the Nation that this member of the loyal opposition can no longer remain silent.

Many of President Carter's decisions are inconsistent with statements made in his campaign, and some of his policies are in conflict with each other. In fact the only consistency apparent from the White House is its inconsistency.

One common theme, however, is becoming clear with each new White House pronouncement; short-term expediency with little regard for future consequences.

In yesterday's newspaper this "deny now, pay later" philosophy expresses itself in two stories about recent Carter decisions.

One story deals with the Carter administration's plans to eliminate a number of important water development projects across the country. Right below that story is one about the President's opposition to a realistic farm program.

Both of these ideas are advanced in the name of fiscal conservatism and a balanced budget. Certainly, I agree that each of these fiscal policies is desirable. But responsible public officials must look beyond the dollar that can be saved today and ascertain tomorrow's demands.

Take the case of the water projects. Some of these projects are well on the way to completion. To shut them down now, after spending millions of dollars, would be fiscal foolishness. But look at the situation in a broader sense. Multipurpose water projects are designed to provide flood control, municipal and industrial water supply, irrigation, recreation, power generation or a combination of these benefits.

It seems inconsistent with sound public policy to one day recommend spending $844 million in aid to drought-stricken Western and Plains States and then call for an end to projects that could bring water to these dry areas of the country, thus making such drought relief unnecessary in the future.

We can also use hydroelectric power produced by such facilities. During these days when we are concerned about environmental quality and about the worsening energy shortage, hydroelectric power meets some of our needs in a manner that is not objectionable.

The farm bill is another example of the shortsighted and inconsistent thinking of this administration.

The President has recommended increasing price supports for milk producers to 83 percent of parity; yet, he proposed supports of less than 50 percent of parity for other commodities. By holding down spending for Federal assistance to farmers now, the President will trigger widespread bankruptcy of younger farmers thus jeopardizing the Nation's food supply for the future.

If President Carter's policies are allowed to go into effect, millions of Americans will be cold, hungry and thirsty in the years ahead.

Economizing in Government is a worthy goal that I wholeheartedly endorse; however, I detect much inconsistency in Mr. Carter's pronouncements about costcutting and what actually is taking place in his departments and at the White House.

It is interesting to note that newspapers have reported that Secretary of Health, Education, and Welfare Califano has hired his own personal cook at a salary of $12,763. The White House announced that the Secretary, after a talk with the President, said he is "going to deal with" the situation. Perhaps he is going to instruct the cook to eliminate saccharin from the meals.

I noted in last night's paper that Mr. Califano has added another position to his personal staff—a $43,923 bodyguard.

Such increases at the departmental level should not be surprising considering that the President has raised the pay of 48 White House staff members at a cost of $400,000 while announcing that taxpayers are actually getting a savings of $166,400. If the congressional budget committees used that kind of arithmetic, we could balance the budget tomorrow.

As a member of the Budget Committee I know of the strenuous effects which have been made to get the executive branch to furnish Congress with an honest budget. If President Carter plans to use this arithmetic in the budget process, we are headed again into a series of confrontations with the executive branch.

The White House staff that is saving money for the American taxpayer through this new arithmetic is the same White House staff that candidate Carter said he would cut drastically to save money. The Congressional Quarterly reported recently that the President's promised drastic cut has reduced the staff from 485 people under President Ford to 460 people presently. At the same time, President Carter is spending $1 million more for his staff than did President Ford.

Mr. President, the Nation needs a strong, dependable, believable, truthful leader. President Carter began his administration as if he desired to fill this need. The actions of the President and his administration during recent days indicate that he has sadly departed from his earlier policies.

WILDERNESS IN A BALANCED LAND USE FRAMEWORK

Mr. METCALF. Mr. President, on Monday of this week, my distinguished colleague, the senior Senator from the State of Idaho, Senator CHURCH, delivered a major policy address before the first annual wilderness distinguished lecture series at the University of Idaho.

This speech, entitled "Wilderness in a Balanced Land Use Framework," touches on a number of contemporary wilderness issues, which merit further discussion. Senator CHURCH speaks in some detail about the early controversy which surrounded the establishment of the National Wilderness Preservation System, the growth of the wilderness concept, congressional strategy for wilderness classification, wilderness related to better use of other national lands, and the issue of wilderness purity. All in all, this speech is an important cornerstone of the debate over the future of our wilderness resources, and I commend it to my colleagues.

I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

WILDERNESS IN A BALANCED LAND USE FRAMEWORK

(By Frank Church)

Thank you for asking me to be the first speaker in your annual "Wilderness Resource Distinguished Lecture Series." The College of Forestry, Wildlife and Range Sciences is to be congratulated for establishing this new series of lectures. I hope they will contribute to balanced land and resource management.

The chance to speak here on "Wilderness in a Balanced Land Use Framework" is a treat for me. That subject has claimed a good deal of my time during twenty years in the Senate. And, being from Idaho, I have had more opportunity than most to savor wilderness.

THE EARLY CONTROVERSY

Passage of the Wilderness Act in 1964 marked the beginning of a legislative effort; to preserve certain federal lands in their natural state. The Act was preceded by eight years of lively debate in Congress, in the press, and in public hearings throughout the country. Congress finally passed the legislation after sixty-five separate bills had been

introduced. In the end, it was the public interest to be served by a wilderness system which overcame the vested interests arrayed against it. Still, it was never sufficiently understood at the time that the bill formed only part of a larger equation: by designating some lands as wilderness, it followed that more intensive use should be made of other lands, such as our working forests.

If any Senator were singled out, it is Hubert Humphrey who deserves the credit for being the father of the Wilderness System. He introduced the first bill. However, by the time the legislation reached the Senate floor in 1961, its principal sponsor and advocate was Clinton P. Anderson of New Mexico, then serving as Chairman of the Senate Interior Committee. Unfortunately, Senator Anderson was taken ill and had to be hospitalized just before the bill was called up for debate. At his request, I filled in a floor manager of the legislation.

Because the bill engendered a heated controversy in Idaho and elsewhere in the West, it was considered a heavy political cross to bear. In 1962, when I ran for re-election, the newspapers in Idaho were filled with references to the "Church Wilderness Bill," which was not intended as a compliment and gave me more credit than I deserved.

It was apparent that my opponents were determined to make wilderness the major issue of the campaign. No other politician in either party stood with me, and as the election approached, most of them joined in a chorus of calamity over the awful fate in store for Idaho, should the Senate-passed bill become law.

Looking back, I still have vivid memories of that bitter campaign. I recall meetings where the mood of the crowd made me wonder if a hanging were planned, with the noose intended for my neck! Wild-eyed descriptions of the Wilderness Bill had spread anger and alarm throughout the mountain communities. But Idahoans are fair-minded, even when aroused, and they were willing to hear me out. They peppered me with questions:

"Senator, why are you in favor of converting our Western forests into wilderness playgrounds for Eastern millionaires?"

I replied that I thought the wilderness areas in Idaho would be used principally by our citizens, a prediction since borne out by Forest Service statistics.

"But, Senator, only the wealthy can afford to hire guides and packstrings. What about us ordinary folks?"

This argument, widely circulated and surprisingly believed, was enough to blow the mind. Most people hike into the wilderness, with packs on their own backs and their children in string. A few years ago, in the Summer of 1973, I spent a week in the Sawtooth Wilderness. We were the only party with horses. But we encountered many other wilderness visitors: college students and mountain climbers in small groups, older back-packers and fishermen, and hardy parents and their kids. That's not exactly the chic clientele you find at Sun Valley! Around the campfires, I remember the conversations well. One young father, leaning back to glimpse the treetops, and the arching star-studded sky, put it this way: "What an irony. No amount of money could buy what is given us free tonight. No King could purchase these splendors. This is the best vacation we could possibly have as a family. And, you know, it happens to be the only kind I can afford!" [1]

Well, enough of rhapsody. Let's return to the grim inquisition of the 1962 Senatorial campaign. A familiar statement was:

"That's not the point, Senator. Maybe some just-plain people do enjoy the wilderness. Still, they're not the majority. Most of us want to drive through the woods and find places to park our campers. The great outdoors is O.K., but we like a little comfort, too."

"Well, fine," I would reply. "We're spending a fortune building forest highways, developing campgrounds, marinas, and other recreational facilities. By the time we are done, 90 percent of our public lands will be accessible to the majority who want to take their vacations on wheels. But what about the people who don't? Are we to leave nothing for them, no escape from the pavement, the crowds, the billboards, the costly resorts? This country is big enough to leave some of its land alone, as a sanctuary for those who, from time to time, feel the need to get away from it all. Otherwise, we'll turn this country into a cage!"

Still, in the autumn of 1962, it was not possible to debate the wilderness issue solely on its merits. Too many people who depended on the public domain for their livelihood were afraid that the wilderness concept, once imbedded in the law, would spread and spread, until their jobs were threatened. They forecast a time when our resource-based industries—timber, cattle and sheep grazing, mining, and water development for power and irrigation—would all be constrained by the expanding wilderness system. That was the rub which no amount of argument could dispel.

So, looking back, it was hardly surprising that the user groups should have combined against me on the wilderness issue. The night before the election, my chances looked bleak. My father-in-law, the late Chase Clark, paced back and forth in our living room at home in Boise. He was then Federal District Judge, but he had formerly served as Governor of Idaho, as Mayor of Idaho Falls, and had held membership in both houses of the State Legislature. As well as any man, he knew that the user groups had historically dominated Idaho politics.

"Tell me, Frank," he asked, "how do you expect to win? All the organizations that count are against you: the cattlemen, the woolgrowers, the mining association, the forest products industry, the newspapers, the chambers of commerce . . . and for what? For wilderness! You don't just have rocks on your mind; you've got rocks in your head!"

Well, he hadn't exhausted the list. The doctors and dentists were also against me—but that was on account of Medicare.

The Judge's case was pretty persuasive that night. All I could say was: "Pop, maybe I'll be lucky like Harry Truman. Remember 1948? Everybody was against Harry Truman; everybody but the people."

The next day I won the election. A corner had been turned. Despite the raging editorials, the united efforts of the user groups, the scare talk, a majority of the people wanted a part of our fast-vanishing wilderness saved. They knew this was the right thing to do, if the good life they had enjoyed was to be preserved—for themselves and their children. The campaign had been a classic case of the West divided against itself, and the issue was decided in accordance with the best instincts of the voters.

Valid as the verdict favoring wilderness was then—and is now—the fears of those who opposed the Wilderness bill in 1962 have not proved to be unfounded. The concept of an expanding wilderness has extended far beyond the limits of the original bill. To understand how it happened and what it may imply for the future calls for a brief review of our recent history.

THE GROWTH OF THE WILDERNESS CONCEPT

As finally enacted into law in 1964, the original Wilderness Act created 54 instant wilderness areas totaling 9.1 million acres. In addition, the 34 existing Primitive Areas in our National Forests were to be reviewed, their boundaries redrawn, with the objective of then admitting them, one by one, into the system. The roadless land within the National Parks and Wildlife Refuges was also to be reviewed, and tracts found appropriate were to be recommended to Congress for inclusion. Altogether, a wilderness system of 40 to 50 million acres was anticipated.

Since then, despite growing pressures for more wilderness, Congress has acted with restraint. In 1975, the Eastern Wilderness Act was approved. It designated 16 National Forest areas—some 207,000 acres—as Wilderness, and directed a study of 17 other areas, an additional 125,000 acres. Considering the urgent need for wilderness in the densely populated regions of the East, this was hardly a runaway program.

Then came passage of the so-called BLM Organic Act last year. It requires a study of BLM's 13 primitive and natural areas, comprising 307,000 acres, for possible wilderness classification, plus an inventory of all the 90 million acres of roadless lands within the vast domain of the BLM, to be completed within the next 15 years, looking toward the selection of new wilderness study areas.[2] Since most of this land is arid or semi-arid, no serious impact on existing uses should be entailed.

Since 1964, however, unanticipated court decisions have greatly confused the picture. The East Meadow Creek decision, upheld by the Supreme Court in 1972, decreed that no roadless area next to a National Forest Primitive Area may be developed prior to a Congressional decision on whether or not to incorporate the area in the Wilderness system. Following this decision, the Forest Service conducted a far-reaching review and identified 1449 roadless areas, 5,000 acres or larger, selecting 274 of these—a total of 56 million acres—as new wilderness study areas. Furthermore, the Chief of the Forest Service ordered that agency plans for any of the forest areas not selected for wilderness study—44 million acres—must still consider wilderness as one possible use. Furthermore, environmental impact statements would have to be prepared for each planning unit.

All these events have increased the potential size of the Wilderness System from the 40 to 50 million acres originally contemplated by Congress into something much larger. Today, 14.4 million acres are in the system, excluding proposals under the Alaska Native Claims Settlement Act; nearly 25 million acres are pending action by Congress; another 24 million acres have been committed either by Congress or the agencies to wilderness study; while nearly 150 million acres of roadless lands remain with opportunities for wilderness as well as other uses. These are agency estimates; environmentalists claim an even greater acreage.[3]

All this presents us with serious questions about the future use of at least 150 million acres of roadless land that may also be of value for logging, mining, or other multiple-use applications. What part of this should be wilderness? What part should be managed for other purposes?

There are no easy answers to these questions. Experience proves that. However, there are a number of things which can help us make the hard decisions.

CONGRESSIONAL STRATEGY FOR WILDERNESS CLASSIFICATION

Congress must begin to do some long-range thinking about the ultimate size and location of the Wilderness System. The current practice of area-by-area classification obscures the need for a comprehensive view of the national system we intend to build. Omnibus bills to incorporate a number of areas at once are obviously necessary. This is the purpose of the Endangered American Wilderness Bill I will soon introduce in the Senate. By speeding up the incorporation of areas for which there is widespread agreement, the study of remaining areas can be expedited and the needed decisions sooner made.[4]

Meanwhile, we should move ahead with

Footnotes at end of article.

the backlog of proposals now pending before Congress. For example, here in our own state, the Idaho and Salmon River Breaks Primitive areas have still to be reclassified as wilderness. That's a high priority on my list for this session. This region is the largest roadless tract left in the United States south of Alaska. It will constitute a wilderness of immense attraction and significance.

In addition to the workload now facing us, Congress must also exercise an oversight of the ongoing management and classification plans. Congress is not properly representing the people if concerned citizens can't turn to us and say, "We think the agency is mistaken in proposing to develop—or not to develop—this or that area. Come take a look."[5]

But in carrying such appeals to Congress, I would hope that the various interest groups would strive to present broadly balanced and well-reasoned arguments. For example, proponents of wilderness sometimes appear to be more concerned about obtaining the maximum size than they are about the true wilderness quality of an area. At the same time, some timber interests are more concerned with total allowable cut reductions than actual use of the timber in the proposed area. Mining interests seem of the opinion that nothing should ever restrict exploration or mining anywhere—even if the minimal potential of the survey is very low.

Most of the 1175 Forest Service roadless areas not selected for wilderness study—and perhaps many of the BLM tracts yet to be inventoried—will be better suited for other uses. Our goal should be to see that endangered and deserving areas move more swiftly into wilderness designation. And, equally important, that areas better suited for resource development are scheduled for such use with all deliberate speed, thus reducing the uncertainty now facing our resource dependent industries.

WILDERNESS RELATED TO BETTER USE OF OTHER LANDS

It is not possible to resolve wilderness issues in a vacuum. For example, a relatively small amount of the nation's timber supply is tied up in potential wilderness. But a loss of this timber to wilderness could be made up easily through more intensive management of our working forests. Better reforestation, thinning, fertilization, genetic makeup of seedlings, fire, insect and disease control, along with improved timber utilization, logging methods and planning, could all help boost the annual harvest. Elsewhere, incentive programs might spur fiber production on small, privately owned woodlots. Wilderness advocates should—and they often do—recognize that it's in their best interests to see multiple-use management improved. The ultimate size of the wilderness system may well depend on increasing production levels from our other lands.

I'm reminded here that, back in the early 70's, following debates on the proposed Timber Supply Act, an ad hoc committee of conservationists and lumber industry representatives was convened by the American Forestry Association. Its purpose was to identify "areas of agreement." The concept is a good one because it puts diverse groups to work, side by side, searching for consensus on matters they do agree upon. And, in addition, by helping build a common effort to get more from our forests—both wood and wilderness—it helps reduce the polarization that so often bogs us down in resource matters.

So, as I work for wilderness, I work also for more efficient forest management across the board.[6] I urge sportsmen, conservationists, and environmentalists to help. Because the only way we can fashion an adequate Wilderness System is if it's part of a well-balanced resource management program for the entire country.

THE PURITY ISSUE

My final comments tonight concern the issue of wilderness purity. Time after time, when we discuss wilderness, questions are raised about how developed an area can be and still qualify as wilderness, or what kind of activities within a wilderness area are consistent with the purposes of the Wilderness Act. I believe, and many citizens agree with me, that the agencies are applying provisions of the Wilderness Act too strictly, and thus misconstruing the intent of Congress as to how these areas should be managed.

One of my longtime friends, Ted Trueblood, challenged the purity doctrine of the Forest Service in a September 1975 issue of *Field and Stream*.[7] As Ted put it, the Forest Service with their purist doctrine is trying to "scuttle the Wilderness Act." In arguing his case, Ted refers to the exclusion of deserving Idaho areas from wilderness classification because they contain minor evidence of man's prior activities, to requirements which make outfitter operations difficult, to fish and wildlife management activities which limit the enjoyment of hunters and fishermen, and—perhaps most tragic of all—to the burning of historic cabins to eliminate the evidence of earlier human habitation.

Such policies are misguided. If Congress had intended that wilderness be administered in so stringent a manner, we would never have written the law as we did. We wouldn't have provided for the possibility of insect, disease, and fire control. We wouldn't have allowed private inholdings to remain. We wouldn't have excluded condemnation, as the means for forcibly acquiring developed ranches within wilderness areas—a practice allowed on ordinary national forest lands from which wilderness is created. We wouldn't have made wilderness classification subject to existing private rights such as mining and grazing. We wouldn't have provided for the continuation of non-conforming uses where they were established—including the use of motor boats in part of the Boundary Waters Canoe Area and the use of airfields in the Primitive Areas here in Idaho. As these examples clearly demonstrate, it was *not* the intent of Congress that wilderness be administered in so pure a fashion as to needlessly restrict their customary public use and enjoyment. Quite to the contrary, Congress fully intended that wilderness should be managed to allow its use by a wide spectrum of Americans.

There is a rule of reason in interpreting the Act, because wilderness values are to be protected. As I stated in 1972, while chairing an oversight hearing of the Subcommittee on Public Lands:

". . . The Wilderness Act was not deliberately contrived to hamstring reasonable and necessary management activities. We intend to permit the managing agencies . . . latitude . . . where the purpose is to protect the wilderness, its resources and the public visitors within the area . . . (including, for example) minimum sanitation facilities . . . fire protection necessities . . . (and) the development of potable water supplies. . . . The issue is not whether necessary management facilities are prohibited; they are not. The test is whether they are necessary.[8]

Thus, the wilderness management framework intended by Congress was for the agencies to do only what is *necessary*. The facilities just mentioned may be required—and restrictions on use may sometimes be needed to protect especially fragile locations. But in adopting regulations, common sense is required. For example, I can understand the Forest Service urging outfitters and guides to make their camps conform to the spirit of a wilderness experience for their clients; but it seems insane to allow wooden tent floors in their camps, only to require them to be packed out of the area each fall, before they disappear below the snow, and then carried back in again after the Spring thaw!

SUMMARY AND CONCLUSIONS

In summary, if purity is to be an issue in the management of wilderness, let it focus on preserving the natural integrity of the wilderness environment—and not on needless restriction of necessary facilities for human use and enjoyment.

We often embark on a journey looking for one thing and discover something else. Columbus and other explorers of his time were looking for the East Indies and discovered two continents they did not know existed. The search begun by Aldo Leopold, Bab Marshall and others earlier in this century for a system to protect some of America's wilderness remnants led eventually to a heightened concern for our natural environment. Yes, the wilderness movement was the forerunner of the environmental movement. Through our concern for these wildlands, we came to realize that it is folly to extract and exploit resources without considering the impact of these actions on the surrounding environment. We have been forced to recognize that man cannot live well in an empty open-pit copper mine, or on a falling water table, an eroded farm, or field of tree stumps.

Thus, the wilderness movement was not a romantic excursion into the past; rather, it was the start of an exploration of our future. We are learning, at times painfully slowly, that the environment—both the living plants and animals and the fossil fuels and minerals which are their ancient relatives—are all vital to our well-being.

I think the real meaning of wilderness was stated best twenty years ago by my late colleague from New Mexico, Senator Clinton Anderson. He was not only Chairman of the Senate Interior Committee, and a former Secretary of Agriculture, but a hard-headed businessman to boot. He put it this way:

"Wilderness is an anchor to windward. Knowing it is there, we can also know that we are still a rich nation, tending to our resources as we should—not a people in despair scratching every last nook and cranny of our land for a board of lumber, a barrel of oil, a blade of grass, or a tank of water."[9]

Today as we rise to the difficult challenge of designating and managing wilderness, we must rise, too, to the challenge of better stewardship of all our natural resources: the land, the water, and the air. As we proceed on this journey together, the real meaning of wilderness will open our eyes like an Idaho sunrise on a summer morning.

FOOTNOTES

[1] Two studies of the Selway Bitteroot Wilderness, in 1971, by the Forest Service, and last summer by the University of Idaho's Wilderness Research Center, show that it's not just wealthy people that use the wilderness; nor is it people from far away. It is people representing *all* incomes, ages and educations; and the vast majority of them live *near* the area. Maybe most important is the fact that so many of them are students; nearly one-fourth in the 1971 study and more than one-third last year in this Idaho-Montana Wilderness.

[2] The exact acreage of BLM roadless lands potentially suitable for wilderness is debatable until an inventory is carried out. This estimate is documented in House of Representatives Report 94–1163, May 15, 1976, pages 18 and 50.

[3] See Table 1 attached.

[4] On this point, see my "Introductory Statement for the Endangered American Wilderness Act," Con. Rec. 122 (103); June 29, 1976.

[5] Recent laws and current proposals in Congress often reflect that, after taking such a look, Congress has disagreed with agency decisions and has upheld the intent of these citizen requests:

P.L. 94–557, an omnibus Wilderness Act added 16 Wildlife Refuge and 3 National Forest Areas to the Wilderness System, one

of which was a noninventoried and one a non-selected roadless area. The Act also designated 8 new Wilderness Study Areas in the National Forests, 4 of which were noninventoried, 2 and part of a third of which were nonselected roadless areas.

P.L. 94-567, an omnibus Wilderness Act added 13 National Park areas to the Wilderness System, revised boundaries of 3 existing wilderness, and created one Wilderness Study Area from National Forest noninventoried and nonselected roadless areas.

S. 393, the Montana Wilderness Study Areas Bill, which passed the Senate only in the 94th Congress, designated 10 new Wilderness Study Areas on National Forests which, with the exception of portions of 3 of them, were nonselected roadless areas. (See Senate Report 94-1027.) This bill has been reintroduced to the 95th Congress under the same number.

S. 3630, the proposed Endangered American Wilderness Bill, introduced in the Senate late in the 94th Congress, called for 9 instant Wilderness Areas and 6 Wilderness Study Areas, with all or part of the 15 areas being Forest Service noninventories or nonselected roadless areas. A nearly identical "Endangered Bill" was also introduced in the House by Congressman Udall, H. 14524. A revised version of H. 14524 has been reintroduced as H.R. 3454 in the 95th Congress. I will soon reintroduce a revised version of last year's Senate bill.

S. 1381, the Oregon Omnibus Wilderness Areas Bill, called for instant wilderness classification of 14 areas, 4 of them nonselected roadless areas. This bill has been reintroduced to the 95th Congress but has been revised to focus only on nonselected Forest Service roadless areas.

[6] While I have strongly supported wilderness and wild river additions, I'm equally proud of my support for across-the-board improvements in resource management—the "Church clearcutting guidelines" in the recent National Forest Management Act and my sponsored amendment to that Act to provide increase annual funding for reforestation and timber stand improvements. TABLE 1.—THE WILDERNESS SYSTEM AS OF JANUARY 1977, WILDERNESS PROPOSALS, WILDERNESS STUDY AREAS DESIGNATED BY CONGRESS AND THE AGENCIES, AND REMAINING ROADLESS LANDS THAT ARE POTENTIAL WILDERNESS

Agency	Total agency jurisdiction (million acres)	Classified wilderness		Proposals to Congress (million acres)	Congress mandated study areas (million acres)	Administration established study areas (million acres)	Remaining roadless (potential wilderness) (million acres)	Tota
		Number of areas	Million acres					
USFS	187.6	92	12.6	3.2	1.6	10.9	42.2	70.
NPS	31.1	17	1.1	14.0	10.6	.3		26.0
FWS	32.1	52	.7	7.2			13.8	21.7
BLM[1]	450.0				.3		89.5	89.8
Total		163	14.4	24.4	12.5	11.2	[2]145.5	208.0

[1] The BLM figures reflect the following. 120,000,000 to 140,000,000 acres, including some of the roadless lands, may be withdrawn or assigned to other agencies under the Alaska Native Claims Adjustment Act. The study areas are BLM primitive and natural areas which total 307,000 acres. Remaining roadless lands are minimum estimates, cited from H. Rept. 94-1163.

[2] Excluding any proposed allocations under the Alaska Native Claims Adjustment Act, these remaining roadless lands include the following agency estimates of acreage in Alaska: USFS 1[2],000,000 acres; NPS none; FWS 13,600,000 acres; BLM a minimum of 64 000,000 acres. Thus, a total of 95,700,000 acres of these roadless lands are in Alaska and 49,800,000 acres in the other States.

BYELORUSSIAN INDEPENDENCE DAY

Mr. CASE. Mr. President, I wish to congratulate all Americans of Byelorussian descent on the occasion of the 59th anniversary of the Declaration of Independence of Byelorussia. The Proclamation of Independence of the Byelorussian Democratic Republic took place in Minsk on March 25, 1918. True independence was short-lived, however, because Byelorussia was annexed by the new Soviet Socialist Republic on January 1, 1919, and the Byelorussian Soviet Socialist Republic was instituted.

Throughout its long history, Byelorussia has been subject to periods of domination by foreign powers—since 1386 by Poland, and since the Treaty of Vilna in 1656 mostly by Russia and then the U.S.S.R. In both world wars, Byelorussia was devastated—it was one of the chief battlegrounds between the Germans and the Russians. Thus, Byelorussia has a unique stake in peace in Europe. It is the only Soviet Republic other than the Ukraine to have individual representation at the United Nations. At the European Conference on Security and Cooperation in Europe, Byelorussia was not given individual representation. Nevertheless, the tragic history of Byelorussia gives it a particular interest in the humanitarian problems raised in the Helsinki Final Act.

As a member of the Commission on Security and Cooperation in Europe, I am especially concerned with the obligations which the Soviet Government has solemnly undertaken in regard to such areas as the reunification of families, freedom of information and religion, the right to binational marriages, and the rights of ethnic minorities. The activities of this Commission—for which I was one of the legislative sponsors—are keeping me informed of many developments in the ongoing struggle for human rights in the Soviet Union—including, of course, Byelorussia.

Once again, let me extend my best wishes today to all Byelorussian-Americans and let us all work together so that Byelorussians wherever they are, will be free to practice their religious, cultural, and political rights as they see fit.

OPERATION PUSH AND EDUCATION

Mr. GLENN. Mr. President, earlier this month I had the pleasure of meeting with Rev. Jesse L. Jackson, president of Operation Push. We talked about the hard and difficult educational issues facing the Nation, particularly those issues impacting most heavily on the black communities of the Nation.

Reverend Jackson is most forceful and articulate in presenting his national program "push for excellence." This program is a nationwide education campaign that stresses excellence, self-reliance, and total community involvement in and responsibility for the education of young people. Reverend Jackson is a young veteran of both the civil rights movement as well as the complex struggles being waged in our northern cities. He has the vision and the perspective to view today's problems as involving much more than dollars, programs, and ideological labels. Thus, he lays great stress on individual responsibility along with his calls for a society-wide commitment to excellence and morality as essential ingredents necessary to create an enviroment in which our programs and dollars might work better. It is a powerful message that needs broad distribution.

Mr. President, I ask unanimous consent that two articles describing the push for excellence program be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Sun-Times, Sept. 26, 1976]

PUSH FOR EXCELLENCE

(By Jesse L. Jackson)

For nearly a year Operation PUSH has been engaged in a national education campaign. We contend that the present *atmosphere* around and *attitude* toward education must be radically changed.

Specifically, education must be seen by black and other oppressed people as essential to our struggle for liberation. Generally, education must be seen by all as essential to progress and as a civilizing agent.

Everyone agrees that excellence is a worthwhile goal. But push means something specific when we call for a "Push for Excellence" in education.

First, Push for Excellence is the recognition of the intrinsic worth and potential of every human person. Education is not a reward conferred only on those who succeed and win as competitors. Ultimately we must compete, not merely with others, but for our own unfulfilled potential. From this recog-

nition will come increased personal freedom and self-direction. We can pursue excellence without holding others less gifted or fortunate in contempt.

Secondly, Push for Excellence is a move toward self-reliance and away from dependency. That is what I mean when I say, "nobody will save us, from us, for us, but us." In our schools and in our society it is time for self-reliance to replace the dependency that has victimized too many of us. We must break the chains of mediocrity, striving mightily to achieve excellence in education as in all areas of our lives. Academic excellence is achieved by using the same formula as athletic excellence: sacrifice, discipline, duty and perseverance.

Thirdly, Push for Excellence is a total involvement concept. Parents, pupils, principals, preachers, teachers, businesspersons, politicians, civic and community leaders, and the media must all see good education as part of their responsibility. It has been too easy to hold the notion that the schools and professional educators have the total responsibility or capability for educating our children. We must redistribute *responsibility*, so that education will be seen as a shared function, benefiting all who participate.

Parents must provide care, motivation, chastisement and discipline in love. Students must be challenged with what they need and not coddled with what they want; given appropriate freedom and held responsible for exercising it. They must be taught, by precept and example, that a combination of sacrifice and self-reliance will take them further than a combination of liquor and "luck".

Professional educators must administer and teach with competence and enthusiasm. Preachers must view education as part of God's will. Businesspersons, politicians, the media, civic and community leaders must see education and support it, among other reasons, out of an enlightened self-interest.

At the teaching level, the Chicago Teachers Union must find ways of protecting the pay and benefits of the teaching staff without losing integrity and excellence. Teachers who are incompetent should be made competent or fired—with the understanding and support of the union.

At the administrative level, the ratio of one staff person to every eleven students (or approximately 48,500 employes to 520,000 students) should be examined, with a way found to increase the proportion of teachers while decreasing the proportion of administrators or overlapping bosses.

Saving children must be our first priority. Only a moral and ethical imperative will result in dedicated teachers, concerned parents and motivated students.

[From the Commercial Appeal, Sept. 20, 1976]

BUCKET WITH A HOLE

The message of moral revival that Rev. Jesse Jackson is taking to school systems across the country may belabor the obvious, but it holds as much promise as anything we have heard in recent years for the improvement of educational quality in the public schools.

As national director of Operation PUSH, Jackson has been identified with black militancy. Some Americans undoubtedly think of him as an agitator, a troublemaker, a man who manipulates mass emotions, especially those of poor blacks, to create confrontations and even violence.

But Jackson is a former lieutenant of Dr. Martin Luther King Jr. and a follower of King's philosophy of nonviolence. His militancy has been dictated by the circumstances of resistance to equal treatment and opportunity for minorities that traditionally have been held back by discrimination. It's a cause that many whites also support. And now Jackson is speaking to a problem that, as much as any other, crosses all lines of race and social and economic standing. All Americans should listen to what he has to say.

In an article in the Viewpoint section of The Commercial Appeal yesterday, Jackson told staff reporter Jerome Wright, "We have a bucket with a hole in it. It doesn't matter whether you put black water, white water or black and white water into the bucket. If it has a hole in it, it will not hold substance." The hole is what Jackson calls "the death of ethics . . . the sabotage of excellence."

Ever since the educational programs of the Great Society failed to uplift the educational achievement of students from poverty areas, educators and a disgruntled public have been tossing around for solutions to what has seemed at times an impossible problem. But achievement failures haven't been limited to the poor. National scores have declined across the board. Discipline has become a major concern in the suburbs as well as in the inner cities. The use of drugs and scorn for authority have bedeviled all. As Jackson said, the glorification of sex, violence, killing, hustling, rape and robbery has caused many youngsters to develop values of spiritual decadence. And many others, for whatever reasons, don't seem to be willing to put in the effort that demanding goals require.

Educators, backed up against the wall of accountability, have said repeatedly the schools can't remake society by themselves or change the attitudes of every child they see only six hours a day. Jackson concurs. He places the greatest responsibility for student behavior on parents. The moral authority needed to develop self-discipline and personal growth, he said in the Viewpoint article, must have its source in the home.

Jackson has suggestions for greater community involvement, especially by parents, in the public schools. He says he would like to see stricter standards for students to encourage them to strive for excellence. But such ideas have been repeated in a thousand variations at every PTA meeting and teacher convention for decades. The crux of Jackson's message is to say these things in a way that awakens.

"The mediocre students," he says, "are going to be mediocre adults. They are going to produce mediocre family lines, and families are going to disintegrate not because of a lack of money but because of a lack of adequate values. And children are going to grow up in split homes—not split levels—because the mother and father did not develop the capacity to learn how to live with other people."

To blacks, he says, "it is time, I think, for us to stand up, admit our failures and weaknesses and begin to strengthen ourselves . . . Racism and oppresion have to be fought on every front. But it takes strong soldiers to fight the battle."

The response to Jackson reportedly has been dramatic. Wright pointed out that another black would be called an "Uncle Tom" for saying the same things. A white person would be called a "racist" for doing it. Rev. Samuel B. Kyles, director of the Memphis PUSH chapter, told Wright it's amazing that students are listening to Jackson. "He speaks their language," Kyles said. "He is telling them to stop shuckin' and jivin' and straighten up, and they are applauding him."

Students and parents have heard the same challenge from teachers, principals, ministers and community leaders. They respond to Jackson because of his eloquence, his image and his credibility as a civil rights activist. But the success of the schools has to be founded on something more stable than a cult of personality. What Jackson says is more important than the man himself.

A major effort is needed to make parents aware of their responsibilities, even to hold them responsible for their children. Parents have to insist that their children behave with honor and decency, that they do the homework assignments given them, that they obey the teachers, that they respect other people.

Mrs. Bertha Jackson, a counselor in the city schools, backs up Jackson's statements. "You have only a handful of parents," she said, "who really participate in the schools. And their kids are the ones who are excelling."

Jackson has a program for the schools called PUSH for Excellence. Several school systems have started to use it. The program probably doesn't have all the answers, but it focuses sharply on the underlying weakness in public education and much of our society. It could give the Memphis school system a starting point for exploring ways to increase the responsiveness of parents and the community at large to the needs of the schools and their students. Young people must be made to realize what a lifelong stake they have in getting an education. And parents must be made to realize how important they are for their children's success in achieving productive life.

AN AURA OF AWE ABOUT CHAIRMAN BURNS

Mr. PERCY. Mr. President, on March 14, 1977, the New York Times printed a feature story entitled, "An Aura of Awe About Chairman Burns," by Clyde Farnsworth. The article was a profile on Arthur F. Burns, Chairman of the Federal Reserve. Mr. Farnsworth is correct in his statement that an aura of awe does exist around Chairman Burns. But Mr. Farnsworth misses the point when he attributes this aura to Chairman Burns' stature and dress, to the power of the "Fed," or his "philosophy of crusty, homebaked conservatism, seasoned with spices of academia . . ." The respect accorded to Arthur Burns in Washington is a direct result of what Arthur Burns has accomplished.

When Arthur Burns became Chairman of the Federal Reserve in 1970 the U.S. economy was well into an inflationary cycle caused by a Johnson administration belief that the U.S. economy could provide both guns for Vietnam and butter for America without drastic effect on our domestic economy. They were wrong. This inflationary pressure contributed to the collapse of the international monetary system between 1971 and 1973 and was exacerbated by an investment and commodity boom in 1973 and 1974. This economic bubble burst under the pressure of a fivefold increase in the price of crude oil in 1974. Subsequently, the economics of the non-Communist world have gone through the deepest recession since the Great Depression and the world economy is still under severe strain.

Through all of this tumult Chairman Burns has helped guide the U.S. economy, using the power of both word and deed, through the worst of the economic shoals. He is the first one to admit that the journey is not over and the U.S. economy is not functioning well enough. However, he has provided the vision and the voice that economic cycles are not rectified by quick political fixes. He has held to policies that have slowly squeezed the excess inflation out of our economy and hopefully will increase the flow of investment that is needed to create employment. He has stood against many

who have advocated, in the name of the people, dangerous policies whose only merits were extra votes from those who did not understand. The proposed $50 per individual rebate on 1976 taxes already paid costing the Treasury $11.4 billion when other means of economic stimulus are so readily available is a recent example of his sound thinking.

Many individuals in Washington honestly disagree with Chairman Burns, but they do it with respect. It is this profound respect that generates the aura of awe. In my opinion, both the aura and the awe are well-deserved. Mr. President, for the benefit of my colleagues I ask unanimous consent that Mr. Farnsworth's story be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AN AURA OF AWE ABOUT CHAIRMAN BURNS

(By Clyde H. Farnsworth)

WASHINGTON, March 13.—In the high-ceilinged committee chamber he sits alone at a big table, briefcase filled with charts and graphs to one side, pipe and paraphernalia to the other. His dark blue, ultraconservative suit brings out the salt and pepper shades of his neatly cropped gray hair. And, as Arthur F. Burns speaks, the words slide out in scratchy nasal tones slowly, precisely, with a sharp cutting edge.

When the chairman of the Federal Reserve Board sits before the House Banking Committee to disclose new quarterly targets for monetary growth, the words slice through a hushed, standing-room audience composed largely of bankers in expensively tailored pinstripe suits who have just stepped off the morning shuttle from New York. With the precious words stored in tape recorders or on note pads, the bankers troop back to Wall Street for afternoon meetings of interpretation on which million-dollar deals are hanging.

Before all the committees (Banking, Budget and Finance in both Senate and House) Chairman Burns—or simply The Chairman, he is frequently called—is held in the kind of veneration rarely accorded anyone in this city apart from the President. Whether or not Senators and Representatives agree with the Burns philosophy of crusty, homebaked conservatism, seasoned with spices of academia—and many do not agree with it—they hear him out with what can only be described as awe

What is the phenomenon of Arthur Burns? Whence derives his authority? Who is the man, and how does he operate?

Alexander Hamilton wanted to found an American central bank, but for more than a century all attempts to do so were either abortive or temporary. In the crisis of the 1890's it was the House of Morgan that floated a gold loan to save the credit of the United States Government.

Just prior to World War I Congress, finally asserting its right (as the Constitution says) to coin money and "regulate the value thereof," established the Federal Reserve System, independent of the executive branch. Woodrow Wilson went so far as to refuse to invite the original Federal Reserve governors to the White House for social occasions, fearing that it might jeopardize their independence. Removal of the Federal Reserve from the daily battles of economic politics—and from special groups seeking speculative advantage in the marketplace—was deemed essential if the new institution was to fulfill its functions of managing the money and checking inflation.

During World War II the Federal Reserve had to finance the war deficits with its dollar-printing presses. But what has come to be known as the Accord of 1951 restored the right of the Fed to refuse to finance with easy inflationary money whatever budget deficits an Administration might choose to incur.

The Fed's power, and that of Dr. Burns, is still far from clearly defined. Despite recommendations in the early 1960's by the Commission on Money and Credit to increase the powers of the executive branch over the Federal Reserve, the tradition has gained ground that the Fed is primarily responsible to Congress. But it's not even clear what this means, except that Dr. Burns has to tell the Congressional committees what he's doing.

President Kennedy could not get Dr. Burn's predecessor, William McChesney Martin, to go along with the Administration's expansionary economic policies. After informal pressures were put on it, the Fed did accommodate the Kennedy programs. A comparable situation exists today. Dr. Burns, in luncheons with Budget Director Bert Lance and Treasury Secretary W. Michael Blumenthal, is being subjected to informal pressures to accommodate the Carter plan to economic stimulus.

THE CHOICE OF A CHAIRMAN

But the Federal Reserve—as one student of the institution, Prof. Paul Samuelson of the Massachusetts Institute of Technology, points out—is not, and was never regarded as, a fourth branch of government. Its measure of day-to-day autonomy is subject to review by Congress. Its duty to confer with the executive is imperfectly spelled out, but Professor Samuelson and other persons (including the House Banking Committee chairman, Henry S. Reuss, Democrat of Wisconsin) believe this must become a concrete obligation.

"Since nature abhors a vacuum," Professor Samuelson says, "I believe it must be the Congress that sets out the longer-range range choices that the Federal Reserve is to implement in its day-to-day decisions." At a minimum, he says, legislation should be enacted that gives each incoming President the right to name the chairman of the Federal Reserve Board. Dr. Burns was appointed by President Nixon in 1970, and his term as chairman expires next January. Governors on the seven-man board have a 14-year term, so he can remain on the board (though not as chairman) until 1984.

Decisions of the Federal Reserve lead to crucial political tradeoffs between unemployment and inflation. In arguing for a shorter string in the Fed's responsibility to the executive branch or to Congress, Professor Samuelson declares, "No Professor Burns, no Professor Samuelson, no Dr. Burns, no Governor Burns can exercise, as a matter of his conscience and expert scholarly knowledge, control over the economic destinies of diverse groups, regions, and classes of American citizens."

A DOMINATING PERSONALITY

Autonomy of the institution accounts at least in part for the phenomenon of Arthur Burns. The other part of the story is the man himself. "He is a dominating personality," says an associate. "You sense it simply by the hush that falls over a room when he walks into it."

A former college professor at Rutgers and Columbia, Dr. Burns lectures the Senators and Representatives in the hearing galleries as if they were his students.

Answering a question on unemployment at recent House Budget Committee hearings, he went into a long discourse about the high jobless rate. He said there were many more women in the labor force because women were taking advantage of the "new opportunities life offers." He said that the cost of living had gone up for everybody and that, since "Americans do not want a decline in their living standards, inflation causes upward "pressure on the labor force." He said Congress had made unemployment "attractive for some members of our general public who lack energy." In addition, he said there were "serious deficiencies" on the investment side.

WHEN IT'S TIME TO SUM UP

The Budget Committee's chairman, Robert N. Giaimo, Democrat of Connecticut, tried to sum it all up: "If I infer correctly, what you are saying is that the unemployment problem is really one of women and young people."

"Oh," said Dr. Burns, taking a long puff at his pipe and timing his reply for maximum impact, "I said a good deal more than that." The gallery broke up in laughter. Mr. Giaimo, laughing heartily himself, interjected: "Thank you. I will stand on the inference."

Dr. Burns's constitutency is the conservative business and banking community. He talks what businessmen consider to be "good sense" to the politicians, and they identify with him in his constant battle with the politicians to curb Government spending and check inflation. At a moment when efforts are under way to revive business confidence as an ingredient for economic renewal in the nation, his identification as a symbol of that constituency makes it extremely difficult for any politician to tangle with him. This is another major source of his power.

His independence allows him to speak with certain candor, making the lively Burns hearings perhaps the best show in town.

For instance, he tells the Representatives that everyone is concerned over the plight of the poor, but he goes on to say: "What I find missing in much of our thinking today is that we forget that there is such a thing as the middle class, that the great energies of our people are largely concentrated in that class and that, when we start manipulating taxes and so on, we tend to ignore that class. Perhaps that is right and proper from some social viewpoint. But, from the viewpoint of energizing the economy, we are definitely making a mistake."

IMMIGRANT FROM AUSTRIA

And he drives home a point in a discussion of the reforms of the 1930's. The New Deal, he recalls, "introduced one measure after another to reform our financial system" as well as labor practices and public utility setups. "The reforms served our country well, but the recovery lagged and the decade of the 1930s was a decade of depression. Now if the reforms had been spread out, if the accent originally had been on recovery, I think that we would have avoided much of the heavy unemployment of those times. Therefore, when thinking of a quick way of stimulating the economy, I would say put reform to one side."

Dr. Burns came to the United States as a youth from Austria, where he was born in 1904. The hyperinflation of that country in the 1920's made a deep and lasting impression on him and probably accounts more than anything else for his encrusted conservation. To him it is a crime to have even 5 to 6 percent inflation in the United States, let alone the double-digit rates of a few years ago, which he ascribes in large measure to the unwillingness or inability of the Johnson Administration to get the taxpayers to finance the war in Vietnam.

"I think inflation is still raging in our country," Dr. Burns tells the legislators, and his position is that the Federal Reserve Board is doing far more than it should be to accommodate that inflation. But if he curbs the growth of the money supply and drives interest rates higher he would in effect be tearing up President Carter's stimulus package of tax cuts and new-jobs spending.

PRIVATE UNIVERSITY EDUCATION

Mr. MOYNIHAN. Mr. President, America's private universities and colleges are surely an educational and cultural resource of incalculable value to our

country. Yet, in recent years, much has been written about the future of private university education; most of the more dire predictions center on the financial problems which these institutions must overcome. We know that one dramatic change in private higher education in America has been the growing financial involvement of the Federal Government—but that involvement has not been without cost or controversy.

A particularly illuminating analysis of these questions was offered last December by William McGill, president of Columbia University, an institution that is older than the State of New York itself and certainly one of the most distinguished universities in America. Because of the timeliness of William McGill's remarks, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

GOVERNMENT REGULATION AND ACADEMIC FREEDOM—UNIVERSITY CENTERS FOR RATIONAL ALTERNATIVES CONFERENCE

In his annual report of 1926–27, President Nicholas Murray Butler advised the Trustees of Columbia University of a painful truth already quite well-known to them. The task of formulating the University's budget for the year ending June 30, 1928 had proved to be one of "exceptional difficulty and embarrassment." Expenditures for University operations were anticipated to be $8.6-million. The budget would be in balance if the general income of the University apart from gifts and endowments were as large as $6.2-million, but the most optimistic income estimates yielded only $5.8-million. Hence the President contemplated the embarrassment of an operating deficit in the 1927–28 academic year amounting to more than $400,000. Butler, making full use of the pious language which university presidents reserve for the most painful financial moments with their trustees, observed that "the estimated deficit was kept even at this very large sum only by declining to make appropriations urgently asked for and really all but necessary for the effective carrying forward of the University's work."

Having used nearly the same rhetoric last May to divert a new generation of Columbia Trustees from the star reality of a projected operating deficit in 1976–77. I can appreciate Butler's embarrassment as thoroughly as I can savor his faultless display of presidential legerdemain in slipping a bad budget past a skeptical board. It is almost as though nothing had changed in the last fifty years at Columbia. But closer observation reveals that a great deal has changed. The essential circumstances governing that change have brought us together in this conference to discuss the proper role of government in higher education.

The budget which I expect to bring to the Columbia Trustees next April will forecast university expenditures in 1977–78 approximating $230-million. Roughly $70-million of that figure will be generated by the university's instructional activities. Another $70-million will come directly from the federal government via programs of research support and student aid. An additional $25-million of our budgeted expenditures will come to us from New York City and New York State. Substantial portions of this funding have their origins in federal programs.

Nicholas Murray Butler's budget for Columbia University in 1928 had no government money in it at all, whereas nearly one-third of my budget in 1978 will be paid for in Washington. During the last fifty years we have entered into a remarkable partnership with the federal government. In so doing we and government have managed to create an extraordinary educational enterprise contributing greatly to the advancement of our nation. The partnership has fostered standards of excellence in colleges and universities across the nation unmatched elsewhere in the world. It has generated an almost unbroken sequence of American accomplishments in science and in the arts since the Second World War. These achievements have projected our country and our educational system into positions of world leadership. I need not belabor this sophisticated audience with the obvious caveat that this major accomplishment did not happen by accident. It was built out of the brains and the labors of extremely capable men and women working cooperatively over many years to create an educational system that has now trained increasing numbers of even more capable men and women. The evidence of success is clear as the Nobel Prizes begin to roll in, and as our remarkable economy manages to adjust to the rigors of a hostile world environment in which we can no longer claim to control a significant portion of the resources consumed by our industry and by our standard of living. Our technology continues to be the marvel of the rest of the world, and of course it has been built upon a foundation of higher education.

In comparing Butler's budget of 1928 with Columbia's budget forecast for 1978, I should also note that the 1928 expenditures in each of the traditional major categories of expense are now multiplied by a factor of about twenty. The last fifty years have not produced a major expansion of the University either in its student body or its faculty. We have gone from about 12,000 students and 2,000 faculty in 1927 to about 16,000 students and 3,700 faculty in 1977. The very large increases in our dollar expenditures are due chiefly to the inexorable force of currency devaluation over the last fifty years. Endowment earnings are systematically eroded in times of inflation by the operation of what seems to be an economic law affecting institutions dependent upon the delivery of costly professional services. Investments tend to increase in yield at a rate determined by inflation in the productive areas of the economy, whereas a university's operating budget grows at a substantially higher rate since costs of professional services cannot be controlled by enforced productivity changes. This means that in times of inflation endowment income grows more slowly than operating expenditures.

The financial pressures experienced by Columbia during the last fifty years have forced us to search for new sources of current income. Accordingly our partnership with the federal government was not entirely voluntary. The more than twenty-fold inflation of our basic costs over the past fifty years, coupled with the inability of our endowment to keep pace, led us to turn increasingly to the government for financial assistance. During the 1950's Columbia University crossed a fundamental threshold that will determine the basic structure of the University for at least as long as we are alive. In this period and for the first time in Columbia's long history, a yearly infusion of federal resources became absolutely necessary for our operation and for our survival. It is a fortunate thing that Columbia's emerging need for sources of revenue over and above tuition and endowment earnings happened also to coincide with the federal government's decision to turn to the major research universities for a unique kind of public service. These universities were given stewardship over the nation's expanded commitment to basic research and advanced teaching. The threshold was passed in 1957 when the Soviets launched their Sputnik beeping to the world its message of technological superiority. After Sputnik the involvement with government initiatives in higher education, and the dependence on federal funds for expansion of facilities and mission, was such that no major American university would ever be the same again. On our side at least the new federal partnership was born in part because of serious financial needs and in part because of understandable aspirations to excellence. Despite Columbia's ancient charter, and despite our reputation as one of the world's great independent institutions, we are no longer a truly private university. We are now acutely and critically dependent on the federal government not only for roughly one third of our annual operating budget but for the sustenance of the intellectual activity of perhaps half of our faculty. In this respect we differ only in trivial ways from the fifty or so other large universities in the United States, both public and private. There is no substantial qualitative difference between Columbia, Berkeley and Michigan for example. Each of us holds substantial private resources, and each of us is also critically dependent on major federal support to insure the quality of our scholarly activities. Berkeley and Michigan happen to go to their legislatures annually to meet the costs of faculty salaries and to maintain their physical plants. Columbia passes most of such costs through to its students in tuition charges. The difference does not seem to me to be crucial in defining the style of operation of the three universities. Each of us functions in essentially the same way and none of us could survive in anything remotely resembling our current configuration without a transfusion of resources received each year from the federal government. Columbia ranked 7th in the nation in the dollar amount of federal support in 1975, whereas Berkeley ranked 11th and Michigan 12th.

I have offered this somewhat unusual treatise on the elements of modern university financing as a preliminary argument in order to make clear the vulnerability of the nation's major universities to currents of change in federal policy. President Nixon was not misdirected in threatening to cut off federal grant support for MIT when he became furious with the policy advice given by MIT's president. Mr. Nixon was angry enough to want to destroy MIT, and in his own inimitable fashion he chose the surest and deadliest way of doing it. Fortunately no one else in the government took him seriously. His intemperate outburst illustrates more clearly than any reasoned argument how vulnerable large universities have become to federal economic attack. We are totally dependent upon the cooperative efforts of an enlightened citizenry and wise public officials for providing the necessities of political freedom and assured financing on which our stability rests. Nicholas Murray Butler could plan Columbia's activities in 1927 with evident disregard for the impact of federal support of his University. Butler's successor in 1977 is virtually obsessed by the problem. That has happened not just to Columbia but to every university in the United States during the last fifty years. It is, as I have said, a fundamental change and there will be no turning back.

Have we in fact traded away our political freedom for federal dollars? There are now insistent voices in the academic community claiming that this is really what has happened to us, but a more temperate analysis suggests that the partnership between the federal government and American education was not only inevitable but has proved to be immensely beneficial to most universities. No institution can afford to build and equip the major instructional facilities or to design and implement the advanced curricula demanded by the march of human knowledge without going heavily into debt. The cost of educating a medical student in the United States is now in excess of $20,000 annually.

Would it be better to pass on such costs to students in heavy tuition charges or should the government be asked to share the burden with us? It is claimed that we should not have first class science facilities and modern instructional programs in American universities or that we should not educate medical students because we cannot afford to do so without federal assistance? That is the dilemma. The angry voices in the academic community, claiming that we have sold out our academic freedom in pursuit of federal dollars, seem determined nevertheless to enjoy all the benefits of federally supported educational excellence. They want their chief administrators to increase federal economic assistance and at the same time to eliminate federal oversight of colleges and universities—no minor accomplishment!

Nothing draws American academics to the barricades more readily than threats of government interference with the internal affairs of a faculty, or attempts by public officials to limit what a faculty might think or teach so as to conform to political standards of orthodoxy. I have spent all my adult life in universities and have experienced a great deal, yet I continue to be amazed at the way in which even I can become stirred by struggles involving academic freedom.

For three years the University and I waged a bitter struggle with the Soviet Union in order to secure an exit visa for Vitaly Rubin, a Soviet professor of Chinese language and culture, permitting him to come to Columbia in order to take up an appointment as a visiting professor. The Soviet government refused on the ground that Rubin was the possessor of state secrets. We were outraged to see a fellow academic refused the privilege of a visiting appointment at Columbia because his government had subjected him to such a ridiculous political test. Then suddenly last June we were notified that Rubin was free. When he arrived at Columbia in September I wept openly to think that our public struggle had not only restored Vitaly Rubin's academic freedom but had given new hope to countless unknown professors elsewhere in the world laboring under the cold scrutiny of oppressive governments.

When I was a graduate student at Harvard, I experienced the chill engendered by Senator Joseph McCarthy's merciless public handling of a fellow graduate student whose crime happened to be that he believed in Marxism. It was frightening to see close at hand the damage to one individual's life caused by an irresponsible public official interested largely in personal publicity.

Years later when I became Chancellor of the University of California, San Diego I found myself jousting with the American Legion, the people of San Diego, the California legislature and even the Governor, as they all sought to force in aging Marxist philosopher, Herbert Marcuse, from his post on our faculty on the ground that his teaching posed a danger to the community. The memory of Senator McCarthy made me very difficult to deal with on that occasion.

At Columbia in 1971 I experienced the threats and insults of the Puerto Rican Independence Party as they sought to prevent Arturo Morales Carrion, then a visiting professor, from teaching his classes on Morningside Heights because they disagreed with his version of Puerto Rican history. Professor Morales Carrion taught his classes protected by security guards, but he taught them. He was recently elected President of the University of Puerto Rico. We now laugh about the incident because it is his responsibility to defend unpopular professors just as I once had to defend him.

These academic freedom battles were easy because the offenses were gross. The imperative need to resist incursions on the freedom of a teacher in his classroom was perfectly clear to everyone. The heavy boot of oppression was evident and no great qualities of mind were required to detect it. One needed only the courage to resist. And of course over the years we have managed to win most of these struggles. American public officials and crusading groups now rarely attempt to interfere directly in faculty appointments or in classroom and laboratory activities. They have found the American academy to be both explosive and persistent when our academic freedom is challenged. Hence, most of our current efforts are directed at recalcitrant officials in the Soviet Union, in South America, and the Middle East.

Our dealings with the federal regulatory establishment pose a much more subtle set of questions. We are struggling not with political zealots but with bureaucrats, ordinary government employees carrying out what they perceive to be the requirements of public policy. In order to understand whether or not this bureaucratic environment offers a genuine threat to the freedom of the academic community we need to look more closely at the nature of the regulatory process.

The topic of federal regulation is now almost a commonplace gripe among executives attempting to manage enterprises subject to federal regulatory control or dependent on federal resources. There is no doubt that such regulation has been accelerating with unusual rapidity during the last decade. During a recent session of the American Assembly at Columbia a St. Louis banker, Leonall C. Anderson, noted that the Federal Register, where agencies publish their regulations, had grown from 3,450 pages in 1937 to 35,591 pages in 1973, 45,422 pages in 1974 and 60,221 pages in 1975. Not long ago a business colleague pointed out to me that during the past year Congress enacted 402 laws, whereas in the same period 7,496 new federal regulations appeared. The sheer expansion of the regulatory framework attested to by these statistics is both astonishing and worrisome. What began at the turn of the century as a somewhat hesitant attempt to control public utilities and other monopolies, has become in our time a vast legal and bureaucratic apparatus for the public management of nearly all forms of commerce, universities included.

No experienced university president would think of criticizing a process that has liberated America's minorities, protected our consumers, and provided a standard of living for American workers unequalled elsewhere in the world. Clearly this socially oriented regulation of business has strengthened our society and buttressed it against revolutionary pressures inherent in the growth of industry. A well-established body of law implements the regulatory process. It has been studied and shaped by our law schools and political science departments over many years, but administrative law tends to be less well understood by faculty in other fields. Most of the rest of us tend to confine our interest in the law to the Constitution and the Bill of Rights. Clearly that is not a sensible way to deal with regulation. Constitutional doctrine is not entirely relevant to regulatory practice.

As I have suggested, federal regulation is hardly an unmixed blessing. Among other things it has sponsored a formidable bureaucracy in Washington and in countless other outreach offices. This bureaucracy supervises vast programs of salary and wage administration, personnel management, equal opportunity regulations, pension rights and retirement benefits, health and safety regulations, expenditure audits, rules on accounting, record-keeping, and reporting of commercial transactions. The list grows longer every day. Today any enterprise dependent on federal funds must, as a matter of course, organize itself to furnish a continuous flow of documentation to regulatory agencies in any of these areas. The paper flow is truly stupendous. I would estimate that Columbia University spends easily in excess of $1-million each year just in meeting its various federal reporting obligations.

We must also be prepared to submit to the quasi-judicial judgments of the regulators in disputes that are bound to arise from time to time in the conduct of our activities. During the past five years, for example, we have been in periodic difficulty with the Office of Civil Rights of the Department of Health, Education, and Welfare on the adequacy of Columbia's Affirmative Action Program. After much public trauma a major submission was made by the University in 1972 and eventually approved by HEW. Last June we received a notice from the agency disallowing our 1972 Affirmative Action Program and calling for improved data based on recent changes in regulations as well as new guidelines governing the submission of such plans. The letter of disallowance was accompanied by a long and carefully drawn document citing the deficiencies in our plan of 1972. This kind of problem no longer throws us into panic. We have tried to organize ourselves to achieve affirmative action compliance via the development of a modern personnel administration under the direction of an experienced Vice President for Personnel Management, but the effort has taken a great deal of money as well as a great deal of our attention, and it is still by no means complete.

Recently we were sued by a group of thirty of our employees, university maids, who charged that we had entered into an illegal labor contract with a union because the distinction between janitors and maids provided in the contract was a form of sex discrimination. On this ground we were charged with various offenses and violations of the Equal Pay Act. Actually, of course, we were not sued by the Columbia maids but by two very able young lawyers who sought to represent the maids against Columbia and thereby to project themselves into national prominence. I was particularly privileged in this case to be sued personally by two successive Secretaries of Labor who joined the maids in their action against the University. In such matters one cannot make basic mistakes although I suppose I can always show my grandchildren the legal papers in which Secretaries Brennan and Dunlop take dead aim at me.

Fortunately we won the case in court. We had originally sought to lay off the maids in order to reduce our building maintenance budget by $100,000. At the conclusion of the litigation we found that there had been no layoffs and the legal costs of our defense exceeded $50,000. The principal outcome of the suit was that our labor contract was modified to provide for "light cleaners" and "heavy cleaners" without distinction as to sex. I do not see it as a great intellectual or administrative advance but that seems to be the way in which the Department of Labor wants it, and our policy is to keep Columbia out of trouble. Evidently any administrative initiative that begins as an attempted expenditure reduction of $100,000 and ends with not only no savings but an added $50,000 in legal costs is hardly the way to administer a university in today's hazardous environment. I will not make that kind of mistake again!

Currently a large number of women employees, including many faculty, have filed a complaint with the Equal Employment Opportunity Commission charging the university with maintaining a discriminatory pension benefit plan. Women employees with the same salary history as male employees nevertheless receive smaller monthly retirement payments because their expected lifetime is greater according to insurance actuaries. The problem is that Columbia does not administer the retirement plan at all. We subscribe to the TIAA-CREF program

which has been offering retirement benefits to university employees all over the country for almost sixty years predicated on the principles now under challenge.

The action is directed against the university rather than TIAA–CREF because we could have elected to purchase added benefits at our own expense, assuring equal retirement payments to men and women. Our lawyers tell me the Department of Labor treats the TIAA–CREF retirement plan as acceptable whereas EEOC does not. The university is thus caught in the middle of a regulatory dispute between two federal agencies.

Finally, I will mention that two years ago, a letter of complaint written by a graduate student to a local congressman led to an in-depth investigation of Columbia's Chemistry Department by OSHA, the federal Occupational Safety and Health Administration. What happened was that a senior member of the Department of Chemistry contracted cancer and died. In cleaning out his laboratory, the Department discovered a low level of residual radiation from several bottles of radioactive salts left on the laboratory bench. This was reported routinely to the University's radiation safety officer. There was no problem and there never was any danger, but a physics graduate student who had been sponsoring political demonstrations against his Department claiming their involvement with the JASON group of the Department of Defense, found out about the incident and reported it to OSHA and also to his congressman. He warned of a radiation hazard in the Department of Chemistry at Columbia. The congressman did what he had to do in the circumstances—he passed the complaint off to OSHA. The next thing we knew we were being investigated. Of course, it all came to nothing, but for awhile we were very worried about and very busy with the formalities. In fact, the entire affair could have been settled by a phone call to a responsible administrator or the Chairman of the Chemistry Department but things seldom work out that way in areas subject to federal regulation.

These few incidents will suffice to show the character of the regulatory process as it is currently being experienced in colleges and universities. The list might have been amplified one hundredfold but I have spared you a full accounting of audit disputes, IRS investigations, Labor Relations Board rulings, and other common problems. Each of the matters I have cited suggests a special difficulty to which we might address ourselves constructively as we consider what might be done to diminish the adversary character of regulation of universities. The basic issue of academic freedom seems to me to be closely related to the adversary approach taken by the regulators.

University people accustomed to thinking in terms of constitutional protections find the Federal Register to be quite a revelation. It is, as I have said, a set of published standards describing in legal language the manner in which federal agencies will interpret and enforce the titles of legislation that require supervisory activities by the government.

Typically such legislation will state a requirement in the form: "No funds appropriated under this act may be disbursed to educational institutions which as a matter of policy do such and such"—for example, "which bar military recruiting on campus". The entire requirement may be set down in no more than ten lines of legislation, but the pertinent regulation will then often develop the federal agency's interpretation of the meaning and scope of the legislation in several thousand lines of detailed controls. The now well-known rules governing Title IX of the higher education amendments of 1972 are a good example.

One of the major features of the regulatory process is that regulations are typically cast in such a way as to place the burden of proof of good behavior on the defendant institution, reversing the ordinary requirements of legal procedure. This means in effect that every silly claim is investigated seriously and a great deal of time must be devoted by both agencies and universities to the handling of frivolous and trivial complaints. As a consequence the regulatory agencies find themselves buried beneath a paper mountain of ultimately worthless allegations. The incident at Columbia in which a graduate student's complaint about a radiation habard in the Department of Chemistry led to an OSHA investigation illustrates this difficulty nicely.

It is a situation which cries out for the concept of an administrative action threshold placing an important part of the burden of establishing the seriousness of a complaint on the complainant himself. Federal agencies should be prepared to exercise their power only in the most serious matters.

Presently there seems to be no effective review mechanism governing the correspondence between the regulatory language and the intentions of Congress in framing legislation. Thus for example, we have recently seen the ridiculous circumstance in which the President of the United States was forced to intervene personally to deter HEW from prohibiting father-son affairs in school districts on the ground that they constitute a form of sex discrimination barred by Title IX. Certainly this is not what Congress intended. There is little doubt that congressional review of regulations would avoid their misapplication to cases having little or no merit and there is no doubt at all that such congressional review can be carried out.

Congresswoman Edith Green wrote a provision in Title IX of the Higher Education Amendments of 1972 requiring that the text of the proposed regulations be specifically reviewed and approved by the Congress. It was an extremely good idea. We cannot guarantee that Congressional review would control the growing numbers of questionable regulations although I believe that to be a likely consequence if the review were carried out broadly. More important, in my judgment, is the fact that congressional review and supervision of regulations would assure correspondence between regulatory language and congressional intent. Thus we might put to rest one of the most frequently expressed complaints about the federal bureaucracy, namely, that it is a unique form of government by the non-elected.

One of the first tasks to which the new administration should address itself if it intends to limit the almost cancerous growth of regulatory initiatives by government, ought to be the maze of bureaucratic conflicts and overlapping jurisdictions that have developed around the important social legislation of the last two decades. The case of Columbia's women employees charging a discriminatory pension plan under guidelines provided by EEOC offers a good illustration of the problem. Columbia's administration relies on guidelines followed by the Department of Labor, and it is plain that the two federal agencies seem to be in basic disagreement on what constitutes sex discrimination in retirement benefits. A University cannot act in such circumstances without inviting attack from one aggrieved party or another. In this instance it is women faculty who filed the action, and EEOC is pursuing it. If we or TIAA–CREF were to move to unisex mortality tables in determining our pension benefits we would almost certainly invite suit by male faculty who could claim that they were being forced to pay for extra pension benefits for women. In this claim they would appear to be supported by the policy of the Department of Labor.

As we deal with the government on matters of affirmative action in employment and promotion, universities must work with the Office for Civil Rights of the Department of Health, Education, and Welfare and the Office of Federal Contract Compliance of the Department of Labor. These two agencies appear to coordinate quite will but when compliance disputes develop, their staffs have been known to give different brands of advice, forcing universities to follow two different tracks of conflict resolution among the federal departments.

And of course, it is well known to this audience that an employee charging race or sex discrimination in employment has almost unlimited recourse to advocacy of his claim by a veritable maze of city, state, and federal agencies. Few of these agencies recognize the jurisdiction of the others. I know of at least one case at Columbia in which a terminated member of our research staff took his case to all four jurisdictions (including EEOC) during the last five years. It pains me even to think of the money expended in unnecessary legal costs attributable to the necessity of responding to the same charges in multiple jurisdictions.

I have sought in these remarks to address myself to what I take to be the real problems, and not to stress the familiar litany of complaints asserted by university people in response to the federal requirement for submission of goals and time tables for increasing the utilization of the so-called protected categories in university affirmative action programs. Columbia University was one of the first to come under federal scrutiny in 1971 because of the inadequacy of its federal reporting on matters of affirmative action. We said then that we were willing and anxious to meet federal regulations on affirmative action. The fact is that we believe in equal opportunity and we acknowledge the ugly history of discrimination in the United States. Of all the institutions of society, universities should be prepared to exercise leadership in the national commitment to break down race and sex discrimination in employment. Our problem was the inadequacy of our data analysis. We sought promptly to correct those deficiencies. Accordingly, Columbia was one of the first universities to achieve a federally approved affirmative action plan in 1972. There has never been any attempt by the government to treat the goals and timetables we submitted as though they were contractual obligations. We have dealt with HEW in good faith and the agency has dealt with us in the same way. On the essentials of affirmative action we agree with the intent of the law and the regulations. We see such matters as issues of moral principle and we are committed to lead in breaking down all vestiges of discrimination in American life.

The major problems associated with affirmative action plans seem to me not to be in the area of academic freedom but in the rigidity of the regulations themselves. In 1972 several of us made urgent representations to the Secretary of HEW, that the use of principles identical to those applied earlier with business firms would wreak havoc among us. The regulations required that responsibility for employment policy be highly centralized in the personnel management function. Any university, as we all know, operates best on a loosely coupled collegial organization in which each academic unit is primarily responsible for supervising its own conduct. If the president of the university were to attempt to dictate enforcement of affirmative action in tenure actions by departments, it would be a certain prescription for campus warfare. Yet the regulations are written assuming such managerial control. We suggested to the Secretary of HEW that special guidelines should be developed after consultation with universities on the specifics of such problems. To the great credit of HEW this was done, but there was very little give and take between the universities and the HEW regulators in the development of the guidelines. Our goal of working closely

with federal agencies in the development of practical and enforceable guidelines could not be realized. Of course, the agencies are faced with continuous political pressures from representatives of the so-called protected groups. Regulators cannot appear to be in league with universities or subject to the charge that they have entered into cozy agreements which have the effect of perpetuating employment discrimination. This has always been the dilemma of regulatory bodies. The adversary polarities in society prevent regulatory agencies from working closely with the institutions they regulate. For instance, several of us have sought to point out the scientific inadequacies in the so-called utilization analyses in affirmative action plans. Members of protected categories currently employed are compared with expectations based upon random sampling from a pool or universe of qualified potential employees. Under-representation is treated as an inadequacy to be corrected by setting appropriate hiring goals. The problem with this argument is that it assigns spurious precision to the discrepancies which every student of probability theory knows to be subject to random fluctuations. There is a well-established body of knowledge for making valid estimates in the face of random fluctuation, but it does not appear in the mechanics of the regulations. They will therefore be viewed skeptically by knowledgeable university people, but any attempt to introduce probability theory at this point would no doubt lead to a political struggle on the ground that HEW was becoming soft on enforcement at universities. The regulators have their problems too.

We have urged HEW to develop a graded series of sanctions for dealing with noncompliance. At present affirmative action regulations are written at the maximum level of enforcement. You must comply or face a cutoff of federal funds. Clearly a university with a faulty personnel management system or inadequate data reporting should not be placed in the same jeopardy as a state which creates publicly supported private academies in order to avoid desegregation. Yet the regulations provide no flexibility for dealing with minor inadequacies or limited non-compliance. One entrenched and misguided department chairman can bring an entire university under federal threat. It would be more reasonable and perhaps also more just if federal regulators could direct their pressures pointedly at the malingerers.

Certainly it is the case that the regulatory code makes the power of federal agencies very great in relation to the recipients of federal funds. The only prudent course for institutions dependent upon federal funds is to attempt to comply with all applicable regulations and stay out of trouble with the government. This, however, implies a parallel obligation on the part of government to review and supervise its regulatory code in order to insure that it accords fully with the intentions of Congress.

Similarly the government must act to minimize the regulatory burden by eliminating jurisdictional and policy ambiguities among federal agencies in the enforcement of regulations.

Finally, the government, having established a public policy in the form of laws we are all obliged to accept, must make a determined non-adversary effort to work closely with regulated institutions in order to insure that the mechanisms of regulation are reasonable, just, and flexible.

A recipient of federal funds who feels himself mishandled by a regulatory agency can always take his complaint to court. But this involves months and sometimes years of litigation. Columbia's dispute with its maids illustrates this dilemma. It is cold comfort to discover at the end of a long court case that you have won your point at the expense of very heavy legal fees. Few people prefer to go broke in a just cause. Such disputes never should be brought to a negotiated peace in some alternative form of dispute settlement matched to the subtlety of the issues involved.

Last spring the Chief Justice of the United States appeared before a judicial conference in St. Paul honoring the 75th Anniversary of Roscoe Pound's famous 1906 address to the Bar Association on "The Causes of Popular Dissatisfaction with the Administration of Justice". He observed that the federal courts were heavily overburdened and much too taken up with procedural and jurisdictional disputes. He urged the removal from the adversary courtroom process of a variety of personal disputes: divorce, child custody, medical negligence, probate among others, in the hope of creating a more effective and a more responsible legal system.

It saddens me to observe that the United States has drifted into an unparalleled growth of adversary struggle. The emerging social order appears to be one in which policy at all levels is forged out of the struggle of narrowly based constituency groups at war with one another, each pressing for its own special interests. One aspect of this struggle is the remarkable recent growth of federal initiatives in regulation. I believe it to reflect an activist political philosophy that seeks desirable social goals by direct intervention into the operation of society's institutions, rather than by the patient application of social incentives. The impact has been stunning, and the protests over government by a bureaucratic elite rather than by elected representatives appear to be growing. Presidential candidates now campaign vigorously against the bureaucracy, but no President has been able to mold it to his policy or to limit its growth.

It is time to pay some attention to this problem. Federal regulation, if carried out fairly and responsibly and if aimed at genuine abuses, is a clear necessity in a free society. Twenty years of experience with America's civil rights problems has taught us that federal regulation is a necessary mechanism for the governance of a just society. But coercive regulation as an exercise of power by inexperienced young advocates of narrow constituency groups is very dangerous indeed and must be curbed.

Is federal regulation a threat to academic freedom? I would have to conclude that it is not in principle, and certainly not yet, but we appear to be moving in worrisome directions.

LETTER TO PRESIDENT CARTER

Mr. METZENBAUM. Mr. President, this morning I delivered to President Carter a letter supporting the President's commitment to a foreign policy based on the protection of human rights. The letter was cosigned by 58 liberal, moderate, and conservative Senators from both political parties. It is an unmistakable signal to all nations that the President's commitment is shared by all Americans and will continue to be the foundation of our foreign policy.

I ask unanimous consent that the text of the letter, and the names of the cosigners be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARCH 23, 1977.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: In the three months that you have been in office, you have expressed a strong commitment to the ideals of human rights and individual freedom. While this concern is not new for our Nation, its eloquent expression by your Administration serves as further evidence to foreign governments and to the American people that our Nation's concern for human rights is no less valid or strong today than it was 200 years ago.

We freely concede that we, too, like all nations, have unfinished business in human rights, but you have properly reminded the world that there can be no true understanding among nations unless formal pledges about human rights are implemented. Your statements imply no special status for America, but simply demonstrate a world-wide commitment to the belief that human rights must be clearly stated and energetically pursued.

American leadership in the field of human rights will be welcomed both by our own citizens and overwhelmingly by the peoples of the world. We support your efforts to tell the nations of the world that American foreign policy will continue to be dedicated to the cause of freedom.

Sincerely,

Alan Cranston, Frank Church, Hubert H. Humphrey, Henry Jackson, Howard M. Metzenbaum, Birch Bayh, Mark Hatfield, and Clifford P. Case.

Gaylord Nelson, Richard G. Lugar, Harrison A. Williams, Jr., Edward Zorinsky, Dennis DeConcini, Spark Matsunaga, Thomas McIntyre, John A. Durkin, John Culver, Daniel K. Inouye, Jacob K. Javits, James B. Allen, Lloyd Bentsen, Lee Metcalf, Edward S. Muskie, Edward M. Kennedy, Tom Eagleton, Gary Hart, Howard W. Cannon, Ernest F. Hollings, Warren G. Magnuson, Sam Nunn, Dick Clark, Orrin G. Hatch, and Charles H. Percy.

Richard Stone, Wendell R. Anderson, Strom Thurmond, D. P. Moynihan, Edward W. Brooke, Lowell P. Weicker, Jr., John Melcher, George McGovern, Adlai Stevenson, Paul Sarbanes, Abraham Ribicoff, S. I. Hayakawa, William Proxmire, John Sparkman, Robert C. Byrd, Patrick J. Leahy, Claiborne Pell, John Danforth, Robert Stafford, Jesse Helms, Walter D. Huddleston, John Glenn, Herman E. Talmadge, Jim Sasser, and John H. Chafee.

THE IMPORTANCE OF UNITED NATIONS PROGRAMS TO THE NATIONAL INTERESTS OF THE UNITED STATES

Mr. HUMPHREY. Mr. President, yesterday, Charles Maynes, Assistant Secretary-Designate for the Bureau of International Organization Affairs of the Department of State, testified in support of the administration's request to fund IO programs in fiscal year 1978. I want to call my colleagues' attention to both Mr. Maynes' prepared statement and the remarks I made in opening the hearings before my Foreign Assistance Subcommittee.

My concern, as I pointed out in my statement, is that the Congress spends little time studying U.N. programs in general. As a result, congressional perceptions of the United Nations represent only a surface examination of the U.N. system.

As I noted:

Very few people in this country, or the Congress, realize the important daily contributions the U.N. system makes to the well-being of millions of Americans.

Mr. Maynes' testimony was particularly effective in gaining a deeper insight into our voluntary contributions to U.N. and other multilateral assistance programs. As he pointed out:

To us these agencies are an essential element in our quest for global prosperity and the search for creative solutions to problems which are of concern to all of us. As the world's greatest industrial power we are direct beneficiaries of a prosperous and developing world economy. Thus, the activities of these agences have a direct bearing on the living standards of American workers and consumers. It is increasingly clear that our economic fortunes are interlocked with those of the developing countries where our investments are going and on whom we depend for resources and markets. The programs in-place, functioning and capable of acting, spur the global economy and address social and economic dislocations as well.

Of particular interest is the fact that the U.N. programs such as UNDP are nonpolitical in nature. The assistance is provided on the basis of nonpolitical jurisdiction and projects are implemented nonpolitically. No better example of this can be found than in the UNDP program in Israel, which was recently terminated at Israel's request.

As Mr. Maynes noted:

In a recent editorial commenting on the closing of the UNDP office in Israel after 26 years of operations, the Jerusalem Post comented, "In contrast with the political arm of the United Nations, the technical assistance administration has always shown impartiality. It is distinguished from the various bilateral (nation-to-nation) programs by its exclusive devotion to the interests of the recipient country." I might add that the Post praised the UNDP's quarter of a century of devoted service to Israel's development. Because of the impartiality of the service, multilateral assistance is also preferred by many developing countries in areas such as mineral exploration, exploitation, telecommunications and atomic energy.

The UNDP office in Israel closed because that country had reached a degree of development that they chose no longer to seek assistance from UNDP.

Particular attention was paid to the UNDP program in Mr. Maynes' testimony because it represents the largest U.N. development activity:

Through UNDP we foster institution of growth, a new self-reliance, transfer of essential technology and expertise. UNDP also funds vital pre-investment investigations, carried out cooperatively with the World Bank and other financial institutions. These provide the basis for sound investment in important capital projects—roads, dams, and irrigation schemes, universities and housing development. UNDP meets needs in countries and sectors that are not assisted by any other bilateral and multilateral program.

Once again, I think it is important to point out how the variety of development programs—both multilateral and bilateral—complement each other in addressing the total development needs of a recipient country.

Of particular interest to my colleagues should be the direct economic benefits the United States derives from participation in UNDP. Once again, quoting from Mr. Maynes' testimony:

For example, UNDP provides U.S. businesses and individuals with many contract opportunities. In 1975 thirty percent of all UNDP equipment contracts, valued at $20 million, were supplied by U.S. firms. Thirty-five percent of all UNDP consulting contracts with a value of $20 million were awarded to U.S. companies. Also, 13 percent of the 10,800 experts serving UNDP in 1975 were Americans. In fact, adding the salaries paid U.S. experts . . . and the expenditures UNDP made in the United States for headquarters expenses (salaries, rent, utilities, printing, etc.) to the sum of these contract awards, we find that in 1975 total cash outlays of UNDP in the United States were $125.6 million, substantially in excess of our contribution that year ($77.9 million). UNDP preinvestment studies have also been of substantial importance to the U.S. business community. By the end of 1975 an estimated $3 billion in follow-in bilateral investment in the developing countries had resulted from UNDP projects. Of this amount over $600 million was U.S. investment.

Mr. President, I think it is abundantly clear that the congressional perceptions of the United Nations system is shaped by a very limited scope of its activities—that on the political side which oftentimes is of marginal concern to us.

In pointing out just a few examples of how the American people benefit from the U.N. programs and activities, I made the following observations:

This is just a handful of examples of the positive contributions the United Nations makes to the security, health and economic well-being of the average American. The list is endless. This is the side of the story that never gets told. Yet, it probably represents ninety-nine percent of the U.N. activity which occurs in this world. The U.N. system has many problems, as I mentioned earlier in my remarks, and we should not ignore them. But these problems must be weighed against the positive side of the United Nations activities and placed in their proper perspective.

Mr. President, I ask unanimous consent that both statements be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

OPENING REMARKS BY SENATOR HUBERT H. HUMPHREY

We begin hearings today on the International Organizations and Programs section of the Foreign Assistance Act at a very propitious moment. I say propitious because our hearings follow closely on the heels of a major foreign policy address delivered by President Carter at the United Nations last week. In that speech, the President placed a significant emphasis on the United Nations as a vehicle for attacking a multitude of global political and human problems.

In according the United Nations a high priority in our foreign policy considerations, the President has ended an era of neglect of this institution on the part of U.S. policymakers. I commend him for what I consider to be a long overdue shift in our policy towards the U.N. system.

These hearings are also being held at a time when the United Nations is the object of considerable disenchantment and frustration within the Congress. Increasing concern has been expressed over the politicization of certain U.N. programs and agencies; concern has been expressed over the proliferation of U.N. organs; and concern has been expressed over allegations of waste, mismanagement, and over-paid employees. All too often the Congress has preoccupied itself, in recent years, with marginal issues such as whether or not U.S. contributions are being used for UNDP projects in Vietnam, Cuba, or Uganda. Yet, this is the side of the United Nations which captures the news headlines in this country. This is the side of the United Nations emphasized by many in the Congress to justify cutting back our contributions to various international programs or to curtail our participation in the U.N. system.

However, these perceptions represent only a surface examination of the U.N. system. At worst, they ignore that in many instances the political actions of the majority of nations at the U.N. are but manifestations of a decade-long frustration over U.S. neglect of, or insensitivity to, their legitimate economic needs and concerns.

Very few people in this country, or the Congress, realize the important daily contributions the U.N. system makes to the well-being of millions of Americans. For example, U.N. activities contribute to the good health of Americans. Preventive health care has always been a major concern of our public health authorities. To most Americans, this means a series of shots beginning in infancy. Prior to 1971 among the first shots infants received was a smallpox vaccination. Yet, today, thanks to new techniques and a worldwide campaign by the U.N.'s World Health Organization, smallpox has been almost completely wiped out. Routine smallpox vaccinations have not been given in the United States since 1971 as a result of these efforts of W.H.O. The savings to the United States in the production of vaccine and allied medical services is estimated to be over $150 million per year, or a little more than one-fourth of our total yearly contributions—assessed and voluntary—to the U.N. system.

Vaccines and needles supplied by the United Nations Children's Fund during the first twenty-five years have protected nearly 400 million children in the world against tuberculosis. Many millions more have been vaccinated against diphtheria, tetanus, typhoid, and other child-killing diseases.

National efforts alone are not enough to control pollution of air and water. Environmental problems must be attacked on a global basis. Through the U.N. Environment Program, a worldwide surveillance system, caled Earthwatch, is using a network of national and international programs to check on conditions and changes in our environment. Among the accomplishments of the Environment Program is a 16-nation agreement on long-term efforts to protect the Mediterranean.

Food shortages in other countries mean high food prices here at home. The U.N. is working on increasing the quantity and quality of food in the developing countries. The "Green Revolution" of the 1960s, with its high-yield miracle grains, was the result of a cooperative effort among several U.N. agencies, national governments and private foundations. Now, after 20 years of experimentation, scientists in these same institutions have developed a high-protein corn that can grow almost anywhere at any altitude. It is now being introduced to farmers around the world through agricultural training programs.

Much land in the world is unused because of pests. The desert locust has destroyed crops from North Africa to southwestern Asia since Biblical times. Swarms of up to a billion insects had been known to black out entire cities. In 1958 alone, the locusts ate 167,000 tons of grain—more than enough to feed a million people for a year. In 1960, several U.N. agencies joined with the 42 nations in the locust area in a massive attempt to wipe out the species. After nine years of operations, not a single swarm has been reported in many areas of the world. Should one reappear, an international network is ready to predict it three weeks in advance, in time to mobilize the equipment and manpower needed to destroy it.

We need over a million new jobs every years, just to maintain stable employment levels in the United States. This means finding new markets for our goods and services.

U.N. economic assistance in developing countries is creating a potential two billion new customers for American products. In the past 15 years alone, our exports to these countries have increased by more than 80 percent. Even before the developing countries themselves become paying customers, U.S. firms supply about one-third of the equipment used by the U.N. in preliminary development projects.

With just six percent of the world's population, Americans consume nearly 40 percent of the world's natural resources. We are rapidly using up our own resources and importing larger amounts each year. New mineral deposits must be found to meet our future needs. Most of these untapped resources are to be found in the developing countries. United Nations Development Program surveys have already helped to locate mineral deposits worth over $20 billion. More explorations are currently underway.

The U.N. has helped settle disputes in almost 50 countries during its first 31 years—through the Security Council, the General Assembly, and the behind-the-scenes efforts of the Secretary-General. Today, blue-helmeted U.N. soldiers are trying to keep the lid on in Cyprus and the Middle East. Both these cases involve highly charged issues that arose long before the founding of the U.N. But the U.N. was still able to provide the only mutually acceptable peacekeeping mechanism for all parties concerned. It has been the indispensable safety valve for all concerned.

And, finally, it was because of the United Nations that the transition from colonial rule in independence for more than one billion of the world's population in Africa and Asia was achieved in relative peace.

This is just a handful of examples of the positive contributions the United Nations makes to the security, health and economic well-being of the average American. The list is endless. This is the side of the story that never gets told. Yet, it probably represents ninety-nine percent of the U.N. activity which occurs in this world. The U.N. system has many problems, as I mentioned earlier in my remarks, and we should not ignore them. But these problems must be weighed against the positive side of the United Nations activities and placed in their proper perspective.

It is within this framework that I welcome Mr. Charles William Maynes, Assistant Secretary-Designate for International Organization Affairs, and Mr. James Leonard, Deputy Ambassador-Designate to the United Nations to these hearings. I hope we can utilize this opportunity to expand upon a story which needs to be told if we are to approach our consideration of requests for these programs with intelligence and rationality. Mr. Maynes, you may begin.

STATEMENT OF CHARLES WILLIAM MAYNES

Mr. Chairman: I welcome the opportunity to be with you and the committee today to discuss the President's request for $256 million in support of the UN and OAS development, humanitarian and other programs. U.S. support for these programs, which have the confidence of both the developing and developed world, is an important aspect in the ongoing North/South dialogue. Their activities respond to the real and pressing needs of the world about us and through them we are able to deal with the problems of the poorest, and most disadvantaged and most vulnerable elements of the global society.

The U.S. played a leading role in the establishment of virtually all of these programs, which were created to deal cooperatively with some of the world's most pressing problems: food, population, energy and natural resources, environmental protection, and education. The UN and OAS developmental and humanitarian activities have been perceived to meet our foreign policy objectives over the years and we remain strongly committed to them. While these programs can be viewed in their narrow development context they can also be seen in a broader light. To us these agencies are an essential element in our quest for global prosperity and the search for creative solutions to problems which are of concern to all of us. As the world's greatest industrial power we are direct beneficiaries of a prosperous and developing world economy. Thus the activities of these agencies have a direct bearing on the living standard of American workers and consumers. It is increasingly clear that our economic fortunes are interlocked with those of the developing countries where our investments are going and on whom we depend for resources and markets. These programs in-place, functioning and capable of acting, spur the global economy and address social and economic dislocations as well.

One of the special attractions of these multilateral agencies is the fact that assistance is provided to nations on the basis of non-political justification and projects are implemented non-politically. Thus they can be carried on on technological and economic terms, and not subject to the vagaries of bilateral relations between countries. Because of this factor sensitive developing countries often prefer development assistance on a multilateral basis. In a recent editorial commenting on the closing of the UNDP office in Israel after 26 years of operations, the Jerusalem Post commented "In contrast with the political arms of the United Nations, the technical assistance administration has always shown impartiality. It is distinguished from the various bilateral (nation-to-nation) programs by its exclusive devotion to the interests of the recipient country". I might add that the Post praised the UNDP's quarter of a century of devoted service to Israel's development. Because of the impartiality of the service, multilateral assistance is also preferred by many developing countries in areas such as mineral exploration and exploitation, telecommunications and atomic energy.

The UNDP office in Israel closed because that country had reached a degree of development that they chose no longer to seek assistance from UNDP. In our view a number of the more advanced countries should "graduate" from the program as has Israel. And Spain, Kuwait and Qatar have also chosen not to receive further UNDP grant aid. The U.S. will continue to press for other countries to follow suit.

At the center of UN assistance activity is the all important UN Development Program, funding the field program of the Specialized Agencies. Through UNDP we foster institution of growth, a new self-reliance, transfer of essential technology and expertise. UNDP also funds vital pre-investment investigations, carried out cooperatively with the World Bank and other financial institutions. These provide the basis for sound investment in important capital projects—roads, dams, and irrigation schemes, universities and housing development. UNDP meets needs in countries and sectors that are not assisted by any other bilateral or multilateral program.

Because of its central role in the UN development system our contribution to UNDP has been viewed as a major signal of U.S. interest in and commitment to the development efforts of the international community. There are, however, other benefits to UNDP beyond the symbolic. It helps us to influence the nature of the development process and to guide developing countries in the direction of responsible and compatible economic policies which serve our national interests.

Of key importance is the fact that there has been a marked shift in the UNDP program and it is now aimed in very large measure at the poorest of the poor. During 1977–81 almost 55 percent of its funds will go to countries below the $200 GNP level and 80 percent below $600.

UNDP is helping to support projects of technical co-operation in over 140 countries and territories of Asia, Africa, Latin America, the Middle East, the Metiterranean and parts of Europe. Moreover, through its network of over 100 country offices, UNDP is playing a significant role in coordinating the strategic development planning and the field development work of the UN system as a whole and in integrating both with national development efforts and other forms of external assistance.

Services provided by UNDP aim at laying the groundwork for:

The increased production and processing of food, timber, and other agricultural commodities;

The expansion and modernization of industry, power generation, transport and communications;

The improvement of basic essential facilities for education, health care, housing, employment, and administrative and social services;

The growth of more equitable trade, and other advances toward the goal of establishing a more cooperative international economic system;

Progress in integrated rural development, comprehensive urban renewal, integration of women in development and other pioneering fields.

Mr. Chairman, as we all know Mr. Morse inherited a Program undergoing severe liquidity difficulties which required temporary program retrenchment. I am happy to report that during the past year he has instituted strong and effective measures to tighten UNDP headquarters management control, reduce administrative costs and restore financial integrity. Among some of those management improvements have been:

Top heaviness in the Secretariat has been reduced. Plans were completed for 1977 decreases in professional staff of 17 percent at headquarters and 13 percent in the field. Since January 1976 there has already been a reduction of 40 posts at senior level.

UNDP's 1976 administrative budget was cut by $2 million and the proposed 1977 budget by $4 million.

Concerted efforts were launched for the collection of pledges with the result that an impressive 89% of 1976 pledges were paid in the year and unpaid pledges for prior years were reduced from $41.6 million at the end of 1975 to $21.9 million at the end of 1976.

An improved financial management information system was installed and financial planning overhauled.

The $40 million deficit facing UNDP for the end of 1976 was eliminated, in part through $23.1 million in new pledges.

The UNDP Governing Council made a strong decision at its January meeting which it is hoped will lead to greater utilization of the program's accumulation of non-convertible currency holdings.

The evaluation office of UNDP has been expanded under the leadership of an American from AID, and greater emphasis is being given to this activity.

Brad Morse has met recently with OPEC Finance Ministers in Vienna who have agreed in principle on increased cooperation between the OPEC Special Fund and UNDP. Negotiations have begun with the OPEC Special Fund which may lead to a decision on significant contributions to UNDP resources at the Fund's next Board of Governor's meeting in May or June.

As a result of these developments, in our opinion UNDP has the ability and capacity to increase its programming significantly above current levels in line with the objectives of its Second Development Cycle (1977–81). While U.S. legislative procedures would

not permit us to formally endorse the multi-year program target of $3.46 billion for the Second Development Cycle which was agreed to by consensus by the Governing Council, a forthright and positive participation by the United States must include an attempt to meet these goals. The proposed increase in our contribution, which President Carter endorsed during his General Assembly speech March 17, is a major step in that direction.

While significantly higher than the previous year, our proposed 1978 contribution to UNDP of $130 million would represent about 22% of expected contributions in that year from all governments. In 1971 the President's Commission for the Observance of the Twenty-fifth Anniversary of the United Nations (the Lodge Commission) recommended that U.S. contributions to UNDP at a minimum reach a level of $200 million by 1975.

The direct economic benefits in the U.S. from participation in UNDP are many. For example, UNDP provides U.S. businesses and individuals with many contract opportunities. In 1975 thirty percent of all UNDP equipment contracts, valued at $20 million were supplied by U.S. firms. Thirty-five percent of all UNDP consulting contracts with a value of $20 million were awarded to U.S. companies. Also, 13% of the 10,800 experts serving UNDP in 1975 were Americans. In fact, adding the salaries paid U.S. experts (13% of the 10,800 experts serving UNDP in 1975 were Americans) and the expenditures UNDP made in the United States for headquarters expenses (salaries, rent, utilities, printing, etc.) to the sum of these contract awards, we find that in 1975 the total cash outlays of UNDP in the United States were $125.6 million, substantially in excess of our contribution for that year ($77.9 million). UNDP pre-investment studies have also been of substantial importance to the U.S. business community. By the end of 1975 an estimated $3 billion in follow-on bilateral investment in the developing world had resulted from UNDP projects. Of this amount over $600 million was U.S. investment.

The second largest item in the administration's request for International Organizations and Programs is a proposed $52 million voluntary contribution to the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) for 1978. This would constitute approximately 35% of total government contributions projected for that year, our traditional share which we feel strongly must be maintained at this time.

We have long attached great importance to UNRWA's program for the Palestinian refugees. We believe UNRWA is a significant positive element in the long term effort to achieve a permanent Middle East settlement. UNRWA has recently been able to broaden its base of support. In response to a special appeal in 1976, more than 20 countries contributed in excess of $28 million (including $12 million by U.S.) over and above the regular contributions for that year. This included $11.5 million from Arab countries, for a total of $14.8 million from them in 1976. In addition, Egypt, Syria, Jordan and Israel provided approximately $60 million in direct assistance to Palestine refugees in 1976.

We are genuinely concerned about UNRWA's financial outlook the implications of a reduction in U.S. funding below our traditional share.

I would like to point out, Mr. Chairman, that the majority of Palestinian refugees receiving UNRWA services reside in Israeli-occupied territories and in Jordan, while significant numbers are in Lebanon and Syria. A substantial reduction or termination of UNRWA services caused by under-funding could place an added burden on those countries which already provide substantial supportive services and assistance complementing UNRWA's direct relief.

The next item in our request is $20 million for UNICEF, the UN Children's Fund. Established thirty years ago, UNICEF has become one of the UN's most effective organizations, helping children and their mothers in over 100 countries and territories, and also calling world attention to their plight. UNICEF is helping children so that their current problems of health, nutrition, and education do not become problems of the future. UNICEF aims at the poorest people in the poorest countries. These children have been among the hardest hit by the world economic crisis.

Although the United States has until this year been UNICEF's largest single supporter, I am happy to report that many other countries have given generously, and almost all have given something to UNICEF. In 1976 there were 133 countries of every political persuasion which contributed to UNICEF. Nonetheless, a great deal more needs to be done to help countries help the lot of their own children, and tens of millions of dollars worth of projects around the globe await only sufficient funds to start them.

We are requesting $10 million in support of the programs of the International Atomic Energy Agency and the development and strengthening of the Agency's nonproliferation international safeguards responsibilities.

Of this total amount, $4.4 million will be used as contributions, either in cash or in-kind, in support of the Agency's technical assistance and training program for the developing countries.

The remaining $5.6 million is directly related to the determination of the past and present U.S. administrations to intensify the development of international safeguards in order to enhance the effectiveness of the IAEA's safeguards system and improve measures for physical security of nuclear materials.

In the face of growing worldwide concern over rising costs and depletion of readily available fossil fuel to meet increasing energy requirements, the role of nuclear power in meeting this need is expected to grow. While the IAEA safeguards system, which is the central safeguarding body under the Nonproliferation Treaty, has adequately kept pace with the development of peaceful uses of atomic energy up to this point, it has now become apparent that greatly accelerated efforts on our part, in cooperation with other nuclear advanced countries, are required.

The additional funds requested in FY-78, therefore, will enable us to continue the expanded program of international safeguards development which we hope to augment with the additional $3 million we have requested for 1977.

We are requesting $10 million for the United Nations Environment Program. This Program was launched on the wave of deepening awareness of global environmental problems within the United States, but which quickly swept the world, and remains in full force today. The Environment Fund itself was directly the product of a U.S. Presidential initiative, which received broad bipartisan support in the Congress. The $10 million request, which is the same level as 1977, will complete the initial U.S. pledge to contribute up to $40 million to a $100 million goal for the first five-year period of the program, 1973–1977, subject to other countries contributing $60 million. Pledges total approximately $109 million, and contributions received suggest that the $60 million goal will be fully met by the end of this year.

A provision for the United States to make a contribution of $10 million to the Endowment Fund of the United Nations University is one of the new items contained in the President's request.

This new institution, which was created to develop intercommunications networks among advanced research and training institutes engaged in applied research projects, is a practical response to the need for greater collaboration in research on problems of global significance.

This is an initiative in which one of our allies, Japan, has taken the lead and has already provided generous support. As nine other countries have pledged or contributed to the UN University, we believe a contribution at this time is urgently required if other potential major donor nations are to provide their support with significant contributions.

We have been favorably impressed with the University's first year of activities and the leadership of a distinguished American educator, Dr. James M. Hester, the former President of New York University, who was appointed Rector of the UN University in 1975.

Mr. Chairman, the ten-fold increase (to $500,000) in funding requested for the United Nations Educational and Training Program for Southern Africa is directly related to the pressing needs of Namibians and Zimbabweans for training in administrative and technical matters in order to provide needed skills when majority rule is attained in these territories. UNETPSA has a pressing need for substantial increased funding in order to address this problem. At present, most of its money is being taken up by renewals with little left for new training and educational awards. In view of the rapidly evolving situation in Southern Africa, it is urgent that UNETPSA be able to increase substantially the number of assistance awards it can grant.

Included in the Administration's request is an item for $17.5 million for development programs carried out by the Organization of American States (OAS).

With the gradual reduction in the funding available for the bilateral development programs, the resources made available through the OAS assume greater importance. Furthermore, the OAS programs are viewed by the Latin American countries as reflecting their priorities and complement those carried out by the UN as well as other development agencies.

A significant percentage of the training and technical assistance available to Latin America comes through OAS funded programs which are related to many of the key sectors; e.g., economic and social (public finance, employment services, wages and social security, tourism and export promotion), and several areas of education, science and technology.

The importance of these programs, for example, may be seen in the fact that annually at least three thousand Latin Americans participate in formal studies, seminars, and other training programs carried out under OAS auspices. OAS programs are also viewed as having opened up new ground, particularly in science and technology, which indicate the high priorities the member states place on these sectors. Given Latin American development requirements during the next decade, reflecting in part its still rapidly growing population, the need for OAS collaboration is viewed as being of great value.

As a major donor the U.S. has continuously sought to make OAS programs more efficient and effective. The External Audit Committee now in tis second year of operation, was established to assure that comprehensive audit reviews would be carried out. The U.S. is represented by a senior GAO official who is also President of the committee. An Advisory Committee on Administrative and Budgetary Matters has been established to provide expert analyses and recommendations directly to the governing bodies of the OAS. Made up of five members, one of whom is an experienced U.S. expert, the committee makes recommendations for later review and approval by the Permanent Council, and re-

views the programming budget procedures. Other areas of concern include the OAS personnel structure and practices, financial management procedures, as well as other administrative areas.

The present OAS Secretary General assumed office in July 1975, and has devoted his energies to restructuring and modernizing operations. Given the priority placed on development, he puts great emphasis on maximizing delivery of direct technical services to the member states.

U.S. support of the OAS activities in this area was emphasized by the Secretary of State during the meeting of the General Assembly in June 1976. At that time he indicated continued U.S. commitment to the OAS and advanced ideas regarding areas, particularly in science and technology, where the organization should provide leadership.

Mr. Chairman, the request also includes $2,000,000 for the UN Revolving Fund for Natural Resources Exploration (a decrease of $500,000 from the 1977 level), $2 million for WMO's Voluntary Assistance Program, $1.5 million for the World Food Program and $500,000 for the UN Institute for Training and Research (UNITAR). The latter amount reflects a slight increase over the 1977 appropriation of $400,000.

This concludes my prepared statement, Mr. Chairman. I will be glad to answer any questions or provide additional data for the Committee.

THE HEALTH OF BLACK AMERICANS

Mr. GLENN. Mr. President, the March 1977 issue of Ebony magazine contains a very informative article by Dr. Therman E. Evans concerning the health of black Americans. Dr. Evans carefully documents a very disturbing pattern showing that in many areas blacks suffer far higher incidences of illness and disability than the population as a whole. This health gap is one of the tragic vestiges of racial discrimination that must be eradicated from our society.

This is not just a Federal problem. While it is national in scope, the excellent questions Dr. Evans raises must be answered at all levels of government, by our health care system, Federal, State, and local.

Furthermore, Dr. Evans very properly points out that the problem must be attacked on three levels: Individual responsibility for one's own health, the health professional becoming increasingly aware of this inequity, and the system better reflecting these needs.

Dr. Evans offers several positive suggestions for beginning to solve this problem. I recommend this article to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Ebony magazine, March 1977]

ON THE HEALTH OF BLACK AMERICANS

(By Therman E. Evans, M.D.)*

In reviewing the latest available comprehensive document on the health of Americans, "Health United States 1975," it is clear that the current health of black Americans continues to lag far behind that of their white counterpart. In fact, in some categories there is strong evidence of actual mistreatment of blacks by the medical care system.

The health picture for black Americans is not a good one. And it all begins where, in my opinion, the poverty cycle begins, during pregnancy. Essential to a safe and healthy pregnancy and a healthy baby, is prenatal care. Yet prenatal care is received in the first three months of pregnancy by only 52 percent of pregnant black women as compared with 75 percent of pregnant white women. This situation contributes to the fact that black mothers die during childbirth (maternal mortality) three to four times as commonly as white mothers, and black babies die during their first year of life (infant mortality) twice as commonly as white babies. Maternal and infant mortality are higher when the mother is economically poor or poorly educated, when the birth is out of wedlock, or when the mother is under 20 or over 35 years old. Proper prenatal care with adequate nutrition—especially protein nutrition—will result in a reduced incidence of complications of pregnancy, premature deliveries, low birthweight babies, mental retardation and future generations of poverty cycled people.

Next we are concerned about the lasting damaging effects of inadequate care received during pregnancy and infancy. Dr. James P. Comer and Dr. Alvin F. Poussaint, in their book, *Black Child Care*, clearly describe these effects. They say, "A child's life chances are to an extent determined before his birth. The health of the mother while she is pregnant affects the well-being of the child. Black women have often carried their babies without the benefit of a balanced diet and adequate medical care. Children born of malnourished women are often weak and sickly, running a high risk of mental retardation and delayed physical development. The care received by the mother and infant at birth also affects a child's development. Black women have consistently lacked adequate access to doctors and medical facilities at the time of delivery. Prenatal complications and physical birth injuries have resulted in brain-damaged and otherwise handicapped children."

In addition to the above, the immunization of one- to four-year-old black children against such diseases as polio, diphtheria, typhoid, whooping cough and measles continues to lag far behind that of their white counterpart. In all instances, the number of black children in this age group protected against these communicable diseases ranges from slightly under to slightly over one-half, compared with the number of protected white children ranging from at least two-thirds to three-fourths.

Other communicable diseases that continue to be reported at a much greater frequency in blacks than whites are hepatitis, gonorrhea and syphilis The devastating effects of these diseases have been chronicled many times in the literature.

Along with the continued prevalence of these very serious illnesses, there is significant evidence of mistreatment of blacks by the medical care system (i.e., doing them more harm than good).

For persons under 17 years, more whites (10 in 1,000) than blacks (8 in 1,000) have vision impairments. In the age group 17 to 44, the gap widens. Even more whites (33 in 1,000) than blacks (27 in 1,000) have vision impairments. However, in the next age group, 45 to 64, this trend is totally reversed as we find, surprisingly, that blacks have an overwhelmingly higher incidence of vision impairments (100 in 1,000) than whites (60 in 1,000). Perhaps during this time period their vision needed correcting but the expense made it prohibitive. Or perhaps (and more likely) the vision correction received at the hands of both "qualified" and unqualified people was incorrect. To illustrate further, a recent study done by the National Center for Health Statistics pointed out that more black youths (77 percent) than white youths (69 percent) have 20/20 vision without glasses. However, when tested after they had been given glasses, a consistently larger proportion of white than black youths had superior vision. Why?

For persons 17 to 44 years old, many more whites (51 in 1,000) than blacks (33 in 1,000) suffer some impairment of the back or spine. In the next age group, 45 to 64, the picture is completely the opposite, with many more blacks (81 in 1,000) than whites (67 in 1,000) suffering from some impairment of the back or spine. I can surmise that this reversal results from a combination of the many years of hard, menial labor type of work for survival in which blacks predominate, and the economic and educational inability to deal with relevant medical and health problems. Otherwise my question would be, "Why?"

In addition to the above, blacks have twice the incidence of iron deficiency anemia; a higher incidence of arthritis, a very serious disabling disease; nearly twice the incidence of diabetes; a significantly greater incidence of heart conditions (heart disease is the number one medical killer of all people in this country); two to three times the incidence of high blood pressure, and a strikingly higher incidence of cancer (the number two medical killer).

These illnesses and diseases result in longer average hospital stays for blacks (11.3 days) than for whites (9.2 days). In addition, they have caused limitation of mobility (i.e., confined to house, need help in getting around or has trouble in getting around) in approximately 5 percent of the black work force between ages 18 to 64 compared with 2.7 percent of the white work force. Further, almost one tenth (9.3 percent) of the black work force have been completely work disabled compared with about one twentieth (4.9 percent) of the white work force.

All of this and more is a part of the health picture for Black Americans. In 200 years, the health of blacks relative to whites has gone virtually unchanged. The gap that was, is.

How do we change this picture? It must be attacked at three levels: the individual (or consumer), the health professional, and the system.

At the individual or consumer level, each of us must begin to accept more responsibility for our own health. For example, we cannot continue to disregard what we eat as if our diet has no effect on our health status. In fact, what we eat is both directly and indirectly related to every major illness we know of, including heart disease, high blood pressure, cancer, diabetes and infectious diseases. We must, individually, take care of our bodies not only by putting nutritious food items on the inside but also by exercising it from the outside and by demanding to know what is being done to us by any medical personnel who touches us or writes us a prescription.

Our health professionals must assume the necessary roles in delivering health information to our people who need it. Black professionals in the various health disciplines have a responsibility and an obligation to be excellent, and to take the lead in the struggle to improve the health status of poor black people. Finally, they must head up the ongoing political struggle to secure more resources from the federal health establishment, and inform, motivate and recruit more black youth into the health professions.

SOME VIEWS ON FEDERAL GRAIN INSPECTION

Mr. HUMPHREY. Mr. President, the Congress recently enacted legislation to provide for an improved system of weighing and inspection of grain exported from the United States. This legislation was in response to abuses in grain inspection and weighing which were carefully examined in an extensive series of committee hearings.

This examination was undertaken by the Foreign Agricultural Policy Subcommittee, which I chair, and the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices. The General Accounting Office, the FBI, and the Justice Department also were involved in the study of this important matter.

I believe that the legislation which was formulated as a result of this process will be an important contribution in strengthening the grading, inspection, and weighing system to assure the highest standards of quality for our farm exports.

Yet, the complexity of these areas has led to certain deficiencies in the present system which have only come to light as the new system of grain inspection becomes operational. The Committee on Agriculture, Nutrition, and Forestry is well aware of these deficiencies and has already reported corrective legislation.

Furthermore, we will continue to monitor the implementation of this new system to make sure that it is responsive to the objective of maintaining high quality and accurate quantities of grain exports. But we also will seek to make sure that it is fair to exporters, importers, producers, and others involved in the production and marketing of grain for export.

In our effort to explore all views related to the issue of grain inspection, I would like to share two statements which were made on this subject at the midwinter board meeting of the U.S. Feedgrains Council. The first is by Mr. Myron R. Laserson, senior vice president, North American Grain Division, Continental Grain Co. Mr. Laserson provides an interesting view of the problem from the perspective of a major grain exporter.

The second statement is by Mr. Norman Weckerly, a farmer and chairman of the North Dakota State Wheat Commission. Mr. Weckerly expresses concern that the competitive implications for U.S. agricultural exports should be taken into account as changes are considered in the Grain Standards Act.

Mr. President, I ask unanimous consent that these statements be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

THE FGIS ACT—A GRAIN EXPORTER'S VIEW

(By Myron R. Laserson)

I have always admired the balanced planning which governs U.S. Feed Grains Council meeting programs.

In sponsoring this forum for the broad exchange of information, the Council is encouraging the open opinions of a representative cross-section of our industry, and this is all to the good. I would hope that the citing of facts and the expression of all the expert opinion in this room may influence our Congress as it is now at work on amendments to FGIS.

Believe me, I have some opinions to voice today. I hope sincerely that any knowledge which comes out of this presentation spreads beyond this room . . . into the working conference rooms of the Senate and the House in Washington. At the same time, I want to offer our comments to the control center of FGIS, so that the administrators of this program may better understand the implications of their regulations on America's grain producers and marketers.

For a long time now, we in grain export—as we as some other grain industry sectors—have been made to appear as villains in a spectacular portrayal of headlines and accusations that have been heard not only in our own country but around the world. I am delighted at this opportunity to present what I consider to be a more objective picture.

You all know of our earlier problems with weights and grades. It may interest you to know that despite all the publicity given to the subject I am aware of only one personal benefit. Back home, especially during the summer, we sometimes have lobster over the week-end. Lobster, as everything else, has gone up substantially in price, and I have a large family. The supplier of the lobster, in an effort to make things tidy. . . puts the lobsters in a large pet food bag—before weighing. Having learned something about the science of weights I now am able to persuade him to deduct the weight of an empty bag before I pay.

As exporters we recognize that some industry elements needed cleaning up. The dramatic growth in export volume over the past several years no doubt contributed to a few loose ends. Management's attention was concentrated on handling the new and unprecedented volume and thus was diverted from the tight controls and procedures routine to our business.

Following various investigations and legal actions, we took a good hard look at the problem areas. As one major consequence, exporters embarked voluntarily on costly, full-scale compliance or affirmative action programs which met with government approval. These compliance programs, in many ways more stringent than the regulations of FGIS and covering every major aspect of elevator function and management, have become basic policies and procedures.

Maybe we needed this government assistance. Maybe we needed only more gentle prodding. In any event, we concede that these compliance programs are useful.

However, these corrective actions undertaken by the trade seem of small importance to our critics. We live with the schoolboy doctrine that "repetition builds retention", as we hear again and again of the alleged misdeeds of the grain exporters. When is enough. . . enough?

But let's remember: he who would separate the true from the false must have a good idea of what is true and what is false.

Now, what about all these claims by foreign buyers concerning quality and weight?

Well, the facts are these:

Item: As brought out by the General Accounting Office in a report last year:

Many complaints stemmed from grain price fluctuations, as foreign buyers sought relief from earlier perhaps higher priced commitments.

Condition of the 1974 U.S. corn crop undoubtedly was the cause of many quality problems.

Of 582 formal complaints filed with USDA over a 10-year period through June 30, 1975, all but 17 dealt with quality. And GAO says the "total amount of grain in question would have been small in relation to total grain exports during the period."

In the same study, 7 of 9 agricultural attaches contacted said they did not believe importers were having significant problems with U.S. grain.

Item: About a year ago Congressman Edward Madigan of Illinois, concerned by allegations against U.S. grain exports and indirectly against American farmers, set out on a fact-finding mission to Europe.

He found in his talks with officials of the European Common Market that complaints about the quality of U.S. grain had been overstated, coming mostly from speculators who paid too much for the grain in the first place.

In London, officials of the Port of London Authority told him that complaints about U.S. grain quality have dropped steadily over the past few years.

Madigan went to the Nertherlands and visited with Komite, a grain and feed trade association. He was advised Komite had received no complaints about quality of grain from the United States. Further, it was their opinion that breakage occurred during loading, off-loading and/or transshipping.

He reported a number of instances where methods of grain handling at destination could materially affect quality.

Finally he asked . . . at every stop . . . for suggestions as to how grain quality could be improved. He said he received not one constructive comment.

Item: This observation from a group of grain importers from Belgium and the Netherlands who toured the United States a few months back:

To a man, they were surprised that the United States seems so intent on finding fault with its grain inspection system. In fact, customers abroad seem to be more satisfied with the quality of the grain they received from the U.S. than are the U.S. critics of the system.

"The unbelievable amount of publicity the United States gives to irregularities in its system is damaging the country's interests abroad", they said.

They acknowledged an "occasional" problem with grain from any origin, but by far the majority of shipments arrive in good condition and correspond to what the buyer ordered.

In this group's view, the United States has been found to be a very dependable supplier with regard to both grain quality and consistency in marketing.

Item: I have been in the export business myself for almost 25 years. During this time I have had occasion to talk about quality with buyers from all over the world. What I have learned during this time is that whenever there is allegitimate complaint about our quality, and it is extremely rare, the buyer is so surprised he feels compelled to tell us we made a mistake. Those buyers would not accept our terms if we made many mistakes.

You know and I know that there is considerable information available on what happens to grain . . . for instance, corn . . . during export shipment.

What about the good work by Messrs. Sellam and Christensen at the University of Minnesota?

Their study published by the Minnesota Agricultural Experiment Station found that corn which is well within the limits for moisture and other characteristics for U.S. Grade No. 2 can—after loading into barge or ship—undergo moderate to severe spoilage within a month or six weeks.

I wonder if information of this type, based on work going back to 1954, isn't available to complaining buyers?

Or what about the research done by Lowell Hill and his associates at the University of Illinois? We know about his study of a corn shipment from Toledo to Rotterdam which showed increase in BCFM between origin

and destination of 8.3 percentage points. But do foreign buyers know about this? My guess is they do.

For anyone to imply that the grain exporter is out to exploit the buyer-seller relationship is to question some very sound business motives. The reputation of the grain exporter is bound up in continued business and future sales.

I don't have to tell *this* audience, certainly, of our contribution to American agriculture and to the countrys' economy as a whole. The Midsouth Soybean and Grain Shippers Association in Blytheville, Arkansas puts it this way: "A system that exported as much grain out of the U.S. as it did last year and years before can't be all that bad."

Farm exports are a 22-billion-dollar plus business today.

We are doing our part!

It may seem that I have spent an inordinate amount of time on grades and FGIS is concerned with weights as well as grades. Let me repeat from the GAO study: of 582 formal complaints filed with USDA over a 10-year period through June 30, 1975 all but 17 dealt with quality. All but 17 . . . over 10 years.

Let us look also at how this weight business works:

Item: Most buyers in Western Europe elect to pay a nominal cost to insure outturn weights. In those situations the weight at the export elevator is not used for commercial settlement.

Item: The largest buyer of U.S. grain—Japan—elects not to pay for guaranteed outturn weights. I have been assured that the Japanese keep meticulous records and have clearly decided they do not need the insurance. I do not consider them naive.

Item: In many instances, particularly with trainloads of hopper cars shipped from interior points, the commercial settlement weight is the interior weight. Think about it: the export elevator weight is of no commercial significance.

Item: In many other instances the export elevators receive a large percentage of grain from their own inland points. The system is called stock transfer . . . the reality is that the export elevator is receiving grain already settled for in quantity and price as well as quality someplace else.

Why mention all of these items? Because now we have the new Federal Grain Inspection Service.

My friends, we are facing a threat today not unlike that of this country's first colonists who complained in the Declaration of Independence of a king who had erected a multitude of new offices, and sent hither swarms of officers to harass our people. We do not declare ourselves independent of the law but we ask that the law be reviewed fairly and objectively.

We want our industry to prosper with integrity and vitality. Just as we must avoid practices that are wrong we must also avoid regulations that stifle.

The economic impact of the new FGIS established under the 1976 Act is not to be taken lightly. It becomes a significant added burden to export business which must be borne by the users of the service. The exporters, in turn, cannot merely absorb this as an additional non-productive incremental cost of operations. It will find its way back to the producer in most cases.

If we assume that this incremental cost is about ½ cent per bushel at the export point, as has been frequently quoted, we might tend to consider this an almost imperceptible added burden in the total pricing structure of export tonnage; but in absolute dollars, this is far from true.

The calendar year 1976 nearly equalled the 1973 record year with 3.56 billion bushels of grain and oilseeds exported from the United States, of which 2.76 billion bushels or 77½ % left our shores from those port areas which are being federalized. Only 22½ % or 800 million bushels were shipped from those 10 states which are still delegated to officially inspect and certify export grain.

The 2.76 billion bushels, at an added ½¢ bushel cost for Federal inspection and weighing supervision, will require an additional $13.8 million annual outlay. The federal supervisory costs for the 10 states still doing business will be another $1.25 million based on the announced fees totaling $1.50 per 1,000 bushels.

In our opinion, however, the ½¢ per bushel is a very conservative estimate. The true story is slowly unfolding as the take-overs are implemented on an area-by-area basis. In our own experience we are finding that weighing supervision alone is going to impose between 5 to 8 persons per eight-hour shift, depending upon the configuration of a specific elevator.

We have already established that this weighing supervision is in many instances a clear redundancy and the requirements should be modified realistically.

By the government's own calculation, the FGIS total manpower needs will grow to an ultimate 2,800 people in 1978 versus a staff of 450 persons in 1976. This 2350 headcount growth, at approximately $30,000 per year per person (2080 hours x $14,00/Hr.) will amount to a minimum of $70 million dollars—all of which will be borne by the trade!

Other costs emanating from the mandatory FGIS export inspection law include capital expenditures to provide enlarged inspection laboratory space, revisions to sampling device systems, surveillance equipment, revisions to grain flow patterns with security devices, upgrading of scales with quick testing appurtenances, etc. We estimate that this could require a $15–20 million expenditure on a nation-wide basis. Our company alone is budgeting nearly $1.5 million in the next year for such capital projects—all at the government's request.

Even more alarming are the indirect and incalculable added costs of "slow-down" of export operations. When large numbers of new federal people, to whom absolute power is given to halt an activity either with cause or on a mere uncertainty in their minds, choose to exercise this power, the consequences are financially catastrophic and non-recoverable. This would encompass such items as ship, barge and rail demurrage, idle elevator labor, penalties for B/L default, longshoring labor, etc.

U.S. grain exports compete successfully in world markets not only because we are blessed with a temperate climate producing an abundance, but because we are geared to efficiently move over 100 million tons of these commodities through a network of complex handling processes from farms to the ports and onto ships at greater speeds and minimum costs. Productivity has indeed been phenomenal and will never be equalled elsewhere in the world. This must not be diminished!

We wonder, then, how long we can endure the growing burdens being imposed on the free U.S. grain trade when other nations, with subsidies, are becoming larger suppliers to the world's markets. FGIS is not the only significant new financial factor, but it must be added to costs of other non-productive regulations.

Since 1887, when the Interstate Commerce Commission was established, Congress has set up 82 regulatory agencies, 14 alone in the last eight years. Total employment is over 64,000 and in 1976, their budgets totalled nearly $3 billion. In 1975 alone, this government within government published some 45,000 pages of rules, regulations, standards and notices in the Federal Register. True, unfortunately, all true!

This heavy burden for an efficient marketing system by a regulatory agency is the only one of which I know where those being regulated are nearly the sole support of the program.

And now FGIS. Can we carry the load?

Are we to believe that the FGIS entry into the export picture will make everything right?

We have our doubts.

Recently, a representative of the North American Grain Export Association attended a series of grain inspection seminars conducted by FGIS in Europe—including the very active grain markets in Copenhagen, Frankfurt, Rotterdam, Antwerp and London.

The stated purpose of the seminars was to explain the new grain standards act and the proposed FGIS organization, as well as export sampling and certification procedures. At the same time, the audiences heard about new wheat standards and proposed changes in corn and soybean standards.

We learned that the audience at each location was generally uninformed on the complexities of our shiploading and grading procedures for export. It did not help that the FGIS representatives lacked commercial and practical knowledge, and it was fortunate that the export association representative was there to expand or correct statements relating to blending, shiploading and certification.

There was general confusion on the subject of complaints, foreign monitoring, meal quality, federal appeal, and the proposed corn and soybean standards which may never be implemented anyway.

Specifically, questions relating to certificate by hatch, mixing in vessel, buying without official grade, certificate final, divided original certificate and domestic vs. export pricing left no doubt that there is room for education and an information effort on the part of the grain exporters. We cannot rely on FGIS representatives to do this job for us. At this point we would be content if they worked with the exporters in a positive way so as to end turmoil and doubts in the minds of our buyers.

As it now stands, we face the nightmarish prospect of our unique free market system being regulated to a near-halt as costs and distrust mount and our world prestige suffers. We can reverse this prospect if we can convince Congress about what is happening to us. Let's regulate what needs to be regulated but let's avoid duplication. Let the government monitor our controls but not crowd us out of business. Let us restore mutual respect. I call upon all of you to join in a massive effort.

We've been down before, but if you don't see me as defeated today, it's simply because I don't believe we're down for the count. In any event, we have to try.

We as exporters are constantly striving to improve. You as producers, country elevator managers, transportation specialists, are doing the same. The history of investment in and the growing complexity of our businesses attests to this.

But while we improve, let us be sure of our objectives. And of course, let us be certain we can retain the sense of pride, the efficiencies, and the reality of past accomplishments as guideposts to greater progress in the years to come.

PRESENTED BY NORMAN WECKERLY

Mr. Chairman, panel members and distinguished guests; I am honored to have been asked to participate in this discussion and I would like to express greetings from the North Dakota wheat producers and grain handlers from our area.

I feel a little bit like a duck out of water with all you corn-feed grain people, but I guess that a lot of our grading problems are all the same—we're all in the same boat.

When I was asked to discuss the impact on internal/producer pricing and compli-

ance, I think I have to add producer attitudes to this also because concerned producers and country elevator operators and directors in North Dakota and other states are expressing uncertainty regarding *what* impact the new Federal grain inspection system will have on grain movement and pricing. I think out there in the country many of you probably know we really don't know what is coming, with the changes that are being proposed, we're in that next tier and, believe me, Myron, we don't think we're out of the woods just because the Senate Ag Committee may have this funded out of an appropriation.

Of the many things that are being considered, it's not only the cost of inspection fees that we're looking at but, of course, also the closer internal scrutiny of grading and, probably what would hit home closest to us would be the record keeping costs, if these are put through. There have been many direct cost projections expressed and some of them up as high as 2½ cents and more per bushel, but I'm not going to spend any time on costs because I don't believe that any of us really know what the costs will be.

If I may, I would like to go back a couple of years for a quick look at what one might consider a more normal trade situation, if in fact, there ever was such a state of affairs as a normal trade situation. At that time producers and elevator operators felt that our system consisting of private trade, state and Federal grading was doing a very acceptable job. I recognize and other producers recognize that we then entered into a period of trying times for the trade and grain producers. The U.S. production, transportation, handling and certainly, the grain grading capabilities were overtaxed during this period of unusually heavy grain movement. I think that considering that the U.S. picked up the bulk of increased world grain trade during this period, we, as producers, realized some of the inherent strengths of our free enterprise system. Ours was a system that could adapt and meet the challenge of this.

Producers and local elevators in our areas have always experienced and will continue to experience some grain grading problems—spring wheat, protein variance, barley protein variance and durum graded on color—these are extremely hard to grade. They contain a lot of human elements. Many times I've shipped a lot of durum which graded 80% hard & vitreous and a month later I shipped out of the same bin and got 70% hard & vitreous. I think that probably between Grand Forks and Duluth is one of the worst points mentioned by the GAO as being an area of great changes; but I guess the trade there has taken this in stride and producers also.

However, our producers also felt that there were some serious abuses of our grading and weighing system which existed at some points, primarily the Gulf as we saw it there. It is certainly too bad that these abuses took place because we now are seeing the results of government overreaction to try to solve a problem caused by the failings of our own private industry.

Obviously, some well-thought-out changes were necessary, especially regarding the penalties imposed on individuals or companies involved in such irregularities. Such breaches of faith have done a great deal of harm to the U.S. export grain effort. Hopefully, this harm is not irreparable because, we, as producers, need this sales avenue if we hope to receive a reasonable return for our efforts.

As these irregularities were made public, many producers also called for complete government takeover. However, the North Dakota Wheat Commission and the U.S. Durum Growers Association presented testimony before the Senate Agricultural Committee on March 16, 1977, which called for reasonable reforms, recognizing that extending Federal supervision to all points would be too costly, too disruptive and would not materially improve the system. The testimony further stated that such regulations would tend to be overreactive and would bring about cumbersome bottlenecks throughout the marketing chain. This, it was felt, would eventually throw an unfavorable reflection on the American farmers' efforts to compete aggressively in the world grain market. We feel that all efforts to correct and strengthen the Grain Standards Act should be designed primarily for one purpose—the preservation of the integrity of the American export certificate and the American export system.

It seems that there are those who believe that government can be or is infallible. Some believe that government can perform services better and be free of corruption and problems. During the past week I have noted USDA press releases which express the minimal cost of the new Federal grain inspection system. I agree that the actual cost of inspection and supervision may be minimal, but I don't believe we can forecast the costs of a slowdown of the grain marketing system or the record keeping and duplication of costs. Actual labor costs are very low in my business and I am sure in many of yours, but slowdowns and downtime of our tremendous plant investment is a tremendous cost.

Farmers can see the effects of overregulation by looking at other industries and the inefficiency overregulation has brought to these businesses. The U.S. railroad transportation system is a prime example. We also witnessed the results of the new Federal meat grading standards which brought meat processing costs to such prohibitive levels that half of our local, small town meat businesses had to close. We, as producers, didn't believe that this could happen, that before a farmer could take a critter to get butchered at his local plant, he'd have to have a Federal grader look at it. I realize that this legislation doesn't propose that, but I think that these are things that can happen when you carry this a little farther.

I think we must all remember that there are no "free lunches." I believe that any cost that is added to our marketing system will ultimately be paid for by the consumer. The end result is a lower standard of living for our consumers.

It is obvious that the initial effect of such added costs will also mean *lower* prices to producers if commodities are in an adequate supply situation. Another detrimental effect will be that U.S. producers will be put at a competitive disadvantage in the export market because of higher marketing costs.

Up to now I have dealt with the primary impact of the new regulations. I would like to make a few other observations pertaining to our industry—producing and marketing commodities. I believe that we have the best system in the world. However, I think we must continue to make improvements without being forced to by the government. As a producer and country elevator operator, I do feel that we need much more communication between a private trade and farmers for the production side of agriculture. For all too long there has been too much secretism from the trade, too much producer apathy and too much ignoring the people on the consumer side of our business. I may be naive; however, I believe our business as grain traders and handlers is to serve these consumers, to be the most efficient system to get commodities from the producer to the consumer. These problems we are facing today are the product of our failures. Now we must not only work together to try to moderate the government action taken but also work on the basic cause of these government overreactions.

THE F–15 EAGLE

Mr. BARTLETT. Mr. President, the decision by Defense Secretary Harold Brown to cut this year's procurement of F–15 Eagle advance air superiority fighters from the original 108 programed to only 78 is another example of the false economies which are being made by the new administration in the name of streamlining the defense budget. The Carter administration has decided to cut the production rate for F–15 fighters down to 6½ per month, well below the present rate of 9 per month. This arbitrary delay in the F–15 Eagle procurement program not only deprives many American combat aircrews of the world's finest air superiority fighter, but it increases the program unit cost to the tune of over $1 million per aircraft.

With a top speed of Mach 2.5, the F–15 Eagle is our fastest, highest flying fighter. Still, advanced technology has made the Eagle far more maneuverable than the old F–4 that it replaces. In fact, the F–15 is nearly as maneuverable as the much smaller F–16. And the Eagle, unlike the F–16, is an all weather fighter capable of tracking and attacking enemy aircraft which are trying to avoid radar detection by flying close to the Earth. Also, the F–15 can climb rapidly to high altitudes in order to engage the Soviet Union's Mig–24 FOXBAT which can fly unopposed high above present air defenses. In 1975, the F–15 set eight climb to altitude records. While its Sparrow missile permits the F–15 to intercept aircraft at long ranges, its Sidewinder missile and 20 mm. cannon permit the F–15 to exploit its superb agility in close air-to-air dogfighting. Although primarily an air superiority fighter, the F–15 has been tested in the ground attack role and can carry more ordnance and has greater range than does the F–16 lightweight fighter. Its long range virtually eliminates the need for tanker support during global deployments. Furthermore, its advanced electronic countermeasures permit the Eagle to operate effectively in the intense air defense environment found on the modern battlefield.

The McDonnell Douglas F–15 Eagle was born in 1965 when the U.S. Air Force decided to develop an air superiority fighter free from the mistakes and errors forced into the ill-starred TFX program, and in this they have succeeded magnificently. After 7 years of careful development, the first F–15A flew in 1972, the first F–15A was delivered to the Air Force in November 1974, and the first F–15 Wing was operational in 1976. Israel has already received four of the 25 F–15 Eagles it purchased to prevent Mig-25's from flying over her sovereign territory, and after extensive operational testing and competition, the Japanese air force found the F–15 best suited to its needs—better than the F–14, F–16, or F–18. Already the sound engineering has paid off in an outstanding safety record. This properly paced program has resulted in the need for few changes to the basic design and has left room for growth and improvement in the F–15 system.

One longtime critic of the Defense Department who had opposed the development of advanced air superiority fight-

ers like the F–14 and F–15, and who still opposed the F–14, recently told the Senate Armed Services Committee that—

The F–15 has demonstrated that it is a significant improvement in terms of air superiority so that the program could continue; yes, I think also consideration ought to be given as to whether or not some version of the F–15 might be adaptable for carrier service.

This is high praise indeed from Mr. Paul C. Warnke, our chief SALT negotiator, who also maintains that the F–15 is a "cost effective weapon."

More important than meeting the objections of a longtime critic is the ability of the Eagle to meet the current needs of our Air Force. In our report on NATO, submitted to the Senate Armed Services Committee, Senator SAM NUNN, Democrat of Georgia, and I pointed out that the Warsaw Pact superiority in numbers was being coupled with major improvements in the quality of Soviet aircraft. The introduction into Eastern Europe of advanced offensive aircraft like the Mig–23, the SU–19, and the Backfire bomber, along with the excellent Mig–21 and the Mig–25, gives the Soviet Union a long-range, low-altitude penetration capability along with the capacity to deny NATO air superiority in the crucial early days of battle when Western ground forces would be dependent upon close air support. The F–15 Eagle is our best countermeasure to both of these Soviet threats and an effective Air Force is our best insurance against an intense "blitzkrieg" attack launched with little warning. Just last week, Lt. Gen. Alton Slay, Air Force Deputy Chief of Staff for Research and Development told the Senate Armed Services Committee that the F–15 is the best fighter in the world today and the only aircraft able to meet the increased threat from Soviet all-weather fighters. I had already heard such praise from military commanders in Europe.

President Carter pledged to cut $5 to $7 billion in fat from the defense budget. Instead, he has simply delayed the delivery of additional muscle to our armed services. It makes no sense to deprive our Air Force of the best fighter plane possible, the F–15 Eagle, at a time when the Warsaw Pact has conventional superiority in Europe and when the Soviet Union has the advantage of momentum in deployment of conventional weapons.

Mr. President, I yield the floor.

UNANIMOUS-CONSENT AGREEMENT SETTING DATE AND TIME FOR VOTE ON SENATE RESOLUTION 110

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent—and I have discussed this with the distinguished Republican leader and various Senators on my side of the aisle—that the final vote on the adoption of Senate Resolution 110, resolution to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate, occur at 11:15 a.m. on Friday next, provided, that at 9:45 a.m. on Friday, Mr. BAKER be recognized to call up an amendment, on which there be a 1-hour limitation; provided further that in the event there is an amendment to Mr. BAKER's amendment, such amendment may be called up during that hour, but not prior to the expiration of the first 30 minutes; provided further that the time during the hour for debate be equally divided between the majority and minority leaders or their designees; provided further that at the expiration of the hour, the vote occur on the amendment by Mr. BAKER if no amendment is offered thereto and if no tabling motion is offered in relation thereto; provided further that, in the event an amendment is offered to the amendment by Mr. BAKER and the yeas and nays are ordered thereon, the vote on such amendment to Mr. BAKER's amendment occur at 10:45 a.m., with the vote on Mr. BAKER's amendment—in the event there is either a tabling motion or an amendment thereto—to occur immediately following the disposition of the amendment thereto or the tabling motion thereto.

So that, in any event, a vote on the Baker amendment, as amended, as amended, if amended, if not tabled, would occur not later than 11 a.m., with the further understanding that, immediately upon the disposition of the Baker amendment, if not tabled prior thereto, as amended, if amended, the vote occur, which is already set for 11:15 a.m.

Mr. BAKER. Mr. President, reserving the right to object, I ask the majority leader if we could clarify the beginning part of the time allocation. It is my understanding that the Senator from Tennessee would have not less than half of the hour allocated for debate on this amendment or any amendment to the amendment. As I understand the majority leader, he suggested that any amendment would not be offered until 30 minutes had first expired.

The point the Senator from Tennessee wants to make is that he wants to make sure that he has 5 or 10 minutes at the end of the period for debate. I have no objection to the form it was put in by the majority leader; but I want to make sure that nothing in the agreement prevents me from reserving a part of my 30 minutes to conclude the debate on the amendment.

Mr. ROBERT C. BYRD. The Senator wishes to conclude the argument on the amendment.

Mr. BAKER. I want to be able to reserve a part of my half of the hour in order to conclude the debate. I may, in fact, not be able to conclude the debate. I may not be the last speaker, but I should like to reserve a few minutes in order to speak, for instance, after someone might offer an amendment.

I simply want to make sure that nothing in this formulation would prevent me from reserving, say, 5 minutes as an example, and using that 5 minutes after the expiration of the first 30 minutes.

Mr. ROBERT C. BYRD. In the event another amendment is offered.

Mr. BAKER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, I shall assure the Senator he will have that 5 minutes if I have to yield him 5 minutes out of my time.

Mr. BAKER. I thank the distinguished majority leader.

Mr. ALLEN. Reserving the right to object—and I shall not object—the final vote is set for Friday at 11:15 a.m.

Mr. ROBERT C. BYRD. Yes, sir.

Mr. ALLEN. In the unlikely event that all amendments have been disposed of and no Senator wishes to argue the resolution, would the distinguished majority leader, prior to that time, set this matter aside until Friday at 11:15 and take up something else in the interim?

Mr. ROBERT C. BYRD. Yes, I was going to get to that. All that we are trying to do at this time is to have an agreement that would deal with Friday morning between 9:45 and 11:15.

Mr. ALLEN. I see. I thank the Senator.

Mr. ROBERT C. BYRD. The distinguished Senator recalls something to mind.

Mr. President, I ask further unanimous consent that, upon the disposition of the amendment that is offered by Mr. BAKER, whether it be tabled or whether it be an up and down vote, there be no intervening amendment, motion, or debate between that moment and the hour of 11:15, when the final vote occurs.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Under the formulation just stated, is it clear that this unanimous-consent request would obtain with respect to time, notwithstanding the 50-hour limitation on the resolution?

The PRESIDING OFFICER. That is the Chair's understanding. The Senator is correct.

Without objection, it is so ordered.

The text of the unanimous consent agreement is as follows:

Ordered further, That on Friday, April 1, 1977, at the hour of 9:45 a.m., the Senator from Tennessee (Mr. BAKER) be recognized to call up an amendment upon which there shall be 1 hour debate, to be equally divided and controlled by the Majority and Minority Leaders, or their designees, and that if an amendment thereto is offered, it can only be offered after the first 30 minutes of that hour has elapsed, and that at the end of the 1 hour on the Baker amendment, the vote occur on any amendment offered to the Baker amendment, if any has been offered, or on a tabling motion, if one is offered, with such vote to occur at 10:45 a.m.: *Provided further*, That in any event, the vote on the Baker amendment occur no later than 11:00 a.m., unless tabled, and that following such vote, no intervening amendment, motion, or debate be in order, with a vote on adoption of S. Res. 110 to occur at 11:15 a.m.

ORDER FOR RECESS FROM MONDAY, MARCH 28, 1977, UNTIL 4 P.M. ON TUESDAY, MARCH 29, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday—I anticipate that that would be around 7 p.m.—it stand in recess until 4 p.m. on Tuesday.

The PRESIDING OFFICER Without objection, it is so ordered.

AUTHORIZATION FOR MAJORITY LEADER TO CALL UP H.R. 4877 AT ANY TIME ON WEDNESDAY OR THURSDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the majority leader be authorized to call up the supplemental appropriation bill, H.R. 4877, at any time on Wednesday or Thursday, whichever seems to meet with the desire of the chairman of the Committee on Appropriations, Mr. McCLELLAN, and the ranking member Mr. YOUNG.

Mr. BAKER. Mr. President, reserving the right to object—and, once again, I shall not object—the 3-day rule respecting the availability of reports by that time will have been complied with, and the authority sought by the majority leader at this time is simply that it be in order for him to call up this measure, either Wednesday or Thursday.

Mr. ROBERT C. BYRD. Yes, depending upon which day, if either, the chairman of the committee—I think I should give him the last word in this—desires that it be called up. He works very closely with Mr. YOUNG. I am sure they will be working together.

Mr. BAKER. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS ON MONDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I cannot guarantee that there will be no votes on Monday prior to 3:30 p.m., but with the cooperation of the distinguished minority leader and the managers of the resolution, it is my hope that we could work together and possibly arrange on Monday, if any rollcall votes are ordered prior to the hour of 3:30 p.m.—and undoubtedly there will be—that such votes occur at 3:30 p.m., or thereafter.

Mr. BAKER. Mr. President, if the majority leader will yield, I would be most agreeable to trying to accomplish that schedule. I know that some Members on both sides of the aisle on Monday have travel difficulties on occasion. I think that this would be an accommodation to them, in all likelihood; and I shall be glad to help the majority leader in an effort to arrange the schedule that way.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

There are several amendments on which very short time limitations have already been agreed to. It might be possible for Senators, if they wish to do so, who intend to call up those particular amendments, to call them up and have debate thereon. Then—if unanimous consent can be gotten—we can set the votes back to back beginning at 3:30 p.m. But we shall have to wait until Monday to see what the circumstances allow.

In any event, I guess that is about it for today.

Mr. President, I suggest the absence of a quorum and ask that the time be charged equally against both sides on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I would ask the distinguished majority leader if he has any plans to try to arrange a sequence of amendments for the schedule on Monday next?

Mr. ROBERT C. BYRD. I would rather have some little degree of flexibility on Monday, not knowing which Senators may be here early or who would be prepared to call up amendments.

I think it would be helpful if the distinguished minority leader would indicate, however, the names of those Senators who will be prepared on his side of the aisle to call up amendments; and if he could do it in sequence, that would be fine. We would have the understanding, however, that that is not necessarily the order, because no order has been entered into in that regard. There may be a Senator or so on this side of the aisle who would also want to call up amendments. But it would be appreciated, because it would be helpful to the disposition of the resolution on both sides of the aisle, if the minority leader could do that.

Mr. BAKER. I thank the majority leader.

I understand the requirement for flexibility. I might say that I have inquired on this side to see who might be available on Monday and what sequence they would prefer. I understand, of course, we are not now establishing a schedule on Monday, but this is the sequence and these are the names of the Members on this side who are agreeable to offering their amendments on Monday: Mr. HELMS, who has six amendments; Mr. WALLOP, three; Mr. CURTIS, two; Mr. JAVITS, three; Mr. PERCY, six; Mr. HANSEN, one; and Mr. DOLE, five.

Mr. ROBERT C. BYRD. If I may suggest to the distinguished minority leader, if Mr. HELMS is ready to go with his, I think we ought to get an order now that he would be recognized to call his amendments up.

Mr. BAKER. Mr. President, it is agreeable to Mr. HELMS that we would probably try to make his the first series of amendments on Monday.

Mr. ROBERT C. BYRD. Yes.

Mr. President, do we have any orders for the recognition of Senators?

Mr. BAKER. We do not.

ORDER FOR MR. HELMS TO OFFER AMENDMENTS

Mr. ROBERT C. BYRD. I ask unanimous consent that on Monday, after the two leaders or their designees have been recognized under the standing order, Mr. HELMS be recognized to call up his first amendment and that he may have the privilege of calling up his six amendments in sequence, if he so desires, on Monday.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Reserving the right to object, and I will not object, once again it is the Senator from Tennessee's understanding that there is already an order further limiting the time on these six amendments.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR MR. CRANSTON TO OFFER AMENDMENTS

Mr. CRANSTON. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. CRANSTON. I have two amendments that I believe will both be accepted. Could there be an order entered for me to bring up those two amendments under a strict time limit, following the Helms amendment?

Mr. ROBERT C. BYRD. That would be agreeable to me, if it would to the minority leader.

Mr. BAKER. Surely.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the Helms amendments, Mr. CRANSTON be recognized to call up two amendments on which there be a time limitation of 15 minutes, equally divided, on each.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask the majority leader, is it his intention, as he has done in the past generally, to try to interlace majority and minority amendments, or series of amendments, as we proceed during the day?

Mr. ROBERT C. BYRD. Yes. That would be the case. But may I say to the distinguished minority leader, we are soon going to run out of amendments on our side.

I recognize that the distinguished minority leader has many Senators and many amendments on his side of the aisle. But I only know of four or five amendments on the majority side.

Mr. BAKER. I thank the majority leader.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess, subject to the call of the Chair, with the time not to be charged against either side.

There being no objection, at 3:48 p.m. the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 3:55 p.m., when called to order by the Presiding Officer (Mr. HART).

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 11 a.m. on Monday. After the two leaders or their designees have been recognized under the standing order, the Senate will resume consideration of Senate Resolution 110, the Code of Conduct for Members, officers, and employees of the Senate.

At that time, Mr. HELMS will be recognized to call up a series of amendments. It is my understanding he has as many as six amendments on which time limits have already been agreed to.

It will be the intent and desire of the joint leadership to postpone any rollcall votes, if possible, until 3:30 in the afternoon. We cannot guarantee that, but we will make every effort to do that, consistent with the will of our colleagues.

Upon the disposition of the amendments by Mr. HELMS, Mr. CRANSTON has two amendments on which there is a time limitation of 15 minutes each; and upon the disposition of the Cranston amendments there are several other amendments which will be taken up during the afternoon. It is anticipated that the Senate will remain in session until about 7 p.m., and that votes will occur until that hour.

ORDER OF BUSINESS ON TUESDAY, MARCH 29, 1977

Mr. ROBERT C. BYRD. On Tuesday, the Senate will not come in until 4 p.m., the reason being that the leadership hopes to give committees a full day for the conduct of hearings and markups on bills, and so forth, without interruptions by rollcalls or quorum calls from the floor.

It is hoped that at least some committees will meet as early as 8 a.m. on Tuesday. It is my understanding that some of the committees are overlapping in their meetings, which causes Members in many instances to find it impossible to attend all committee meetings in which they are interested.

So, I would voice the hope that some committees could meet as early as 8 a.m., which they are allowed to do when the Senate is not in session, and they could, perhaps, so coordinate their work among themselves—certainly in some instances this might be done, some committees could meet at 8, some at 10, some at 12, and some at 2 o'clock on Tuesday, so as to facilitate as much committee work as possible, without conflicting meetings, on Tuesday before the Senate comes in at 4 p.m.

Mr. BAKER. Mr. President, I misunderstood the majority leader. I thought he said he hoped the committees could meet as late as 8 o'clock, and I was preparing to ask how that could be done under the rules. I understand the Senator is speaking of 8 o'clock in the morning.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Which, I am sure, will come as much of a surprise to some of our colleagues as it did to the minority leader.

Mr. ROBERT C. BYRD. Under the Stevenson resolution, as the minority leader will remember, provision was made for committees to meet from 8 o'clock to 10, 10 o'clock to 12, and in no event after 2 p.m. if the Senate is in session—without consent. So, I had in mind the Stevenson resolution in suggesting that some committees might, if possible, meet as early as 8 a.m.

I think we find many committees meeting at 10 o'clock. I have heard some of my colleagues express concern because, while they are on good committees, in many instances their committees are all meeting at the same hour of 10 o'clock.

I am merely voicing hope on the record that some committees may start meeting at 8 a.m. so as to allow Members to attend different committees to which they are assigned, which otherwise would result in overlapping meetings.

On Tuesday afternoon, the Senate, at 4 p.m., will continue its consideration of the code of conduct resolution with rollcall votes occurring. The Senate will not stay in beyond circa 7 p.m. I think that is about as far as I had better venture into next week.

It is understood that the supplemental appropriations bill may be called up on Wednesday or Thursday, and of course the order has already been entered for the final vote on the code of conduct resolution, which will occur at 11:15 a.m. on Friday next. Other measures cleared for action may also be called up during the week. The unemployment benefits extension bill may come up inasmuch as there is a March 31 deadline involved.

Mr. BAKER. Mr. President, I especially express my agreement with the majority leader in the matter of the late starting hour on Tuesday and the suggestion that it will give committees some flexibility in scheduling so that we minimize the overlap. Overlapping commitee responsibilities is a matter of great concern to a large number of Senators. I think that the majority leader has suggested a good procedure, and I would hope that we might pick a day a week when we give special emphasis to virtually a full day of committee activity and then encourage the committees to try to coordinate those meetings so that they do not overlap, or at least so that they minimize the overlap.

Mr. President, during much of the day today, the Senator from Tennessee and the distinguished majority leader have tried to negotiate a time to have a final vote on the ethics resolution, and it has been with great difficulty that we have arrived at this agreement to have the final vote at this time. A great number of Senators have been consulted on our side. We put out the so-called hotline request for expressions of agreement or disagreement with this arrangement. I believe that we have worked out an accommodation that is suitable to all or virtually all the Members on our side. I take this opportunity to thank the majority leader for spending all day, virtually, in trying to arrive at an agreement that was acceptable on our side as well as to the majority.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader. It has been difficult.

I thank him also for the splendid cooperation that he and his colleagues have given in the effort to agree upon an hour for final decision on Senate Resolution 110.

Mr. President, it is my intention to attempt during the last 2 weeks of April and the first 2 weeks of May to establish 1 or 2 committee working days each week. I met on yesterday with the staff directors of the legislative committees and discussed this problem with them. The distinguished majority whip (Mr. CRANSTON) was also present. Committees have a very important May 15 deadline to meet under the Budget Reform Act. Therefore, I think it is important that during the last 2 weeks of April and the first 2 weeks of May, committees have at least 1 day a week on which they may meet throughout almost the entire day.

This is not to say that it would not be necessary to come in on those days but it would be, say, at around 4 p.m., just as we are going to do next week on Tuesday.

This will allow committees to come in early, at 8 a.m., and stagger their sessions, so that all committees would not be convening at the same hour, as is so often the case when they all convene at 10 a.m. But at least they would not be interrupted in their work, and we could still get 2 or 3 hours of work done on the floor calendar. I announce this at this time so the committee staffs can be thinking about it.

I will try to work out a schedule within the next few days so that the various legislative committees will know well in advance the special committee days that will be set aside during the last 2 weeks of April and the first 2 weeks of May, for their convenience in expediting the flow of legislation to the Chamber to meet the budget reform deadline.

RECESS SUBJECT TO CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 4:06 p.m., took a recess subject to the call of the Chair.

The Senate reassembled at 4:10 p.m., when called to order by the Presiding Officer (Mr. LAXALT).

RECESS UNTIL 11 A.M. ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 11 a.m. on Monday.

The motion was agreed to; and, at 4:11 p.m., the Senate took a recess until Monday, March 28, 1977, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate March 25, 1977.

DEPARTMENT OF STATE

Charles William Maynes, Jr., of New York, to be an Assistant Secretary of State.

Barbara M. Watson, of New York, to be Administrator, Bureau of Security and Consular Affairs, Department of State.

James F. Leonard, Jr., of New York, to be Deputy Representative of the United States

of America to the United Nations, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Chester Crawford McGuire, Jr., of California, to be an Assistant Secretary of Housing and Urban Development, vice James H. Blair, resigned.

Geno Charles Baroni, of the District of Columbia, to be an Assistant Secretary of Housing and Urban Development, vice Constance B. Newman, resigned.

DEPARTMENT OF AGRICULTURE

Robert Haldeman Meyer, of California, to be an Assistant Secretary of Agriculture, vice Richard L. Feltner, resigned.

Robert Haldeman Meyer, of California, to be a member of the board of directors of the Commodity Credit Corporation, vice Richard L. Feltner, resigned.

FEDERAL TRADE COMMISSION

Michael Pertschuk, of the District of Columbia, to be a Federal Trade Commissioner for the term of 7 years from September 26, 1977, (reappointment).

CONFIRMATION

Executive nomination confirmed by the Senate March 25, 1977:

DEPARTMENT OF JUSTICE

W. J. Michael Cody, of Tennessee, to be U.S. attorney for the western district of Tennessee for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

PROPOSAL TO BAN OFF-ROAD VEHICLES FROM PUBLIC LANDS

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. BAUCUS. Mr. Speaker, over the last few days a number of my colleagues and I have received calls from constituents who are very concerned over a rumor that President Carter may be about to ban off-road vehicles from public lands.

After a lot of checking—and I must say, after getting somewhat of a "runaround" from the executive branch—I have learned that there is more than a grain of truth to these rumors. I want to take this opportunity to share with my colleagues what I have learned. Incidentally, I am inserting below a copy of the proposed change in Executive Order 11644—a document which those of us concerned about the problem have been unable to get from the executive branch but which I managed, finally, to secure from other sources.

First, by way of background, let me explain that Executive Order 11644, issued in 1972, required Federal agencies to specify those areas of public lands on which off-road vehicle use would be allowed or prohibited.

The purpose of the 1971 Executive order—and I think it is a good purpose—is to protect the ecology of publicly owned lands while recognizing the legitimate needs of off-road vehicle users.

Now to the present controversy. As I understand it, President Carter is to give a major environmental message at the beginning of April. In making decisions about environmental policy in preparation for this address he had asked the Council on Environmental Quality, among other entities, to prepare possible environmental initiatives for his consideration.

One of the suggestions from CEQ is to amend Executive Order 11644. It is this proposed amendment which is the cause of the present controversy.

Following is the unreleased text of the proposed amendment to Executive Order 11644, including an explanation. To place this in context, it is followed by a copy of the original Executive order:

AMENDMENT TO EXECUTIVE ORDER 11644 ON "USE OF OFF-ROAD VEHICLES ON THE PUBLIC LANDS"

ISSUE PAPER

Executive Order 11644 provides for the regulation of off-road vehicles on the public lands. Under section 3 of the Order, Federal agencies are required to designate specific areas and trails where such vehicles will be permitted to operate. While the Executive Order reflects an urgent concern over the environmental harm caused by off-road vehicles, it is now apparent that some agencies may not complete the designation process for at least another ten years.

It is generally agreed that the environment of the public lands may be seriously degraded during this lengthy implementation period. Indeed, in its "Draft Environmental Impact Statement, Departmental Implemention of Executive Order 11644 Pertaining to Use of Off-Road Vehicles on the Public Lands," ("Draft EIS") the Department of Interior acknowledged that some "unique and fragile biophysical, archeologic, or historic resources . . . will have been damaged or destroyed irreversibly as a result of ORV use during the undesignated periods." Draft EIS at 56.

To eliminate this threat to the public lands, we propose to amend the Executive Order by adding a section 3A which reads:

Section 3A. Protection of the public lands

Notwithstanding the provisions of section 3, where the use of off-road vehicles may cause undue adverse effects on the soil, vegetation, wildlife, wildlife habitat or cultural or historic resources of particular areas of the public lands, the respective agency head shall immediately close such areas to the use of off-road vehicles.

This amendment is clearly consistent with the policies and objectives of the Executive Order. By requiring agencies to take immediate action to protect the public lands from environmental damage, it will ensure that the Presidential mandate is fully implemented both before and after specific areas and trails have been designated under section 3.

We propose a second amendment to clarify the original intent of Executive Order 11644 and to resolve uncertainty within the Bureau of Land Management arising from the recent court decision in *National Wildlife Federation* v. *Morton*, 395 F. Supp, 1286 (D.C.D.C. 1975). The Bureau maintains that this decision limited the options available for managing the public lands under the Executive Order.

[Executive Order 11644, February 8, 1972]

USE OF OFF-ROAD VEHICLES ON THE PUBLIC LANDS

An estimated 5 million off-road recreational vehicles—motorcycles, minibikes, trail bikes, snowmobiles, dune-buggies, all-terrain vehicles, and others—are in use in the United States today, and their popularity continues to increase rapidly. The widespread use of such vehicles on the public lands—often for legitimate purposes but also in frequent conflict with wise land and resource management practices, environmental values, and other types of recreational activity—has demonstrated the need for a unified Federal policy toward the use of such vehicles on the public lands.

Now, therefore, by virtue of the authority vested in me as President of the United States by the Constitution of the United States and in furtherance of the purpose and policy of the National Environmental Policy Act of 1969 (42 U.S.C. 4321), it is hereby ordered as follows:

SECTION 1. *Purpose.* It is the purpose of this order to establish policies and provide for procedures that will ensure that the use of off-road vehicles on public lands will be controlled and directed so as to protect the resources of those lands, to promote the safety of all users of those lands, and to minimize conflicts among the various uses of those lands.

SEC. 2. *Definitions.* As used in this order, the term:

(1) "public lands" means (A) all lands under the custody and control of the Secretary of the Interior and the Secretary of Agriculture, except Indian lands, (B) lands under the custody and control of the Tennessee Valley Authority that are situated in western Kentucky and Tennessee and are designated as "Land Between the Lakes," and (C) lands under the custody and control of the Secretary of Defense;

(2) "respective agency head" means the Secretary of the Interior, the Secretary of Defense, the Secretary of Agriculture, and the Board of Directors of the Tennessee Valley Authority, with respect to public lands under the custody and control of each;

(3) "off-road vehicle" means any motorized vehicle designed for or capable of cross-country travel on or immediately over land, water, sand, snow, ice, marsh, swampland, or other natural terrain; except that such term excludes (A) any registered motorboat, (B) any military, fire, emergency, or law enforcement vehicle when used for emergency purposes, and (C) any vehicle whose use is expressly authorized by the respective agency head under a permit, lease, license, or contract; and

Prior to the court decision a number of federal agencies, including the Tennessee Valley Authority, the Department of Defense and the Bureau of Reclamation, had adopted a policy to close all or portions of the public lands within their jurisdiction to use by off-road vehicles except those areas and trails specifically designated as open to such use. The Society of American Foresters, among others, favors this approach to regulating off-road vehicles and has taken the position that

"In order that control be effective, off-road vehicles should be allowed only on forest roads, trails and areas . . . which are explicitly designated for off-road vehicles use Experience shows this approach to be less costly, and easier to enforce than a restriction in which off-road vehicles are allowed on all forest roads, trails and areas except where designated to the contrary."*

*Society of American Foresters, "The Use of Off-Road Vehicles on Public Forest Lands: A Position of the Society of American Foresters" (Washington, D.C., Nov. 12, 1975)

While the Bureau itself has described this approach as the "most environmentally beneficial alternative", it maintains that, in view of the Court's opinion, "such a course of action would require modification of Executive Order 11644." Draft EIS at 65. The Council differs with this interpretation of the law, but proposes to adopt the Bureau's suggestion for resolving the matter by adding a subsection (d) to section 3 as follows:

(d) Each respective agency head shall be authorized to adopt the policy that all or portions of the public lands within its jurisdiction shall be closed to use by off-road vehicles except those areas and trails which are suitable and specifically designated as open to such use under subsection (a) of this section.

This amendment would clarify the original intent of the Executive Order and dispel the Bureau's uncertainty over this issue. With authority to close the public lands until specifically opened under the Executive Order, Federal agencies would retain an administratively sound and flexible option for regulating off-road vehicles.

(4) "official use" means use by an employee, agent, or designated representative of the Federal Government or one of its contractors in the course of his employment, agency, or representation.

SEC. 3. *Zones of Use.* (a) Each respective agency head shall develop and issue regulations and administrative instructions, within six months of the date of this order, to provide for administrative designation of the specific areas and trails on public lands on which the use of off-road vehicles may be permitted, and areas in which the use of off-road vehicles may not be permitted, and set a date by which such designation of all public lands shall be completed. Those regulations shall direct that the designation of such areas and trails will be based upon the protection of the resources of the public lands, promotion of the safety of all users of those lands, and minimization of conflicts among the various uses of those lands. The regulations shall further require that the designation of such areas and trails shall be in accordance with the following—

(1) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, or other resources of the public lands.

(2) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats.

(3) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

(4) Areas and trails shall not be located in officially designated Wilderness Areas or Primitive Areas. Areas and trails shall be located in areas of the National Park system, Natural Areas, or National Wildlife Refuges and Game Ranges only if the respective agency head determines that off-road vehicle use in such locations will not adversely affect their natural, aesthetic, or scenic values.

(b) The respective agency head shall ensure adequate opportunity for public participation in the promulgation of such regulations and in the designation of areas and trails under this section.

(c) The limitations on off-road vehicle use imposed under this section shall not apply to official use.

SEC. 4. *Operating Conditions.* Each respective agency head shall develop and publish, within one year of the date of this order, regulations prescribing operating conditions for off-road vehicles on the public lands. These regulations shall be directed at protecting resource values, preserving public health, safety, and welfare, and minimizing use conflicts.

SEC. 5. *Public Information.* The respective agency head shall ensure that areas and trails where off-road vehicle use is permitted are well marked and shall provide for the publication and distribution of information, including maps, describing such areas and trails and explaining the conditions on vehicle use. He shall seek cooperation of relevant State agencies in the dissemination of this information.

SEC. 6. *Enforcement.* The respective agency head shall, where authorized by law, prescribe appropriate penalties for violation of regulations adopted pursuant to this order, and shall establish procedures for the enforcement of those regulations. To the extent permitted by law, he may enter into agreements with State or local governmental agencies for cooperative enforcement of laws and regulations relating to off-road vehicle use.

SEC. 7. *Consultation.* Before issuing the regulations or administrative instructions required by this order or designating areas or trails as required by this order and those regulations and administrative instructions, the Secretary of the Interior shall, as appropriate, consult with the Atomic Energy Commission.

SEC. 8. *Monitoring of Effects and Review.* (a) The respective agency head shall monitor the effects of the use of off-road vehicles on lands under their jurisdictions. On the basis of the information gathered, they shall from time to time amend or rescind designations of areas or other actions taken pursuant to this order as necessary to further the policy of this order.

(b) The Council on Environmental Quality shall maintain a continuing review of the implementation of this order.

RICHARD NIXON.

THE WHITE HOUSE, *February 8, 1972.*

First, Mr. Speaker, I call to your attention the language in the proposed amendment ordering the closing of public lands to off-road vehicles when they "may cause undue adverse" impacts.

Second, let me call to your attention the later language authorizing agencies to close "all or portions" of public lands under their jurisdiction to off-road vehicles, "except those areas and trails which are suitable and specifically designated as open to such use."

These two statements, taken together, are the cause for concern by off-road vehicle users.

I have talked with officials at CEQ, where I learned that their intent is simply to prohibit off-road vehicles from critical areas where irreparable adverse impacts may occur. I have talked with officials at the Department of the Interior, and this is their understanding as well.

Finally, I have talked with the White House where I learned two things: First, the President is not yet at the point of reviewing suggestions in this area for his April 1 address. Second, the President's advisers believe that he has no intent whatsoever of banning all off-road vehicle use from public lands.

Rather, from what I gathered, the intent of this amendment may be simply to clarify Executive Order 11644, in order to prod the Bureau of Land Management into moving more rapidly to protect some critical areas under its jurisdiction.

Mr. Speaker, I hope this information is useful to my colleagues, and to Montanans, and to other individuals who are concerned over the proposed amendment.

Before I close, I would like to make a few observations about this proposal with the hopes that executive branch officials who may read today's CONGRESSIONAL RECORD may be influenced by what I say.

First, Vice President MONDALE, as well as Secretary of Interior Andrus, are both from States in which off-road vehicle use is extensive. I am sure they know how important off-road vehicles are to these States' economies. I understand that Secretary Andrus owns a snowmobile. With this in mind, I wonder if it is necessary to amend an Executive order in such a way as to cause anxiety and concern by many reasonable people who use off-road vehicles in their everyday lives. If, as I have been told repeatedly, this amendment is to clarify the existing Executive order, not to add to or extend its powers, I suggest that it is unnecessary and is needlessly alarming a lot of people.

Second, if the problem is in the Bureau of Land Management's interpretation of the existing Executive order, a situation which I understand is causing difficulty because the rest of the Government is interpreting the Executive order differently than the BLM, I suggest that a short phone call from the Secretary of Interior to the Director of the Bureau might clarify and change the interpretation with much less agony than has already occurred with the present proposal.

Third, since this subject has been opened, I would suggest a review of the existing order to allow more flexibility in limiting off-road vehicle use. Blanketly banning all off-road vehicles from an area is not always necessary. It does not take into account the different natures of snowmobiles and trail bikes, for example.

Further, it does not take into account the possibility that snowmobiles might be prohibited under certain low snow conditions, and not under other conditions. The thrust of the Government's activity must be to protect the environment in a sensible way. Arbitrary assumptions that all off-road vehicle use necessarily causes significant environmental damage are just as groundless as assumptions that all off-road vehicle use is always environmentally compatible.

Finally, I would suggest that everyone in the executive branch who has been involved with this problem, take note of all the time and effort that they and we in Congress have had to spend on this. And I remind you that I am told by the executive branch that this proposal would not really do anything more than clarify the existing Executive order.

If we are going to make Government more effective, more efficient and more responsive, we would be well-advised to think a little longer before raising new requirements that duplicate old ones—especially when there is a chance that they might be interpreted in such a confusing way.

A member of my staff this week was talking to Mrs. Nina Smith, chairman of the Montana Snowmobile Association, and she said she could not understand why this amendment was being proposed

if, as we were being told, it did nothing new. Frankly, I cannot either.

A NEW LOOK AT THE WAR POWERS RESOLUTION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. MAZZOLI. Mr. Speaker, 3 years ago, the Congress enacted with my vigorous support—and over then-President Nixon's veto—the war powers resolution. The general consensus was that this was a good piece of legislation.

It marked the reassertion of Congress' proper role in making life and death, peace and war decisions.

I fully concur with the basic premise of the war powers measure. Congress has a central role to play in American foreign policy. A sound approach here can only be based on cooperation, consultation, and good faith between the legislative and the executive branches of the Government.

The following Washington Post article contains incisive and interesting observations and raises some vexing questions regarding the war powers resolution which should receive careful consideration by the Congress:

THE WAR POWERS FLOP: CONGRESS STILL CAN'T RESTRAIN PRESIDENTS

(By W. Stuart Darling and D. Craig Mense)

Three years have passed since Congress enacted the War Powers Resolution over President Nixon's veto. Since then, there has been relatively little discussion about this law which purports to ensure that the United States will never again become involved in another unpopular war like that in Vietnam.

In essence, the law seeks to ensure that American armed forces will not be committed to hostilities by the President without prior congressional authorization except in "emergency" situations. In the event that such an emergency does arise, the President can, on his own, commit forces to combat provided that they must be withdrawn after 60 days unless Congress has enacted a measure specifically endorsing his action. The statute grants the President authority to extend this 60-day period for an additional 30 days if, in his opinion, "unavoidable military necessity" so requires. Thus, the President can wage war on his own for 90 days before Congress really enters the picture.

The present act has seemingly been forgotten since the resignation of Richard Nixon. But whether, as is claimed, the law will compel future Presidents to allow for congressional participation in any decisions to commit U.S. troops to hostilities overseas is questionable. And as we enter a new era, there is a clear need to analyze the law's practical effects on the nation's foreign policy.

It is not difficult to envision, drawing from the current world situation, a crisis which might precipitate the introduction of U.S. troops overseas to protect our real or imagined interests. The death of Marshal Tito, now 85, could tempt the Soviets to grab for power in strategic Yugoslavia, probably by a variety of subtle means, conceivably by overt military action, and should that occur President Carter would not necessarily be bound by the comment of candidate Carter dismissing a military response. The potentialities for trouble in the Middle East are not limited to the Arab-Israel conflict but cover as well the volatile Persian Gulf into which has flowed in recent years large quantities of American weapons and thousands of American military instructors.

One can go on identifying potential trouble spots, evoking Cassandra-like images of the future in southern Africa or Korea.

PROBLEMS CREATED

The question which must be asked is this: Would an American President, faced with what he saw as an unavoidable conflict and aware of the military advantages of quick action, be restricted by the current war powers law from initiating U.S. military actions until he could acquire congressional approval? We think not. In fact, the existing statute creates more problems than it solves. As Yale Law Professor Charles L. Black characterized it: "Presented as a limitation on presidential power, [it] can hardly be read as other than a very nearly explicit authorization of any presidential action whatever, with Congress exercising supervisory power later along, after the commitment has been made."

The failure of the law stems from a decision made in 1973 in a conference committee formed to reconcile the differences between the bill's House and Senate versions.

The Senate had acknowledged the necessity of the President's acting without prior congressional approval in certain emergency situations, but spelled out what those "emergencies" were: (1) responding to or preempting an attack on the United States itself (2) responding to or preempting an attack on U.S. armed forces stationed abroad (3) and rescuing American citizens abroad from circumstances which endangered their lives.

The House, on the other hand, had allowed the President unilateral emergency power without specifying what would constitute an emergency. The conference committee placed the Senate codifications of emergencies under the "Purpose and Policy" section of the compromise bill. The conference report explained that the "Purposse and Policy" section was "a statement of the authority of the commander-in-chief respecting the introduction of armed forces into hostilities" and went on to say "subsequent sections . . . are not dependent upon the language of this subsection, as was the case with a similar provision of the Senate bill."

By delaying the congressional imprimatur for 90 days, one of the bill's main goals was compromised. The authors of the Senate bill felt it crucially important that Congress share in the decision to use force before an actual commitment had been made. Otherwise, Congress would have to make the very difficult choice of compelling a withdrawal or evacuation of forces already engaged in hostilities. For these reasons, Sen. Thomas Eagleton (D-Mo.) voted against adoption of the conference report, though he had helped draft and guide the legislation through the Senate.

Most other supporters of the Senate bill, even though they shared many of Eagleton's reservations, chose to accept the conference version. They did so to a significant and unfortunate degree because of unrelated political events. Remember the atmosphere at the time: President Nixon, under mounting criticism from all sides because of Watergate, had recently fired special prosecutor Archibald Cox in the "Saturday Night Massacre."

Nixon vetoed the conference bill, claiming that it was both unconstitutional and an unwise inhibition on the President's conduct of foreign policy. By this time, however, Congress seemed to have tired of arguments for or against the bill itself. Nixon's veto tended to transfer the issue from the bill's provisions to a question of congressional capability to stand up to an increasingly discredited President. In its 10-month existence, the 93d Congress had not overridden any of Nixon's vetoes. In the House, the vote to override was very close. Eight House liberals who had formerly opposed the conference bill switched sides to make the override possible. The margin was only four votes above the necessary two-thirds majority. In the Senate, the override margin was 13, and on Nov. 7, 1973, in Public Law 92-148, the country at last had a war powers act.

But is this law worth having? Does it do more harm than good?

De Tocqueville observed that "foreign politics demand scarcely any of those qualities which are peculiar to a democracy; they require, on the contrary, the perfect use of almost all those in which it is deficient."

It is difficult for democracies to compete in world politics against totalitarian states. Democracies are suspicious of secrecy and not very good at it. Yet successful foreign policies sometimes require secrecy, as well as intimidation, threats, alignments with undemocratic states and, too often, the application of force to obtain desired ends. When a democracy must resort to violence, however, it is imperative both for the success of the foreign policy leading to the use of force, and for the military operation itself, that the people understand why they are fighting and accept the sacrifices necessary for victory. Without this element of consent and a willingness to bear the burdens of war, a democracy is wise to keep out of combat situations.

In effect, by deciding not to require prior congressional consent for presidential war-making in other than designated emergency situations, the conference committee awarded the President *carte blanche* to undertake any sort of military operation subject only to *ex post facto* congressional review. A situation in which Congress felt compelled to force a withdrawal of forces already engaged in hostilities would be a nightmare for all concerned, not least to the military personnel, officers and men, doing the actual fighting. The effects on service morale would be lamentable and frightening.

More likely, however, Congress would never steel itself to make such a decision unless a military venture had proved utterly calamitous, either on the battlefield or at home, or both. Additionally, if for some reason (albeit an unlikely one) Congress became too zealous in compelling withdrawals after 60 days, the world could bear witness to a succession of American Dunkirks that would be unredeemed and unredeemable.

Sen. Barry Goldwater (R-Ariz.) and others have expressed the view that the President must not be deprived of his ability to defend and protect U.S. lives and interests throughout the world. True. It is the price we pay for living in a world where force, and not law, is oftentimes the arbiter of the future. It would be a foolish mistake to deprive the President of the ability to wage a defensive war.

WHAT IS DEFENSIVE WAR?

However, there remains the problem of determining what a defensive war is. Nearly all belligerents call their half of any war "defensive," it is the other side who's waging an aggressive, "offensive" war. Hitler claimed his invasion of Poland was a defensive war justified by a fabricated "seizure" of a German radio station, actually carried out by SS troops masquerading in Polish uniforms.

In 1848, Congressman Abraham Lincoln addressed himself to this point:

"Allow the President to invade a neighboring nation, whenever he shall deem it necessary to repel an invasion, and you will allow him to do so whenever he may choose to say he deems it necessary for such purpose—and you allow him to make war at his pleasure. Study to see if you can fix any limit to his power in this respect. . . . If today he should

choose to say he thinks it necessary to invade Canada to prevent the British from invading us, how could you stop him? You may say to him, I see no probability of the British invading us but he will say to you be silent: I see it if you don't."

The Senate bill presented as workable a definition of defensive war as can likely be written. In that section, the President was empowered to "forestall" or preempt, the "direct and imminent threat" of attacks on the United States itself and on American armed forces abroad without a declaration of war. In the event of attacks on the United States, he could take "retaliatory" action as well. He could use the armed forces to rescue American citizens abroad, but with provisions that prevent such an operation from being used as a guise to cloak ulterior motives. In any other situation, the President would first have had to secure the approval of Congress before resorting to the use of armed forces.

The present law, however, took one step forward and two steps backward. Certainly, this War Powers Resolution is not without some valuable ideas. It makes clear, for example, that our treaty commitments are not self-executing. Apparently, this surprised several of our allies and caused them to worry aloud about American credibility as a world power. In reality, however, the mere fact that a given nation's signature appears on a treaty proclaiming a military alliance is not what matters. Alliances are based on a shared preception of a common threat. Alliances are little more than verbal expressions of a common view of potential danger. This common perception can change as the danger mellows or if it is mistakenly though to mellow. In this way treaties can become only "scraps of paper."

History offers few examples of nations risking their security for "scraps of paper" that did not represent a much deeper concern than keeping promises. In 1914, Britain went to war ostensibly to honor its treaty commitment to Belgian neutrality, but the fundamental reason was that the British would not accept the jeopardization of their security which a German defeat of France would cause. The NATO treaty will become only a scrap of paper if, for whatever reason, the United States, or the West Europeans come to feel that Soviet domination of Europe is not something worth fighting to prevent.

THE NEED FOR CLARITY

The congressional record in foreign affairs since the adoption of the present war powers law has not been impressive. The failure of the bill to involve Congress in the decision-making processes surrounding the evacuation from Vietnam or the Mayaguez affair illustrates both the weaknesses of the statute and congressional reservations about accepting the constitutional responsibility that some claimed the President has usurped. If Congress continues to evoke its constitutional authority in as haphazard a manner as it has in the last two years, becoming involved in the Angolan and Cypriot situations but not in the evacuation from Vietnam or the Mayaguez affair, Congres will justifiably be subject to charges of meddling in presidential concerns and the formula for democratic participation in decisions to use force will remain cloudy.

The current period of relative domestic and international tranquility offers the opportunity to reopen the issue for further consideration. Now is a good time for a reasoned and dispassionate analysis of the existing law. A better opportunity may not be forthcoming. It is bitter to contemplate the effects of a renewed war powers debate instigated by a future military conflict involving U.S. troops. Common sense should beckon the Congress to settle the issue beforehand.

A return to the original Senate bill would clarify the situations in which the President's emergency powers do allow him to act unilaterally and would specify the situations in which the President can act only with prior authorization.

Some flexibility would be lost to the President in his conduct of diplomacy. This weakness is inherent in our democracy and we would be better off recognizing our limitations. However, that loss of flexibility would be more than compensated by the gain of a truly democratic dialogue on the issues of foreign policy. The President, too often shielded from adversary politics, would be obliged to engage in public debate. He would be forced to state his proposal and to persuade Congress and the American people to accept it.

The adoption of such a bill would demonstrate to any future President that the judgment to send this nation to war is not his alone and that, while unforeseen circumstances may compel him to abandon the rule in favor of an exception, as Arthur Schlesinger has written, "he should not pretend—as Jefferson, Lincoln and Roosevelt declined to pretend and as Johnson and Nixon have pretended—that the exception is the rule."

The Senate bill is not perfect, but then we do not claim to know what a perfect war powers law would be. As the spokesmen for the Nixon administration pointed out throughout the war powers debate, the world has probably seen the last formal declaration of war. Future wars will either be conventional wars limited in scope, or total, nuclear wars which could be over within hours, if not minutes. For the former, declarations of war are undesirable; for the latter, impossible.

Nevertheless, Congress must have a part beforehand in any decision that involves armed forces in combat situations. A good war powers law would help ensure that the President will not commit the nation to policies it will not accept. If the President does perceive dangers which this countrymen are too slow to recognize, then his task is to educate them, and not compel them to do what they do not want to do.

THE HUMPHREY-BAUCUS BILL: AGRICULTURAL EMERGENCY ASSISTANCE

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 24, 1977

Mr. BAUCUS. Mr. Speaker, it is easy to see why Secretary of Agriculture Bergland's remark that Federal disaster programs are a disaster has been so widely quoted. Anyone who has been affected by a natural disaster knows about the redtape, insufficient coverage, and lengthy delays which our disaster programs involve. Farmers and ranchers whose crops and stock are threatened by the prolonged drought in the West are already grimacing at the prospect of trying to seek remedies through Federal programs. Secretary Bergland was only voicing an opinion which many already share.

Much of the blame for this sorry state of affairs must unfortunately rest with Congress. We created the patchwork of disaster programs, and it is our duty to revise and improve them. For this reason, I am today introducing the Agricultural Emergency Assistance Act of 1977. This bill is identical to S. 788, which Senator HUMPHREY has introduced in the Senate. The bill is designed, not only with the drought situation in mind, but also in anticipation of other agricultural emergencies such as abnormal hailstorms. The bill makes necessary additions to the current disaster programs, and streamlines the operations of the overall set of disaster programs. I have included a summary of the bill's provisions at the end of this statement.

Critics have attacked the notion of aid to ranchers and farmers. They claim that the farmers and ranchers who are in trouble are inefficient. The solution to inefficiency, they believe, is not to keep the inefficient producers in business, but to let them go out of business, leaving the industry to a smaller number of supposedly efficient producers.

This argument is a good example of how a little economics is a dangerous thing. While in most cases, declining industries should be allowed to shrink, agriculture is different from most other industries. Perfectly efficient, farmers and ranchers can suffer major economic losses if natural disasters—over which they have no control—deprive them of crops or reduce their herds for a year or two. When conditions become more favorable, these farmers and ranchers would again be able to produce effectively. But if we allow them to go out of business during the bad years, we will not have them around to produce when conditions improve. And make no mistake; new farmers and ranchers will not materialize if the weather improves. Ranching and farming are highly technical industries today. Their owners and employees are skilled professionals who are not easy to replace.

This whole argument reminds me of the biblical parable, from the story of Joseph, about the seven fat cows and the seven lean cows. Back in ancient Egypt, where most people worked the land, resources were set aside during the good years to help producers through the bad years. We ought to take a lesson from the Bible and formulate effective disaster relief programs.

We have a great need right now for a reformed, efficient disaster program. Most of the West has suffered 2 years of prolonged drought; current precipitation will simply not relieve these long-term deficiencies. Meanwhile, current emergency programs are confusing and inadequate. They are often designed to meet sudden disasters, like floods, but not prolonged, slow disasters, like droughts. Farmers and ranchers, particularly young farmers and ranchers, are leaving the land because of weaknesses in our emergency programs.

Yesterday, President Carter released his drought relief package. If enacted, the President's program would go a long way toward helping this country through its worst drought in nearly half a century. However, much of the President's program deals with such drought-related problems as energy production, community water conservation, and aid to small businesses. While these problems are certainly important, ranchers and farmers' concerns go well beyond the scope of his proposals. My constituents

want emergency programs which will help them through, not only the drought, but the unforeseen emergencies of the future. My bill can serve as an effectvie addition to the President's program.

Everyone in this country has a stake in the welfare of our American ranchers and farmers. After all, they produce our daily food. And they consume the output of all major industries. But, when they are forced off their farms, they often join the urban unemployment rolls, becoming drains on society rather than boons to society. We all have a stake in effective disaster relief. Enactment of this bill would be an important step in providing that relief.

I will conclude with the following summary of the provisions of the bill:

SHORT EXPLANATION OF THE AGRICULTURAL EMERGENCY ASSISTANCE ACT OF 1977

The major provisions of the bill would—

(1) direct the Secretary of Agriculture to provide leadership in coordinating, within the Executive Branch, all Federal programs designed to assist farmers and ranchers in disaster areas, and coordinate Federal efforts with State and local governments and county ASC committees;

(2) authorize research and development efforts that (a) administrative delay and confusion in the implementation of assistance programs for farmers and ranchers, and related problems, and (b) the need to develop programs that are specifically designed for drought situations;

(3) direct the Secretary to give special consideration to areas of the United States subject to frequently recurring natural disasters, such as drought, in administering the Department's conservation programs;

(4) authorize in a supplemental appropriation for FY 1977 of $10,000,000 for drought emergency conservation measures;

(5) continue, through the 1982 crop year, crop production disaster assistance to farmers in the form of payments to producers for deficiencies in production—

a. if crop insurance is not available to them;

b. for the commodities of wheat, feed grains, upland cotton, rice, and soybeans;

c. if production is below 75 percent of normal production;

d. on all acreage planted (not just allotted acreage);

e. at the rate of one-third of the cost of production;

(6)(a) require a minimum disaster reserve, to be held by the Commodity Credit Corporation, of 20,000,000 bushels of grain or, as necessary, hay or other livestock forage;

(b) authorize the Secretary of Agriculture to purchase commodities for the reserve, if necessary to maintain it at the minimum level; and

(c) authorize the Secretary to use the reserve, in disaster situations, to provide emergency feed for livestock;

(7) authorize the use of the emergency livestock feed program when the Secretary of Agriculture, under the Consolidated Farm and Rural Development Act, has made a designation that an area is eligible for emergency loan assistance, in order to improve the coordination of the two programs;

(8) improve the hay transportation program for livestock producers in disaster areas: The Secretary of Agriculture would be authorized to pay livestock producers up to three-fourths of the actual cost of transporting up to a 90-day supply of hay into the disaster area, when local hay production falls to less than 60 percent of normal production; and though normally it would be a temporary program, it could be renewed if disaster conditions continue;

(9) make permanent the Emergency Livestock Credit Act of 1974, under which the Secretary of Agriculture may guarantee loans made to livestock producers who are otherwise unable to get financing for their operations; and

(10) authorize the Secretary of Agriculture to modify repayment schedules on FmHA loans for borrowers located in disaster areas, to allow such borrowers grace periods of up to two years on repayment of the principal or interest on their FmHA loans.

The text of the bill follows:

H.R. 5560

A bill to improve and strengthen disaster assistance programs for agricultural producers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Emergency Assistance Act of 1977".

TITLE I—FINDINGS AND PURPOSE

FINDINGS

SEC. 101. (a) Congress finds that—

(1) United States agricultural producers efficiently supply high-qality food and fiber to meet the needs of the American people through intensive yearly production and will be called on in the future to maintain or increase this production

(2) natural disasters are not infrequent occurrences, but recurring destructive climatic events to which agricultural producers are especially vulnerable;

(3) costs of agricultural production have sharply increased in recent years, making it increasingly difficult for producers to overcome the effects of natural disasters that reduce or destroy crop and livestock production;

(4) existing agricultural programs designed to support prices or adjust production and to aid producers who suffer losses from natural disasters are not adequate to meet the needs of agricultural producers;

(5) a Federal crop insurance that would be available nationwide for all agricultural production and producers is not possible in the foreseeable future; and

(6) a well-coordinated Federal emergency assistance program is necessary to help agricultural producers cope with natural disasters and, therefore, assure the maintenance of the efficient and productive United States agricultural system.

(b) Congress further finds that there is need for improved administration and coordination of all Federal agricultural emergency assistance programs in order to assure that the programs are responsive to the needs of agricultural producers.

PURPOSE

SEC. 102. It is the purpose of this Act to develop a strengthened and better coordinated Federal effort in providing emergency assistance to agricultural producers who suffer losses as a result of natural disasters.

TITLE II—RESPONSIBILITIES OF THE SECRETARY OF AGRICULTURE; CONSERVATION ASSISTANCE

SEC. 201. Section 526 of the Revised Statutes (7 U.S.C. 2204) is amended by adding at the end thereof new subsections (c) and (d) as follows:

"(c)(1) The Secretary of Agriculture is authorized and directed to provide leadership in coordinating, within the executive branch, all Federal programs designed to assist agricultural producers in alleviating distress caused by natural disasters. In exercising this responsibility, the Secretary shall utilize the services of (A) other executive branch departments and agencies, and (B) the agencies, bureaus, offices, and services of the Department of Agriculture, in coordination with State and local governments and State and county agricultural stabilization and conservation committees. The Secretary is authorized to initiate or expand research and development efforts related to—

"(i) the coordination of emergency assistance programs for agricultural producers;

"(ii) uniformity and consistency in the application of criteria for eligibility;

"(iii) administrative delay and confusion in the implementation of assistance programs;

"(iv) the need for (a) the development of programs specifically designed to alleviate the distress caused to agricultural producers by prolonged drought, and (b) increased scientific understanding of climatic trends in order that timely preventive measures may be taken by producers to reduce the effects of drought;

"(v) the need for maximum flexibility in the administration of Federal emergency assistance efforts; and

"(vi) the need to assure maximum producer input and participation in the administration of Federal emergency assistance efforts.

"(2) The Secretary shall report to Congress, not later than February 1 of each year, on the progress made in carrying out the provisions of this subsection.

"(d) With respect to areas of the United States subject to frequently recurring natural disasters, the Secretary shall, in the administration of agricultural conservation programs and consistent with other provisions of law, give special consideration to such areas in allocating the funds for such programs and otherwise encouraging the adoption in such areas of conserving practices, including, but not limited to, the development of shelter belts, stock dams, and the use of agricultural land for soil conservation purposes."

EMERGENCY CONSERVATION MEASURES

SEC. 202. There is hereby authorized to be appropriated for the fiscal year ending September 30, 1977, for drought emergency conservation measures, to be used for the same purposes and subject to the same conditions as funds appropriated for emergency conservation measures in the Third Supplemental Appropriation Act, 1957, $10,000,000, in addition to any sums heretofore appropriated for the fiscal year ending September 30, 1977.

TITLE III—CROP PRODUCTION ASSISTANCE

DISASTER PAYMENTS

SEC. 301. Effective only with respect to the 1978 through 1982 crops of wheat, feed grains, rice, soybeans, and upland cotton, the Agricultural Act of 1949, as amended, is amended by inserting after section 107 new sections 108 through 112 as follows:

"DISASTER PAYMENTS FOR WHEAT

"SEC. 108. (a) Notwithstanding any other provision of law, if the Secretary determines that, because of drought, flood, or other natural disaster or condition beyond the control of the producers, the total quantity of wheat on a farm which the producers are able to harvest is less than 75 per centum of the farm acreage planted to wheat for harvest times the projected yield of wheat, payments shall be made to the producers on the farm for the deficiency in production below 75 per centum by multiplying such deficiency times one-third of the cost of production of wheat per bushel.

"(b) The provisions of this section shall be applicable only in counties where Federal crop insurance for wheat cannot be obtained by the producers for the crop year involved.

"DISASTER PAYMENTS FOR FEED GRAINS

"SEC. 109. (a) Notwithstanding any other provision of law, if the Secretary determines that, because of drought, flood, or other natural disaster or condition beyond the control of the producers, the total quantity of feed grains on a farm which the producers are able to harvest is less than 75 per centum

of the farm acreage planted to feed grains for harvest times the projected yield of feed grains, payments shall be made to the producers on the farm for the deficiency in production below 75 per centum by multiplying such deficiency times one-third of the cost of production of food grains per bushel.

"(b) The provisions of this section shall be applicable only in counties where Federal crop insurance for feed grains cannot be obtained by the producers for the crop year involved.

"DISASTER PAYMENTS FOR RICE

"SEC. 110. (a) Notwithstanding any other provision of law, if the Secretary determines that, because of drought, flood, or other natural disaster or condition beyond the control of the producers, the total quantity of rice on a farm which the producers are able to harvest is less than 75 per centum of the farm acreage planted to rice for harvest times the projected yield of rice, payments shall be made to the producers on the farm for the deficiency in production below 75 per centum by multiplying such deficiency times one-third of the cost of production of rice per bushel.

"(b) The provisions of this section shall be applicable only in counties where Federal crop insurance for rice cannot be obtained by the producers for the crop year involved.

"DISASTER PAYMENTS FOR SOYBEANS

"SEC. 111. (a) Notwithstanding any other provision of law, if the Secretary determines that, because of drought, flood, or other natural disaster or condition beyond the control of the producers, the total quantity of soybeans on a farm which the producers are able to harvest is less than 75 per centum of the farm acreage planted to soybeans for harvest times the projected yield of soybeans, payments shall be made to the producers on the farm for the deficiency in production below 75 per centum by multiplying such deficiency times one-third of the cost of production of soybeans per bushel.

"(b) The provision of this section shall be applicable only in counties where Federal crop insurance for soybeans cannot be obtained by the producers for the crop year involved.

"DISASTER PAYMENTS FOR UPLAND COTTON

"SEC. 112. (a) Notwithstanding any other provision of law, if the Secretary determines that, because of drought, flood, or other natural disaster or condition beyond the control of the producers, the total quantity of upland cotton on a farm which the producers are able to harvest is less than 75 per centum of the farm acreage planted to upland cotton for harvest times the projected yield of upland cotton, payments shall be made to the producers on the farm for the deficiency in production below 75 per centum by multiplying such deficiency times one-third of the cost of production of upland cotton per pound.

"(b) The provisions of this section shall be applicable only in counties where Federal crop insurance for upland cotton cannot be obtained by the producers for the crop year involved."

TITLE IV—LIVESTOCK PRODUCTION ASSISTANCE

DISASTER RESERVE

SEC. 401. (a) Section 813 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (87 Stat. 239; 7 U.S.C. 1427a), is amended as follows:

(1) Subsections (a) and (b) are amended to read as follows:

"SEC. 813. (a)(1) Notwithstanding any other provision of law, the Secretary of Agriculture shall, under the provisions of this Act, establish, maintain, and dispose of a separate reserve of grain for the purpose of alleviating distress caused by a natural disaster.

"(2) Such reserve inventories shall include such quantities of grain that the Secretary deems sufficient so that the reserve may, from time to time, be drawn on for the alleviation of distress as the result of natural disasters, but not less than twenty million bushels nor more than seventy-five million bushels of grain.

"(3) The Secretary is authorized to acquire hay and other livestock forages for the purpose of alleviating distress caused by natural disaster at such times and in such amounts as the Secretary may determine.

"(b) The Secretary is authorized to purchase such commodities through the Commodity Credit Corporation or acquire them through the price-support program.".

(2) Subsection (d) is amended to read as follows:

"(d)(1) The Secretary is also authorized to dispose of such commodities only for (A) use in relieving distress (i) in any State, the District of Columbia, Puerto Rico, Guam, or the Virgin Islands, (ii) in connection with any major disaster or emergency determined by the President to warrant assistance by the Federal Government under the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121), and (iii) in connection with any emergency determined by the Secretary to warrant assistance pursuant to section 407 of the Agricultural Act of 1949, as amended (63 Stat. 1055, as amended; 7 U.S.C. 1427), or the Act of September 27, 1959 (73 Stat. 574, as amended; 7 U.S.C. Prec. 1427a); or (B) use in connection with a state of civil defense emergency as proclaimed by the President or by concurrent resolution of the Congress in accordance with the provisions of the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251–2297).

"(2) Whenever commodities are disposed of as described in paragraph (1) of this subsection in such quantities that the inventories are reduced below a level of twenty million bushels, the Secretary is authorized to acquire commodities pursuant to subsection (b) of this section over a period of six months immediately following the end of the natural disaster, major disaster, emergency, or the expiration of the concurrent resolution, in order to reestablish the separate reserve at a minimum level of twenty million bushels.".

(b) The Secretary of Agriculture is authorized to acquire commodities pursuant to subsection (b) of section 813 of the Agricultural Act of 1970 over a period of two years immediately following the effective date of this section.

EMERGENCY LIVESTOCK FEED

SEC. 402. (a) Section 407 of the Agricultural Act of 1949, as amended (63 Stat. 1055, as amended; 7 U.S.C. 1427), is amended by striking out from the fifth sentence "any major disaster determined by the President to warrant assistance by the Federal Government under Public Law 875, Eighty-first Congress, as amended (42 U.S.C. 1855)" and inserting in lieu thereof "(A) any major disaster or emergency as determined by the President to warrant assistance by the Federal Government under the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121), or (B) any emergency as designated by the Secretary pursuant to the provisions of section 321 of the Consolidated Farm and Rural Development Act (75 Stat. 331, as amended; 7 U.S.C. 1961)".

(b) Section 2 of the Act of September 27, 1959 (73 Stat. 574, as amended; 7 U.S.C. Prec. 1427a), is amended by striking out the period at the end of the first sentence and inserting ", or if he has designated the area as an emergency area pursuant to the provisions of section 321 of the Consolidated Farm and Rural Development Act (75 Stat. 331, as amended; 7 U.S.C. 1961)".

EMERGENCY HAY TRANSPORTATION

SEC. 403. (a)(1) The Secretary of Agriculture is authorized to pay up to three-fourths of the actual cost of transporting a maximum ninety-day supply of hay or other livestock forage from areas in which hay is in plentiful supply to livestock producers in major disaster or emergency areas whenever—

(A) a State or area within a State is designated by the President as a major disaster or emergency area, pursuant to the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121), or is designated by the Secretary of Agriculture as an emergency area pursuant to the provisions of section 321 of the Consolidated Farm and Rural Development Act (75 Stat. 311, as amended; 7 U.S.C. 1961), or section 407 of the Agricultural Act of 1949, as amended (63 Stat. 1055, as amended; 7 U.S.C. Prec. 1427a), or the Act of September 21, 1959 (73 Stat. 574, as amended; 7 U.S.C. Prec. 1427a);

(B) the Governor of the State submits evidence during the period of designation to the Secretary of Agriculture showing that the combined hay, forage, or pasture losses in the major disaster or emergency area are or will be at least forty percent of the normal production for such area; and

(C) the Secretary of Agriculture concurs in the evidence of loss submitted by the Governor.

(2) As used in this section, "normal production" means the average production of hay, forage, and other pasture crops in the major disaster or emergency area, using statistics from the three calendar years immediately preceding the calendar year in which the major disaster or emergency designation was made: *Provided*, That if during any of those three years, the State or area was designated as a major disaster or emergency as described in paragraph (a)(1)(A) of this subsection, such year shall not be used to determine normal production, and, in lieu thereof, the next preceding calendar year in which no such major disaster or emergency designation was made, shall be used.

(3) In computing the amount of hay or other livestock forage for which a livestock producer will be entitled to transportation assistance under this section, the Secretary shall utilize a formula of forty pounds of hay per brood cow or dairy cow per day and twenty pounds per replacement heifer or head of beef cattle per day. The Secretary shall develop appropriate feed ratios for other forages and other livestock, as required.

(4) Within ninety days after the Secretary initially makes the assistance under this section available to livestock producers in an area, the Secretary, at the request of the Governor, shall review any additional information submitted by the Governor and evaluate the immediate situation and the long-term situation for livestock producers in the area.

(5) The Secretary is further authorized, whenever the Secretary determines such action to be necessary and appropriate based on the Secretary's evaluation of the continuing situation as provided for in subsection (4) of this section, to pay up to three-fourths of the actual cost of transporting additional supplies of hay or other livestock forage to livestock producers in the major disaster or emergency area, in such amounts as determined by the Secretary to be necessary to alleviate the distress caused by the major disaster or emergency.

(b) The Secretary is authorized to provide assistance under this section to any livestock producer whenever such action is necessary to prevent undue financial hardship to the producer in maintaining the producer's livestock herd, as determined by the Secretary.

(c) The Secretary is authorized to issue such regulations as he determines necessary to carry out this section.

(d) Whoever disposes of any hay or other livestock forage for which transportation costs were paid under this section, other than with the prior approval of the Secretary of Agriculture, shall be subject to a penalty equal to but not in excess of the amount paid by the Secretary to transport the hay or other livestock forage involved, to be recovered by the Secretary in a civil suit brought for that purpose, and in addition shall be guilty of a misdemeanor and upon conviction thereof shall be subject to a fine of not more than $3,000 or imprisonment for not more than one year.

(e) Section 8 of the Farmer-to-Consumer Direct Marketing Act of 1976 is hereby repealed. Notwithstanding such repeal, the provisions of section 8 of the Farmer-to-Consumer Direct Marketing Act of 1976 shall continue in effect with respect to any emergency or major disaster declared prior to the effective date of this section.

(f) The provisions of this section shall become effective thirty days after the date of enactment of this Act.

(g) There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

TITLE V—CREDIT ASSISTANCE

EMERGENCY LIVESTOCK CREDIT

SEC. 501. The Emergency Livestock Credit Act of 1974 (88 Stat. 392, as amended; 7 U.S.C. Prec. 1961) is amended as follows:

(a) Section 3 is amended by striking out from subsection (a)(3) "eighteen months immediately preceding the date of enactment of this Act" and inserting in lieu thereof "five years immediately preceding the date the loan applicant applied to the lender for the loan".

(b) Section 8 is amended by striking out all that follows after the word "enactment" and inserting in lieu thereof a period.

GRACE PERIOD FOR LOANS

SEC. 502. The Consolidated Farm and Rural Development Act, as amended, is amended by inserting immediately after section 324 a new section as follows:

"SEC. 324a. (a) Notwithstanding any other provision of this title, and subject to the provisions of subsection (b) of this section, the Secretary is authorized to modify repayment schedules on loans made under this title to be commensurate with borrower circumstances by postponing all principal and interest payments for up to two years, except for annual payments equal to 1 percent of the principal. During this grace period, interest shall accrue on principal, but shall not accrue on the deferred interest.

"(b) The authority to modify repayment schedules shall be exercised only with respect to borrowers whose farming, ranching, or aquaculture operations are located in areas which—

"(1) the President has determined to be in need of assistance by the Federal Government under the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121), because of major disasters or emergency situations; or the Secretary has designated as emergency areas in accordance with section 321(a) of this title; and

"(2) have been, within the five years immediately preceding the date of such determination by the President or designation by the Secretary, subject on one or more occasions to either such determination by the President or designation by the Secretary; or the major disasters or emergencies have resulted in economic distress of such severity that the assistance provided herein is warranted, as determined by the Secretary.".

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

MEETINGS SCHEDULED

MARCH 28

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
HUD—Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings to inquire into domestic communications common carrier policies (i.e., telephone, computer, etc.)
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To continue hearings on proposed authorizations for fiscal year 1978 for ERDA's budget as it pertains to nuclear power.
3110 Dirksen Building

Environment and Public Works
To resume consideration of bills proposing amendments to the Clean Air Act (S. 252 and S. 253).
4200 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To resume hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

10:30 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

11:00 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
To resume oversight hearings on major international economic issues facing the United States.
4221 Dirksen Building

1:30 p.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

2:30 p.m.
Foreign Relations
African Affairs Subcommitte
To receive a briefing in closed session from CIA Officials on internationalization of local conflicts in Africa.
S-116, Capitol

MARCH 29

9:00 a.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Rural Development
To hold hearings on medicare reimbursements for rural health care clinics.
322 Russell Building

Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1978 for the Fish and Wildlife Service.
1224 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Office of Human Development.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Armed Services
Research and Development Subcommittee
To resume closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons programs.
224 Russell Building

Banking, Housing, and Urban Affairs
To markup S. 69 and S. 92, to extend the Export Administration Act.
5302 Dirksen Building

Energy and Natural Resources
Energy Production and Supply Subcommittee
To continue hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Foreign Relations
To hold hearings on sundry State Department nominations, to be followed by consideration of those and other pending nominations.
4221 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To continue hearings on S. 2 to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

1:30 p.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommitee
To continue hearings on proposed budget estimates for fiscal year 1978 for the National Technical Institute for the Deaf; the American Printing House for the Blind; Gallaudet College, and Howard University.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Armed Services
Research and Development Subcommittee
To continue closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons programs.
224 Russell Building

Commerce, Science, and Transportation
To hold hearings on the nomination of Joan Buckler Claybook, of Maryland, to be Administrator of the National Highway Traffic Safety Administration.
5110 Dirksen Building

Human Resources
Health and Scientific Research
To hold hearings on S. 705, to revise and strengthen standards for the regulation of clinical laboratories.
4223 Dirksen Building

2:30 p.m.
Foreign Relations
*Foreign Economic Policy Subcommittee
To continue oversight hearings on major international economic issues facing the United States.
S-116, Capitol

MARCH 30

9:00 a.m.
Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear Secretary Bergland.
1224 Dirksen Building

Energy and Natural Resources
To hold hearings on the nomination of Guy Richard Martin, of Alaska to be an Assistant Secretary of the Interior.
3110 Dirksen Building

9:30 a.m.
Appropriations
*Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the National Park Service.
S-126, Capitol

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
235 Russell Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Agricultural Production, Marketing and Stabilization of Prices
To hold oversight hearings on problems of flue-cured tobacco farmers.
322 Russell Building

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of the Export-Import Bank, and Overseas Private Investment Corporation.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Social and Rehabilitation Service.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Armed Services
Research and Development
To continue closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons programs.
224 Russell Building

Banking, Housing, and Urban Affairs
To mark up S. 305, to require issuers of securities to maintain records, and to prohibit the payment of overseas bribes by any U.S. business concern.
5302 Dirksen Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Governmental Affairs
To continue hearings on S. 591, and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To continue hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Human Resources
Health and Scientific Research
To continue hearings on S. 705, to revise and strengthen standards for the regulation of clinical laboratories.
4232 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on S. 717, to promote safety and health in the mining industry.
4232 Dirksen Building

Joint Economic
To hold hearings to receive testimony on a study on food chain stores' profits and prices.
318 Russell Building

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

10:30 a.m.
Commerce, Science and Transportation
To consider the nomination of Michael Pertschuk, of the District of Columbia, to be a Federal Trade Commissioner.
5110 Dirksen Building

11:00 a.m.
Foreign Relations
Foreign Assistance Subcommittee
To consider proposed legislation authorizing funds for development assistance programs, and for contributions to international organizations.
4221 Dirksen Building

1:30 p.m.
Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Foreign Relations
Subcommittee on Foreign Economic Policy
To meet in closed session to receive a staff report on U.S. Foreign Economic Policy Issues: The United Kingdom, France, and West Germany.
S-116, Capitol

Rules and Administration
To resume consideration of S. Res.'s 5 through 12, proposing several changes in the Senate rules, principally with regard to Rule XXII (closure); and to consider other committee business.
301 Russell Building

MARCH 31

9 00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
332 Russell Building

Foreign Relations
Foreign Assistance Subcommittee
To mark up legislation on international financial institutions and bilateral development assistance.
4221 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Outdoor Recreation and the Land and Water Conservation Fund.
1318 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Handicapped Subcommittee
To resume oversight hearings on the implementation of the Developmentally Disabled Assistance and Bill of Rights Act (P.L. 94–103).
6202 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To hold hearings in connection with the protection of human subjects used in experimental research.
6226 Dirksen Building

Select Small Business
To hold hearings on the nomination of Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.
424 Russell Building

10:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the defense establishment, to hear public witnesses.
1223 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Social Security Administration.
S128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for National Highway Traffic Safety Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
To hold hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on national water policy in light of current drought situations.
4200 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

*Select Nutrition and Human Needs
To continue hearings to examine the relationship between diet and health, to receive testimony on the need for fiber in diet.
Until: 1 p.m. 1202 Dirksen Building

11:00 a.m.
Foreign Relations
Subcommittee on Arms Control, Oceans and International Environment
To hold hearings on S. Res. 49, favoring international agreement to a treaty requiring the propagation of an international environmental impact statement for any major project expected to have significant adverse effect on the physical environment.
4221 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Office of Civil Rights, Inspector General, Policy Research, and General Management.
S–128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense establishment, to hear public witnesses.
S–126, Capitol

Appropriations
Legislative Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the legislative branch, on items under the Office of the Secretary of the Senate.
S–146, Capitol

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S–407, Capitol

3:30 p.m.
Foreign Relations
To receive a briefing (in closed session) from officials of the Central Intelligence Agency on the general world situation.
S–116, Capitol

APRIL 1

9:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on the administration's proposals relative to the food stamp program.
322 Russell Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Environmental and Public Works
Water Resources Subcommittee
To hold hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To continue hearings in connection with the protection of human subjects used in experimental research.
6226 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To markup proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on the nominations of Charles Linn Haslam, of North Carolina, to be General Counsel, and Frank Alan Weil, of New York, to be an Assistant Secretary, both of the Department of Commerce.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To resume hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To continue hearings on proposed authorization for fiscal year 1978 for Energy Research and Development Administration.
Room to be announced

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To consider S. 365, authorizing funds for fiscal year 1978 for NASA.
235 Russell Building

APRIL 6

9:00 a.m.
Energy and Natural Resources
Parks and Recreation Subcommittee
To hold hearings on S. 393, the proposed Montana Wilderness Study Act.
Room to be announced

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior, to hear congressional witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on rural telecommunications policy.
235 Russell Building

Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Select Small Business
Monopoly Subcommittee
To continue hearings on alleged restrictive and anticompetitive practices in the eye glass industry.
318 Russell Building

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear public witnesses.
1318 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Consumer Product Safety Commission, Office of Consumer Affairs, and Consumer Information Center.
Room to be announced

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To continue oversight hearings to determine status of national efforts in energy conservation.
3110 Dirksen Building

*Government Affairs
Energy Subcommittee
To continue hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To hold hearings on the benefits from and technological uses of genetic engineering-deoxyribonucleic acid (DNA) research.
6202 Dirksen Building

APRIL 7

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for military construction programs, on funds for NATO and classified programs.
S-146, Capitol

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To resume hearings on S. 419, to test the commercial, environmental, and social viability of various oil-shale technologies.
3110 Dirksen Building

Select Intellegence
To hold a closed hearing on proposed fiscal year 1978 authorizations for Government intellegence activities.
S-407 Capitol

2:00 p.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Dr. Frank Press, of Massachusetts, to be Director of the Office of Science and Technology Policy.
5110 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings to receive testimony in connection with delays and congestion occurring at U.S. airports-of-entry.
235 Russell Building

APRIL 18

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal years 1978 and for Department of Housing and Urban

Development and Independent Agencies, to hear public witnesses.
1318 Dirksen Building
Environment and Public Works
Water Resources Subcommittee
To resume hearings on the national water policy in view of current drought situations.
4200 Dirksen Building
Judiciary
To hold hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building

APRIL 19

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and Related Agencies, to hear public witnesses.
1114 Dirksen Building
Appropriations
Transportation Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building
Commerce, Science, and Technology
Science, Technology, and Space Subcommittee
To hold hearings on S. 126, to establish an Earthquake Hazards Reduction Program.
5110 Dirksen Building
Environment and Public Works
To resume hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building
10:00 a.m.
Banking, Housing and Urban Affairs
To hold hearings on proposed housing and community development legislation with a view to reporting its final recommendation thereon to the Budget Committee by May 15.
5302 Dirksen Building
Commerce, Science, and Technology
Consumer Subcommittee
To hold oversight hearings on activities of the Consumer Product Safety Commission.
235 Russell Building
Energy and Natural Resources
To resume hearings on S. 9, to establish a policy for the management of oil and natural gas in the Outer Continental Shelf.
3110 Dirksen Building
Governmental Affairs
Subcommittee on Reports, Accounting, and Management
To hold hearings to examine governmental accounting and auditing practices and procedures.
3302 Dirksen Building
Judiciary
To continue hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building
3:00 p.m.

SENATE—*Monday, March 28, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by Hon. DICK CLARK, a Senator from the State of Iowa.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty and Ever-Gracious God, as we turn to Thee in prayer may our hearts and minds be quickened and purified by Thy spirit. As the times demand stout hearts, true faith, and willing hands, take us as we are and by Thy touch magnify our wisdom and increase our strength. Give us grace sufficient for our tasks. And grant that we may walk in the steps of Him who with the fewest hours finished the divinest work, even Jesus Christ, Thy Son, our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 28, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. DICK CLARK, a Senator from the State of Iowa, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. CLARK thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Friday, March 25, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Chair recognizes the minority leader.

Mr. BAKER. Mr. President, I yield 5 minutes to the distinguished junior Senator from Rhode Island.

RHODE ISLAND 4 YEARS LATER: PULLOUT STILL HURTS

Mr. CHAFEE. Mr. President, I ask unanimous consent to have printed in the RECORD at this point an article appearing in yesterday's Washington Post, business and finance section, entitled "Rhode Island 4 Years Later: Pullout Still Hurts."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RHODE ISLAND 4 YEARS LATER: PULLOUT STILL HURTS

(By William Claiborne)

QUONSET POINT, R. I.—When the U.S. Navy abruptly announced in 1973 that it was pulling its Atlantic destroyer fleet out of Rhode Island and closing its sprawling air base and Seabee center here, state officials were hard-pressed to grasp the logic of the decision.

Gov. Joseph Garrahy, who was then lieutenant governor, first heard about it on a radio newscast and, by his own account, was dumfounded. What Garrahy heard was that Rhode Island, the smallest state in the nation, was going to absorb 50 per cent of the defense cuts ordered by President Nixon.

"I thought, 'This can't be right. That announcer has got to be wrong'," recalls Garrahy.

Raymond G. Neal, a Navy captain who recently had retired as chief of staff of the Quonset Point Air Base and who is now vice president of the Hospital Trust National Bank, Rhode Island's biggest bank, had just mailed a recommendation to bank officials that they open a new branch at the base because of "burgeoning" growth.

Then-Gov. Philip W. Noel and other top state officials had come to think of the destroyer fleet in Newport and the air base here, which was built in 1941, as permanent Rhode Island institutions.

After all, the Navy had just built scores of new duplex housing units at $40,000 apiece, had just completed a new commissary scheduled to open days after the shutdown announcement, and had let local officials float

millions of dollars in bond issues to build several new schools to accommodate dependents of the military.

Earlier, the Navy forced the state to spend an additional $8 million to change its plans for the proposed Newport Bridge so that it would be high enough to allow the passage of aircraft carriers of designs projected to the year 2000. The bridge, with a conspicuous bulge in the center, was completed in 1969.

If officials of the tiny State of Rhode Island (pop. 950,000) were hard-pressed to understand the officials of the big state of U.S. government bureaucracy (pop. 2.8 million) in 1973, they are even more bewildered now.

For after devising an ambitious industrial plan for economic recovery that would offset the loss of 17,000 military personnel and their families and 6,000 civilian workers, the state still has not been allowed to acquire the surplus Navy land it needs to build new factories.

It took the Defense Department nearly four years to release $1 million needed to fund an environmental impact study of the industrial plan, and state economists estimate that the federal government has pumped $30 million a year into Rhode Island for unemployment insurance during that time.

The General Services Administration still has not made an official fair market appraisal of the 4,600 acres of land covering 10 sites, nor the 1,311 structures the Navy is giving up.

And environmental groups have gone to court to bottle-neck the industrial development further, and in a decision bitterly received in most quarters of the statehouse, a New York federal judge last month set back plans for creating a large offshore oil-staging facility here by voiding leases for exploration of oil fields in the so-called Baltimore Canyon off the New Jersey and Delaware coasts, which could have provided thousands of jobs here.

"There's no way of describing how frustrating the last four years have been," Garrahy said in an interview in his statehouse office.

"We've got the best industrial site in the whole Northeast. It's got a deepwater port, rail lines, an airfield and hundreds of good buildings for sale at surplus prices. It's a natural, but we can't do anything with it."

Meanwhile, according to Garrahy and a dozen economists, bankers and state officials interviewed, Rhode Island continues to suffer from the debilitating effects of the base closures.

After the base closings, the statewide unemployment rate soared from about 6 per cent to 18.2 per cent, rising to more than 30 per cent in some towns.

Coupled with the economic impact of the Middle East oil embargo and the national recession, the loss of the Navy's $344 million annual payroll caused an immediate 6 per cent loss in the gross state product. Rhode Island, which trailed the average national per capita income by only $9 in 1972, fell $38 behind two years later. In one year, small-business income dropped by 25 per cent in the Newport area and by 15 per cent in the Quonset Point area.

Restaurants and bars on Sailor's Row in Newport folded almost immediately and, as the Navy withdrew its forces rapidly over the first year, hundreds of rental houses and apartments became vacant.

National chain retailers which had announced plans for new outlets suddenly withdrew, leaving shopping center developers with big parking lots and little else.

Teacher employment plummeted, and several towns found themselves with empty schools and bond issues they will be paying off for years.

"There has been nobody as little as us who has ever been so devastated," said James O. Roberson, director of the State Department of Economic Development.

"Other states could absorb this. What does the Brooklyn Navy Yard mean to New York, or the Boston Navy Yard to Boston? But to us, my God, it's [the base closings] a big part of our economy," Roberson said.

With the movement of most of Rhode Island's textile industry to the South in the 1940s and 1950s, the state was left with a labor force of 430,000, nearly a quarter of them employed in the jewelry industry and a third in mostly light manufacturing. Gorham Silver and several large gold and silverworking firms are located here.

It was against this backdrop that the state launched an aggressive economic development program, committing more funds per capita on such promotion than any other state in the nation.

Among the projects designed to recoup the loss of the Navy were an $80 million mortgage guarantee program for new factories and equipment, tax-exempt industrial revenue bonds, tax credits and write-offs for research and development, elimination of property and sales taxes for factory equipment, a state-funded-job training school and other incentives.

The state also feverishly solicited new industry, building an elaborate, $200,000 "briefing room" at the Providence airport, with sliding screens and multimedia visual presentations designed to seduce visiting industrialists into moving to Rhode Island.

But the linchpin of the recovery scheme was the plan to convert the old Navy installations into nearly instant factory centers, which were envisioned as providing 10,000 new jobs at Quonset and 2,500 more in the Newport area.

Rhode Island has had some success, despite the tieup of its planned industrial land. General Dynamics Corp.'s Electric Boat Division opened a plant at Quonset that fabricates hull plates for the atomic-powered Trident submarine. The component parts are shipped to Groton, Conn., by barge.

Electric Boat, which invested $17 million at Quonset in the face of a restrictive, one-year lease, employs 5,000 workers—all hired from the unemployed work force. The division's capital investment was considered extraordinary because the state—restricted to the terms of its tenuous and temporary control over Navy land—could offer nothing more than a one-year lease, cancelable in 30 days.

John B. Dana, Rhode Island Port Authority director in charge of the Quonset Point land, also has granted one-year factory leases—permissible under the surplus land terms with the Navy—to 13 small factory owners. The businesses—regarded as the vanguard of the industrial development plans—include a sailmaker and a pipe fabricating plant.

Dana, however said that the Navy property—which includes 82 miles of paved roads, 94 miles of water lines, 40 miles of sanitary sewers and 25 miles of underground steam pipes—is overdeveloped for the use that the site is now getting.

Moreover, few industrialists are willing to make a capital investment in Rhode Island on the basis of a one-year lease. But until the state takes title to the surplus Navy land, it is not permitted by law to offer more than a short-term lease.

Rhode Island officials recently took a bold step and tried to talk a consortium of two dozen oil companies into establishing an oil-rig services center on the surplus piers at Quonset Point.

Encouraged by the potential for oil discoveries in the Georges Bank Field in the Atlantic and in the Baltimore Canyon, the oil companies tentatively set up a staging center here. They brought in tons of equipment, including drilling pipe and facilities for making the chemical compound called "mud" that is used as a drilling lubricant.

Richard McCone, general manager of Superior Oilfield Service, Inc., one of the lessees who located at Quonset in anticipation of a major oil find at Georges Bank, said 3,500 to 5,000 oil workers could be employed at Quonset in two years if federal government site restrictions are lifted.

"All the supplies for the rigs offshore will have to come from this staging base. Drill pipes will be overhauled, mud will have to be supplied, and the entire nuts-and-bolts backup operation will have to be made out of here' McCone said.

The environmentalists, led by the Rhode Island Conservation Law Foundation, say they are not trying to stand in the way of progress, but that they are committed to preserving the bay from industrial ruin.

Harold R. Ward, chairman of the foundation, said the $1 million promised by the Defense Department for an environmental impact study may not be enough to chart the ecological impact on undeveloped lands surrounding the naval facilities.

But in the view of bankers such as Neal and Hospital Trust president Henry Woodbridge, the surplus Navy lands are essential to Rhode Island's economic recovery. They argue that the state is "losing face" with industrialists across the country because of the bureaucratic tieups, and that chances of exploiting the potential of the Navy land may never be realized.

"How long can you hold people's hands and say, 'Here's this great industrial site, but we can't give you anything more than a one-year lease, because we don't own it yet'?" asked Roberson.

"If General Motors wanted to move their whole Detroit operation here right now, we couldn't do a thing about it. That's the frustration of it," he added.

Mr. CHAFEE. Mr. President, I wish to offer a few comments in connection with this article, which is a very fine one. The article deals with the 1973 decision which substantially reduced military installations across the country.

In that decision Rhode Island suffered some 50 percent of the total reductions that were suffered throughout the Nation. I believe it is important to remember that when such cuts take place, usually there is a good deal of publicity, a good deal of furor, and then the Nation, in its consideration, moves on to other problems and difficulties. But to those areas which have been hit by such cutbacks, especially when they are small areas, the remaining effects of such activities are truly devastating.

Our State is, as Senators know, a small one. As a result of the Navy pullout, we suffered the loss of some 17,000 military personnel and some 6,000 civilian personnel, with a total payroll loss of over $344 million. Our gross State product dropped some 6 percent immediately. Our per capita income dropped. Our unemployment rate rose from 6 percent to some 18 percent.

In all fairness, these problems are not entirely attributable to the loss of the Navy installations, but certainly a large part of it was.

A further difficulty I would like to point out, Mr. President, is that when such actions take place, I believe it behooves the Federal Government to move as rapidly as possible to provide a solution or amelioration of the effects of such cutbacks. Unfortunately, while our State has been trying to gain title to the former Navy lands, we have been caught in a good deal of Federal redtape dealing with this problem. Consequently only short-term leases are available to those companies choosing to come in and develop.

As we all know, a 1-year or a 2-year lease is insufficient to enable any company to make a major capital investment. I am extremely hopeful that the Federal Government will move swiftly in trying to resolve the difficulties which stem from the abandonment of those lands by the Navy so that our State can move in, obtain the lands and facilities, and move ahead with its vigorous industrial program.

Thank you, Mr. President.

CONSERVATION, COAL, AND URANIUM

Mr. BAKER. Mr. President, I would like to call the attention of my colleagues to an editorial in this morning's Washington Post entitled "Coal or Uranium?"

This editorial concerns our energy options for the rest of this century. Its conclusions are consistent with what the former Administrator of ERDA, Dr. Robert Seamans, has been saying for the past 3 years. New energy technologies such as solar and geothermal will emerge, but they will not be major contributors until the next century. For the next 25 years we must solve our energy problems with a mixture of conservation, coal, and uranium.

It is imperative, therefore, that Congress and the administration develop a realistic energy policy that chooses the correct mixture of these three resources. The consequences of trying to implement an unrealistic plan or of avoiding the issues altogether will be increasing impediments to needed economic growth and the inevitably attendant rise in unemployment.

Mr. President, this editorial highlights some of the strengths and weaknesses of our energy options. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 28, 1977]

COAL OR URANIUM?

To generate increased amounts of electricity, this country now has only two choices. It can either burn more coal or build more uranium-fueled nuclear reactors. Sometime in the next century other technologies will emerge—perhaps solar or geothermal generators. But for the next 30 years or so, this country must expect to depend on the sources that we already have. As Americans work their way toward a coherent national energy policy, it's necessary to weigh these two fuels, coal and uranium, against each other. What are the respective risks to health, safety and the natural environment?

Coal, on present evidence, is more dangerous than the present generation of nuclear reactors running on enriched uranium. Coal is also likely to be a bit more expensive than nuclear power in most parts of the country. The evidence is admirably summarized in the report published last week by a distinguished committee brought together by the Mitre Corporation with a grant from the Ford Foundation. The Mitre report argues that there is no reason for the United States to proceed in this century to build the plutonium breeder reactor. But uranium and the present commercial reactors are an altogether different story from plutonium and the breeder—and far less hazardous. Fuel policy is, above all, a weighing of hazards.

Coal smoke contains poisons that, inhaled over the years can kill people. That truth is widely known, yet there seems to be a tendency to discount it because people have been living with it for a long time. How many lives would it cost to carry out a massive increase in coal-fired power generation? Estimates vary, just as estimates of nuclear dangers vary. But they do not vary so much that a comparison is impossible. The Mitre committee concludes that "new coal-fueled power plants meeting new source standards will probably exact a considerably higher cost in life and health than new nuclear plants."

Large increases in coal consumption throughout the country would also probably affect the weather. Burning coal (or anything else) produces carbon dioxide, and there are already indications that humanity is burning fossil fuel fast enough to tip the natural balances in the atmosphere. The impact on the climate cannot be predicted accurately—and that's another reason for caution.

But certainly the list of imponderables also includes the chances of serious nuclear accidents. Mankind's experience with reactors has been very brief, and any calculation of danger has to be based on extrapolation rather than experience. Precisely because the uncertainties are very great, in coal as well as in nuclear generation, the Mitre committee wisely counsels using both. Nuclear energy will not be indispensable to this country for many decades, it argues. But a cautious and steady expansion of the reactor system would offer a valuable kind of insurance against unexpectedly severe consequences of greatly increased coal use.

There is one crucial point that the Mitre report does not directly address: How much electric power will the country need? Most of the power companies currently expect demand to rise about 5.5 per cent a year. That would mean more than trebling the country's generating capacity by the end of the century—requiring a truly awesome expansion of both coal and nuclear power. The conventional view is that any great reduction below that rate would jeopardize the nation's economic growth. But that's not necessarily true, if conservation is carried out with careful thought and preparation. The public issue is not just how to balance coal against nuclear power. First of all, it's deciding how much of either the country wants—with all of the risks and penalties that will inevitably accompany either. That's a question for President Carter and Congress, to be answered in the energy policy that they must hammer out this year.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no other requirement or request for time under the standing order. I yield back the remainder of my time.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of the pending business, Senate Resolution 110, which the clerk will state.

The assistant legislative clerk read as follows:

A resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the United State Senate, and for other purposes.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from North Carolina (Mr. HELMS) is recognized to call up six amendments. The time for debate on four of these amendments shall be limited to 20 minutes each and time for the other two shall be limited to 40 minutes, with the time on each amendment to be equally divided and controlled.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged against both sides on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

WHITE HOUSE CONFERENCE ON SMALL BUSINESS

Mr. ROBERT C. BYRD. Mr. President, there is one measure on the unanimous-consent calendar that was placed there last week. Without taking any time from the pending measure, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 54 on the unanimous-consent calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 105) requesting a White House conference on small business.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution, which had been reported from the Select Committee on Small Business, with an amendment to strike out all beginning with the preamble and insert the following:

Whereas the United States of America is entering on a crucial period of economic rebuilding;

Whereas such rebuilding can only be accomplished by a revitalization of the Nation's small business community;

Whereas small business provides 52 per centum of all the nongovernment employment in the United States;

Whereas small business provides 48 per centum of business output;

Whereas 43 per centum of the gross national product of the United States is produced by small business;

Whereas 97 per centum of all United States enterprises are defined as small business;

Whereas significant innovative and technological developments frequently originate in the small business community; and

Whereas the Senate Small Business Committee has actively recommended better development of the Nation's small business community to reduce unemployment, increase production, and provide for the future: Now, therefore, be it

Resolved, That it is the sense of the Senate of the United States that the President of the United States convene a White House Conference on Small Business with the help of the Senate Small Business Committee to develop specific and comprehensive recommendations to increase public awareness of

the importance of small business; to identify the problems of new, small, and independent business enterprise; and to suggest legislative, executive, administrative, and other appropriate governmental actions for encouraging and maintaining the economic interests and potentials of the American small business community in order to strengthen the overall economy of the Nation.

UP AMENDMENT NO. 101

Mr. NELSON. Mr. President, I send to the desk an amendment and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes unprinted amendment No. 101.

On page 3, after line 12, insert the following:

SEC. 2. The Secretary of the Senate is hereby directed to transmit a copy of this Resolution to the President of the United States.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The committee amendment, as amended, was agreed to.

The resolution, as amended, was agreed to.

The preamble was amended and agreed to.

The resolution, as amended, with its preamble, as amended, is as follows:

S. RES 105

Whereas the United States of America is entering on a crucial period of economic rebuilding;

Whereas such rebuilding can only be accomplished by a revitalization of the Nation's small business community;

Whereas small business provides 52 per centum of all the nongovernment employment in the United States;

Whereas small business provides 48 per centum of business output;

Whereas 43 per centum of the gross national product of the United States is produced by small business;

Whereas 97 per centum of all United States enterprises are defined as small business;

Whereas significant innovative and technological developments frequently originate in the small business community; and

Whereas the Senate Small Business Committee has actively recommended better development of the Nation's small business community to reduce unemployment, increase production, and provide for the future: Now, therefore, be it

Resolved, That it is the sense of the Senate of the United States that the President of the United States convene a White House Conference on Small Business with the help of the Senate Small Business Committee to develop specific and comprehensive recommendations to increase public awareness of the importance of small business; to identify the problems of new, small, and independent business enterprise; and to suggest legislative, executive, administrative, and other appropriate governmental actions for encouraging and maintaining the economic interests and potentials of the American small business community in order to strengthen the overall economy of the Nation.

SEC. 2. The Secretary of the Senate is hereby directed to transmit a copy of this resolution to the President of the United States.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. HELMS. Mr. President, I yield myself as much time as I may require.

AMENDMENT NO. 114

Mr. HELMS. I call up my amendment No. 114 and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes amendment No. 114.

On page 35, line 25, strike out "and" and insert a comma.

On page 36, line 2, before the period insert ", and the cost of the mailing (such cost to include the amount of postage which would be payable if the frank were not being used, materials, labor, and prorated overhead including the cost of the maintenance of computer lists)".

On page 36, line 7, strike out "and".

On page 36, line 7, before the period insert ", and the cost of the mailing (such cost to include the amount of postage which would be payable if the frank were not being used, materials, labor, and prorated overhead including the cost of the maintenance of computer lists)".

On page 36, after line 7, insert the following:

"(c) When a Senator disseminates information under the frank by a mass mailing (as defined in section 3210(a)(5)(D) of title 39, United States Code), the following statement shall be printed in a boxed area on the front page of each piece of the mass mailing: (1) in ten-point boldface type: 'This mailing prepared and delivered at taxpayers' expense'; and (2) in regular ten-point type a statement of the total cost of the mailing, such cost to include the amount of postage which would be payable if the frank were not being used, materials, labor, and prorated overhead including the cost of the maintenance of computer lines.".

The ACTING PRESIDENT pro tempore. The Chair inquires of the Senator whether this is a 20-minute amendment or a 40-minute amendment.

Mr. HELMS. Let us decide that later. I do not anticipate taking much time. I hope it will be a 20-minute amendment.

Mr. President, this amendment has been modified to correct a typographical error on page 2, line 17, changing the word "lines" to the word "lists."

I ask unanimous consent that Dr. James P. Lucier of my staff be accorded the privilege of the floor during consideration of Senate Resolution 110 and any votes thereon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. Mr. President, while waiting for Mrs. Helms to pick me up one evening recently, I decided to step inside the Senate print shop in the basement of the Dirksen Senate Office Building. Frankly, Mr. President, I had not fully known the purpose of that room. I had heard machinery clicking there from time to time. I had seen rolls of newsprint being delivered. I had seen various other signs of activity, and it all caused me to wonder what was going on. So I went in and I was greeted very cordially. The employees were most gracious and polite. Indeed, one of them was kind enough to give me a sort of "minitour" of the Senate print shop.

I was fascinated by the sheer volume of printed matter coming off the high-speed offset presses in that facility. Upon inquiry, I learned that the printing in process that evening included no less than 700,000—let me repeat, 700,000—copies of a senatorial newsletter; and that, Mr. President, was for just one Senator. Moreover, I learned that newsletters of at least one or two Senators have been sent out to over 1 million persons in their States, presumably on a regular basis.

I hope the Senate will stop for just a moment and examine the cost of all of these newsletters. These newsletters are treated by the Postal Service as first-class mail. Then there is the cost of the paper, ink, and other materials. There is the cost of labor, the care and maintenance of the printing equipment, and the very costly, continuous updating of computer lists. There is the value of the space provided in the Dirksen Building for the Senate printshop. There is extensive staff time taken up in preparation of the contents of newsletters.

So, Mr. President, if we start with 13 cents, being the first-class postage that is covered by the frank, and add all the other expenses mentioned, we can see these newsletters cost in the neighborhood of 25 cents apiece. Hence, when one Senator mails out a million copies, it is costing the taxpayers at least $250,000. Multiply that, if you wish, by the 12 months of the year and again by the number of Senators who send out newsletters, and add similar expenses in the House of Representatives—we are talking, Mr. President, about hundreds of millions of dollars of the taxpayers' money.

I know that Senators will respond that newsletters are worth the cost, because they keep the people informed. Frankly, Mr. President, I do not believe it for a minute. It may be that the only thing newsletters keep the citizens informed about is whom to vote for in the next election. But even assumig there is some information of value, is it necessary? There are plenty of newspapers, magazines, television, and radio stations across this country which do a pretty thorough job of coverage. Of course, any citizen who has a specific question can always write or telephone his Senator for information.

So the question emerges—and it is one, I believe, that Senators should face up to—do we really need to spend hundreds of millions of dollars of the taxpayers' money to give the citizens of this country this additional "information"?

More fundamentally, do the citizens, who are purportedly being benefited, want their tax money to be spent to be so informed? I do not know the answer to the question, Mr. President, but there is one sure way to find out. The pending amendment requires a simple statement on the front page of each newsletter distributed by a Senator to contain the declaration that "this mailing is pre-

pared and delivered at taxpayers' expense" followed by the total estimated cost of the mailing.

That is the kind of education I think the taxpayers ought to have, and I believe that Senators owe it to the taxpayers to give it to them. If the notation that it cost, for instance, $250,000 of a citizen's tax dollar to mail a newsletter causes such adverse reaction that no Senator would dare mail out a newsletter with such a notation, then I believe we will have had an adequate answer to the question whether the citizens really want these newsletters.

Mr. President, I suppose this could be called a sort of a "truth in packaging" amendment. If the citizens are to be thusly informed, let them first be informed about how much it is costing them to be informed. Surely no one could object to this amendment. Who would want to advocate that the citizen should not know how much their Senator is spending of their tax dollars to keep them informed?

We now are supposed to have Government in the sunshine, so let the sun shine in. If these newsletters are so necessary and the cost is so justified, then surely the citizens will see the wisdom of all of this and heartily approve it.

Mr. President, I reserve the remainder of my time.

Mr. NELSON. Mr. President, what was the time limitation on this amendment?

The ACTING PRESIDENT pro tempore. There is a complicated time agreement on the six amendments by the Senator from North Carolina. Four of them are to have a 20-minute limit and two are to have a 40-minute limit to be selected by the Senator from North Carolina. So it is either a 20-minute limit or a 40-minute limit.

Mr. HELMS. Mr. Presdent, may I ask how much time I consumed?

The ACTING PRESIDENT pro tempore. The Senator has used 10 minutes.

Mr. HELMS. I choose to make this a 20-minute amendment, 10 minutes to a side.

The ACTING PRESIDENT pro tempore. The Senator has 10 minutes.

Mr. NELSON. Mr. President, I yield whatever time is desired to the Senator from Montana.

Mr. METCALF. I thank the Chair.

Mr. President, last year Senator Mansfield in the Democratic conference and Senator Hugh Scott in the Republican conference appointed an ad hoc committee to consider matters arising in connection with a lawsuit that was brought against the Postmaster General to declare the franking statute unconstitutional.

Affidavits have been made by all of our administrative assistants, and a massive file of information with respect to actual use of the frank has been made available to the court. Just one of the pleadings made on behalf of the subpenaed Senate employees is about 3 or 4 inches thick and weighs several pounds.

The ad hoc committee has made a thorough study of the franking privilege and the use of the frank. The committee has found, for example, that use of the frank by Senate offices has not been by any means excessive. In fact, from 1973 to 1975, 92 Senators distributed less than two pieces of mail per voting-age constituent each year. Considering the fact that it is our responsibility as Senators to maintain two-way communication with our constituents, only two pieces of mail per year indicates not that we are overusing the frank but that we are underusing it. Even more revealing is the fact that 81 Senators sent out less than one piece of mail per voting-age constituent each year, 1973 to 1975.

The Senator from North Carolina is a distinguished and able Senator and a good friend of mine. But he may have the capability to report to his constituents by other means than newsletters. Mr. President, in the State I represent, I have tried to send columns to the weekly newspapers. Except for two weekly newspapers none of them would print the columns. And the weekly newspapers that printed it for a time are now out of business. So sending columns to weekly newspapers is out, where my State is concerned. I have tried to send weekly radio programs. But the stations, play them on public-service time—about midnight every night. I have tried to send television programs, but the television stations will not even use my clips on news breaks.

The only way that I have to communicate directly with my constituents is by sending them newsletters and telling them how I feel about the legislation that is coming to the floor of the Senate.

In the ad hoc committee we discovered that there is no relationship between the volume of mail sent by a Senator and his status as a candidate for reelection.

The ad hoc committee has published a committee print entitled "Communication With Constituents: The Senator's Duty To Inform the People." In that print is an analysis of the use of newsletters, including polls that have been taken on the public's reaction to newsletters, together with the history of the franking privilege, which has been in use ever since the American Revolution.

Mr. President, I ask unanimous consent that this committee print be made a Senate document.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. METCALF. We have found in the ad hoc committee, which consisted of representatives of the minority as well as the majority, that anything unnecessarily restricting use of the frank would be contrary to the public interest. Every poll indicates that the citizen today wants and needs more and not less information about the activities of their elected representatives.

Mr. President, I ask unanimous consent that excerpts from the committee's report pertaining to the public's evaluation of newsletters be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS

Today, newsletters and similar information mailings by congressional offices receive widespread attention from the public—and the response is generally favorable.

In a survey conducted for a Senate subcommittee in 1973, for example, it was found that about three out of every four respondents had received a letter or mailing from their representative in the U.S. House of Representatives. About six out of 10 had received a similar mailing from their Senator.

When asked for their evaluation and reaction to these communications—according to the Louis Harris and Associates organization—a majority of those surveyed gave positive responses. More than half (57%) said the communications contained "useful information," and about the same number described them as "interesting to read." Just under half of the respondents (47%) indicated that such mailings "tell you how" your congressional representatives are voting.

Through such communications—in correspondence, as well as in travel to his State or district, in talks with constituents to discuss their problems, in speeches and lectures—the Member of Congress is not merely providing the citizen with "useful information." He is also getting to know and to feel the issues, the competing interests, desires, complaints, and needs which he as a representative and the legislature as a representative institution, if both are to carry out the functions intended for them, must weave into some sort of working resolution.

Mr. METCALF. And the committee's report further stressed the historic importance of newsletters and the franking privilege in a concluding section, Mr.President, and the relevant portions follow:

As is shown elsewhere in this report, the franking privilege predates the Constitution, and the Congressional "circular letter"—or newsletter—was in use shortly after its ratification. Indeed, it was a Federal grand jury investigation into a Congressman's conduct in circulating just such a letter, in 1797, which prompted Jefferson and Madison to defend—and, furthermore, to encourage—their use as not only "of right" but also "of duty," for communicating "information of the public proceedings," for "asking and receiving" the advice and opinions of constituents.

Such correspondence, they argued, was essential "to give to the will of the people the influence it ought to have, and the information which may enable them to exercise it usefully. . . ."

Today, to supplement information available through commercial press and broadcast outlets, all Senators mail, in quantity, various publications and documents to their constituencies. Because access to the news media is not always available, almost all employ the "newsletter" technique to provide information about governmental activities and to elicit the views of their constituencies.

Such informational mailings from Congressional offices receive widespread recognition from the public. The response to them is generally favorably. And it is the use of the frank in mailing newsletters and other informational materials that remains the most effective method the individual Senator has of communicating directly with and thereby remaining accountable to those he represents.

The franking privilege—for correspondence to and from delegates of the United Colonies—was extended to Members of the Continental Congress as early as 1775. In 1789—in the First Congress—it was extended to Members of the Senate and the House of Representatives, again for correspondence to and from their constituencies.

Then, as now, the reasons for encouraging such correspondence were compelling. The privilege, it was pointed out during debate

on motions to eliminate it in the Second Congress, "was not assumed by the members for their own private accommodation but for the benefit of their constituents, to transmit to them every necessary information respecting the operations of the General Government, and to receive from them such information as they might have to communicate." The "motives for adopting certain measures ought always to be explained to influential characters in the different parts of the Union," it was added, thus "reconciling the people to the measures of Government. . . ." And further, "the citizens have a right to expect information, not only of the acts of government, but also the principles upon which they were grounded."

Without this privilege, it was argued, the right of petition would be curtailed, and the citizens far from the seat of government would be cut off from any direct information as to the affairs of State.

Today, there is every indication that the people of this Nation want and need more, not less, information about the activities of their government and their elected representatives.

Inhibiting the exchange of information between Congressman and constituent will diminish, not enhance, the influence the people must have in our democracy, the influence that flows from the right they have exercised, "of being governed by laws to which have consented by representatives chosen by themselves. . . ."

Mr. METCALF. Certainly, there are millions of pieces of mail going out. There are millions of people in the United States. Certainly, there are millions of communications going out, but the fact remains that 81 Senators—an overwhelming majority—sent out less than one piece of mail per voting age constituent each year, from 1973 through 1975. That is just not enough communication from Senators to their constituents.

Mr. President, the business of the Senate and Senators in communicating with constituents is a basic duty we have under the Constitution. The opportunity for us to communicate directly with our constituents, to tell them what is going on in their Federal Government, to tell them how we feel about pending and proposed legislation, is at the heart of the democratic process.

Anything that would inhibit or unduly limit that opportunity for communication is something that I feel would be not only contrary to the public interest but abhorrent to the American people as well.

Mr. President, I yield to the Senator from Wisconsin the remainder of my time.

Mr. NELSON. Mr. President, how much time remains?

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin has 3 minutes.

Mr. NELSON. Mr. President, I say to the distinguished Senator from North Carolina that with respect to one of his amendments on franking, I have mailings 180 days before a general election, 90 days before a primary. We will get to that issue later.

The issue was before us in the committee, because the House had gone to 60 days. I was pushing for 90 days which because of the timing of the primary and general elections in my State would amount to 6 months. We finally took 60 days, knowing that we are going to have to deal with the House on this question when the Preyer committee has finished.

So even though I think I would end up about where the Senator is on that amendment, I am inclined not to do anything more on franking than we did, until the Preyer committee comes along with a statute.

How much time remains, Mr. President?

The ACTING PRESIDENT pro tempore. The Senator has 1 minute remaining.

Mr. NELSON. Does the Senator wish me to yield that minute to him?

Mr. HELMS. The Senator is most gracious.

Mr. President, I say to the distinguished Senator from Montana that I do not disagree with a word he has said. I agree that it is essential that we communicate with our constituents. The point of this amendment simply is that Senators communicate to them information in addition to that which Senators would perhaps like to communicate—that is to say, the cost of educating or communicating with them.

I am not passing judgment on the newsletters. It so happens I do not send them out. That is a judgment I have made. Other Senators make other judgments. I simply am saying that the taxpayers have a right to know how much all this "education" is costing them.

I thank the Senator from Wisconsin for yielding to me.

Mr. NELSON. Mr. President, I ask unanimous consent that this amendment be temporarily laid aside so that we may proceed to each amendment of the Senator from North Carolina. We may reach an agreement to vote tomorrow.

Mr. HELMS. That is satisfactory to me, and I thank the Senator.

Mr. NELSON. I yield to the majority leader on this.

Mr. ROBERT C. BYRD. Mr. President, is it agreeable with the distinguished Senator from North Carolina that we put this vote over until tomorrow?

Mr. HELMS. Yes, indeed.

Mr. ROBERT C. BYRD. We discussed that with the Republican leader earlier, and he seems to be agreeable to it.

Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized on tomorrow, the Senate resume consideration of the Code of Conduct, at which time the question be on the pending amendment by Mr. HELMS, No. 114.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. HELMS. Mr. President, reserving the right to object—and I shall not object—the Senator from North Carolina wishes to reiterate publicly what he has said to the distinguished majority leader and to the distinguished manager of the bill: I do hope that on this amendment we can have an up-and-down vote and not a tabling motion. If the Senator from North Carolina can be accorded that courtesy, he will be most grateful.

Mr. NELSON. As the Senator knows, I have made the argument with other Senators that a motion to table is easier to handle because the Members then know the position of the manager is to table. But I respect the desires of the Senator from North Carolina.

Would the Senator be agreeable, then, if we had a straight up-and-down vote on this amendment and I moved to table the other four?

Mr. HELMS. None whatever. I would appreciate the accommodation of the Senator.

Mr. NELSON. I have no objection to this—that on this amendment there be a straight up and down vote, and it is the first amendment, No. 114.

Do I correctly understand that the majority leader's unanimous-consent request also will provide that the next four amendments of the Senator from North Carolina, if he calls them up today and discusses them, will follow in succession behind the first one?

Mr. ROBERT C. BYRD. That was going to be my next request, because I think the distinguished Senator from North Carolina had indicated earlier to me and to the Republican leader that this would be agreeable.

Mr. HELMS. That is correct.

The ACTING PRESIDENT pro tempore. Is there objection to the first unanimous-consent request? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the disposition of the pending amendment, No. 114, the Senate then proceed to vote on the remainder of the amendments by Mr. HELMS, in sequence, as he calls them up today.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. METCALF. Mr. President, the Sen-Senator from Wisconsin yield?

Mr. NELSON. I yield to the Senator whatever time he desires, from the bill.

Mr. METCALF. Mr. President, the Senator from Wisconsin knows that the Senator from Montana objects to tabling motions and prefers to vote on the major issues.

Inasmuch as I have opposed the first amendment of the Senator from North Carolina, I wonder whether we can have an up and down vote on that issue, so that the Senator from Montana will not have to vote against his own convictions insofar as a tabling motion is concerned.

Mr. NELSON. As I understand it, the agreement between the Senator from North Carolina and myself on this amendment is that——

Mr. METCALF. The second amendment?

Mr. NELSON. We agreed that on the pending amendment there would be a straight up and down vote.

Mr. METCALF. But on the first amendment, to which I objected, I would like to have a straight up and down vote, also.

Mr. NELSON. That is the one on which we have agreed to have a straight up and down vote. We agreed that on the next four there would be motions to table.

Mr. METCALF. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a motion to table be in order on the amendments

to be offered by Mr. HELMS, with the exception of the first amendment, No. 114.

The ACTING PRESIDENT pro tempore. Without objection it is so ordered.

The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, the distinguished Senator from New Mexico (Mr. SCHMITT) is away on official business today, and he has asked the Senator from North Carolina to delay consideration of amendment No. 112, which I had intended to call up at this time. With the approval of the able manager of the bill, I shall defer calling up amendment No. 112 until tomorrow, and proceed with amendment No. 113, which is at the desk, and I ask that it be stated.

AMENDMENT 113

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment numbered 113.

The amendment is as follows:

On page 35, between lines 14 and 15, insert the following:

"2. A Senator may not use the frank for any mass mailing (as defined in section 3210 (a) (5) (D) of title 39, United States Code) on more than two occasions during any calendar year.".

On page 35, line 15, strike out "2" and insert "3".

On page 35, line 18, strike out "3" and insert "4".

On page 36, line 8, strike out "4" and insert "5".

On page 36, line 14, strike out "5" and insert "6".

On page 36, line 22, strike out "6" and insert "7".

Mr. HELMS. Mr. President, I yield myself such time as I may require. The time on this amendment will be 20 minutes, equally divided.

Mr. President, this amendment simply proposes to restrict the number of newsletters that may be mailed under the frank to two newsletters per calendar year.

Frankly, I would rather see the number reduced to zero, but if we are going to have newsletters, if it is indispensable that the citizens share Senators' wit and wisdom at the taxpayers' expense, then I am inclined to think that twice a year for such an educational process ought to be sufficient.

A senatorial newsletter, as I understand it, is certainly not intended to give an up-to-date synopsis of recent events. But I also understand that a newsletter is intended to give a broad overview of the Senator's activities and the activities of Congress viewed through the Senator's eyes. Therefore, it seems to me, costing what they do, that it is appropriate to limit these excursions into intellectual enlightenment to two a year.

We are all talking about economy in Government. But, as Mark Twain remarked about the weather, few people are doing much about it. Let us do something to encourage economy in Government, starting with our own practices.

I noticed the other day the Federal debt is now in the neighborhood of $655 billion, which is a pretty expensive "neighborhood" for the taxpayers, when one considers that the interest alone on this Federal debt is costing almost half as much as it cost to operate the entire Federal Government just 15 years ago.

So we can strike a blow for economy in Government and we could go home and honestly say we are practicing what we are preaching, by cutting newsletters down to two a year.

Not only would the semiannual restriction hold down costs, but it would also minimize the inherent political benefits, which I am sure our political opponents 2 years or 4 years hence will appreciate as a matter of fair play.

I happen to believe the majority of the American citizens would favor this restriction to two per year. As a matter of fact, I think they would be most grateful to be relieved of the constant barrage of often unwanted and unneeded "information" from their friendly Senator.

Mr. President, I reserve the remainder of my time.

Mr. NELSON. Mr. President, what the committee did do in the resolution, Senate Resolution 110, was to provide an increased period before an election during which no mass mailings could be franked 60 days before a primary and 60 days before a general election.

I had, in fact, advocated 90 days for each, and in many States that would, in effect, be 180 days—it would in my State.

But the House went to 60 days, and we decided, as I stated a few moments ago, we would conform our rule to the House, and then see what agreement could be reached with them when they sent over legislation.

We also provided a prohibition against franking any mailing which is printed with private funds because we felt that the newsletters should be printed only with paper officially furnished, rather than with campaign funds or private funds, which have been used in some instances in the past.

We also provided a registration of mass mailings for public inspection, and prohibition against storage of political lists in computer facilities.

I realize there are other provisions that, at least, this Senator would support. As I mentioned previously, a longer period in advance of primaries and general elections would be one of those things. But this was the agreement we could reach in committee unanimously, and that is the reason at this time why I would vote opposing each of the Senator's amendments, although, as I said, I may support one of them later in the year.

Mr. HELMS. I thank the Senator.

Mr. NELSON. How much time does the Senator from Wisconsin have, Mr. President?

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin has 7 minutes remaining. The Senator from North Carolina has 6.

(The following proceedings occurred later in the day and printed at this point in the RECORD by unanimous consent.)

Mr. HARRY F. BYRD, JR. I say to the distinguished Senator from North Carolina, as I understand it, amendment No. 113, offered by the Senator from North Carolina, would limit the number of newsletters per year to two.

Mr. HELMS. That is correct.

Mr. HARRY F. BYRD, JR. I wonder if the Senator from North Carolina would consider modifying that amendment to an extent.

First, let me say that I think it is desirable and it is a good idea to put a limit on the number of newsletters which could be sent by the Members each year. It seems to me that two is limiting, shall we say, too much. I wonder if the Senator from North Carolina would be willing to modify his amendment to make it four.

Mr. HELMS. The distinguished Senator from Virginia, Mr. President, has discussed this with me and he is very persuasive. I shall certainly be glad to modify the amendment. I send the modification to the desk.

Mr. HARRY F. BYRD, JR. I think it should cause the amendment to have a better chance of passage were the figure 4 inserted in place of the figure 2. I would like to see a limitation passed, I may say.

Mr. THURMOND. Will the distinguished Senator yield for a question?

Mr. HARRY F. BYRD, JR. Yes.

Mr. THURMOND. What is considered a mass mailing? Would it be 5,000, 10,000, 20,000?

The PRESIDING OFFICER. Is there objection to the modification?

Mr. NELSON. I have no objection.

Mr. THURMOND. I wonder what the Senator considers a mass mailing. First, there are some Senators that, I understand, send to everybody in their State, maybe, 400,000 or 500,000 or more, several times a year. Other Senators send 10,000 or 20,000 each month.

Mr. HELMS. I believe the Senate Committee on Rules has stipulated that a mass mailing is defined as 500 or more. Is that not correct, I ask the Senator from Wisconsin?

Mr. NELSON. A mass mailing is defined as 500 pieces or more.

Mr. THURMOND. I wonder, if that is the case, then the Senator who sends, say, only 1,000, if he sends it four times a year, is sending only 4,000, whereas, if some other Senator sends a half million 4 times a year, that is 2 million. The Senator might want to consider some number, maybe, according to the size of the State, rather than the number of mailings?

Mr. HELMS. The Senator from North Carolina would be willing to consider any suggestions of the able Senator from South Carolina. But what the Senator suggests would involve a rather complicated formula.

Mr. THURMOND. He might think on that. I know one Senator in a State might send to everybody four times a year, over 400,000. Then the other Senator probably sends 10,000 to 20,000 at more frequent intervals, but does not aggregate half as much as the first Senator, who sends only four times a year.

The PRESIDING OFFICER. Is there any objection to the modification of the amendment by the Senator from North Carolina?

The amendment was modified.

Mr. NELSON. Mr. President, I wish to add just a comment as to amendment 113.

The PRESIDING OFFICER. The Senator will proceed.

Mr. NELSON. I think it should be pointed out, if I understand the amendment correctly, that it now would allow four "mass mailings" per year. A mass mailing is defined as a mailing of 500 pieces or more of the same material within your State.

We have the anomaly, then, that someone might send four newsletters of 500 or 600 each totaling 2,000 or 2,400 total in the year or four newsletters of 600,000 each, which would be 2,400,000.

I do not know what that accomplishes. But this Senator wishes to point out that there are some issues which are of special consequence to one group: perhaps to farmers, to the bar such as an issue involving the appointment of a member to the Supreme Court, or it may be a question of interest to a localized area within the State respecting some Federal project. To provide in order to get to that one key issue, one would have to send a mass mailing to the whole State really does not make much sense to me. Yet this would be the effect of the amendment. No one could afford to send a mass mailing to one group on an issue, because it would count as one of their four mass mailings.

Mr. NELSON. I have nothing further to say on it. When the time is yielded back, I repeat that it will be my intention tomorrow to move to table this amendment as well as the next three if they are called up.

I am prepared to yield back the remainder of my time.

Mr. HELMS. Mr. President, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time is yielded back.

The Senator from North Carolina is recognized to call up a third amendment.

Mr. HELMS. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. HELMS. Does the Chair understand there will be a roll call vote on these amendments, one of them up or down and the other four—

The ACTING PRESIDENT pro tempore. If the yeas and nays are ordered that has been the unanimous-consent agreement.

Mr. HELMS. Mr. President, I ask unanimous consent that when there are enough Senators on the floor to achieve a sufficient second that it be in order to ask for the yeas and nays en bloc for all of these amendments.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I shall not object.

Mr. HELMS. With the understanding that the majority leader and I reached earlier.

Mr. ROBERT C. BYRD. I do not object to this.

What the Senator is asking is unanimous consent that it be in order to order the yeas and nays on these amendments at any time and with one show of seconds; is that correct?

Mr. HELMS. That is correct.

Mr. ROBERT C. BYRD. I have no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 158

Mr. HELMS. Mr. President, I call up amendment No. 158 and ask that it be stated.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes amendment No. 158.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 23, line 5, strike out the period and insert "; or ", and after line 5 insert the following:

"(4) from an organization established in a foreign country if (A) the government of such country certifies that the organization is organized under the laws of such country as a charitable or educational organization or foundation, and that no substantial part of its funds are provided by the government of such country, (B) such gifts are tendered only in connection with an educational visit to such country, and (C) the organization's name is on a list, to be maintained by the Select Committee on Ethics, of organizations that have been so certified within twelve months preceding the tendering of such gifts.".

Mr. HELMS. Mr. President, this amendment would clarify the status of foreign travel by Senators and their staffs when that travel is paid for by charitable and educational foundations in foreign countries.

rule XLIII, dealing with "gifts," the definition of the word gift includes "anyfinition of the word gift includes "anything of value, including food, lodging, transportation, or entertainment and reimbursement for other than necessary expenses, paragraph 3(a), page 23, lines 7–11. Rule XLIII forbids the acceptance of such gifts in an aggregate amount of more than $100 per year from any person, organization, or corporation having a direct interest in legislation or from any foreign national.

The phrase "from any foreign national" is ambiguous in that it does not clearly state what is meant by "any foreign national." The report which accompanies Senate Resolution 110 says the following:

The committee intends that "foreign national" be given the same definition as it has under the Federal Election Campaign Act 2 U.S.C. section 441(e), which defines it to include (1) a "foreign principal", as the term is defined in the Foreign Agents Registration Act of 1938 (22 U.S.C. section 611(b) or (2) an individual who is not a citizen of the United States, or a resident alien. Under this definition, the term "foreign national" would include a foreign citizen; a corporation, a partnership, or other business enterprise organized under the laws of a foreign country and having its main place of business in that country; a domestic business entity subsidized, directly or indirectly, by a foreign principal, a business entity supervised, directed, controlled or financed in whole or substantial part, by any foreign government or foreign political party; or a foreign government or a foreign political party.

Now it is quite clear from this that the thrust of the prohibition goes against accepting gifts from a foreign government or political party, or from an individual or business, particularly one with commercial interests affected by U.S. laws. Such prohibition is sensible and valuable. Both the U.S. Constitution and the laws of this Nation already forbid the acceptance of gifts from a foreign government. And it is clear that individuals or commercial enterprises could well have concealed motives that could be embarrassing later to any Senator or staff person who accepted such gifts.

But on the other hand, the concept of international exchanges of scholars, business leaders, and political figures is an established part of international relations. Many foreign leaders are brought to this Nation as guests, both through private foundations and through U.S. Government programs. Our own international visitors program, administered by the State Department, brought 2,184 foreign visitors in 1975 and 2,102 foreign visitors in 1976. This program began with the Fulbright-Hayes Act of 1961 and has always been considered a strong asset working for international understanding.

Of course many of these official visitors are members of parliamentary bodies and high government officials. No one has ever suggested that the fact that U.S. Government funds are used to provide transportation and hospitality is in any way subverting their countries or suborning their integrity. These programs contribute directly to a broader understanding of the U.S. way of life—its faults and its virtues—throughout the world. Without such programs, the leaders of other nations would have few opportunities for direct personal experience of our culture and life.

I think that it is unanimously agreed that the interest of the United States in such programs is not to bribe government officials and scholars of other countries, but to present them with the opportunity for the free exercise of their own judgment.

It only makes sense, therefore, to turn the programs around and look at them from the other nations' point of view. The travel of U.S. Government officials—including Senators and their staffs—is an important opportunity to secure greater understanding and even personal friendships among world leaders. To deny other nations the opportunity of returning hospitality and reciprocating such invitations would be the height of hypocrisy. We cannot pretend that other nations are attempting to exert undue influence by the offer of hospitality to Government officials when we are offering such hospitality to them and congratulating ourselves upon our disinterested motives.

Now, unfortunately, the U.S. Constitution raises a bar to allowing U.S. Government officials from accepting the hospitality of other governments. We cannot, through legislation, allow Senators and their staffs to participate in government programs of the very kind that we provide. But there is no reason at all why Senators and their staffs cannot accept the hospitality of entities established abroad which have disinterested motives of international understanding and friendship.

My amendment provides a test for such disinterested motives. It would exclude from the category of unacceptable gifts the gift of transportation and related expenses from bona fide charitable and educational foundations organized abroad. We cannot be in the position of saying that our Rockefeller Foundation or our Ford Foundation or whatever is acting from disinterested motives in assisting foreign nationals and at the same time attempt to assert that similar foundations organized in other countries are attempting to exercise undue influence in assisting U.S. citizens and leaders.

There are such foundations in other countries, and they have in the past invited U.S. leaders to their countries so that our leaders can learn more about those counties. Some allegations have been raised whether such foundations are truly independent, or acting under government policy. We have no way of investigating such allegations. Indeed, the very nature of international relations prohibits such investigations. We cannot meddle in the internal affairs of other countries.

We can impose a test, however; any foreign foundation that wants to invite U.S. Senators can seek from their government certification that they are organized under the prevailing laws of their country as a charitable and educational foundation, and that no substantial part of their funds come from the official government funds of that country.

This would go about as far as we could in assuring that the foundation was bona fide, and that it was funded from the private sector. At the very least, it would provide a reasonable assurance upon which members of this body and their staffs could rely in complying with the laws of this country and the ethics of the Senate. By limiting the acceptance of such gifts to travel and related expenses only, my amendment would insure that the gift was made only in the name of international understanding. By limiting the donors to foundations not funded in any substantial amount by foreign government funds, my amendment insures that the gift of travel meets the constitutional test.

This amendment assumes, of course, that the country in question has a nongovernmental economic sector. Because of the constitutional prohibition, I think that any arrangement with a country that excludes a private sector is highly dubious. But where there is a private sector, and that private sector can contribute to a charitable and educational foundation, thereby establishing a disinterested motive, then it is both proper and desirable to promote such exchanges. It will not cost the U.S. taxpayer 1 penny, and it will build a strong relationship precisely with those countries which encourage a private sector.

One additional feature of my amendment is that the Select Committee on Ethics would maintain a list of qualified foundations that have been certified within the previous 12 months. This would insure that the status of the foundation is current, and that Senators and their staffs would have an authoritative source with which to check their information before accepting foreign hospitality.

Needless to say, Mr. President, any gift of travel accepted from a foreign charitable and educational foundation under rule XLIII also is subject to public financial disclosure under rule XLIII, paragraph 2(A)5(c). Public disclosure will work to curb any abuse which might creep in due to excessive acceptance of foreign hospitality.

Mr. President, I reserve the remainder of my time.

Mr. NELSON. Mr. President, I yield myself whatever time I may need.

I wonder if the Senator from North Carolina would yield to a question.

Mr. HELMS. Certainly.

Mr. NELSON. On line 5, the language reads, "and that no substantial part of its funds are provided by the government of such country."

Just to ascertain the legislative intent if a charitable or educational organization in a foreign country is treated in terms of taxes the same way we treat them here in the United States, that is to say, they are not required to pay taxes, is it the intent of the Senator that that would be considered a contribution by the Government?

Mr. HELMS. No, indeed. It would be on the same basis that we treat it in this country.

Mr. NELSON. So that it is clear: if it is a tax-exempt organization, the fact that it is tax exempt would not mean that it is receiving a substantial part of its funds by the Government?

Mr. HELMS. That is correct.

Mr. NELSON. Mr. President, there is a statute, and I do not know whether we have it handy, that provides that staff and Members of Congress may participate in cultural exchanges. I do not have the statute. I do not know the breadth of it. It may very well be affected by this amendment.

We also have another amendment that relates to this issue. We might want to offer it to the amendment of the Senator from North Carolina.

So let me suggest that since we are not going to deal with it until tomorrow anyway, the Senator's staff and the staff here, as well as the Senator, check the statute, plus the proposed amendment we have, and see how it fits in with his amendment.

Mr. HELMS. Very well, we will do that.

I thank the able Senator for his suggestion.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

Mr. HELMS. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time has been yielded back. The Senator from North Carolina was recognized to call up his fourth amendment.

AMENDMENT NO. 111

Mr. HELMS. Mr. President, I wonder if the able manager of the bill will indulge me a quorum call charged against the resolution itself for just a moment, no longer than 2 or 3 minutes?

Mr. NELSON. Mr. President, I ask unanimous consent that the quorum call be charged against my time on this amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment of the Senator from North Carolina should be sent to the desk so that the time can be run against it.

Mr. HELMS. I thank the Senator. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I call up amendment No. 111, which is at the desk, and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment numbered 111.

The amendment is as follows:

4. If a Member, or an employee in a Member's office (including an employee employed under section 705 of S. Res. 4, Ninety-fifth Congress), engages in foreign travel and, in connection therewith, claims any payment or accepts any funds from the United States Government (including foreign currencies made available under section 502(b) of the Mutual Security Act of 1954 (22 U.S.C. 1754 (b)), or is furnished any transportation, food, lodging, or other service or facility by any department or agency of the United States Government, such Senator shall cause to be printed in the Congressional Record, on or before the fifteenth day of each month (or as soon thereafter as possible), an accounting of such travel during the preceding month. Such accounting shall include—

(a) the name of the individual or individuals who engaged in such travel and their purpose or purposes in traveling;

(b) the amount of such payments claimed and such funds received;

(c) a description of such transportation, food, lodging, or other service or facility furnished;

(d) the itinerary, and the number of days or hours spent at each stop during such travel; and

(e) the nature of the business transacted during such travel, and the number of hours spent each day in the transaction of such business.

Mr. HELMS. Mr. President, this amendment is intended to carry out further the purposes of the ethics resolution; namely, to increase public confidence in the actions of the Members of this body. This amendment would simply require that whenever a Senator or an employee in his office engages in foreign

travel at the taxpayers' expense, then he must make a full report on such travel to the public.

Mr. President, it is the experience of the Senator from North Carolina that there are few activities that arouse more suspicion and indignation among the people than when Members of this body travel abroad at the taxpayers' expense. The Senator from North Carolina knows that many Senators consider much of this criticism to be unfair. There is general agreement that it is important for this body to have Senators who are experienced and well-informed in world affairs. When Senators travel abroad on official business, there is always a well-filled schedule of meetings and inspection trips.

But frankly, Mr. President, it is very difficult to convince the average citizen that such trips are an important and necessary part of the Senate's business. The Senate is a privileged group. Those who are among the privileged few and who therefore have the opportunity for frequent foreign travel sometimes forget how the voter feels who does not have the same opportunities. It is very difficult to convince the voters that these trips are not luxurious pleasures indulged in at the expense of taxpayers who earn far less than the Members of the Senate. There is no doubt that the pay raise—which the Senator from North Carolina vigorously opposed—has made the public perception of the U.S. Senate, indeed of the entire Congress, even worse. It is not by chance that such trips are commonly labeled "junkets" by the press, with all the connotations of wastefulness that such a word conjures up.

It is precisely for this reason that the Senator from North Carolina has never traveled abroad at the taxpayers' expense, and unless I change my view of the situation, I do not think I will. That is a value judgment I have made. I criticize no Senator who goes on foreign trips; that is his judgment to make. Nothing in this amendment, and nothing in the remarks that the Senator from North Carolina is making, is intended in the way of criticism of Senators who do travel abroad at the taxpayers' expense.

The Senator from North Carolina fully realizes that it is the consensus of the Senate that such trips are justified. But the Senator from North Carolina also realizes that this consensus is not extensively shared outside of the Senate, and he has tried to bend over backward to accommodate the feelings of the people.

Mr. President, it is public confidence in Congress that is on the line now. It is a problem, which may be, in fact, a good deal more serious than some Senators realize. It must be corrected.

The only cure for this problem is full disclosure, so that the people back home can know precisely and accurately what is going on, how their money is being spent, how the time of their Senators and their Representatives is being used, and for what purposes. I happen to think that full disclosure is all we needed in the first place, when we set out on this ethics bill. But when the Senate is using the taxpayers' money for purposes which the Senate considers legitimate, but are not fully understood by the American people, that is when the problem arises, and that emphasizes the very clear point that the only real remedy is full disclosure.

Let me draw an analogy with a similar problem: The situation which arises when the Congress goes into recess. As we all know, the press has been in the habit of describing nonlegislative periods as "vacations." But all of us also know that such periods are a time of activity which is sometimes more extensive and intensive and sometimes includes a more exhausting schedule of constituent visits and services than the periods when the Congress is in session. My colleagues may recall how effectively Representative PAUL FINDLEY of Illinois responded last month to this kind of criticism by publishing in the Washington Post a complete schedule of his activities on a recent trip to his district.

The point is that by the simple expedient of disclosing what is really involved in the work of the Congress during congressional recesses, the distinguished Representative, in one stroke, rebutted the contention that there were periods of "vacation."

Let us not criticize the people back home for misunderstanding Congress. Let us face the facts: Most voters work hard for a living, and they work constantly at the job with perhaps 2 weeks of vacation a year. When they are away from their place of work, they are on vacation. It is only natural that they assume that our place of work is the Senate Chamber, and that when we are away we are on vacation, too. But I reiterate, for emphasis, that simple disclosure, and only simple disclosure, is a sure rebuttal.

So it is, too, with foreign travel by Senators. We must face the fact that foreign travel is a privilege denied to most Americans. They regard such travel as a vacation, when Senators argue that as a matter of fact it is not. But whether it is or whether it is not, a Senator's travels overseas are a privilege which must not be abused when the taxpayers are working to pay for it. The simplest way to build public confidence or to regain public confidence is full and frequent disclosure of the cost of foreign travel paid for by the taxpayers, the nature of the business that requires it, and the time involved in official business. Such disclosure, assuming that all of these trips are for real, and are necessary, will not only build public confidence; it will be a self-enforcing mechanism against any tendency by any Senator or any staff member toward the abuse of taxpayers' funds.

And why should not the taxpayers know? I think they are entitled to know how their money is being spent, and I would hope that most Senators would leap with alacrity to share the truth with the taxpayers.

Since my amendment requires monthly publication in the CONGRESSIONAL RECORD of the relevant information, any taxpayer will be able to find out quickly what his Senator is doing and where he is traveling with the public's money.

Hopefully, the local press will study the CONGRESSIONAL RECORD also, and help keep the public informed about senatorial travel at the taxpayers' expense.

Mr. President, there seems to be an implication in much of the oratory of the past few days that the spending of taxpayers' money is ethical if the Senate as a whole authorizes and appropriates the money. But just because something takes place in the public sector is no reason to assume that abuses cannot occur, or that those who take advantage of such spending are not compromised. The only way to make sure that the people of this Nation accept and understand what we do is to make it completely clear what we are doing.

It is especially important when we are dealing with what appears to many citizens to be a luxury benefit to Senators. No Senator is ever forced to travel abroad, either at taxpayers' expense or otherwise. Foreign travel is entirely voluntary. It can be of great value to our work. But if the Senate is ever going to convince the voters that such travel, at their expense, is necessary, then we must place all the details on public view. In my judgment, that is what this amendment is all about.

(Mr. INOUYE assumed the chair as Presiding Officer at this point.)

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I am delighted to yield to my friend from Virginia.

Mr. HARRY F. BYRD, JR. May I ask the able Senator from North Carolina how his amendment—which I am inclined to support, by the way—would affect a situation like this: Two years ago the Senator from Virginia, at the request of the Jewish community in our State, led a delegation to Israel.

I paid my own expenses. I paid for the entire cost myself. But while I was there I stayed with a former Member of the Senate, who was then Ambassador to Israel, Ambassador Keating. I was a guest of the Embassy. I do not know how many meals I had in the Embassy. While I was there I met with Golda Meir, the Prime Minister, and many other Israeli officials.

Since this Senator stayed at the American Embassy as a guest of the Ambassador and also as a guest of the Government, and had a number of meals in the Embassy, what would be the reporting process in that regard?

Mr. HELMS. There would be no problem at all for the Senator from Virginia. He would simply publish in the RECORD, as stated on page 2, line 11, a description of such transportation, food, lodging and other service or facility furnished. I might add that the Senator from Virginia would have no problem with this because I know and admire his record in taking every precaution to avoid the misuse of funds. As I understand it, the Senator from Virginia has even reimbursed the White House when he has traveled on Air Force 1.

Mr. HARRY F. BYRD, JR. That is correct.

Mr. HELMS. So has the Senator from North Carolina. So he has no problem. It

would simply be a matter of disclosure of any facilities or any hospitality extended to the Senator.

Mr. HARRY F. BYRD, JR. The Senator from Virginia, on other occasions, has been on official business for the Armed Services Committee. On many of those occasions the Government has paid the transportation, the hotel, whatnot. Of course, that would be covered by this amendment of the Senator.

Mr. HELMS. That is correct.

Mr. HARRY F. BYRD, JR. The point I am not clear on is if the Senator from Virginia pays his own expenses but does stay at the Embassy, or has dinner one night at the Embassy; is all of that included? I have no objection, but I just want to find out how extensive this would be.

Mr. HELMS. It would be included. The point of the amendment is to restore confidence on the part of the American people in the Congress. I know the Senator would not object to disclosing that information even though it might sometimes come under the category of minutia. I know the Senator and I know his record of disclosure. I know how very prudent he is in spending public funds. There would be no problem, but I would think it ought to be reported under this amendment.

Mr. HARRY F. BYRD, JR. On other occasions I have been the guest of the Ambassador at meals or banquets in hotels or restaurants. How do we put a value on that?

Mr. HELMS. No value would have to be reported—only a description, to use the words of the pending amendment.

Mr. HARRY F. BYRD, JR. The Senator's amendment does not call for a value, I do not believe.

Mr. HELMS. It just specifies a description.

Mr. HARRY F. BYRD, JR. I thank the Senator.

Mr. THURMOND. Will the Senator yield?

Mr. HELMS. Yes.

Mr. THURMOND. I have been listening to the questions propounded by the distinguished Senator from Virginia of the Senator from North Carolina. If the Senator were a guest at the Embassy or a guest of the Ambassador and if the U.S. Government paid, that would be charged at that end, I presume. As I understand, what the distinguished Senator from North Carolina wishes to bring out here is what the U.S. Government has paid on account of his trip and what the Senator actually incurred himself. Is that correct?

Mr. HELMS. That is correct.

Mr. THURMOND. For instance, if he is a guest of the Embassy for an evening, the Ambassador would have to show that. The Senator would not also show it. Otherwise, there would be duplication and it might indicate that the Government paid for it at the Embassy and the Government is paying for it here through the Senator.

I am inclined to support this amendment. I have been on trips in which some Members of Congress have drawn counterpart funds and also had their expenses paid. If anything is wrong, I think that is wrong. I believe it is completely wrong.

Mr. HELMS. I agree with the Senator.

Mr. THURMOND. When a man travels for the Government at Government expense only his actual expenses should be paid by the Government and not $75 a day, or whatever the amount is which is allowed, unless he actually spends that much.

There are different items which the Senator has listed to be disclosed, which would seem to be in order. I believe the reports are now made to the Secretary of the Senate. My understanding is that it is required that that information be published in the CONGRESSIONAL RECORD. At any rate, it would be published under this proposal.

To clear up the point asked by the Senator from Virginia, if a Senator is the guest of the Embassy it would not appear to be necessary for him to report that because he did not expend that amount himself.

Mr. HELMS. I say to the able Senator, he would not be required to put a price tag on the meal, but he would be required to disclose it.

Mr. THURMOND. But it is what money the Senator has to pay, if he had to pay it himself, and the Government pays it. Then he ought to have to show it.

Mr. HELMS. The Senator is correct.

Mr. THURMOND. Is that the main thrust of the Senator's amendment?

Mr. HELMS. The main thrust is full disclosure. I thank the Senator for his questions which, as always, are relevant and to the point. Mr. President, I reserve the remainder of my time.

Mr. NELSON. Mr. President, I would like to first say that there is a lot of criticism of travel by Members of the Congress. If my memory is correct, I have not traveled on official business to a foreign country in 4 years. However, I consider travel to be very important. I do not know how the public or anyone else expects the Members of the Senate and the House to vote on the very important issues involved in foreign policy without benefiting from the insight provided by some Member's travel. Take the Middle East, for example; 2 or 3 years ago, after considerable debate, Congress finally passed a provision that the United States would provide the personnel to monitor the line in the Sinai dividing the Israeli troops from the Egyptian troops.

We have had vital issues of military sales to both Israel and the Arabs; all kinds of complicated and difficult questions involving the taxpayers' money.

Does anybody really suggest that with these kinds of decisions in all parts of the world a Member of the Senate should not travel?

I think they must and should travel. Otherwise, what we are really saying is that the Secretary of State and the President shall tell the Congress how much to spend in foreign aid; how much to grant in military sales or contracts, or, when the administration proposes the cease-fire line to be monitored by the United States between Egypt and Israel, we should vote out of ignorance.

Similarly, we belong to NATO. Furthermore, we provide the most equipment and the most money in NATO. There is a NATO conference every year. Is it to be suggested that the Members of Congress should not go to the NATO conference? Congress is supposed to vote the appropriations for those 300,000 American troops in Europe. Would anyone say that no Senator should go there and get informed on the scene about the status of NATO troops, about the status of our own?

That is nonsense. Foreign travel is very important. I have no doubt that a Member here and there may abuse it, that is unavoidable. But foreign travel is important.

I have not traveled for 4 years because the hassle was more than I wanted to take. I turned down a chance to go to the Middle East on a trip I thought was very important. But I looked at that schedule. It was 14 days, covering 5 countries, averaging 2 days or 3 days per country, including travel. I think it was very important that Members went. I did not want to do it, because I did not want to put in 14 days, morning till night meeting with leaders of the various Arab Governments and the Israeli Government, with corporate executives, labor leaders, and everything else. I am glad somebody else did.

I turned down a trip to the Pacific for the same reason. I turned down a trip to the Mexican-American Conference for the same reason. I have some time I like to preserve for catching up in my office, going back to the State, or taking a rest. That is why I have not traveled abroad on official business for 4 years.

I have attended the World Food Conference in Rome. I have attended the ILO Conference. I have attended a NATO Conference. But I have not done my duty in that respect for 4 years.

If that trip to the Middle East 2 or 3 months ago had been a 7- or 8-day trip, I might have done it, but I was not prepared to give up 14 days to do it when I was behind in my office and had some trips to take back to my State.

I think it is a lot of demagoguery to attack foreign trips. We have relations with every single country in the world and we have military bases all over the world, foreign aid all over the world, and policy decisions to be made affecting countries all over the world. So I think it is important that trips be made.

In making this statement, I do not mean to suggest that Senator Helms is implying that there is something wrong with travel. He is not saying that trips should not be made. But I wanted to state for the record at this time that I think these trips are important and I am glad to see people willing to take the time and put in the work. If the Committee on Armed Services does not go over and look at our bases, they are going to be legislating out of ignorance. I want them well informed when they come to the floor and we have debate here. I want to know what is the status of our forces, how much we are spending and in how many countries we are spending it. I want to see members of the Committee on Foreign Relations go, too.

This amendment does not question the importance of travel, but I felt the point should be made.

Mr. HARRY F. BYRD, JR. Will the Senator yield?

Mr. NELSON. Yes.

Mr. HARRY F. BYRD, JR. I agree with the Senator from Wisconsin as to the importance of the Members of the Senate going to various parts of the world, going to various countries where our Nation is spending so many millions of dollars of tax funds. I think it is important to do that. I think it is important, however, and I know the Senator from Wisconsin concurs, that these trips be handled in a businesslike way and be handled in a way that the taxpayers feel is appropriate handling of their tax funds.

I certainly agreed with the Senator from Wisconsin when he indicated the importance of Members of the Senate going to other countries to see how American tax funds are being used and, also, to get firsthand knowledge of the various and great problems which the Senate of the United States must deal with. I do not think we can learn those problems just by sitting here in Washington, D.C., or in Virginia or Wisconsin or North Carolina. We need to go where the facts are and see firsthand the conditions in the various countries so we will know better what policies to pursue when legislation comes before the Senate.

Mr. HELMS. If the Senator will yield, the able Senator from Wisconsin and the able Senator from Virginia have cited the purpose of this amendment, that information on foreign travel ought to be shared with the people so they will better understand that work is indeed done on these trips. As I say, I have never taken such a foreign trip, but I fully respect Senators who do, in their assessment of what they accomplish when they do travel. It is just a matter of gaining public respect and public confidence in the activities of the Senate. That is the purpose of the amendment.

Mr. NELSON. I am sure that we could improve, I suppose, the method of reporting travel now used. But I am also sure that if we put the question to 100 Senators about exactly how detailed reporting should be we would get 100 answers.

The statute now, section 276c–1 and 1754(b) of title 22 of the United States Code, requires the reporting of expenses incurred in connection with travel outside of the United States including those foreign currencies expended and dollar expenditures made through appropriated funds by Members, employees, delegations, and committees of Congress.

The annual report of the Secretary of the Senate lists the name of the Member or staff who has traveled on foreign travel, the itinerary of the Member or staff, the cost of transportation, amount of payments claimed, and description of such transportation.

A report is published now in the RECORD annually on travel and, as I look at it, I note that it starts with the name of the Member or employee; then it has a column for arrival, departure, in each country. As to this particular Member it lists Australia, Indochina, Singapore, Hong Kong, Thailand, Turkey, and France. Then under "per diem" it lists the amount expended in foreign currency. Then it lists another column for U.S. currency equivalent. Then there is a column for transportation which lists the total cost of transportation. Then it has a column, "other purposes." Then it has the total.

So the present report has every item that is listed in the Senator's amendment except the nature of business transacted and how many hours worked each day.

Mr. HELMS. If the Senator will yield, the disclosure to which he has referred occurs up to 6 months after the fact of the trip; does it not? It is twice a year; is it not?

Mr. NELSON. I believe that the Secretary of the Senate report is twice a year. So every 6 months the report of the Secretary of the Senate is printed.

Mr. HELMS. The amendment, as the Senator knows, stipulates that this information shall be published by the Senator in the RECORD within approximately 15 days after his return to the United States. I think it would serve as a good vehicle for renewing the respect of the American people in their Congress. Regardless of the merits or demerits of overseas trips at the taxpayers' expense. Many Americans believe, as the Senator himself said earlier, that these are junkets, that they are pleasure trips. I think it is up to us to provide full disclosure of stewardship as often as we can on as many matters as we can, certainly as to one that is resented by so many citizens of this country. Right or wrong, the citizens are persuaded that these trips are junkets and that they serve no useful purpose other than to entertain Senators and/or their staffs and members of their families. So I urge the adoption of the amendment.

Mr. NELSON. Mr. President, let me say, in response to that, I suppose one can argue that one should report in 10 days, 30 days, or 60 days. The same argument would apply also to disclosure of assets. We disclose assets once a year. I think one can make the same argument that we should disclose assets and transactions in the market every 30 days so that the public's knowledge would be up to date. All we are doing is, it seems to me, creating a cumbersome amount of paperwork. When the Secretary's report is printed every 6 months involving every single Member of the Senate that, it seems to me, that reporting is quite adequate.

I might say that—and I do not wish to have it before me—the Harris poll contracted for by the House of Representatives indicated that something like 80 percent of the people thought Congress should take foreign trips so they will understand what is going on so they can vote intelligently.

So I think reporting twice a year by the Secretary of the Senate and full disclosure in the RECORD covering almost every item listed by the Senator from North Carolina is certainly adequate.

I yield back the remainder of my time.

Mr. HELMS. Mr. President, I likewise yield back the remainder of my time.

AMENDMENT NO. 112

Mr. HELMS. Mr. President, may I ask the able Senator from Wisconsin if we understand each other with reference to amendment No. 112 which, as he will recall, was deferred at the request of the distinguished Senator from New Mexico (Mr. SCHMITT), who is unable to be here today?

I say to the Senator that I am perfectly willing to make this a 20-minute amendment, 10 minutes to each side, but I should like to discuss this amendment prior to the succession of rollcall votes we will have tomorrow.

Mr. NELSON. As I understand it, the unanimous-consent agreement was that amendment 114 would be the pending business at 4 o'clock.

The PRESIDING OFFICER. Amendment No. 114.

Mr. NELSON. I have no objection to postponing it. I would prefer that we check with the majority leader to determine when he might wish that time to be assigned.

Mr. HELMS. I would like the Chair to take note of the fact that the Senator from North Carolina would like to be protected so that amendment No. 112 may be called up prior to the vote, and we will consult with the leadership on that question.

I thank the Senator from Wisconsin, and I yield back the remainder of my time.

The PRESIDING OFFICER. Under the previous order, the Senator from North Carolina is recognized once again. He has two more amendments. Does he wish to take up this time now?

Mr. HELMS. Mr. President, the next amendment would be No. 112, to which I just alluded, and that would be the final amendment that the Senator from North Carolina wishes to call up.

The PRESIDING OFFICER. Under the previous order, the Senator from California (Mr. CRANSTON) is recognized to call up two amendments, on each of which there shall be 15 minutes, to be equally divided and controlled.

Mr. NELSON. Mr. President, the Senator from Wisconsin does not see the Senator from California in the Chamber. However, I understand that the Senator from Wyoming (Mr. WALLOP) has an amendment, on which there is not much controversy, respecting blind trusts. Would the Senator like to call up that amendment at this time?

The PRESIDING OFFICER. The Chair recognizes the Senator from Wyoming. Without objection, that amendment will be in order.

AMENDMENT NO. 159

Mr. WALLOP. Mr. President, I call up amendment No. 159.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP), for himself and Mr. Danforth, proposes an amendment numbered 159.

The amendment is as follows:

On page 10, strike line 25, and on page 11, strike lines 1 through 3, and at line 4 "reporting individual", and insert in lieu thereof the following:

"(d)(1) Except as provided herein and at clause (2) of this subparagraph, the holdings of and income from a trust or other financial arrangement from which the reporting Senator, officer, or employee or the spouse or dependents of such reporting individual receives income or has an equity interest in".

Mr. WALLOP. Mr. President, I yield myself whatever time this will take; it will not take long.

The amendment clarifies the language in the code of conduct regarding the establishment of blind trusts There was a colloquy several days ago which pointed out an internal conflict in the language, circumstances with which no individual could comply. I have checked this with the distinguished floor manager of the bill and the staff. The effect of the amendment simply is to smooth out the language and put the requirements of blind trusts and the reporting requirements in smoother, more simplified language.

I yield to the Senator from Wisconsin.

Mr. NELSON. Mr President, the Senator from Wyoming has stated the case correctly There is no use in the Senator from Wisconsin repeating it. The Senator from Wisconsin has no objection and is wiliing to accept the amendment.

I yield back the remainder of my time on the amendment.

Mr. WALLOP. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming

The amendment was agreed to.

Mr. NELSON. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally against both sides, on the resolution.

The PRESIDING OFFICER. Without objection, it so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DECONCINI). Without objection, it is so ordered.

AMENDMENT NO. 163

Mr. NELSON. Mr. President, I call up amendment No. 163.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an amendment numbered 163.

The amendment is as follows:

On page 3, line 23, after "(1)" strike out "the" and insert "The".

On page 4, line 2, strike out the colon and insert a semicolon.

On page 5, line 14, after "value" insert "of".

On page 9, line 19, after "list" insert "the date of purchase and".

On page 9, lines 20 and 21, strike out "at the time of purchase and the date of purchase".

On page 15, lines 2 and 3, strike out "the date of the enactment of this Act" and insert "December 31, 1977".

On page 19, line 9, after "Act" insert a comma.

On page 19, lines 19 and 20, strike out "has the same meaning given to such term" and insert "includes any employee or individual described".

On page 19, line 21, after "4" insert "(c)".

On page 20, line 3, strike out "shall" and insert "does".

On page 20, line 7, after "inheritance" insert a comma.

On page 23, line 1, strike out "this subparagraph" and insert "subparagraph (a)".

On page 23, line 13, strike out "shall" and insert "does".

On page 25, line 6, strike out "(1)" and insert "1".

On page 25, lines 20 and 21, strike out "shall, subject to the provisions of subparagraphs (b) and (c), mean any income" and insert "means, subject to the provisions of subparagraphs (b) and (c), any income (other than compensation disbursed, or treated as disbursed, by the Secretary of the Senate)".

On page 26, line 1, strike out "shall include" and insert "includes".

On page 26, line 5, strike out "or" and insert "and".

On page 27, line 6, after "receipt" insert "or accrual".

On page 30, lines 9 and 10, strike out "has the same meaning given to such term" and insert "includes an employee or individual described".

On page 30, line 10, after "4" insert "(c)".

On page 30, line 20, strike out "(A)" and insert "(1)".

On page 30, line 25, strike out "(B)" and insert "(2)".

On page 38, line 7, strike out "State" and insert "Senate".

On page 40, line 16, strike out "(k)" and insert "(i)".

On page 41, line 12, before "Committee" insert "Select".

On page 42, line 3, before "Committee" insert "Select".

On page 42, line 14, after "technical" insert a comma.

On page 42, lines 21 and 22, strike out "section 2(a)(2)" and insert "subsection (a)(2)".

On page 43, line 9, strike out "section 2(a)(2)" and insert "subsection (a)(2)".

On page 43, lines 17 and 18, strike out "(as defined in subsection (b)(4))".

On page 44, line 14, after "relationship" insert a comma.

On page 47, line 19, strike the first "of" and insert "or".

On page 54, line 23, before "relating" insert a comma.

The PRESIDING OFFICER. Is there objection to the present consideration of the amendment? The Chair hears none, and the Senate will proceed to its consideration.

Mr. NELSON. Mr. President, this amendment consists of a series of technical amendments. It was introduced last Friday, for the purpose of having it printed in the RECORD, so that it could be checked by any Member to satisfy himself as to whether or not it included any matters of substance that concerned him.

Since every Member has had a chance to look at it and been given notice of my intention to move this adoption. I think we can dispose of this amendment without debate.

Mr. THURMOND. Mr. President, the amendment meets with our approval.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from South Carolina yield back his time?

Mr. THURMOND. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time be charged against the resolution equally divided between both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 99

Mr. CRANSTON. Mr. President, I ask that my amendment No. 99 be called up at this time.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes amendment No. 99.

On page 37, beginning with "to" on line 17, strike out through line 18, and insert in lieu thereof the following: "to two assistants to a Senator, at least one of which is in Washington, District of Columbia.

The PRESIDING OFFICER. On this amendment there are 15 minutes equally divided.

Mr. CRANSTON. Mr. President, I will just very briefly explain this amendment which, I believe, is not controversial in any way, shape, or manner.

Senate Resolution 110 prohibits any officer or employees of the Senate from soliciting, holding, or distributing campaign funds for any candidates to Federal office except for one member of the Senator's staff in Washington and one in the home State office whom the Senator specifically designates to handle such funds.

My amendment will give a Senator the option to have both assistants designated to handle campaign funds in the Washington office.

Because a Senator's campaign committee is located in his home State, I personally do not find it necessary to have any member of my field office staff involved in handling campaign money. The campaign committee staff is, after all, charged with fundraising and handling all other financial aspects of a campaign. I try to keep my field office out of campaign financing activities and engaged only in providing constituent services and other official and nonpolitical Senate duties.

For me, and I imagine for other Senators, too, the need is greater to have people authorized to handle campaign funds in the Washington, D.C., office because of that office's distance from the campaign committee in the home State. As we all know, campaign contributions are sent quite frequently to the Senator directly, rather than to the local campaign organization or to the senatorial campaign committees here in Washington.

I believe that in most offices the handling of campaign money requires two persons—besides the Senator—if only to have one acting as a backup in the event the other is absent in the home State on business or on vacation. The two staff assistants generally are administrative or advisory personnel to whom the Sena-

tor has assigned responsibility over the non-fund-raising political aspects of his office.

Of course, it should be understood that whatever fundraising restrictions are placed on staff, we cannot totally eliminate contact which support personnel such as mailroom assistants or secretaries will have with the fundraising process as contribution checks are channeled to the Senator or his two "political fund" assistants. I do not believe there is any way to control such contact.

Mr. NELSON. Mr. President, the manager of the bill has no objection to that amendment. I think it is practical and makes good sense.

I yield back the remainder of my time.

Mr. CRANSTON. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. On whose time?

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 156 (MODIFIED)

Mr. CRANSTON. Mr. President, I ask that we now call up my amendment No. 156.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes amendment No. 156 .

The amendment, as modified, is as follows:

On page 10, line 17, after the word "entertainment)" strike out through the word "dependents," on line 18 and insert the following: "received by a spouse or minor dependent, and of gifts of over $500 received by an adult dependent,".

Mr. CRANSTON. Mr. President, after conferring with the distinguished Senator from Wisconsin I ask unanimous consent—I ask that I may modify my amendment by striking the word "solely" from line 3 and line 4.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. And in line 4 also.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, under the resolution before us gifts to the Senator's spouse or dependents from any one source aggregating more than $100 or $250 for gifts of transportation, food, or lodging in any 1 year must be disclosed. My amendment would raise the annual aggregate gift disclosure level to $500 for an adult dependent. In addition, under my amendment the earned income of an adult dependent would not have to be reported.

I am concerned about the adult son or daughter of a Senator who is attending college and is listed as a dependent for income tax purposes even though he or she is living away from home and is leading an independent adult life.

To require the public disclosure of gifts of any jewelry or clothing from a boyfriend or girl friend—gifts which might easily aggregate more than $100—would constitute an intolerable invasion of the privacy of these young men and women. A Senator's adult offspring should not be required to live in a fish bowl because of their parent's avocation.

Moreover, where is the equity for the 23-year-old graduate student living away from him but listed as a dependent who must disclose when his 21-year-old brother, still living at home, but employed and not a dependent, is not required to disclose gifts? Anyone attempting to influence the Senator by giving gifts to his dependents would hardly differentiate between the two sons—yet gifts to the older son would be disclosed—while gifts to the younger son would not be.

However, I do agree that a large gift to an adult dependent whom the Senator is supporting could have financial impact on the Senator. Thus, I propose that the disclosure requirement be raised to $500 for an adult dependent.

In addition, I feel that if an adult son or daughter is being listed as a dependent for tax purposes his or her income will be generally small. I feel their privacy need not be invaded even though their mother or father may serve in the U.S. Senate.

In the first place, in order for them to qualify as adult dependents for tax purposes, their parents must be contributing at least 50 percent of the income. These young men and women are usually college students, and they will supplement the income from their parents with whatever they can earn from part-time jobs.

Further, many of them at this point in their lives are trying to establish lives of their own—separate and apart from their Senatorial parents. To require that these young men and women disclose their income and their place of work—part time though it may be—would not only strip away the cloak of privacy, but would force the spotlight of public and press attention on their individual lives.

Therefore, I propose that the earnings of an adult offspring listed as an income tax dependent not be disclosed.

Mr. NELSON. Mr. President, I wonder if the Senator will yield. Did I understand the Senator to be referring only to adult dependents?

Mr. CRANSTON. That is correct.

Mr. NELSON. What about minor dependents? That is in here, too. The Senator has minor dependents here, too.

Mr. CRANSTON. The minor dependents, that is just doing it the way it is in the bill now. That just picks up the bill's language on that.

Mr. NELSON. $500?

Mr. CRANSTON. No, $150.

Mr. NELSON. Mr. President, let me ask the Senator a question which is bothersome to me and is not involved in this amendment, but I would like to have his views.

On page 10, line 15, it states:

For the purposes of subparagraphs—

Starting on line 13 through such and such:

. . . the individual need only report the source, not the amount, of any earned income over $1,000 or gifts over $100. . . .

And this is the one the Senator changed to $500, correct?

Mr. CRANSTON. Correct, for adults.

This problem bothered me for the same reason the Senator raised respecting a gift.

Now, we have a 20- or 21-year-old adult, voting for President, for Governor, for everything else, they work in the summertime and make over $1,000, then in the city where they are working the disclosure occurs.

So the Senator is saying to this 20-year-old, to all the public, the 20-year-old is still a dependent of papa and mama, and even though he made $1,000 it is the same kind of hassle.

Mr. CRANSTON. It is.

For the adult, there is no disclosure of earned income under my amendment.

Mr. NELSON. The thousand-dollar limit only applies to minors?

Mr. CRANSTON. That is correct, minors and spouses under the amendment.

Mr. NELSON. That was not the understanding I had from the staff. I raised the question three or four times.

Mr. CRANSTON. I think the Senator is talking about a different question exactly.

Mr. NELSON. Yes. I am talking about earned income in that paragraph.

Mr. CRANSTON. Our amendment is that there would be a disclosure of earned income.

Mr. President, let us suggest the absence of a quorum.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I want to further modify my amendment to add the word "minor" before the word "dependents" on line 19.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

On page 10, line 17, after the word "entertainment" strike out through the words "minor dependents," on line 18 and insert the following: "received by a spouse or minor dependent, and of gifts of over $500 received by an adult dependent,".

Mr. CRANSTON. Is the Senator from Wisconsin ready to accept the amendment?

Mr. NELSON. Yes, the Senator from Wisconsin is willing to accept the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. CRANSTON. Mr. President, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on

agreeing to the amendment of the Senator from California.

The amendment was agreed to.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. ROBERT C. BYRD. Equally against both sides.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WALLOP. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. WALLOP. Mr. President, I ask unanimous consent that Patty McDonald and Bob Jerome of my staff be accorded the privilege of the floor during the debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, am I correct in stating that the only amendments that we had consent orders to take up in sequence today were the amendments by Mr. HELMS and two amendments by Mr. CRANSTON?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. There are several other amendments on which there are time agreements, and the distinguished minority leader had indicated that certain Senators would be prepared to call up their amendments, possibly in sequence; but no order with reference to the sequence was obtained; am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Then, Mr. President, the Senator from Kentucky (Mr. HUDDLESTON) can call up an amendment at this time without a prior order of the Senate; is that correct?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 102

Mr. HUDDLESTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) offers an unprinted amendment numbered 102.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 28, line 23, beginning with "This" strike out all through line 4 on page 29, and insert the following: "The preceding sentence shall not apply to service of a Member, officer, or employee as—

"(a) an officer or member of the board of an organization which is exempt from taxation under section 501(c) of the Internal Revenue Code of 1954, if such service is performed without compensation;

"(b) an officer or member of the board of an institution or organization which is principally available to Members, officers, or employees of the Senate, or their families, if such service is performed without compensation; or

"(c) a member of the board of a corporation, institution, or other business entity, if (1) the Member, officer, or employee had served continuously as a member of the board thereof for at least two years prior to his election or appointment as a Member, officer, or employee of the Senate, and (2) the amount of time required to perform such service is minimal.

A Member, officer, or employee shall report to the Secretary of the Senate, on forms prescribed by the Secretary, his service as a member of the board of a corporation, institution, or other business entity under subparagraph (c). Such reports shall be made available for public inspection and copying.".

Mr. HUDDLESTON. Mr. President, I would like to take this opportunity to commend the distinguished Senator from Wisconsin (Mr. NELSON) and the Special Committee on Official Conduct for the effort they have made in reporting a stringent code of conduct to the Senate. I believe that Senate Resolution 110 will help restore public confidence in the Congress and benefit the dedicated public official. I have consistently supported a strong code of conduct for Senators and believe that it is in the best interest of the Congress and individual Members to do so. Since coming to the Senate, I have voluntarily made full financial disclosures on an annual basis, and I believe that this has a positive effect on my relationship with my constituents.

While I agree with the basic provisions and goals of the resolution, I do have problems with some of the specific ways of accomplishing these goals. One of the specifics with which I am not in agreement is the broad prohibition contained in paragraph 7 of rule 45 against service on the board of directors of a public corporation or institution. I believe that it goes too far in attempting to correct an activity that could appear to be a conflict of interest without taking into consideration factors which could modify this appearance.

Simply stated, my amendment would permit a Senator to serve on the board of directors of a corporation or institution provided he had served on that board at least 2 years prior to his election; the amount of time spent in performing this service is minimal compared to his senatorial duties; and the service is registered with the Secretary of the Senate for public disclosure.

This amendment recognizes the basic principle that the voters of this country must play the key role in policing the activities of Senators and must have a substantial voice in deciding what is or is not allowed. This is the basic premise underlying the electoral process of a democratic society and must be given due consideration in any congressional code of conduct. In addition to this, the Senate's rulemaking power is not absolute. It is limited by the constitutional requirement of reasonableness and practical considerations of enforcement.

If a Senator has been a member of a board of directors for at least 2 years prior to his election or appointment as Senator, this fact is certain to be made a matter of public knowledge either by his opponent in the election or the press. Given this knowledge, an election of a candidate by the voters would in effect be a vote of approval of the relationship by the citizens of that State. This decision by the voters would be similar in nature to the election of a candidate who owned controlling interest in a public corporation or who owned his own business. Should the Senate as a body presume to impose its judgment over that of the voters in matters such as these, I believe that it would be a serious blow to the electoral process.

The amendment is in agreement with a basic goal of the code of conduct that a Senator should not derive financial gain as a result of his senatorial office. The requirement of prior membership on a board of directors would effectively preclude the possibility that such a position was given in exchange for services or favors rendered as a Senator. The time limitation would also preclude the possibility of a position being bestowed on a candidate who appears certain to become a Senator since it is very unlikely that such a determination could be made 2 years prior to election. The position, instead, would be one of a long-term, continuing nature based on an individual's business expertise. Such an association could not be construed as a reward for granting special favors of a political nature and should not be subject to the overkill limitation imposed by paragraph 7.

A Senator in today's Congress is an extremely busy person with very weighty responsibilities who should devote full time to his role as a public servant. However, this does not mean that a Senator does not have time of his own when he can pursue his own interests or endeavors. This type of outside activity is an accepted way of life for all types of people from average laborers to top professionals. Its acceptability is no more clearly demonstrated than by the fact that outside directors of corporations are usually employed full time in other professions. I have included the requirement that the amount of time required to perform services as a member of a board of directors must be minimal to preclude the possibility that a Senator might serve on a board of directors which required a significant amount of his time, thereby detracting from his senatorial duties. I believe that this limitation is of the same nature as that part of the resolution which excludes earned income from family enterprises if the services provided by the Senator are not a material income producing factor. The committee states in its report that—

If the Senator or employee is making substantially all of the managerial decisions for the enterprise or spending substantial amounts of time with it, then the income so derived should be considered personal services income.

However, I would like to hasten to emphasize that under my amendment, any income from service on a board of directors would be included within the 15-percent limitation on earned income. I use the material income provision only to demonstrate that my amendment employs a similar qualification based upon the amount of time devoted to the activity.

The last provision of my amendment requires registering the service on a board of directors with the Secretary of the Senate for public access. This provision is in conformity with what I believe to be the cornerstone of the code of ethics—full disclosure. As I stated previously, I have been an advocate of full financial disclosure for many years and have been one of those few Members of Congress who not only advocate but practice this. I firmly believe that it is a vital part of a free and open decision-making process which will enhance our democratic form of government.

The logic applied by the committee in exempting service on the board of directors of a section 501(c) tax-exempt organization should have been applied to public corporations, rather than assuming that in all circumstances there would be a conflict of interest or the appearance thereof. A conflict of interest does not have to rest entirely or directly upon a financial interest, and the committee recognized this when it stated in its report that "the possibilities of conflicts of interest are less marked" in a tax-exempt organization. This implies that there could be a conflict of interest for service on the board of directors of a 501(c) corporation. If one looks closely at these organizations, he will find that they cover the entire spectrum of special interest groups. They include labor organizations, civic leagues, agricultural organizations, business leagues, chambers of commerce, real estate boards, social and recreational clubs, fraternal beneficiary societies, and many others.

Most of these have interests which, at one time or another, may come before Congress and represent conflicts of interest for Senators who may serve as officers or directors of them. However, the committee has wisely concluded that it should not make a blanket judgment in these cases but, instead, provides in paragraph 5 of the rule that a Member may decline to vote on any matter when he believes that his voting on such a matter would be a conflict of interest. This leaves the matter to the conscience of the Member and the dictates of his constituents, as it rightfully should. This same logic would be carried forward in my amendment with additional safeguards to assure that service on a board would not be predicated upon the fact that the individual is a Senator.

We who serve the public as elected officials cannot completely eliminate every conceivable activity that "has the appearance of a conflict of interest" because to do so would isolate us from the public we are supposed to serve. An elected official must interact with the public and try to pursue a normal life. Unfortunately, in politics almost every contact we have with those who have special interests related to the Federal Government could be construed as having the appearance of a conflict of interest. Because it is extremely difficult to define exactly what a conflict of interest is, it is incumbent upon us to use great care when prohibiting certain activity. Otherwise, we run the grave risk of trampling upon the right of some Senators who happen to fall within a narrow category and of interfering with the rights of voters to make decisions about the type of representation they want. The courts have stated that in the making of congressional rules, a House "may not by its rules ignore constitutional restraint or violate fundamental rights, and there should be a reasonable relation between the mode or method of proceeding established by the rule and the result which is sought to be attained." I believe that blanket prohibition of certain service activity is unreasonable and possibly does violate fundamental rights.

The directors of a corporation perform a vital service to both the corporation and the economy as a whole. A board of directors occupies a key position in corporate structure because it is the directors who give the corporation the benefit of their experience, knowledge, and practiced good judgment in setting broad corporate policy. The direction given to a corporation by its directors will often be determinative in whether it is a healthy and growing business, marginally economical, or failing. While additional responsibility has been placed on directors in recent years, this has not significantly altered their role as outside directors with full time interest elsewhere. Given that this service is considered to be vital to the maintenance of sound corporations and that sound corporations are a necessary ingredient of a viable economy, I do not believe that a Senator should necessarily be forced to withhold his expertise and knowledge because there might possibly be a conflict of interest or the appearance of one.

Although the Senate is not required to follow in every respect the code of conduct adopted by the House of Representatives, I believe that the fact that the House did not include a provision similar to paragraph 7 in its code or even give serious contemplation to doing so is a compelling argument that it is not needed.

Mr. President, I am convinced that my amendment complies with the spirit and intent of Senate Resolution 110. I have discussed my amendment with many of the committee members on both sides of the aisle and have found no direct opposition to it. I therefore request its adoption.

Mr. President, the provision of the bill which I am seeking to amend affects me personally. Approximately 5 years prior to my election to the Senate I was named to the board of directors of the First Federal Savings & Loan Association of Elizabethtown, from which I receive a director's fee. My service on that board has not taken 1 hour of time away from my senatorial responsibilities during the 4 years I have been here.

I do not believe that I should be forced to get off that board now that I am a Senator. The whole premise of this legislation is that a Senator should not use his office for financial gain, but that certainly would not apply in my case and that of others in this body who were elected or named to such boards prior to their election to the Senate. I might also point out that I have been very careful not to vote on that legislation that would be specifically beneficial to the savings and loan industry.

So my amendment seeks to prevent the penalizing of a Senator for what he has accomplished or achieved prior to his election, while maintaining the prohibition against becoming a member of such a board after his election.

Mr. President, this amendment merely relates to the question of serving on certain boards by Members of the Senate. The amendment is consistent with the express intention of those who are proposing this code that whatever a Senator has accomplished before he comes here cannot be wiped out by an arbitrary restriction.

The amendment would permit a person who had served on the board of an institution covered by this section of the bill for a period of 2 years prior to coming to the Senate, and if the service on such board requires only a minimal amount of his time, to remain on that board.

I have discussed this proposal with those on both sides of the aisle relative to this code of conduct, and they say it is acceptable.

Mr. NELSON. Mr. President, the Obey Commission in the House recommended, and the full House adopted, a scheme in which Members would be allowed to sit on boards, as long as their income was within the 15-percent ceiling. The amendment suggested by Senator HUDDLESTON would be stricter. It provides that a Member, officer, or employee could only sit as—

. . . a member of the board of a corporation, institution, or other business entity, if (1) the Member, officer, or employee had served continuously as a member of the board thereof for at least two years prior to his election or appointment as a Member, officer, or employee of the Senate, and (2) the amount of time required to perform such service is minimal, and the Member, officer, or employee is not a member of or a member of the staff of any Senate committee which has legislative jurisdiction over any agency of the Government charged with regulating the activities of the corporation, institution, or other business entity.

I called up Representative OBEY, after thinking about this matter, to inquire as to why they applied the earned income limitation to service on boards, rather than barring the service. And he said that in their judgment the earned income limitation was sufficient to avoid conflicts or appearances of conflicts, and that we could have any number of cases in which the appearance of conflict would be much greater, say, for a Member who owned majority stock in a publicly held corporation or a regulated corporation and was permitted to continue to own

the controlling interest in a bank or such organization, while another Member who had a 5-percent interest, but was a board member, had to get off the board.

I think it is important to note that many people have spent 20 or 25 years of their lives accumulating some kind of assets. Lawyers for corporations sometimes take stock in the corporation instead of a legal fee. Twenty years go by, they are on the board, and they have accumulated an asset of considerable value. To say that they must, if they run for Congress, get off the board first, give up that asset, and be replaced by another member seems to me to be too harsh a treatment.

If a Member were on a board, or on four boards, as many people are, and if each board paid $10,000 a year, or a total of $40,000, the Member would not be able, while serving in Congress, to receive the $40,000. He could receive only a maximum of 15 percent of his salary, which would, at this stage, be $8,600, which would mean about $2,000 per board instead of $10,000 per board.

But board membership is a valuable asset, and he or she would be giving up retirement rights and other things in order to speculate on being in the Senate more than 6 years.

This amendment moves us back toward the House position. With respect to Members who were serving on boards more than 2 years prior to coming to the Senate, and whose membership is not affected by their committee assignments, it would conform to the House treatment.

Mr. President, I yield back the remainder of my time.

Mr. HUDDLESTON. I yield back the remainder of my time, and move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The resolution is open to further amendment.

AMENDMENT NO. 147

Mr. WALLOP. Mr. President, I call up amendment No. 147.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP) proposes an amendment numbered 147.

The amendment is as follows:

On page 26, lines 9, 10, and 11, strike the following: "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;".

On page 26, lines 15, 16, and 17, strike the following: "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;".

Mr. WALLOP. Mr. President, I call attention to the fact that Senators HANSEN, SPARKMAN, TALMADGE, BELLMON, STENNIS, CURTIS, LUGAR, and HATCH have joined as cosponsors of this amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a question?

Mr. WALLOP. Yes.

Mr. ROBERT C. BYRD. The Senator has one amendment on which he has a 30-minute limitation and another amendment with a 1-hour limitation. Which amendment is this?

Mr. WALLOP. Mr. President, this amendment has the 1-hour limitation.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. WALLOP. Mr. President, the effect of this amendment is to remove from the definition of earned income those services provided by a Senator, officer, or employee of the Senate which are not material income-producing factors to small family enterprises.

Mr. President, small family enterprises, and I do not know how we qualify an enterprise as being family, small, or otherwise, are the backbone of the Nation and do not necessarily interfere with the smooth and legitimate functioning of a Member of the Senate.

I would point out that in this code and in these definitions there are no other restrictions which are similar to these concerning family enterprises. A Senator can write books for as long as he wants. I would refer the Senate to the definition in clause 2 on page 26. He can even receive advances on books other than from established trade publishers under usual contract terms, or advances on other relative or artistic works.

As some have done, he can even have members of his staff write the book for him while on the public payroll and receive that kind of income.

Gains from property or investment are excluded from the definition of outside earned income.

I would point out, Mr. President, that a Senator can sit in his office with his feet on his desk and wheel and deal in real estate, in commodities, or anything else all day long, making decisions that are material to the income-producing factor of his investment.

There are no restrictions with rents. The Senator can collect rents. Obviously, if he can collect rents, he can manage a property which he possesses. Presumably that is not a small family enterprise.

He can receive proceeds from the sale of creative or other artistic work.

In short, a Senator can do anything except have a small family enterprise.

There are others who will speak on the tax problems. Both from a standpoint of income tax and a standpoint of inheritance tax, this provision can result in double taxation to a Senator if he has a corporation in which he does other than participate in a material income-producing manner.

Presumably, under such a set of circumstances, the Internal Revenue Service could say:

Your services are not material to the income-producing nature of your small corporation, your closely held corporation, and, therefore, the monies you are receiving are dividends and not compensation for legitimate services.

The amendment of the Senator from Wisconsin to the tax bill of last year made the qualification with regards to tax provisions, which were written into that code, designed to continue the existence of small agricultural holdings in America. That amendment had a requirement in it that the participation of the holding member be material to the income-producing nature in order to qualify for the inheritance tax advantages.

It seems to me that what happens when the Senate is not in session is not the business of the Senate.

This resolution talks about services not being material to the income-producing nature. Presumably, I can call for stocks and bonds and trade in the commodities market, but I cannot call my ranch foreman and tell him to sell cattle or not sell cattle, to plant wheat instead of corn, and other things, because that is a material decision to the income-producing nature.

Presumably, when all other things in the Senate have been taken care of, I cannot go home and join in the branding.

Presumably, a Senator who might own a drugstore cannot go home and move stock within the store or even make a decision to follow the Senate's professed desire to move from trade names to generic names for drugs.

There has been a suggestion that this particular provision should be modified to the point where Senators would be allowed to pursue these things from a supervisory or a managerial point, providing they do not consume significant amounts of time. If I were to go home and get on a tractor, or grab hold of an irrigating shovel, that can scarcely be called supervisory or managerial. It certainly can be considered income producing. It can also be considered mind cleansing from the incredible participation in this body.

Even so, what is a significant amount of time as is proposed by some who would modify this provision? We have taken Senators from the American public by this whole process. We have stated that there is no Senator who can be trusted. Now, with the implications of all of this, we are saying the public cannot be trusted either. I do not know who can be trusted if it is not, I guess, Common Cause.

It seems that this body ought to encourage rather than discourage Senators from participating in the productive world. Too few Members of this body have ever participated in the productive world of Americans. Somebody in this Senate ought to be able to bring back some firsthand knowledge of what it is like to live with the kinds of laws the Congress passes. So many Members have never met payrolls, have never been part of the commerce of America. They are perfectly willing to give us a code saying that no Senator should remain a part of the commerce of America, and that we should be insulated from the incredible burdens that we lay on the productive sector the American society.

And the public? The judgment of that poor body of Americans is completely mistrusted by this code and by

Common Cause. But that public, despite what we think and despite what Common Cause thinks, is an almightly, commonsense body which can make legitimate decisions. They have made them in the past and they will continue to make them.

I do not know why we in this body cannot display confidence in something. The code before us displays no confidence in ourselves. It displays no belief that we have any ability to resist temptations which could be thrust upon us by membership in the Senate.

If we cannot trust ourselves, can we at least trust the public? We have provided for disclosure. We have provided that a Senator live in a cocoon, and that it be opened at will by the public. It is really a sad time, such an incredibly sad time, for me to watch us insulating ourselves from reality and moving further and further from real life, so that no Member of this body can ever again understand, until he returns to the public world, what it is like to be a part of the productive society in America.

With that, Mr. President, I yield to the Senator from Indiana.

Mr. LUGAR. Mr. President, I associate myself with the remarks of the distinguished junior Senator from Wyoming. I indicate that the Obey Commission, in its thoughts about the issue at hand—namely, the income from family enterprises—and, certainly, the work of the Special Committee on Official Conduct of the U.S. Senate, both recognized that outside earned income did not include the following and, first of all, they have listed royalties from books, but second, income from family enterprises. The disturbing clause which follows, however, provides that the exclusion applies only to income from family enterprises "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor."

It is this clause that gives many of us who are involved in family farming or, for that matter, in other productive family enterprises, some difficulty. We are hopeful that it will be the consensus of this body that that conditioning clause might be changed or deleted, because we believe it will be productive of a great deal of interpretive difficulty.

I want to carry the argument further in two ways and suggest that this is a good time, in deliberating on family enterprises, to discuss the nature of our work as U.S. Senators. There clearly is value, in my judgment, in a Senator being associated with a family farm or with a small family business. It seems to me clear that the problems that are faced by ordinary Americans in farming, in merchandising or in small manufacturing are problems of which we ought to be aware in our deliberations. As a matter of practical import, if many more of us were faced with filling out tax returns and regulatory forms, we would understand the implications of the things that we do upon family enterprises. It is logical to assume that many of the laws that we pass might have a great deal more credibility with the public, and be of greater applicability if we were aware of the problems encountered in having to live with them.

In other words, I stand today to suggest that there is real positive value in Senators being a part of family businesses and not the contrary. In fact, the Special Committee on Official Conduct has recognized that by excluding, in the draft of the legislation, income from family concerns. There is an explicit recognition as to the value of being involved in a family business.

I think that, beyond that, as we try to take a look at a code of conduct, income-producing factors and at the limitations that have been involved, we also are compelled to take a look down the trail at what the nature of Senate service might become.

It seems to me that some have suggested, and I would like to associate myself with them, that there may come a day in which we are not involved in legislation for 12, 11, or even 10 months of the year, but that a great deal of our time might, in fact, be devoted to family enterprises or to other practical affairs of Americans that bring us closer together with our constituents. It seems to me important, at this stage of discussing the code of conduct of the U.S. Senate, that we take a look at the practical affairs that might transpire in due course; namely, that many of us should, in fact, derive substantial portions of our income from family or small business concerns. It might be highly desirable for us to spend much less of our time in being full-time Senators and conceivably, even less of our salaries would come from that service and much more from other enterprises that would leave us in touch with the people with whom we associate and who we try to represent.

I am hopeful that, as a practical effect of the amendment offered by the junior Senator from Wyoming, the language that creates difficulty—namely, "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor"—might be deleted or changed, simply because the concept of a test based exclusively upon income being a material income-producing factor begs many definitions and, I think, endless interpretation.

I am, I suppose, compelled to say that it is so ambiguous that a Senator, in order to avoid any implications of impropriety, might simply be forced to curtail or abandon what would otherwise be perceived as a legitimate and constructive enterprise. In short, each one of us should not want to be compelled to go before one committee after another seeking interpretation as to whether the specific family farming operation in which we are involved or the specific small business operation in which we might be involved is, in fact, a legitimate one.

In my own case, I would hope that marketing decisions that I might make as a U.S. Senator as to the crop plan for our farm in Indiana might, in fact, be good decisions and, to the extent that they are good decisions, they are obviously material income-producing factors. Only to the extent that they are bad decisions, presumably, would they be loss factors or something other than material income-producing factors. Each one of us hope that even if our associations were not time-consuming and only casual, they would, in fact, be constructive, legitimate decisions for profit as opposed to for loss.

It is in this sense that it seems to me we can clarify this language at a point that will save a great deal of grief and, furthermore, may save, at least, a number of family farms and family enterprises from reroganization or from substantial material loss. Such a result was clearly not intended, in my judgment, by this body or by its Committee on Official Conduct but the interpretation of the existing language which we seek to omit or change, might cause exactly that result.

I yield back to my distinguished colleague, the junior Senator from Wyoming.

Mr. HATHAWAY. Will the Senator from Wyoming yield?

Mr. WALLOP. The Senator from Wyoming yields to the Senator from Maine.

Mr. HATHAWAY. Mr. President, I have two perfecting amendments which I send to the desk and ask that they be considered en bloc. They are perfecting amendments to the amendment offered by the Senator from Wyoming. In the event that there should be any question with respect to both of those——

The PRESIDING OFFICER. The Senator's amendments are not in order until all the time is yielded back.

Mr. HATHAWAY. I was going to ask unanimous consent that they may be considered in order at this time. I intend also to attempt to enter into a time agreement on all of the amendments that pertain to the same subject matter.

The PRESIDING OFFICER. Is there objection to that request?

Mr. HATHAWAY. I ask unanimous consent that the amendments may be considered in order at this time.

The PRESIDING OFFICER. Is there objection?

Mr. NELSON. I did not hear the unanimous-consent request.

Mr. HATHAWAY. The unanimous-consent request was in two parts: One, that the amendments which are perfecting amendments to the amendment of the Senator from Wyoming may be considered at this time and two, that they be considered en bloc. Technically, they may not be offered until after the Senator from Wyoming has yielded back all his time. That is the pending unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. WALLOP. Mr. President, it is my understanding that there was a time allotment for the amendments of the Senator from Maine. I certainly would ask that they not be charged to my time.

Mr. HATHAWAY. The Senator is correct. I assume that the 1 hour of time allotted to me for these amendments would be the time used on them and would be added to the 1 hour of the Senator from Wyoming, so that we have a total of 2 hours on all of the amendments involved in this particular issue.

Mr. WALLOP. It was also my understanding that a half hour would be preserved out of the total time of 2 hour allotted to these amendments for tomorrow, to be equally divided, with 15 minutes apiece, before the vote tomorrow.

Mr. HATHAWAY. The Senator is correct. I think that is appropriately the subject of a second unanimous-consent request, unless we want to put it all into one.

Mr. NELSON. I am not prepared to agree to that unanimous-consent request for the moment because I may have an amendment of my own to offer if the amendment of the Senator from Maine does not prevail. So I wish he would withhold that request for the time being at least as I have no objection to the request of the Senator from Maine at the moment on his technical amendments. Are they technical amendments?

Mr. HATHAWAY. No.

Mr. NELSON. What is the request of the Senator from Maine, again?

Mr. HATHAWAY. The first unanimous-consent request was that the amendments be considered en bloc and may be considered in order at this time.

Mr. WALLOP. Was the remainder of that unanimous-consent request that the time of the Senator from Maine be allocated to himself and not to the Senator from Wyoming?

Mr. HATHAWAY. The Senator is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATHAWAY. Mr. President, will the Senator from Wyoming yield further?

Mr. STEVENS. Will the Senator yield for a parliamentary inquiry right there?

Mr. HATHAWAY. The Senator from Wyoming has the time.

Mr. WALLOP. Mr. President, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WALLOP. I thought that the Senator from Maine had gained the floor by the introduction of his amendment and with the allocation of time.

The PRESIDING OFFICER. I believe he yielded.

Mr. HATHAWAY. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Wyoming technically had the floor and yielded to the Senator from Maine.

Mr. WALLOP. I yield to the Senator from Maine with time to be credited to his amendment.

Mr. HATHAWAY. I thank the Senator.

UP AMENDMENT NO. 103

Mr. HATHAWAY. Mr. President, I send unprinted amendment No. 103 to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. HATHAWAY) proposes unprinted amendment en bloc No. 103.

Mr. HATHAWAY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, line 23, strike out all after "rendered" through page 25, line 24, and insert in lieu thereof a period.

On page 26, lines 9, 10, and 11, strike the following: "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;" and insert in lieu thereof the following: "if the enterprises are ones in which the Senator, officer, or employee of the Senate holds a controlling interest and in which both personal services and capital are income-producing factors so long as the personal services actually rendered by the Senator, officer, or employee of the Senate in such enterprises do not generate a significant amount of income;".

On page 26, lines 15, 16, and 17, strike the following: "if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;" and insert in lieu thereof the following: "if the partnership involved is one in which both personal services and capital are income-producing factors so long as the personal services actually rendered by the Senator, officer, or employee in the partnership do not generate a significant amount of income;".

Mr. HATHAWAY. Mr. President, I ask unanimous consent to be recognized in my own right to speak on the amendment for a few minutes?

I yield myself 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator may proceed.

Mr. HATHAWAY. Mr. President, I feel constrained to oppose the pending amendment offered by the Senator from Wyoming, and I have sent to the desk perfecting amendments which would, in lieu of the language that is proposed to be stricken, insert additional language.

The amendment of the Senator from Wyoming has the effect of removing totally from any and all limitations of any income received by Senators, officers, and employees if that income is from a partnership or a family enterprise. His amendment would totally ignore any consideration of whether such income is earned or unearned.

This, I believe, totally ignores the original rationale of the code and the subsequent determinations of this body to subject all outside earned income to a limitation of 15 percent of salary.

The amendment which I have offered would preserve and reaffirm the principle that outside earned income, income which results from personal services, must be limited in order to avoid conflicts of interest and conflicts of time. The amendment which I have offered would at the same time allow for Senators, officers, and employees to accept unlimited unearned income from partnerships, and from family enterprises if such income were truly unearned.

The amendment would achieve this goal by allowing income from partnerships and family enterprises if these entities utilize both personal services and capital as income-producing factors and so long as the personal services actually rendered by the Senator, officer, or employee in the family enterprise or business do not generate a significant amount of income.

In this way, the amendment limits the exemption to those sorts of businesses which are a hybrid, with both capital and personal services as potential sources of income, but insures that the income received by the Senator does not, to any significant degree, flow from his own personal services. It allows income as a return on prior investment but serves to restrict the personal services actually rendered, consistent with the restrictions placed on all Senators in this area—namely 15 percent of salary.

This amendment is critically important if we wish to insure that the code is to treat all kinds of earned income consistently and all kinds of unearned income consistently.

We cannot have a code which subjects earned income to a 15-percent limitation and at the same time states that if that income is from a family business or a partnership, the limitation does not apply. This would be the effect of the amendment of the Senator from Wyoming. Such a code would be blatantly unfair to all those Senators who did not arrive here with family businesses or with interests in partnerships. It would be unfair to these Senators because the code would tell them they could not do anything involving their personal services which generated more than $8,625, but those with partnerships and those with family businesses would be perfectly free to earn through their personal services an additional $50,000, $100,000, or even more.

I fail to see why this body should knowingly authorize such a schizophrenic code of conduct.

Furthermore, there is no evidence of which I am aware that indicates that partnerships or family businesses are inherently conflict-free, or represent a more ethical use of an individual's time than many of the other sorts of personal services activities which this code will clearly limit.

Why should a Senator be limited to accepting 15 percent of salary in speaking fees, yet be perfectly free to run a bank, a farm, a real estate business, a contracting firm, or any of the many other sorts of businesses which would fit under the umbrella of family enterprise or partnership? Why should the code totally outlaw the practice of any profession—whether law, medicine, architecture, or engineering, yet place no limits whatsoever upon those in business if they can show that their business is an old family business or a partnership?

I supported the 15-percent limitation on earned income because I felt it was necessary to demonstrate to the American people that this is a full-time body and that all of us were willing to place strict limits on the permissible sorts of outside income earning activities in which we would participate. I supported it, but I intend now to insure that this policy is implemented, and not riddled with loopholes.

Mr. President, I reserve the remainder of my time.

Mr. WALLOP. Mr. President, will the Senator yield for a question?

Mr. HATHAWAY. I am happy to yield for a question.

Mr. WALLOP. Am I correct in understanding that the effects of this amendment would do away with the other qualifications in the subparagraph determining what outside earned income

actually is? I refer the Senator to page 26, line 7, "Outside income does not include the following." Does his amendment strike all of that language?

Mr. HATHAWAY. No, it does not. It strikes the language on page 26 in subsection 2 and subsection 10 and changes the language in both of those as follows:

With respect to family business on lines 9–11:

If the enterprises are ones in which the Senator, officer, or employee . . . holds a controlling interest and in which both personal services and capital are income-producing factors . . .

These are the important changes:

. . . so long as the personal services actually rendered . . . do not generate a significant amount of income; . . .

The same language is applied on page 26, lines 15, 16, and 17—with respect to partnership shares as long as they do not generate a significant amount of income.

This is the language that was used in what was finally adopted in the House Code of Ethics.

To be sure, there is some ambiguity with respect to the word "significant," on which I will be glad to elaborate in debate with the Senator from Wyoming. But, I think it is a much better standard than the standard that is now in the exemptions subsection, which, it seems to me, allows a considerable amount of latitude with respect to what an individual can do in a partnership or family business and earn considerable amounts of money so long as it is not "material."

Mr. WALLOP. On the other hand, will the Senator agree that the resolution before us says that outside earned income is not limited to honoraria. We dealt with that.

Consider this:

advances on books other than from an established trade publisher under usual contract terms, or advances on other creative or artistic works.

The family business might be writing for Playboy, or even interviewing. The fact is that you can do anything artistic and receive advances. You can invest anywhere. You can sit in your office and deal in the commodities market. You can deal in investments. You can write books. You can do all these things, but you cannot participate in a family enterprise. I fail to see any logic in that. I ask for some kind of explanation as to why it would be fair to exclude some participation in a family enterprise.

Mr. HATHAWAY. With respect to advances on books, it is my understanding that in subparagraph 2(a) on the bottom of page 25 and in subparagraph 2, under (b), at the top of page 26, those are in effect limited to $8,600 per year.

Mr. WALLOP. On the contrary, they are not. If Senators will read it, it says:

advances on books other than from an established trade publisher.

So if it comes from an established trade publisher, you can get any advance you like; and you can get all the royalties you like for writing books any year.

Mr. HATHAWAY. I am not holding any brief for those other exemptions. If the Senator would like to strike the exceptions, I would be glad to join him in that amendment.

Mr. WALLOP. On the contrary, the Senator would not like to strike them.

My point is that it is beneficial to this body that somebody, somewhere, have a knowledge of what the productive world suffers from the measures that pass through these Houses.

Mr. HATHAWAY. Does the Senator think that that should apply to family businesses and partnerships? There is a lot of other information we would like to get as well from many other sources. I do not think that we would necessarily gain additional information of value just because we have a Member who is currently operating a farm or any kind of partnership, that we could not just as easily get that same information from the past experience of Members of the body or from outside witnesses who are involved in those particular businesses.

Mr. WALLOP. Will the Senator provide a definition of what is a family enterprise? Could not real estate dealings, which are exempted here, be considered a family enterprise? What about investments? Because you are investing, you are no longer in a family enterprise. You are looking out for your own interests. You can trade real estate and buy apartment houses and do a lot of other things, and those are not family enterprises, according to this definition.

I suggest that the amendment of the Senator from Maine, far from perfecting mine, would be totally disruptive of the whole code.

Mr. HATHAWAY. I am not clear, from the Senator's statement, just what part of the exclusion he is talking about. If it is truly from rents, I presume that is unearned income, not from personal services, and ought to be exempt.

Mr. WALLOP. It refers to the income from dealings in property. Presumably, if you deal in property, that is not a family enterprise.

Mr. HATHAWAY. I understand that paragraph 3(c)(3) is intended to be restricted to capital gains from the Senator's or operator's personal holdings. It is not intended to cover income to a Senator actively engaged in the real estate business which results from personal services actually rendered.

Mr. WALLOP. The distinction is drawn rather lightly.

Mr. HATHAWAY. I think the report will indicate what I just said.

Mr. WALLOP. Will the Senator from Maine agree that the tax structure, the amendment presented last year by the Senator from Wisconsin, the floor manager of this bill, requires material participation in order for the agricultural benefit, the inheritance tax benefits, to take place? Is the Senator from Maine suggesting that everybody who enters the Senate in the future give up all those holdings or have his family penalized for that type of service?

Mr. HATHAWAY. I think the Senator is correct so far as the inheritance tax is concerned. This simply would mean that the Senator who is managing the farm, who is contributing personal services which generate a significant amount of income would have to have the farm hold back everything over $8,600. Whether or not that would pose a problem with respect to the IRS on the estate tax benefits, I do not know. I doubt that it would.

Mr. WALLOP. From whom would they hold it back?

Mr. HATHAWAY. It might pose another problem with respect to withholding that amount of salary—that is, the excess over the 15 percent of the Member's salary.

My point is that a person could be the general manager of a farm and potentially be entitled to receive income of $50,000 a year; that is, a salary of $50,000 a year. It is just that everything above the $8,625 would have to be withheld in some way by the family business. He could actually receive only the limitation which everybody else has to adhere to with respect to earned income.

Mr. WALLOP. Why would that be evil, as opposed to the royalties from books or advances from publishers?

Mr. HATHAWAY. I say to the Senator that I would be glad to join him in a motion to strike the rest of this, and we can have that amendment taken up after we get through with this. I am not happy with the other exclusions, either. It is just that these two were the most glaring ones that I thought I would bring to the attention of this body, ones which I thought had a realistic chance of being eliminated.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. HATHAWAY. I yield.

Mr. STEVENS. For the life of me, I cannot understand why the Senate should impose upon those who have ongoing enterprises when they come to the Senate, or become involved in them, a standard of conduct that is different from that which we impose upon those who have vast amounts of money in stocks and bonds, investments.

If I understand the Senator correctly, if I were the attorney for the Senator from Wyoming, all I would say is, "Incorporate. You would have no limit."

Of course, it would cost a little more money in taxation. You would have to pay Uncle Sam a little more money. But you could spend all the time you wish on your farm. You could do anything you wish in terms of time or anything else, under this resolution, so long as it is dividends. But if it is the product of a family enterprise or a partnership and you are not in a corporate world, it would be limited.

What kind of a code of conduct are we setting up for Members of the Senate, if we are forcing people to go into the duplicitous world of a corporate structure in order to avoid the implications of a Senate code of conduct?

Mr. HATHAWAY. In answer to the Senator, I suggest that he look at page 25, line 19, which reads:

For purposes of this rule, the term "outside earned income" shall, subject to the provisions of subparagraphs (b) and (c), mean any income earned by an individual which is income received as a result of personal services actually rendered if such services are material income-producing factors.

My amendment would strike the word "if" and all words after that.

So the corporation example that the Senator just gave would not be true. If he earned income within that corporation, he would have to declare it.

Mr. STEVENS. The Senator does not get my point.

The point is that all one has to do in order to avoid the implication of this code of conduct is to incorporate and take his money out as dividends.

If you do you can spend as much time as you want, entirely inconsistent with the purposes of the rule.

What the Senator from Wyoming is trying to do is to set up a system whereby those who are involved in family enterprises—and I have one to deal with a partnership section, too—those who are involved in partnerships can do so so long as it is not inconsistent with their work in the Senate. It is a simple matter, believe me, and I am sure the Senator knows, it is a simple matter, to incorporate these things.

If the question is, in the Senator's mind, the limitation of income, believe me, there is no limitation here on unearned income.

Mr. HATHAWAY. It does not make any difference what form you get the income. If you earn the income from personel services in that corporation you cannot change your earned income over to dividends and, thereby, be exempt. If you are spending your time helping that corporation earning those dividends, that is going to be income to you under the broad definition of "outside earned income".

Mr. STEVENS. I do not see anything in this rule that says it has to be turned into dividends.

Mr. HATHAWAY. It does not have to be in terms of salary to be earned income; it just says income resulting from personal services actually rendered. The dividends could be income under that definition just the same as salary could be income. The rule of this paragraph has to be construed in its entirety.

Mr. STEVENS. Where in the rule, I might ask the Senator, where does the rule cover income, turn dividends into earned income? The provision just read on page 25? I am sure the staff will tell the Senator that is not the case.

Mr. HATHAWAY. On page 25 it says that earned income means any income earned by any individual resulting from personal services. If dividends, in reality were the result of personal services, these would be outside earned income subject to the limitation.

Mr. STEVENS. But dividends are not earned income. Dividends are not earned income; they are specifically excluded. Look at page 12, line 26.

All I am saying is as we look at this I would urge the Senate to consider a code of conduct that allows the Senator to continue his life as he has had it before he came here without being duplicitous.

The end result of what the Senator is suggesting is that anyone in his right mind would incorporate when he came to this body and took his income out in dividends and would not be subject to any limitations or anything else. That is not what we want, and I think in terms of partnerships, I was discussing with the manager of the bill—you know, again going back to that little flower shop my wife had—she does not have it now—it was a partnership and was not a family enterprise because there was another partner not a member of the family.

If this rule had been in effect I would have had to advise her, "Look, you cannot do that and run a risk of making more than $8,600 a year unless you incorporate," and then if the money, this part of the operation, is taken out as dividends it is not taken out as salary, and it is not violating any rule. Is that what the Senator wants me to do in the future?

Mr. HATHAWAY. I cannot find the definition the Senator is talking about.

Mr. STEVENS. Page 26, line 12 exempts dividends. It exempts gains derived from dealings in property or investments; interests, rents, and dividends. So that the Senator from Wyoming is in a position where if he makes a judgment as to a cow to sell this year it is earned income, but if he incorporates and they sell the cow it is a dividend.

Mr. HATHAWAY. I would like to ask the floor manager of the bill. I am interpreting item No. (6) exempting dividends to mean unearned income, and the person cannot merely get around the earned income definition by getting a dividend for personal services actually rendered, otherwise I suppose you could get around the honoraria limitation by forming a corporation to give speeches and pay yourself out in dividends and, thereby, avoid the limitation of 15 percent. Both of these would be sham transactions which I would hope the Ethics Committee would be able to discover and take enforcement action against.

Mr. NELSON. Mr. President, I wonder if the Senator from Wyoming will yield for a question?

The PRESIDING OFFICER (Mr. FORD). Does the Senator yield?

Mr. WALLOP. The Senator from Maine has the floor.

Mr. HATHAWAY. I would be happy to yield the floor at this time.

Mr. NELSON. Amendment No. 147, proposed by the Senator from Wyoming, does affect two different sections, one of them dealing with income from family enterprises, and the other one dealing with partnerships. They are not identical. In fact, there may be substantial differences between a partnership which may have a large number of partners, in which a Member may own a relatively small percentage, and a family enterprise.

I am wondering if the Senator would not be prepared to divide the question—in fact, I think they are divisible as a matter of right—because I may be prepared, as may many others, to vote one way on the family enterprise question and quite a different way on the partnership question. So I would want a division of the question anyway.

May I ask the Parliamentarian whether or not the two parts of Amendment 147, the first starting on line 1 through 3, and the other part, lines 4 through 7, are divisible as a matter of right.

The PRESIDING OFFICER. They are not now divisible because unanimous consent has been agreed to to consider them en bloc.

Mr. NELSON. I will be prepared to move to strike or table because I think these two propositions are too different to be treated as one. At the time the unanimous-consent agreement was requested, I thought we were only dealing with lines 9, 10, and 11, and I did not realize until subsequently we were also dealing with lines 15, 16, and 17 on page 26.

I take it that it takes unanimous consent at this stage to even modify the amendment?

The PRESIDING OFFICER. Motions are not in order until all the time of the Senator from Maine has expired.

Mr. STEVENS. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the inquiry.

Mr. STEVENS. Mr. President, will the Senator yield? It was my understanding that the Senator from Maine's amendment was considered in order and his time was to run during this period, but the Senator from Wyoming's amendment is still the amendment pending; is that not correct?

The PRESIDING OFFICER. The Senator from Wyoming's amendment will come back before us when the Hathaway amendment is disposed of. The Senator from Maine's amendment is to the amendment of the Senator from Wyoming.

Mr. STEVENS. So it is now the pending amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Has there been an agreement on the amendment of the Senator from Wyoming with regard to division of the two items in the amendment of the Senator from Wyoming?

The PRESIDING OFFICER. There has been none.

Mr. HANSEN. There has been none?

The PRESIDING OFFICER. None.

Mr. WALLOP. Mr. President, may the Senator from Wyoming inquire as to how much time is left to the Senator from Maine?

The PRESIDING OFFICER. The Senator from Maine has 4 minutes remaining.

Mr. WALLOP. Well, the Senator from Wyoming, by way of saving time, would agree that the question is divisible and he would agree to divide it.

Mr. NELSON. Does the amendment of the Senator from Maine amend both sections covered by the amendment of the Senator from Wyoming or just the first one?

Mr. WALLOP. It is my understanding it covers both sections of my amendment.

Mr. NELSON. Then I would suppose we would want to have the consent of the Senator from Maine since it takes unanimous consent before we divide the question.

I call attention to the absence of a quorum and ask that the time be divided equally between the two sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The time on the amendment of the Senator from Maine has expired, except for 15 minutes for the Senator from Wisconsin.

Mr. NELSON. I yield back the remainder of my time on the pending amendment.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment.

Mr. NELSON. Mr. President, I understand that the Senator from Wyoming wishes to ask unanimous consent to withdraw the amendment.

Mr. WALLOP. Mr. President, I ask unanimous consent to withdraw my amendment No. 147.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is withdrawn.

UP AMENDMENT NO. 104

Mr. NELSON. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 104:

On Page 26, lines 10 and 11, strike the words "not a material income-producing factor" and insert the following:

"managerial or supervisory in nature, necessary to protect the interests in the family enterprise and do not consume significant amounts of time while the Senate is in session."

Mr. NELSON. Mr. President, this amendment addresses itself to the question that has concerned us, and the question of spending a considerable amount of time in income producing activity, and by the addition of the phrase "while the Senate is in session," I think it presents a provision which avoids the matter of concern to us. So far as I am concerned, it is a good resolution to the question involving family enterprises.

Mr. WALLOP. Mr. President, I thank the distinguished floor manager, the Senator from Wisconsin (Mr. NELSON), for this language. I think it does address the problem that I raised. I understand that there will be some further discussion on partnerships at a later time, but this in fact does answer the question the Senator from Wyoming brought up about small family enterprises in a way which I think is satisfactory to all of us.

I thank the Senator, and I agree to the amendment.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. LUGAR. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Who yields time to the Senator from Indiana?

Mr. LUGAR. Mr. President, I would like to——

The PRESIDING OFFICER. The Senator has no time unless some Senator wishes to yield him time.

Mr. LUGAR. Mr. President, will the Senator yield?

Mr. NELSON. Yes, I yield the Senator from Indiana 5 minutes.

Mr. LUGAR. I thank the Senator. I would like to ask the Senator from Wisconsin a question for the benefit of the RECORD.

Would the Senator, who has proposed the amendment, please clarify his intent in offering the language "while the Senate is in session"? Will the Senator state whether that language offers a rationale or at least a defense against a charge that might be made that efforts by a Senator are a material income-producing factor or that they are not needed to sustain the business? I have argued that indeed they ought to be, if he is making such decisions. But is the intent of the amendment as the Senator has offered it, to see that if these efforts are made, a decision on a crop plan, for example, or examination of a farm, or even the operation of the farm would be permissible conduct for a Senator with regard to the code of conduct insofar as, for example, a family farm is concerned if those activities are undertaken when the Senate is not in session. Would the Senator address that situation for the benefit of the RECORD, so that we could understand what appears to be consistent with a code of ethical conduct on the part of a Senator, for example, involved with a family farm?

Mr. NELSON. I would agree with what the Senator has said, and the way the Senator stated it. It has not been this Senator's intent, nor do I not think, anyone's intent, that when the Senate was not in session or on weekends, that a Member should not be able to give his advice and devote some of his energies in terms of managing and supervising the activities of a family enterprise. I do not think anyone is concerned about the situation of a Member who has an enterprise back in his home State, whether it is a farm or ranch or other kind of business, when the Senate is in recess, going out to his farm and doing some work on his farm and making managerial decisions, then or at any other time, so long as it is not a major effort during the time in which Congress in fact is in session.

That has been my assumption from the beginning. We do not expect someone who spends his life building an enterprise, or who inherited it from his parents, to be prohibited from doing some work on that enterprise and making decisions which probably he alone could make anyway, such as investments, sales, or decisions concerning planting or purchase of equipment, for example.

I do not think anyone should care, when the Senate is in recess during August, if a member wants to spend his time looking over his farm or doing as he wishes with his free time, any more than anyone would want to interfere with any Senator's right to just take a vacation and do nothing.

Mr. LUGAR. I thank the Senator. If the Senator will permit one further question, my understanding of this amendment and the context in which it appears in the resolution is that if it is a family enterprise, and during the time in which the Senate is not in session a Senator's activities result in income, this income is not to be considered as a part of the income which is covered by the limitation of 15 percent.

In other words, the context in which this amendment occurs, as I recall, is in a listing of those areas in which income would not have to be included as outside earned income.

We are now talking about a definition of that type of income, and we are boiling it down, really, to a family enterprise situation, which produces income from efforts that are expended during the time the Senate is not in session, and, depending upon the efforts of the Senator, eventually the income exceeds an amount equal to the 15 percent which is the ceiling on outside earned income. Since the income resulted from activities during the time the Senate was not in session, in any event, it is not a part of the 15-percent consideration and does not have to fit within that ceiling.

Mr. NELSON. That would be my interpretation. I do not see any way to divide the question, really. If one is making managerial decisions in his ranch or farm, and coincident to that, he also operates a tractor or rounds up some cattle, we are not worrying about that. If he is looking after, supervising and making decisions, about the family enterprise on his own time, we are not concerned about trying to divide the Senator's earned from his unearned income in that situation. I do not think we can.

Mr. LUGAR. In any event, the last clause, "while the Senate is in session," controls the other qualifying language the Senator is suggesting; we are not making fine definitions of managerial services as opposed to the thoughts of the junior Senator from Wyoming about service riding the range and actual participation, so long as the activity involving the family enterprise occurs during a time that the Senate is not in session?

Mr. NELSON. Yes. It seems to me it is absolutely impossible to make that kind of exact definition, and I do not think the Senate ought to be telling people what they can do on their family farms when the Senate is not in session.

Mr. LUGAR. I thank the Senator, and I deeply appreciate his support of this amendment.

Mr. NELSON. I yield back the remainder of my time.

Mr. WALLOP. Mr. President, is it in order to move the adoption of this amendment?

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. WALLOP. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

AMENDMENT NO. 132

Mr. JAVITS. Mr. President, I call up my amendment which is at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) proposes an amendment numbered 132.

The amendment is as follows:

On page 5, line 25, strike the words "For investment,".

On page 5, line 24, insert the following: "for investment" after the word "year".

Mr. JAVITS. Mr. President, this particular amendment raises a very serious question regarding reporting data which must be given about property. It relates to personal property. The problem which is involved are the words "for investment."

If Members will turn to page 5, line 25, the reporting requirement is for the identity and category of value of each item of personal property held, directly or indirectly, during such calendar year in a trade or business or for investment or the production of income which has a fair market value in excess of $1,000 as of the close of business of such calendar year.

The problem raised is normally household goods. While not held for investment, many families could acquire jewelry, works of art, or antiques and there would be a question of whether or not they expect the value will increase as time passes. Those are works held for investment.

The concern of many colleagues, as my colleagues on the committee which drafted this resolution know, is that we should not become an attraction to thieves, et cetera, by the items which need to be reported.

I believe this question can be settled, if I might say to the manager on the part of the majority and the minority, by this amendment.

I would like to read what I believe to be a satisfactory explanation of what it means.

Title 1 of the resolution, rule XLII, financial disclosure, paragraph 2(e)2 provides for the reporting of:

The identity and category of value of each item of personal property held, directly or indirectly, during such calendar year in a trade or business or for investment or for production of income which has a fair market value in excess of $1,000 as of the close of such calendar year.

I am now speaking for myself. It is my understanding that by this provision——

Mr. NELSON. I did not hear the last sentence.

Mr. JAVITS. I am not quoting any longer. I am speaking.

It is my understanding that, by this provision I have just read, the committee intended to establish a broad exemption to the reporting requirements for certain items of personal property of a household nature. These include but are not limited to household goods, such as paintings, antique furnishings and jewelry which are acquired for personal use but which may also be good investments. Thus, even if the sale of such items might produce substantial income, or if they have substantial potential for appreciation, they are not required to be reported unless the reporting individual is in a trade or business of buying and selling such items for profit.

Mr. NELSON. The Senator from New York states the interpretation which had been my interpretation all along. It does not seem to me that it is any particular concern if someone inherited some furniture that turned out to be or was an antique, or if somebody liked a picture and purchased it and over the years it became more valuable. This Senator has never been concerned about that.

If one is in the business of investing in antique furniture, the business of investing in paintings, art, or in the business of investing in antique jewelry for the purpose of making a profit, that is a business activity.

I do not think we need to go so far as to say that if somebody purchases a picture he enjoys and would like to have, and the person is not engaged in the business of buying and selling pictures, as such, he has to try to get an appraisal or an evaluation of that kind of personal property. It is my view that is exempt from disclosure unless it comes within the precise definition within the resolution which refers to the business of buying and selling, investing, and so forth, for a profit in these various items.

Mr. JAVITS. There is only one thing the Senator said that should be clarified a little further. It is true that sometimes these things do come by inheritance. It is also true that often they come by purchase. I am sure that I have, and I am sure many other Senators have, sometimes seen the work of an artist or a cabinetmaker and have said, "That looks very good to me. I will take two or three of those." But, of course, we are not in the business of buying and selling paintings. I would think generally this would encompass the amendment the Senator has in mind. Some Members fool around with ancient cars.

Mr. NELSON. I am one of those; I have two.

Mr. JAVITS. As long as we understand each other, what we are after is any person who makes that a business, a business enterprise, then the words "for investment" are accurate and mean that the assets of that enterprise need be reported. But if it is not in any way a business, they do not have to be reported.

Mr. NELSON. That is my interpretation.

Mr. JAVITS. I thank my colleague.

Mr. HANSEN. Will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. HANSEN. I am fully sympathetic with the concern which has been expressed by the senior Senator from New York. Quite properly, he focuses on an issue that discloses some of the michief, albeit unintended, which is included in this bill. Let me give an example of another situation which I believe deserves consideration and thought.

One of the things which happens in the West in the ranching business is that a Member may inherit property from members of his family and, as that property appreciates—despite the fact that it may not yield very much in the way of cash flow—it would have a substantial value if it were appraised.

I have offered an amendment that would cut off at $500,000 the categories under which disclosure would be made. I do not know whether it will be accepted or not. However, it would seem to me that at this point there is just as much reason to say that there be a cutff as to my having to advertise, or anyone else having to advertise, what an appraisal on real estate might show.

I am thinking about a little different situation than is my friend from New York. He is thinking about how advertising objects, antiques, works of art, or whatever might focuse the attention of evildoers upon that particular residence as a place to rob or burglarize.

There is another concern of many people in the West. My colleague from Wyoming and I know perfectly well about cases where members of families have been subject to kidnaping simply because somebody got the idea that a person either had some wealth or, by virtue of what he owned, could get some wealth.

I would like to ask my friend from New York if he would support a cutoff on the disclosure categories. I am not saying that there should not be some disclosure, but I think that over $500,000 would be a good place to cut that off. There is still something magic in the idea that someone is a millionaire. May we have order, Mr. President?

The PRESIDING OFFICER (Mr. CHILES). Will the Senate come to order and give the Senator from Wyoming its attention?

Mr. HANSEN. Would my friend from New York and my friend from Wisconsin support an amendment to cut off at $500,000 this other disclosure?

Mr. NELSON. As of this moment, the Senator from Wisconsin would not, but I would like to ask: is the Senator speaking about disclosure of income from investments?

Mr. HANSEN. No; I am not.

Mr. NELSON. He is talking about disclosure of investments.

Mr. HANSEN. I am talking about disclosure of investments. I am not talking about income. I am talking about disclosure of investments, real estate.

Mr. NELSON. We went through that in some detail in the committee, and that was not the conclusion of the committee. That is not to say the committee came to the perfect answer.

The Senator is saying that the category of disclosure of assets should terminate at a figure of $500,000, is that correct?

Mr. HANSEN. The Senator is correct.

Mr. NELSON. Or above.

Mr. HANSEN. Yes.

Mr. NELSON. I would not be prepared, myself, to accept that amendment, although we have 2 or 3 days left here if the Senator wishes to put it in.

Mr. JAVITS. I am inclined to agree with Senator NELSON. We set the categories of value because we did not wish to compel Members to get appraisals or to reveal exact value.

I did not understand—I apologize that I was not listening closely. Other things distracted me.

I think that by "cutoff," the Senator meant there should be no reporting of real property up to $500,000.

Mr. HANSEN. No, I did not mean that at all. I meant to keep the categories in, but instead of going up to $5 million, as the categories now provide, have the last category read "$500,000 or over."

Mr. JAVITS. What would be the rationale?

Mr. HANSEN. My rationale is that there is still some magic in the word "millionaire," although there are a lot more millionaires today than there used to be. If somebody is thought to be a millionaire, I have seen, and other Senators have seen, where someone possessed of evil intentions may think that he could get a member of that person's family, a grandchild or somebody, and he would have a pretty important hostage. That is all.

I am not objecting one bit to filing with the Secretary of the Senate a full disclosure, full income tax, full appraisal on everything that we own. However, I must say that it is difficult for me to see how an object of art, that may have great value, ought to be excluded from this, while we require that a person who has some real estate goes ahead and fully discloses.

If a trade is made or if an exchange is made, then the value is based upon that exchange and we come right back to the situation that concerns me and which, I think, in time, will concern many in this Chamber. That is, that unwittingly, we are going to make Members of this body the object of people who are possessed of evil intentions.

Mr. JAVITS. May I speak to that a moment?

Mr. HANSEN. Yes, indeed.

Mr. JAVITS. In the first place, "which has a fair market value" I would define to mean over and above indebtedness by way of mortgage. I would not consider fair market value to include the gross value of the property without deducting the amount of mortgage, because a fair market value is a sales value and a sales value is obviously not a value that will include the amount of mortgage.

Assuming, again, this includes ranches and others which represent very large amounts of money—I certainly would want to consider it. I shall not say now I flatly oppose it. I would like to consider it. I think the Senator makes a very strong point.

The reason I did what I did about investments is that the committee did not include household goods, whether it was paintings or antiques or anything like that. The way in which the words "for investment" were placed, if the Senator will read it, at the bottom of page 5, lines 24 and 25, it says:

held, directly or indirectly, during such calendar year in a trade or business or for investment or the production of income. . . .

Therefore, the words, "or for investment," standing alone, indicated that anything held for investment, even a picture, an antique——

Mr. HANSEN. What page is this on?

Mr. JAVITS. It is page 5, line 25, in the measure we are considering, which is amendment No. 65.

Mr. HANSEN. I would not argue with my friend from New York insofar as the intentions of the committee are concerned, but I would say that I do not ascribe omniscience to everything that the committee has done.

Mr. JAVITS. Certainly not. That is why I suggest to the Senator that he submit his amendment. I am open-minded on it.

Mr. HANSEN. I have submitted it, and I have been told that it may be looked at, but I must say that it seems to me that an appropriate time to consider it is right now. I am in complete accord and full sympathy with the desire and the intentions of my friend from New York. However, I must say that if I do not raise the issue now, my fear is that the amendment proposed by the Senator from New York, which I think has great merit, will be accepted, but when mine comes along a little later on, there may not be as many people interested in that as might be interested now.

Mr. JAVITS. Mr. President, may I suggest to the Senator something which he does not know? I am about to withdraw the amendment.

Mr. HANSEN. I was not aware of that.

Mr. JAVITS. I know that. I am satisfied with the colloquy we have had and with the explanation as to what this means in the bill. So that amendment I do not intend to press, as I do not see it as necessary at this time.

Mr. HANSEN. Of course, that does take somewhat from the interest that I have hoped would have been here. I would have to say that it seems to me that the committee is drawing a pretty fine line if it says, on the one hand, that this is the way this section is to be interpreted, as spelled out by the colloquy that we have just heard, while insisting that the other parts of this bill remain unchanged. Despite what some Senators may think, the part that concerns me is that I do not believe that this provision necessarily enhances the image that constituents may have of this body, an image that I think is important. But I am concerned about what can happen if we leave in this bill language which causes Members of the body or individuals who may aspire sometime to become Members of this body to ask themselves, "Do I want to impose upon my family the risk and some of the dangers that could follow if, by my advertising on the front pages of newspapers what property I have, I would place them in greater danger or greater jeopardy than would otherwise be the case."

I think that is an important consideration, and I just do not see the rationale in saying that to carry these limits on up to $5 million is going to make this body more ethical.

Now, if anyone does not know—I know my friend from Wyoming knows—most ranchers, most cattlemen, have not had any net profit in the cow business for at least the last 2 years. Yet, if you were to look at their ranches and the amount of land they have, it very easily could exceed $500,000. It does not take that much land these days.

If any trade is being effected, and a lot of ranchers are trying to make trades, then it has to be reported.

I hope very much that my friend from Wisconsin, the manager of the bill, will be very sympathetic when this comes up and will reflect upon what will happen absent any changes being made in those different categories. What I think is going to result is that unwittingly we will make targets for kidnappers of many families of Members of this body.

Mr. JAVITS. Mr. President, while I have the floor, I wish to say to the Senator if he does propose his amendment I will personally consider it most sympathetically. I could go into the rationale of the committee now, but I am going to withdraw this one. I have three others which will be accepted; they are routine. I simply wish to get on with the business and then, if the Senator wishes immediately to follow me, I shall be happy, with the consent of the manager, for him to so do.

Mr. HANSEN. I thank my friend from New York.

Mr. JAVITS. Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

AMENDMENT NO. 127

Mr. JAVITS. Mr. President, I call up amendment No. 127.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) proposes amendment No. 127.

The amendment is as follows:

On page 50, line 6, insert following the word "thereto" a semicolon and add "and shall review the amounts deductible for senatorial expenses incurred while living away from home pursuant to section 31c of title 2, United States Code, so that the same will more adequately relate to actual living expenses incurred by a Member in connection with the performance of his official duties.".

Mr. JAVITS. Mr. President, I send a modification of the amendment to the desk.

The PRESIDING OFFICER. The modification will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) proposes a modification to amendment No. 127.

The modified amendment No. 127 is as follows:

On page 50, line 7, insert a new paragraph (b): "The Committee on Finance in consultation with the Appropriations Committee shall review the amounts deductible for senatorial expenses incurred while living away from home pursuant to section 31c of title 2, United States Code, so that the same will more adequately relate to actual living expenses incurred by a Member in connection with the performance of his official duties.".

Redesignate paragraph (b) as (c) and in line 8 insert "and (b)" after line (a).

Mr. JAVITS. Mr. President, this section relates to the study of certain provisions of the Internal Revenue Code, and I ask the Finance Committee in consultation with the Appropriations Committee to study the point that we may deduct only $3,000 annually for our Washington expenses even though we maintain two homes and most of us pay two or three times that amount in rent alone for the home that we maintain in Washington. It is one of the real inequities in which we are very badly in my judgment considered under the income tax code. While I do not wish to get into debate about whether or not to do anything

about it in this code—probably it does not belong here—I do believe that it should be studied by the appropriate committees, and we have a study section anyhow in this paragraph which is sought to be amended.

We might as well include this item, which has been so long before us and we have never done anything about. Perhaps the committees will enlighten us on the subject. I do not believe there is any objection to it.

Mr. NELSON. The Senator from Wisconsin has no objection.

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment was agreed to.

UP AMENDMENT NO. 105

Mr. JAVITS. Mr. President, I send another amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. JAVITS) proposes an unprinted amendment No. 105.

On page 39, line 19, add the following new sentence: "In exceptional circumstances the Select Committee may grant an extension to the time provided in this paragraph not to exceed 90 days.

Mr. JAVITS. Mr. President, this paragraph provides that we cannot utilize the services of any individual for more than 90 days in any calendar year in the conduct of our official duties, unless that individual becomes an officer or an employee of the Government or an officer or employee of the Senate or agrees in writing to comply with the Senate rules, these new rules of official conduct.

The problem we have is this: Many of us organize task forces, consisting of college professors, business people, and labor people to help us with given types of legislation and they do not necessarily complete their work in 90 days.

Mr. NELSON. If the Senator will yield, this precise question was raised sometime back. We may be able to work out an amendment, if the Senator will withdraw that.

Mr. JAVITS. Fine. That suits me. I withdraw my amendment, Mr. President.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

UP AMENDMENT NO. 106

Mr. JAVITS. I send another amendment to the desk and ask that it be stated.

The PRESIDING OFFICER (Mr. CULVER). The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York proposes unprinted amendment No. 106.

On page 23, after line 5 insert the following:

"(4) from an individual who is a foreign national if that individual is not acting, directly or indirectly, on behalf of a foreign corporation, partnership or business enterprise, a foreign trade, cultural, educational or other association, a foreign political party or a foreign government."

Mr. JAVITS. Mr. President, the words "foreign national" appear at page 22, line 4, and it is an absolute prohibition against any gift from any foreign national without regard to whether that foreign national is or is not interested in any legislation before Congress.

I do not think that any such thing was intended. Many of us have foreign friends with whom we enjoy very close personal relations and so the amendment which I have proposed, which does not seek to strike those words but goes into the exceptions at page 23, line 5, adds another exception, to wit, if that foreign national is not representing some interest which might have an interest in legislation and spells it out in specific terms. I worked that out with Senator RIBICOFF, and I hope it will be found acceptable by the committee.

Mr. CLARK. The chairman of the committee advises me that he finds the amendment acceptable, and I know of no one on the committee who would object to it. In fact, it seems like a wise addition.

We yield back the remainder of our time.

Mr. JAVITS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The agreement was agreed to.

Mr. JAVITS. I thank our colleague very much.

Mr. CLARK. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent the time be equally divided between both sides on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the first amendment by Mr. HELMS to be considered tomorrow be amendment No. 112, on which he wants 20 minutes. That is one of his 20-minute amendments. He wanted this amendment carried over until tomorrow. I have discussed it with him, and he indicated that it would be perfectly all right with him to have it as the first amendment of his tomorrow.

So I ask unanimous consent that after the two leaders or their designees have been recognized on tomorrow, Mr. HELMS' amendment No. 112 be the order of business at that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. It is understood, is it not, Mr. President, that upon the disposition of the amendment, the votes will occur in sequence in relation to the four other amendments by Mr. HELMS—114, 113, 158, and 111, in that order?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against each side on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 108

Mr. PERCY. Mr. President, I call up my amendment No. 108.

The PRESIDING OFFICER. The amendment will be stated.

The Senate will be in order.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an amendment No. 108.

On page 40, line 7, insert "age," after "origin,".

Mr. PERCY. Mr. President, Senate Resolution 110 prohibits discriminatory employment practices in the Senate on the basis of race, color, religion, sex, national origin or state of physical handicap. However, Senate Resolution 110 does not contain a similar prohibition of discrimination on the basis of age.

I feel age discrimination should also be prohibited. To include age would be comparable with the Revenue Sharing Act which prohibits discrimination on the basis of age in the use of revenue-sharing funds.

Mr. President, I ask unanimous consent that the distinguished Senator from New Jersey (Mr. WILLIAMS) be added as a cosponsor of amendment No. 108 to Senate Resolution 110.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. It is my understanding, Mr. President, that this amendment is acceptable to the managers of the bill.

I yield back the remainder of my time.

Mr. CLARK. Mr. President, the amendment certainly is acceptable. Congress has enacted into Federal law, as the Senator said, the prohibition against employment discrimination on the basis of age; it is a good amendment.

We yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

AMENDMENT NO. 109

Mr. PERCY. Mr. President, I call up my amendment No. 109.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, after line 5, insert the following new paragraph:

(e) The Select Committee on Ethics shall promulgate regulations and procedures to insure the confidentiality of tax returns and tax return information examined by the staff

of that committee pursuant to subparagraph (b) above. Such regulations shall include the sanction of dismissal for any employee who knowingly and willfully communicates to any unauthorized person information derived from any confidentially filed tax return or tax return information examined pursuant to subparagraph (b) above.

Mr. PERCY. Mr. President, Senate Resolution 110 provides that if the Ethics Committee decides to pursue an investigation of an individual, the committee may make his tax returns and other confidential financial material available to any member of the committee or any member of the staff of the select committee.

I do not want nor does any other Senator or staff member want tax returns going to the Ethics Committee with no restriction on what staff can do with them.

Therefore, this amendment would require the Ethics Committee to promulgate regulations to protect the confidentiality of tax returns and tax return information filed with the Ethics Committee. Such regulations shall include dismissal for employees disclosing such information to unauthorized persons.

I actually would have preferred to have written civil and criminal penalties into law for unauthorized disclosure of such information. However, as this is only a resolution it cannot be used to enact statutory sanctions. The amendment, therefore, provides only for the Ethics Committee to promulgate rules to protect the confidentiality of tax returns.

At such time, however, as the Senate passes legislation to apply in law financial disclosure legislation to all three branches of Government, I shall offer an amendment to apply civil and criminal sanctions in law to employees who violate the confidentiality of the tax return.

I would like to ask the floor manager of the bill, Mr. President, if it is correct for me to assume that the Senate will soon be taking up legislation to apply financial disclosure and other regulations uniformly to all three branches of Government.

Mr. CLARK. Yes; that is our understanding.

Mr. PERCY. Is there knowledge as to whether the chairman of the Governmental Affairs Committee plans to hold hearings and mark up this legislation?

Mr. CLARK. I am advised that Senator RIBICOFF intends to hold hearings as soon as possible, hopefully as soon as early May.

Mr. PERCY. I, being the ranking Republican on that committee, will certainly join with Senator RIBICOFF and, I trust, our distinguished colleague, Senator JAVITS, in working on suitable language. I feel in many ways financial disclosure is just as important for executive branch officials since they handle and disburse billions of dollars of funds annually. If financial disclosure is a good thing for Members of the Senate and the House, where we really have no direct contractual capabilities, where we do not grant contracts, where the chances of conflict of interest are much less than that of many people in the executive branch of Government, it is equally applicable to members of the executive branch, particularly in those very highly sensitive positions where they have major contracting authority.

I feel, therefore, it would be well for us to have a uniform law, and I will certainly participate with Senator RIBICOFF in those hearings, and I trust we can report out legislation soon.

I have no further comments to make on amendment No. 109 which, I understand, is acceptable to the managers of the bill.

Mr. CLARK. The Senator is correct. The amendment is acceptable.

I would just say that throughout the process of discussions on this legislation, Senate Resolution 110, Senator RIBICOFF has said on many occasions that, following this legislation, it is certainly his intent to recommend legislation that would apply to all three branches, for many of the reasons the Senator from Illinois has described.

I yield back the remainder of our time.

Mr. PERCY. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

AMENDMENT NO. 110

Mr. PERCY. Mr. President, I call up my amendment No. 110 and ask the clerk to report the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk will read as follows:

The Senator from Illinois (Mr. PERCY) proposes amendment No. 110.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 49, line 22, after the ".", add, "In considering such legislation, the Committee shall consider the need to increase clerk-hire allowances to provide for additional expenses that might be necesary to comply with the requirements of this resolution.".

Mr. PERCY. Mr. President, Senate Resolution 110 requires the Committee on Appropriations to study senatorial allowances to determine whether they are adequate to defray necessary and appropriate expenses incurred in connection with the operation of a Member's office.

This amendment would simply require that that study include whether or not clerk hire allowances should be increased to enable Members to comply with the provisions of this resolution.

It may well be that the resolution as finally adopted will require substantial bookkeeping and other reporting requirements which might involve the need for additional allowances in a Senator's office.

Therefore, I think that as part of the study the Appropriations Committee should study the question of resources needed, if any, to comply with Senate Resolution 110.

Mr. NELSON. Mr. President, I have no objection to that amendment.

Mr. PERCY. I yield back the reminder of my time, Mr. President.

The PRESIDING OFFICER. Is all time yielded back?

The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

AMENDMENT NO. 145

Mr. PERCY. Mr. President, I call up my amendment No. 145.

Is the Senator from Illinois correct that we have 15 minutes to a side on this amendment?

The PRESIDING OFFICER. It is the understanding of the Chair that there are 30 minutes to a side on amendment No. 133.

Mr. PERCY. Thirty minutes to a side?

The PRESIDING OFFICER. Yes, on amendment No. 133.

The Chair is not of the impression there is an agreement on amendment No. 145 on time.

Mr. PERCY. Mr. President, I shall not take the full time, I think, unless there is an extended discussion of it.

I call up amendment No. 145 and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an amendment No. 145.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 14, after "(d)", insert "(1)".

On page 5, after line 16, insert the following:

"(2) In aggregating gifts for purposes of subparagraphs (b) and (c) of this paragraph, the reporting individual may deduct from the total value of gifts received from any source during the calendar year the total value of gifts by the reporting individual to that source during the calendar year, except that, if gifts with a fair market value of less than $35 received from that source are not aggregated, gifts with a fair market value of less than $35 given to that source may not be deducted.".

On page 22, line 4, after the period, insert "In determining whether an individual has accepted any gift or gifts having an aggregate value exceeding $100 during a calendar year from any person, organization, or corporation, there may be deducted the aggregate value of gifts (other than gifts described in subparagraph (c)) given by such individual to such person, organization, or corporation during that calendar year.".

The PRESIDING OFFICER. The Senate will be in order. The Senator will suspend.

The Senator from Illinois.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. ROBERT C. BYRD. There was a time limit on each of the Senator's other amendments.

The PRESIDING OFFICER. The Chair was not aware of that.

Mr. ROBERT C. BYRD. I believe it was a time limit of 1 hour, equally divided.

Mr. PERCY. I think subsequently the Senator from Illinois agreed to reduce it to 15 minutes a side. I thought that was what occurred.

Mr. ROBERT C. BYRD. Very well, then we may do that in case we did not.

Mr. PERCY. I am certainly agreeable to do that.

Mr. ROBERT C. BYRD. Thirty minutes on each of the other amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Fine.

Mr. President, this amendment is simply to get down to the crux of what we are trying to accomplish in the proposed rules affecting gifts and to take into account that there are thousands of individuals covered by and potentially covered by the limitation on gifts.

If we take the Bank of America alone, it has 6,000 officers. There are many corporations and other organizations that have a great many people covered by this. Many of us have had extended friendships with people who are or some day might be covered by the provisions of this resolution.

We certainly do not want to alter or make artificial relationships which have no real relationship to potential conflicts of interest or to attempts to influence a Senator in legislative matters.

Proposed rule XLII requires that gifts of over $250 in food, transportation, lodging, and entertainment from a single source be reported. All other gifts from a single source valued at over $100 must also be reported. Gifts valued at under $35 need not be aggregated for purposes of reporting.

Proposed rule XLIII prohibits the acceptance of gifts valued over $100 from a registered lobbyist or from an officer or director of a registered lobbyist or an officer or director of an organization which maintains a political action committee. Gifts under $35 are excluded.

These are the provisions that I find would be extraordinarily awkward, it would seem, in the course of personal relationships that may have existed over a period of many decades.

The amendment allows the value of gifts that a member or employee gives in return to be deducted from the total of gifts received and the net figure is used to determine whether a report must be filed under rule XLII or whether the limit has been reached under rule XLIII.

Certainly, a gift over $100 to an individual that I may have known for several decades, who is a business friend in a company that happens to have a PAC, for instance, might not be that out of the ordinary whether it is at Christmas time or any other time.

What we are attempting to insure in the resolution is that there is no gift that would influence or be of undue influence. But if I give a gift valued at $100 or $101 and someone gives a gift to our family of roughly comparable value, there is no effort being made to influence anyone.

I think it is really a situation which the committee, in the extremely difficult job that they had in trying to put this together, simply overlooked.

Under this amendment, for purposes of reporting under rule XLII, if a Senator or employee aggregates only those gifts given that are worth $35 or more may be deducted for purposes of arriving at the net figure. As an option, all gifts given and received may be aggregated.

For purposes of the limit under rule XLIII, only those gifts given in return that are valued at $35 or more may be deducted. This is because rule XLIII does not cover gifts valued under $35.

The amendment presumes that members and employees will keep accurate records of transactions covered by either rule so that if a question does arise, the records may be made available to the Ethics Committee. This is particularly important in the case of rule XLIII, because the $100 limit will still apply where more than $100 in covered gifts are received than given.

So it is a net effect. But to arbitrarily place a limit would be, I think, an undue restriction in normal, customary hospitality exchanges, or exchanges of gifts between friends of long standing. To say we cannot accept a gift when we have given in kind, we might just as well say at Christmas time, why do people exchange gifts, why not just keep their own gifts? But that is not the spirit of it. The spirit is an exchange.

What we are trying to get at is an undue influence and there cannot be an undue influence if there has been no net difference over the limitations placed.

If someone received a painting valued at $300 and they gave a table worth $150, that difference would be more than $100. They would have to give gifts closer in comparable value.

That is just about what happens, anyway, in human relationships.

I think this kind of situation is a rather small matter. I suppose it could be handled with an understanding between friends, "Well, after all, you are somewhat different, you are in the U.S. Senate, therefore, you have these arbitrary limitations on you."

But it does seem that what we are trying to get at is the principle of the net difference rather than the situation that I have outlined. I do not think we are trying to prohibit that kind of exchange of normal custom.

Mr. CLARK. Will the Senator yield?

Mr. PERCY. I am happy to.

Mr. CLARK. I am just speaking for myself. It seems to me that the Senator makes a very good case in terms of the limitation on gifts, on that section of the bill which is dealt with on page 2 of the Senator's amendment.

In other words, on page 22, line 4, where he is dealing with the gift section of the bill.

But I wonder, really, if the same argument should be applied to disclosure, which is the other part of the amendment covered, because it seems to me they are rather different considerations.

While we are talking about the gift provisions, we simply restricted gifts from lobbyists and PAC's or officers of PAC groups. That is one thing, and I would tend to agree with the Senator on that point. But when we talk about disclosure, remember in this legislation the disclosure provisions apply to everyone, whether you are a lobbyist or associated with a PAC or anyone else.

It seems to me that the exchange ought to be reported, as with all other gifts, under the $100 reporting provisions. It seems to me the two ought to be separated. One could make a much stronger argument for excluding it from the gift section, when you have an exchange of gifts, than simply exempting it from the reporting provisions. Most people would argue that disclosure is the most important factor involved in any case. What would the Senator think about that?

Mr. PERCY. One aspect of it that I think would help, would not require an amendment but just an interpretation of what is intended and meant in the financial and gift disclosure report, might be clarified at this point. A Member, officer, or employee of the Senate may wish to make some explanatory comments regarding information included in the financial and gift disclosure report that is required to be filed. Would the managers of the bill agree that such explanatory comments be considered an integral part of the report, so that they will be available for public inspection along with the report, and will be mailed to those requesting copies of the report from the Secretary of the Senate?

I think that would take care of a part of the problem, at least, so that in the report itself there would be a full explanation that, after all, a Senator or member of the Senate staff received a gift, but in turn they gave a gift, and you could list the respective values. It creates an artificial situation, as I think we can all see, but at least it creates a better record than showing something was received and nothing given in return, so that there is no offset.

Mr. NELSON. Did I correctly understand the Senator to say that the reporting Member or officer may offer an explanation?

Mr. PERCY. He may wish to include it, that is right. There is no obligation, but if he does it, would the manager of the bill agree that the explanation would be an integral part of the report, so that the explanation is available for public inspection along with the report, and is delivered to those requesting copies of the report from the Secretary of the Senate?

Mr. NELSON. It is not a big issue for the Senator from Wisconsin, but if in fact there is a mutual exchange of gifts or hospitality, so that it is a wash, I really do not see any reason for reporting.

Furthermore, I have always thought that the requirement of reporting a personal gift worth over $100 from a friend, not in the excluded classes, was very strict. We are talking in some cases, after all, about transactions among personal friends who are in no way involved in lobbying and in no way involved with PAC's or any other kind of groups.

The amendment does not concern me all that much. I do not like to see more filing than is necessary to be done to accomplish the purpose of the resolution, or any act. As the Senator well stated, if there is an exchange of hospitality between two individuals, and they are a wash in terms of the exchange, I hardly see much point in having people fill out a report saying, "I stayed 10 days with my friend last summer, and he spent 10 days at my place this winter." What are we trying to accomplish other than a lot of paperwork that serves no purpose?

Mr. PERCY. If that illustration is used, let us just take the case of when friends of the distinguished Senator from Wisconsin stay at the Senator's home for a period of a few days; it is

generally customary for guests coming to spend 3 or 4 days to bring a house gift. Let us say the house gift is—let us say the guests brought a pair of skis and gave them to the Senator from Wisconsin. The value of the skis might be over $100. What does the Senator from Wisconsin do then? Under this resolution he would be required to say, "I cannot accept that gift; take it back and give me a gift worth $98."

Mr. NELSON. Let me say to the Senator that the fact is that under the resolution personal hospitality is totally exempted. It was not a good example.

Mr. PERCY. But if it is a gift, any kind of gift given by, let us say, a business friend of long standing of the Senator from Wisconsin, who has stayed in his home for 3 or 4 days, and he brings a house gift, and the house gift is worth over $125?

Mr. NELSON. That would be covered.

Mr. PERCY. Is it true that the gift, if it is worth over $125, could not be accepted?

Mr. NELSON. If it is from one of the two exempted groups it could not be accepted.

Mr. PERCY. Could not be?

Mr. NELSON. That is right.

Mr. PERCY. Even though he has received hospitality for 4 or 5 days at the Senator's house, and is merely bringing it as a house gift?

Mr. NELSON. That is correct.

Mr. PERCY. It is the purpose of the Senator from Illinois to say that there is no attempt of any kind to influence if there is an exchange of equivalent value, and therefore we only report—and I am trying to cut down the paperwork—that we only report the net difference. If there is nothing given in exchange, and it is a gift of over $100, it has to be reported or limited, but if it is in return for a gift that has been received it would not have to be.

I wonder if the amendment does not appeal to the floor manager as a way of reducing paperwork without in any way undercutting the purpose, which the Senator from Illinois thoroughly supports. It is the net difference we are looking for. Thus the matter will end up with no other effect than to eliminate all of those kinds of cases where there is exchanged hospitality, gifts, or whatever it may be.

Mr. NELSON. I think the Senator states the case which would concern everyone, or at least almost everyone; and that is longtime personal relationships with individuals, many existing before we ever came to the Senate.

I have one freind like that whom I happened to know when I was in the State legislature. We have been friends for 20 years. He is a lobbyist, but a personal friend to this day. I am sure there are many other Senators who have all kinds of friends of that type.

I understood that the Senator from Iowa favored disclosure even if there were offsetting gifts. I have no objection to the position of the Senator from Iowa, I have no objection to the position of the Senator from Illinois, and I have no objection to the position of the committee that sent out the resolution. If you can reach some agreement, I am happy.

Mr. PERCY What the Senator from Illinois is trying to avoid is the paperwork.

Mr. NELSON. I understand that.

Mr. PERCY. We are trying to create something here. Let us take the case of old friends. The Senator from Wisconsin says he has friends of 20 or 30 years' standing. The Senator from Illinois has friends of 40 years' standing. We have traveled together. When we travel together on a trip, someone picks up the check for dinner today, and someone else tomorrow. Under the pending resolution, we are going to have to keep books on this whole business, though at the end of the trip it usually works out that you have equalized the expenditures.

We are not trying to evade the situation the committee has faced up to. The question is, over the period of the reporting time, over 1 year, has there been a net factor of financial gain greater than $150 or $200, whatever the case may be?

Then if there is, it is prohibited to accept a gift valued over $100, or if it is over the $250 or $100 limits of rule XLII, it must be reported. The burden of proof is upon the Senator or member of the staff to keep such records that he can prove the value, if ever challenged. I do not imagine there will be 1 time out of 1,000 where it will be challenged.

What I am trying to eliminate is all this filing, all this paperwork, and all this needless reporting which will be done when we take into account that, if we take all the officers and directors of all the organizations we have potentially covered in America, there are literally hundreds of thousands of people involved. That is what the Senator from Illinois is trying to eliminate in this one amendment.

Mr. CURTIS. Will the Senator yield for a question?

Mr. PERCY. I will be happy to yield.

Mr. CURTIS. The time may come when the ladies of the country will again break the doors of the Senate down and we will again have a lady Senator. That will be a great addition to this body. When that time comes, suppose that lady Senator is the object of a courtship and she receives an engagement ring and a wedding ring. Does she report that fact under this resolution? It seems to me that this whole subject which the distinguished Senator from Illinois has been discussing is getting off into a ridiculous area. It has nothing to do with maintaining standards of honesty as Senators.

I would like to have my question answered. In such a case would she report the receipt of her engagement ring?

Mr. PERCY. The Senator from Illinois would prefer the question be directed to the committee or the floor manager of the resolution.

Mr. CURTIS. What is the answer to that question?

Mr. PERCY. We will be faced with many questions like that as we go along. I am trying to eliminate the perfectly obvious cases with which we are really not trying to deal at all.

Mr. CURTIS. Will the distinguished Senator managing the resolution answer my question?

Mr. NELSON. The question again was what?

Mr. CURTIS. If a lady Senator is the object of a courtship—and this would apply to a staff member also—and she receives an engagement ring and a wedding ring, does she report it, under this resolution?

Mr. NELSON. Under the amendment of the Senator from Illinois they cancel each other, I take it.

Mr. CURTIS. I am serious. I am not trying to be humorous. I am serious in this regard. I think in this whole area we are now talking about we are getting quite far away from anything related to honesty on the part of Senators.

Mr. NELSON. Of course, the amendment the Senator from Illinois offers does not apply just to 100 Members. It applies to some 1,500 employees of the Senate. So it is a much broader question.

Mr. PERCY. We all have the same kind of personal relationships. Employees are no different from Senators. They have longstanding friends. They may be exchanging gifts back and forth at Christmastime or throughout the year, whatever it may be.

Mr. NELSON. I agree. I am saying the problem is substantial because there are 1,500 employees involved.

Mr. CURTIS. What is the answer to it?

Mr. NELSON. The answer to it is that under this resolution I guess they would have to report it.

Mr. CURTIS. Now suppose she gives it back before the reporting date. Does she report the gift and the return, or can it be ignored?

Mr. THURMOND. Will the Senator yield?

Mr. PERCY. I will be happy to yield.

Mr. THURMOND. I have a young lady in my office right now who is engaged to a lobbyist. When he gives her a ring, if she has to report it I imagine it will be a little embarrassing to her fiance, who will have to say how much he paid for the ring.

Mr. PERCY. This is the same sort of thing that we are getting at. We are going to have to ask the value of gifts that are given, I suppose, and have them appraised. We will have to report them. That is why the Senator from Illinois in the amendment that was just agreed to request the Rules Committee to determine how much all this bookkeeping will cost and who will pay for it. This pay increase we have been talking about so much may start to dwindle when we start getting into the bookkeeping costs. We will have to keep records and have them audited, and so forth.

Mr. THURMOND. As I understand the proposal of the Senator from Illinois, if a person gives a friend a gift and he gives a gift in return, only the difference in value is reported.

Mr. PERCY. That is right. They only report the net value, if someone gives a Member or employee a gift.

I want to be very serious about this point. In business, and business faces the same problems we do in the Senate, how do they keep people in the purchasing department from getting corrupted? Are

they corrupted with a $5 lunch? Are they corrupted with a night out at the 21 Club?

I adopted a very simple rule that stood the test of time for the 20 years that I was a chief executive officer. Anyone in the purchasing department, or any other department of the company, could accept hospitality from a seller trying to sell him something because mealtime is a good time to talk over business, exchange views and ideas. But I had an absolute requirement that they could not accept two in a row. The next time they would take the seller out to lunch, dinner, whatever it was, and put in an expense voucher. The company would then pay for it. They never could accept two in a row.

That eliminated all the problems. It was an exchange then. There was no obligation. The suppliers were stunned when they learned that our integrity in business was such that they would be treated as coequals, that they were not trying to buy that business with a lunch or a dinner. They were using mealtime as a time to exchange ideas and thoughts and get to know each other, but the company they were selling to would entertain them for a meal the next time. That was one of the best things we ever did.

That is all we are trying to do here, to say if there is an exchange, it is the net difference we are talking about. If a gift is accepted, then one better see that a gift is given back.

There would be a lot of lobbyists around here who will be stunned, and a lot of gifts that will be turned down, if a Senator realized he had to give a gift back, or should, if the difference was over whatever the allowance is.

First, this is one way to eliminate paperwork, and, second, to remove some of the artificiality.

I do not even know whether a lot of my friends have a PAC. I have friends of 30 years standing who have never really discussed a legislative item with me. They have no interest in legislation. They may have a PAC. I do not know. I will now have to ask them if they have a PAC.

The amendment the Senator from Illinois is now offering would eliminate some of the paperwork and remove some of the artificiality I feel we are creating, setting ourselves up as a separate group.

At this juncture, Mr. President, I ask unanimous consent to have printed in the RECORD an article by Charles Bartlett, a distinguished columnist, entitled "Congressional Ethics May Have a Hollow Core."

In a sense, this columnist, respected across the country for his fairness and judgment, has pointed out very aptly some of the problems we are facing. The amendment of the Senator from Illinois is simply to try to lessen the number of instances of this kind which really make no sense, but also to stick to the principle of the committee that there should not be a gift or an unreported gift of over $100 or $250, as the case may be, unless there is such an exchange.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 21, 1977]

CONGRESSIONAL ETHICS MAY HAVE A HOLLOW CORE

(By Charles Bartlett)

If envy is a key ingredient of the egalitarian spirit, Congress is brewing a fresh batch of it in its urgent moves to win back popular esteem.

The new assertions of more rigid ethics in the House and Senate will take members of Congress out of the ranks of the moonlighters. Their sense of vulnerability at having their pay raised sharply has stirred them to react to admonitions that they should now regard themselves as full-time hirelings of the federal government.

Accordingly, the House has adopted and the Senate is about to adopt a restraint that will allow no member to earn more than $8,625 beyond his salary in any given year. No matter how well his book is selling or how heavy the demand for his lectures, he will confront what Speaker O'Neill has called "a scarifice we must all make."

The injustice of this sacrifice is that it will not affect the outside incomes of members who have made money, who inherited it, who own farms, business, rental properties, or who have working wives. They will enjoy whatever added income their assets produce while less endowed colleagues chafe at the restraints on their earnings. The latter will also be tempted to chafe at the wealth which has eluded them and their egalitarian instincts may be inflammed.

The members are too sensitive about being lofted by their pay hike into the top 1 per cent of income earners. They should take heart from the late Sen. Robert Kerr, a shrewd coot who relished being rich. He argued that he had "a community of interest" with Oklahomans through his involvement in oil, farming and banks. He said that without these links, he wouldn't "be worth a nickel to them."

George Bernard Shaw similarly concluded that power does not corrupt men. Actually, he said, power is corrupted by the fools who acquire it. Few who get to Congress are fools and those who exposed the institution to ridicule in recent years became fools because they allowed themselves to stay immersed and isolated far too long in its specialized environment.

Pending proposals to impose purity on those who serve have the huge defect of enlarging the apartness of the average member, pulling him further away from the warp and woof of society.

The disclosure laws, spending limits, and heavy burdens of the job are transforming him into a frocked citizen, a novice in an order with its own code of conduct.

Sen. Floyd Haskell, D.-Colo., testified that no member should spend "any substantial amount of time" managing his financial affairs. By this yardstick, a member should also limit the time he spends tending his garden, playing tennis, or rearing his children. The idea of the code is to commit him to being a full-time politician, an exertion certain to reduce him in a few short years into a caricature.

This is not what the founding fathers had in mind. Legislators were to emerge from the people long enough to do their duties and then return to what they were. They were to keep their identities as striving citizens instead of flaunting their togas. The aim of reform, as Sen. Howard Baker, R.-Tenn., has been saying, should be to help the overworked members recapture their civilian status.

The new code is an over-reaction. Congress is not perceived as corrupt by reasonable people and cosmetic cures will not reach the few members who may have strayed. If the members could learn to take serious trips instead of junkets, retire when their abilities diminish, get organized to face up quickly to the problems that arise, and behave more like citizens than politicians, Congress' popularity will soon revive.

"The first mistake in public business is going into it," Benjamin Franklin said. The old codger will be proven right once again if the members keep accepting indignities as the price of restoring Congress' reputation.

Mr. THURMOND. Mr. President, I see no objection to the amendment but I believe the Senator from Nebraska has raised a point about gifts. As I say, I have a young lady in my office now who is engaged to a lobbyist. The question is whether she can accept a ring valued over $100. I imagine she would be disappointed and give up her job rather than to accept a ring for $100 or less. Maybe we will have to offer some exceptions to the distinguished Senator from Wisconsin to encourage marriages, in other words to make an exception in the case of weddings or marriages.

I think it is a matter we had better think over. I think that both Senators have raised valid points here.

Mr. CURTIS. Will the distinguished Senator in charge of the legislation answer my last question? It is this: The Senator has told me that if someone subject to this bill were involved in a courtship and received an engagement ring, she would have to report it.

My second question is, suppose she returned it before the reporting date arrived. Does she report the receipt and the return, or neither?

Mr. NELSON. I guess the answer to that would be neither.

Mr. CURTIS. I thank the Senator.

Mr. NELSON. At the time of the reporting, there would be no gift.

As I have said previously, however, I was prepared to accept what is in the resolution. I am prepared to accept the amendment of the Senator from Illinois, which I think makes good sense. So if there is no objection, as far as I am concerned, I shall accept the amendment.

Mr. PERCY. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

AMENDMENT NO. 149

Mr. PERCY. Mr. President, I call up my amendment No. 149 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes amendment no. 149.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27, line 12, strike out "duties." and insert in lieu thereof "duties, including the expenditure of time, for the purpose of acquiring (other than earned income), in an amount which would interfere with the conscientious performance of official duties.".

On page 53, between lines 19 and 20, add a new section as follows:

"SEC. 310. The Committee on Rules and Administration shall, within one hundred and eighty days after the day on which this resolution is agreed to, report its recommendations to the Senate as to whether a specific limitation should be placed on the amount of time which a Senator may devote to the acquisition of income (other than earned income).".

On page 53, line 20, renumber section 310 as 311.

Mr. PERCY. Mr. President, this is an amendment which I hope will also be acceptable. It really is to get at the whole problem of the relative unfairness that may be charged to us as a body for discriminating between earned income and unearned income. We get into a gray area where there could be Members of the Senate who would have what is now looked upon as unearned income, where they could really devote a considerable amount of time to the management of that property, estate, or whatever it may be. It could be rental property, it could be a farm, it could be all sorts of things. We put a very strict, severe limitation on earned income, but there is no limit on unearned income which is comparable. In the sense of fairness, the amendment that I have offered now goes to the heart of this problem.

The resolution, as we are about to adopt it, places a limit on outside earned income of 15 percent of a Member's pay. However, no limit is placed on unearned income, other than the conflict of interest provision, which states:

No Member, officer, or employee shall engage in any outside business or professional activity or employment for compensation which is inconsistent or in conflict with the conscientious performance of official duties.

The amendment that I offer simply adds the following language at the end of this conflict of interest provision:

. . . including the expenditure of time, for the purpose of acquiring income (other than earned income) in an amount which would interfere with the conscientious performance of official duties.

The amendment also requires the Committee on Rules to make recommendations for more specific guidelines on the amount of time which may be spent on the acquisition of such income within 180 days after adoption of the resolution.

The Senator from Illinois is simply concerned at the appearance of unfairness, of discrimination between two categories of Senators—those who have no unearned income to speak of and might have depended in the past upon earned income; and those Senators who have virtually no restriction on them now, who have no particular interest in earned income, but have a deep vested interest in unearned income.

A major purpose of the limit on earned income in the resolution is to make it clear that the Senate is virtually a full-time job. However, many earned income sources take no more or even less time than unearned income. For example, let us say real estate management. That could take a great deal of time. Yet there is no limitation whatsoever on that. I think a time limitation must somehow be placed on a Senator, such as the Senator from Illinois, who enjoys unearned income but has no restriction whatsoever imposed upon the amount of time that he could put into that unearned income.

It is possible for a Senator to spend 30 or 40 percent of time, 50 percent of his time, managing properties that he owns, and so forth, without, in any way, abdicating his responsibilities, under the resolution as it now stands. This amendment makes it clear that the expenditure of time should also be a consideration in the acquisition of unearned income. So many times, we have repeated that a Senator's job is supposed to be a full-time job. Well, then, let us not just put the limitation on those who have had earned income; let us put that same limitation on time itself on the Senators who have unearned income. I do not think there are many Senators that are spending that proportion of time, but there may be at some time in the future. It could be a loophole that I think would be worthy of plugging at this particular time before some abuse in the future would require us to act in retrospect.

The point may be made that the Committee on Rules is already being asked to report on other items and it is impossible to place a specific limit on the use of time. While it would be difficult to place an absolute limit on the amount of time that may be spent on acquisition of unearned income, the Rules Committee may be able to develop some guidelines based on the amount of time which Senate duties may require.

I know this a difficult question. I think the adoption of the amendment, which does at least say that no time can be spent on unearned income that would interfere with the conscientious performance of official duties, would at least place a moral obligation, if not an actual obligation, on a Senator not to spend undue time on outside unearned income.

I think that would be an improvement. Maybe the Rules Committee could come up with something better. If they cannot and they say it is an impossible job, I would accept their decision, but I think they ought to take a look at it.

Before I offered this amendment, I wanted to see whether I could determine how much personal time I have spent in the last decade in connection with outside unearned income. I think the figure of less than 1 percent could be verified. I think it would be easy to verify that the Senator from Illinois does not spend much time. I do not know of any Senator who does. But it could be that, to those Senators who feel there has been a real discrimination against those who have outside earned income and are now severely restricted by the 15 percent, at least we, in principle, have said, "What is good for the goose is good for the gander; we are going to apply this across the board." Every Senator will be affected by this, because we feel that the Senate should be virtually a full-time job and we are going to cover everyone, not just a part of the Senate.

Mr. NELSON. Mr. President, I do not have any investment portfolio, if that is the correct word. Neither Arthur Anderson nor anybody else manages what I do not have. But let me say to the Senator that it seems to me that, a few moments ago, he was arguing about creating all kinds of paperwork and all kinds of extra duties in accounting and timekeeping; and suddenly, the Senator comes along with an amendment which, if it does anything, would do that. But I do not think it does anything.

Lines 9 through 12, on page 27, state quite clearly:

No Member, officer, or employee shall engage in any outside business or professional activity or employment for compensation which is inconsistent or in conflict with the conscientious performance of official duties.

I consider that an unnecessary paragraph and said so when we had this matter in committee. I assume that anybody who takes a public position—in Congress, State legislatures, or what have you—should not engage in outside business or professional activity or employment which is inconsistent or in conflict. I did not assume we had to write that into a resolution, but, nevertheless, the committee did.

So, there it is. It is, as I said about another provision last week, a kind of Golden Rule badly stated. I do not know why it is there or why it is necessary, but there it is.

Now the Senator would include an added provision that you cannot spend time for the purpose of managing a portfolio.

Mr. PERCY. It just says for the purpose of acquiring income, which is the whole idea of the limitation of 15 percent imposed, over severe objection, upon all Senators.

Mr. NELSON. In the view of some, it may be. I did not make the argument that that was the whole idea at all. I think it is a minor, minor part of the limitation on honoraria income.

But the Senator is saying: For the purpose of acquiring income. What area of income acquisitions is the Senator talking about? We prohibit the rendering of any professional services, such as law, or architecture, for any income. We limit the amount of earned income in other areas. What activity for the purpose of acquiring income is the Senator from Illinois covering other than management of investment portfolio?

Mr. PERCY. It could be a whole variety.

Mr. NELSON. I do not want a variety. Give me one.

Mr. PERCY. It is as wide as the definition of unearned income is. A Senator could acquire 15, 20, or 30 pieces of commercial property, residential property right here in Washington, D.C. He could spend his time going around collecting the rent. He could do any number of services and spend a great deal of time doing it.

It seems as though we have restricted the amount of time that an individual can spend on earned income by simply saying it cannot exceed 15 percent of his own Senate salary, but we place no limitation on unearned income. Again the Senator from Illinois has no particular cases in mind. I know of no Senator

spending that kind of time. But it seems when we are writing regulations we are not writing them only for the present body. We are writing them we hope for a long time to come, and it could well be that there is an inference of unfairness on the part of some Senators who feel, "You have restricted us who before dependend upon earned income,"—and many Senators have said they have depended upon earned income,"—and you put no limitation whatsoever other than this conflict of interest provision on unearned income."

There is a conflict, also, of time, and there could be a case where a Senator might well put a good deal of time in managing properties and managing his estates. In fact, it could be possible that some Members who depended upon earned income before will decide: "It pays to be a capitalist now, and I will try to acquire some capital and I will try to do everything I can to make money that way because that is exempt, that the Senate doesn't put any limitation on whatsoever so long as there is no conflict of interest."

But if we simply say that he cannot spend time on making money that in any way would detract from the conscientious performance of his official duties, that seems to the Senator from Illinois to get right to the heart of what we were talking about.

The Senate accepted a very large substantial increase in salary because we intended to say this is a fulltime job. Why should it not apply, then, with the same brush that paints those living on earned income? Why should not the same brush apply to those who live on unearned income so that they cannot put an amount of time in on unearned income that would detract from the performance of their official duties?

I cannot see how any Senator could really object to that provision. It simply plugs a possible loophole. I know of no cases it applies to today. But it is a possible loophole that I think in fairness we should plug up, and I think it should be offered by someone who is not at all affected by the 15-percent limitation on earned income.

Mr. NELSON. Let me say to the Senator, one of the things that clutters up the statute books of the country is that we have some creative minds in both Houses who attempt to dream up rules to handle situations like these. We do not know of any case yet, never heard of any case yet, may never ever happen in the history of the world, but some day, some time, under some circumstance, maybe in 2050, or 2075, someone might spend more time than he should spend in violation of the Golden Rule which said, "You should not do anything in conflict with your duties or that interferes with the performance of your duties." So let us pass a rule that means absolutely nothing and is totally unenforceable, to defend the institution against something that so far as we know has never happened and even if it did we could not prove it.

Let me ask the Senator, Let us assume we have a Senator who decides: "I am going to spend all my time, except during rollcalls, in my office studying investments and how to handle my portfolio, and then on weekends I am going to go into my study, pull the shades, close the door, and spend all day Saturday and all day Sunday working on the portfolio of investments and when the recess comes I do the same." When the Rules Committee undertakes to establish some kind of recommendations as to whether a specific limit should be placed on the amount of time spent, what should they do?

If I were on the Rules Committee, and that is what we are going to have to stop, and I was told I had to do it, we would hire some detectives, and we would watch that Senator to see what he is doing with his time.

Now we know what the next amendment will be, and it will be equally tough. The next amendment we are going to get will provide that you can only spend a very limited amount of time daydreaming because day dreaming interferes with the performance of your duties. How do we catch the fellow who is day dreaming? It is awfully hard to do. So I do not think we should have resolutions saying that you cannot daydream.

Mr. CURTIS. Will the Senator yield right there?

Mr. NELSON. That is most of my enjoyment in life, playing Mr. Mitty, daydreaming about what I "ain't" and what I would like to be. But let us not have a resolution that says we cannot daydream. I cannot afford to do anything for entertainment other than daydream.

Mr. CURTIS. Mr. President, will the Senator yield for a brief question?

Mr. NELSON. I yield.

Mr. CURTIS. I think the Senator could tell whether a Senator has been day dreaming by looking at the legislative proposals that he makes.

Mr. NELSON. I did not say that directly, but I guess the Senator looked at the proposal of the Senator from Illinois.

Mr. CURTIS. Yes. I wonder where this came from.

Mr. NELSON. That may have been the result of daydreaming.

Anyway with all good cheer, I must say to the Senator from Illinois: I realize that having been a dramatically successful man, one of the wonders of the United States, at a young age becoming the president of Bell & Howell, that he wishes to try to be fair and put some limitation on what the rich man can do, this I wish also; I would like to get quite a bit of that money away from him if we could.

Mr. PERCY. Go up in the office and pull the shades down. [Laughter.]

Mr. NELSON. And if we could get it into the General Treasury which is the the second best choice, or into my bank which is the first best choice, I would do it, but I cannot think of any law that I could pass to do so.

I know that the Senator's intent is good, but I do not think there is any way for this to be done, and the Rules Committee will go up the wall trying to come in with a recommendation on the amount of time which a Senator may devote to acquisition of income. I agree with the Senator from Nebraska. We have enough trouble now with provisions in here with which, in fact, I did not personally agree. One Senator said, "You are creating an OSHA code of ethics, or an ethics code with OSHA regulations." So I think that the Senator should take that amendment back, take it home with him, take it into his library and study it a little.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. NELSON. I yield.

Mr. PERCY. Does the Senator from Wisconsin feel that if a Senator did spend time on outside business or activity in making money, which took considerable time, that it would be inconsistent or in conflict with the conscientious performance of his official duties? Does the Senator from Wisconsin feel that that should be countenanced in any way or is it consistent with what the committee is attempting to establish in this resolution?

In other words, are we differing at all on principle? If it is the duty of a Senator to devote virtually all his time to his Senate job, then he should not be managing properties and running around making money on his caiptal.

Mr. NELSON. I would agree with that, but all that does is——

Mr. PERCY. If that is true—and it applies to 20 Senators, possibly more—then is it any more subject to ridicule, I might say, than certain other provisions in this resolution at which fun could be poked?

What are we trying to accomplish? What are we trying to do? We are trying to do the most conscientious job we can in establishing a code of ethics for the Senate.

All the Senator from Illinois is saying is that a Senator, whether he has earned income or unearned income—both situations—should look upon this job as virtually his full-time job.

If we simply adopted the provision which requires no reporting—it is just a statement of principle with which we both agree—if I eliminated the reporting in 180 days, because I realize that it would be extraordinarily difficult to come up with a rule that would put a time limitation on it that would make much sense; would that then be acceptable to the manager of the bill?

Mr. NELSON. Does that language add anything to the language on lines 9 to 12 on page 27?

Mr. PERCY. Yes, because that language, I believe, only deals with an activity that is inconsistent with or in conflict—a conflict of interest. But a conflict also would arise with the element of time, because one could spend a whale of a lot of time managing real estate property, managing a ranch, managing all sorts of things where there is no conflict of interest whatever, other than the question of time.

What we have been talking about for a whole week with respect to the earnings limitation is that Senators should not be running all over the country making money, because they now are being paid a very substantial salary for their job. The Senator from Illinois simply is say-

ing that if it applies to those on earned income, it should apply to those on unearned income.

Mr. NELSON. I was going to say something that I could not defend. I was going to say that I do not like to see redundancy in our statutes, but I see it so often that I have become used to it.

Mr. PERCY. Can the Senator point out that redundancy?

Mr. NELSON. I will read it to the Senator:

No Member, officer, or employee shall engage in any outside business or professional activity—

"Outside business" would cover investments and managing an investment portfolio—

or employment for compensation which is inconsistent or in conflict with the conscientious performance of official duties.

So if one is spending all day long in his office and weekends and other time managing his portfolio, that is in conflict with the conscientious performance of official duties. In fact, the last few words on lines 4 and 5 say "interfere with the conscientious performance of official duties."

So the time element is involved already. I do not see any point to the Senator's amendment at all.

Mr. PERCY. That is an interpretation of the amendment which the Senator from Illinois has not heard heretofore. If that is simply not aimed at a conflict of interest——

Mr. NELSON. Oh, no.

Mr. PERCY. But also aimed at the conflict in time, which would prevent the Senator from carrying out the conscientious performance of his duties, with that interpretation by the floor manager, I agree that this amendment is not necessary, and I will be happy to withdraw it.

Mr. NELSON. That is the way I interpret conflict, that the conscientious performance of duties involves time spent. There is no question about that in my mind.

So if the Senator is prepared to withdraw his amendment, I will yield back the remainder of my time.

Mr. PERCY. Mr. President, I withdraw my amendment.

I thank the floor manager of the bill very much. I hope he does not think we have been nitpicking. Some clarifications have been extremely helpful. The Senator from Illinois simply did not read the resolution with that interpretation. I accept that explanation as the binding intepretation of it now; and I think that, therefore, we are fully in accord on it.

AMENDMENT NO. 161

Mr. BIDEN. Mr. President, I call up my amendment No. 161.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Delaware (Mr. BIDEN) proposes an amendment numbered 161.

The amendment is as follows:

On page 53, between lines 19 and 20, insert the following:

"SEC. 310. The Committee on Rules and Administration and the Committee on Finance shall, within one hundred and twenty days after the day on which this resolution is agreed to, report to the Senate legislation to prohibit the conversion of any contribution (as defined in section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) to the personal use of any former Member of Congress who is defeated for reelection or who does not seek reelection, any individual who is unsuccessful in his campaign to be nominated for election, or elected, to either House of Congress, and the estate or any beneficiary of any such former Member or individual who dies.".

On page 53, line 20, strike out "SEC. 310" and insert in lieu thereof "SEC. 311.".

Mr. BIDEN. Mr. President, on March 9, 1977, I introduced S. 962, the surplus campaign funds amendment, which would amend the Federal Election Campaign Act of 1971, to prohibit the personal use of excess campaign funds held by a defeated candidate for Federal elective office or of a retired, resigned, or deceased holder of such office. Senate rules already cover the incumbents.

Under the existing campaign financing law, anyone of us could raise more money than we need for financing our campaign, retire from the Senate, pay taxes on the excess campaign money, and pocket the rest. My bill would make this illegal.

Senate Resolution 110, which is currently before this body, attempts to partially address this problem. The proposed rule XLVI, paragraph 2, prohibits the conversion of campaign funds for the personal use of any Member or former Member who is defeated for reelection or does not seek reelection.

It is clear that the Senate Rules cannot, however, provide adequate enforcement against former Members. Even the Special Committee on Official Conduct recognized this problem. On page 47 of the report of the committee, the following statement is made:

The Committee recognizes that paragraph 2 may be difficult to enforce against former Senators. The Committee believes that this standard should be set, however, and urges that a prohibition against conversion of campaign funds to personal use be incorporated in the Federal Election Campaign Act at the earliest possible occasion.

The amendment I am proposing today to Senate Resolution 110 would require the Committee on Rules and Administration and the Committee on Finance to report a bill within 120 days that would accomplish this.

It really is a request of the committee, under the measure we are now considering, Senate Resolution 110, to make a part of their resolution the requirement that there be a report within 120 days.

Mr. NELSON. As I understand the distinguished Senator from Delaware—and I just glanced at this amendment for the first time—his proposal aims at requiring the adoption and consideration of a statute which would prohibit former Members, or those not running for reelection, or who are defeated, from converting campaign funds to personal use, is that correct?

Mr. BIDEN. Yes, I think that is what I mean. I am not sure that I heard the beginning of the Senator's question.

If this amendment were accepted by the committee, it would mean that the committee is simply saying in this measure that we must report within 120 days a statute which says that.

Mr. NELSON. As the Senator knows, the committee recognized that a rule could not bind someone who had left office.

We put it in there, although it may not be legally enforceable, for whatever moral or other suasion may be the result of its having been written into the code.

This Senator expects a statute to be adopted on this question, as it should and it must, in order to amend the Federal Election Campaign Act, which, in fact, does permit conversion to personal use of campaign funds.

The reason I would hope, though, the Senator would not add it to this resolution is that the Preyer committee in the House is going to be sending over to the Senate a statute covering those aspects of the rules adopted there, and whatever is adopted here, that should be written into statutory language.

I think I am correct in saying it is expected that the Preyer committee would have recommendations ready by the end of July so that members over there could study them during the August recess, comment in September to the committee on their views and a statute would emerge in October or possibly November.

While I agree that what the Senator from Delaware proposes should be done, I am concerned about mandating a committee here to take one specific aspect of a rule and conduct its hearings and translate it into a statute to be sent over to the House within 120 days, when the Preyer committee is going to be doing the same thing. That is the only objection I would have to it.

Mr. BIDEN. My main concern is what the committee's concern was, that this does not slip between the cracks. The reason for the amendment was to insure that after this election bill is passed it does not go away. It, at least, requires the Senate to take some action one way or the other on the question. So I am not concerned that it be 120 days. Would it allay the Senator's concern if it were 190 days, which would give it plenty of time to not conflict with the House commission report that is forthcoming?

Mr. NELSON. I agree with the Senator that I would not want it to slip between the cracks and not be considered. But I do not like to impose upon the Rules Committee the requirement of drafting a statute if it is going to be done on the House side. As a matter of fact, we as a consequence of this resolution, we have already loaded on the Rules Committee—a whole lot of work they are going to have to try to get done, within 120 days or 180 days.

I agree with the Senator that that prohibition on conversion to personal use should apply to former Members.

However, the issue as to former Members is not raised again, unless there is a death, until after the next primary election in 1978.

Mr. BIDEN. But it exists right now.

Mr. NELSON. Yes. But as to Members who retire or who were defeated last fall, is that what the Senator is saying?

Mr. BIDEN. Yes.

If the Senator will permit me, I am just

concerned about leaving whether or not this gets done to the House. In other words, if the House sends over a bill that has it incorporated in it, then, fine. You know, we have to vote up or down at some point on some aspect of that.

But if the House does not send a bill over, that, in fact, has this aspect, then it makes it more difficult to find a vehicle to attach it to, and we get——

Mr. NELSON. What I would suggest to the Senator are two things: One is the House is very unlikely to send over a bill without that provision in it, because they have adopted the same rule, knowing that it was not binding, and recognizing it had to be put into statute.

But if there is some remarkable oversight which, I would suggest, is unlikely to happen, the Senator could amend that statute when it is here and put in such a provision.

My sole concern—and I agree with him 100 percent—is I would hate to say by resolution that the Rules Committee must conduct hearings, and must resolve this question and report back in 120 days when, in fact, this thing is not going to fall through the cracks. A statute is coming over, and if it were not, I would be happy to join the Senator in offering an amendment on the floor of the Senate that accomplished our purpose because there is nobody in either House, I think, who would vote against it.

Mr. BIDEN. With that assurance from the Senator, that is enough for me, and if it does not, if the Senator will cosponsor such a bill with me with the weight and prestige he has picked up as a consequence of taking this election bill through, I am sure I would not have any question about it falling through the cracks.

Mr. NELSON. With the many, many friends I have picked up as a consequence of managing this bill, I think when we call the roll on this there will be one vote, at least mine, and if the Senator does not desert me, because of a lack of friendship, we will have two.

[Laughter.]

Mr. BIDEN. All right.

I ask permission to withdraw the amendment.

Mr. CLARK. I wonder if the Senator will withdraw his last statement.

Mr. BIDEN. I withhold that.

Mr. CLARK. I just want to point out that the Senate has already supported this amendment. I offered it, as a matter of fact, to the Federal Election Campaign Act Amendments last year. It passed the Senate, and the House dropped it in conference.

Mr. BIDEN. That was my concern. The House did drop it in conference the last time, and that is why I have reluctance, I evidenced reluctance, to rely on the House commission coming forward this year with a provision they dropped last year.

Mr. CLARK. Exactly.

Mr. BIDEN. I think the Senator from Iowa should be complimented on having foreseen this problem long before the publicity and the glare of public light focused on this issue, and I only wish the House had followed the Senator's language, and we would not have had the problem that I think embarrasses us all. That came as a consequence of the recent public disclosure of the potential that exists.

But based on the assurance of the Senator from Wisconsin, I will withdraw my amendment, and I thank the committee for its time and the Senator from Oklahoma for waiting.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT NO. 120

Mr. BELLMON. Mr. President, I call up my amendment No. 120.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON) proposes amendment No. 120 to S. Res. 110, a resolution to establish a Code of Official Conduct for Members, officers, and employees of the U.S. Senate; and for other purposes, viz:

On page 28, strike out lines 12 through 19.

Mr. BELLMON. Mr. President, the purpose of this amendment is to strike the language on page 28 that prohibits Members of the Senate from engaging in what is referred to as professional services, and those services are defined as services as an engineer, real estate agent, insurance agent, attorney, physician, architect, consultant, and then the phrase "or activities of a similar character."

Mr. President, I offer this amendment for two reasons: One is because I am concerned about the vagueness of that last phrase "activities of a similar character" and, second, because I feel very strongly it is contrary to the national interest for this body to refuse service to those who wish to come here and maintain their professional capabilities in their careers and to, in effect, turn the Senate into a body of professional politicians.

Mr. President, all this does, as I say, is strike out the language in that conflict-of-interest section. Simply stated, my amendment would allow Members of the Senate to continue their normal career activities, and this is very significant, so long as their earnings from those activities were within the income limits set by the bill.

We are saying if a person is an attorney or physician, he could continue practicing his profession, but the earnings limitation would still apply.

To me, this section raises a fundamental issue. When our Founding Fathers created the legislative profession, they did not intend that legislators would become members of a full-time governing class.

Rather, it was their intention that individuals would take a limited time away from their normal activities and participate in the lawmaking process. This was a sharp departure from established tradition in other governments where laws were made by a governing elite. In my judgment, this provision for a nonprofessional legislative body is a fundamental part of the basic genius of our representative form of government. It is to a large extent responsible for the length and stability of our system.

Mr. President, to sacrifice our system of lawmaking by nonprofessionals and change over to a procedure by which a selected few of our citizens give up all outside activities in order to become full-time legislators is a departure from the past which I do not believe is in the national interest. The country has been served well by a Congress made up of ordinary citizens. I have grave reservations that a Congress of professional politicians can serve as well. Therefore, Mr. President, this amendment is offered because of my concern for the future of the legislative process.

I might say parenthetically that I am not covered by any of the prohibitions in this section. I am not an engineer, real estate agent, insurance agent, attorney, physician, architect, consultant, nor do I have any activities of a similar character.

I am a farmer and, apparently, farming is not considered a profession by this legislation.

I am also concerned because of the inequities this paragraph creates for those who have dedicated their lives to gaining the education and training a profession requires and who either now or later may want to choose to serve their country as a Senator, officer and/or employee of the U.S. Senate. Without this amendment, men or women with highly developed skills in a profession will be reluctant to come to the Senate because of the long forced abstinence from their normal career activities.

On the surface, the prohibition against Senators continuing normal professional practice may seem to have merit. Serving as a Senator, officer and/or employee is a fulltime job. We all accept that. However, it is essential to the effectiveness of this body that we have access to the unique knowledge and expertise which each Member brings. It is also vital that this knowledge and expertise be kept current. It is the solid base upon which meaningful legislation moves forward.

Thus, a medical doctor who is elected to the Senate brings to this body not only knowledge about health gained from years of study but also, and more importantly, experience gained by remaining active and current in the profession. This can also be said of the engineer who builds bridges and roads, the real estate developer who builds houses, the CPA who works with taxes, and certainly the lawyer who must work with the laws we pass.

This opportunity to remain active in any profession is essential to a continued understanding of that profession or business. The application of that continued knowledge and expertise is essential to the important legislation which we consider. I welcome the expertise of my professional colleagues and I think that it is essential that such expertise be current.

Mr. President, I also question whether we nonprofessionals have the right to require that our professional colleagues cease to use the knowledge and skills gained in a lifetime of work and study and lose their professional excellence in order to serve in the Senate since service here is clearly at the whim of the

voter. The bill, as written, forces a prospective Senator to choose between giving up a lifetime profession for the chancy career of an elected or appointed official. I also do not believe that the paragraph is definitive of what constitutes a profession and may well be unconstitutional.

Notwithstanding the fact that we will lose the benefit of the knowledge and expertise of any given profession through this prohibitive paragraph, we require even a greater sacrifice of the professional who would join our ranks—that is we require Members to surrender their independence.

The distinguished Senator from Minnesota (Mr. HUMPHREY) raised this point last week in his eloquent speech on his concern with this code as proposed. For those of you who failed to hear this speech or have not had the opportunity to read the March 24 CONGRESSIONAL RECORD, let me quote the portion which dealt with his concern about the restrictions on outside earned income:

> We are going to get ourselves painted into a box where these campaign bills are paid out of the public Treasury. We are all paid out of the public Treasury. And a Senator will not dare cast a vote because he will go home and look his wife in the eye later on in life and say: "I don't know whether I can have any independence of judgment on this, Momma, because all I have is my salary there and if I vote on this the way I really ought to vote, I maybe will get kicked out of office. And then where will we be?"

Mr. HUMPHREY goes on to say:

> I think a certain amount of independence of judgment is very necessary around here. There are two ways to get around that—three ways, I guess. One if just plain caring. I hope we all have that. The second is to have some resources of your own and the third is just not to care.

The point is that by prohibiting a professional from maintaining occupational proficiency we have essentially destroyed that person's independence. Such a Senator is in danger of losing the freedom of action needed when complex and controversial issues are before this body. It may be one thing to say that a Member, employee, or officer cannot make more than 15 percent of the base salary in outside earned income, and I certainly agree with that concept. But it is quite another thing to say that active participation in the career for which the person was trained is prohibited. The end result of this provision could well be to eliminate the knowledge and expertise which is vital to good legislation.

Mr. President, knowledge is a precious asset. In discussing knowledge, Will Rogers once said: "Everybody is ignorant, only on different subjects." Rogers was correct. We need Members in the Senate who can protect this body from the errors ignorance brings. We should not require nor encourage ignorance among the Members of the Senate.

We need the knowledge and expertise of many. Let us not pass a law which would prevent us from access to that knowledge and expertise.

Mr. PERCY. Will the Senator yield?

Mr. BELLMON. I yield to the Senator from Illinois without losing my right to the floor.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator from Illinois.

Mr. PERCY. I simply wish to indicate that the concerns of Senator BELLMON and of Senator PERCY are very similar.

I offered an amendment and put it into the RECORD 3 days after Senator BELLMON did, and I was really unaware of the fact that he had offered an amendment along the same lines.

I expanded on the amendment a little bit after deleting lines 12 through 19 and defined the section a little more clearly to be certain the earnings limitation did apply.

But I think the Senator's amendment is a straightforward addressing of this problem which the Senator from Illinois could support.

The concern that the Senator from Illinois had is that, first of all, there is a 15-percent limitation placed on honorariums, for instance, for outside earned income. But there may be many members of the staff who are not equipped to give speeches and earn income that way.

The provision of the resolution on page 28 simply says "For the purposes of this paragraph, professional services shall include services as an engineer, real estate agent, insurance agent, attorney, physician, architect, consultant, or activities of a similar character."

Does that mean then that someone who has been professionally trained as a carpenter could not provide those services?

Would it mean that a person who has graduated from vocational school in automotive repair could not in any way accept compensation as an automobile repairman?

Could a person who received professional training as an interior decorator be prevented then from providing such services in his spare time up to the earnings limit of 15 percent?

I think those are questions that really should be raised and asked of the floor managers of the bill.

Mr. BELLMON. If the Senator will yield to me and if I can get the attention of the Senator from Wisconsin, I would like to ask a question along that line.

This language prohibits a Member of the Senate, or a staff member, or an officer of the Senate, from being an insurance agent. Could he be a stockbroker?

I will read the list. It says:

> Engineer, real estate agent, insurance agent, attorney, physician, architect, consultant, or activities of a similar character.

Could he be a fuel broker, for example, or could a Member of the Senate——

Mr. NELSON. I believe the committee report addressed some language to this question, but I do not remember the language. If the distinguished Senator will wait a moment, I will try to locate that language.

Mr. BELLMON. I am curious to know what is so evil about these jobs set forth here, and why it is important not to do those things, and yet permissible to perform other services that are not greatly different.

Mr. NELSON. My guess would be, from reading the committee language, that given the professions that it names and those that it excludes, it would probably cover stockbrokers, but that only is my guess. I think it would probably be a question that would have to be answered by the Ethics Committee.

Mr. PERCY. Would the Senator from Wisconsin, then, comment on the cases that I have mentioned to Senator BELLMON? For example, what about the case of a person who had received a certificate as an interior decorator, and graduated from a school and considered that his profession? Would he be unable, on a weekend, to give advice and counsel and receive any fees at all for giving advice, as an interior decorator? This could well apply, for example, to women staff members, in order to supplement their income.

Mr. BELLMON. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NELSON. Let me read from the language of the report:

> This paragraph reaches the major professions in addition to law, such as medicine, engineering, architecture and similar types of activities. The Committee also intends the ban to reach service as a real estate or insurance agent or consultant. This paragraph is not intended to deal with jobs such as plumbers, auto mechanics, or hairdressers, which may be considered professional services but rarely pose conflict of interest problems.

I would think that interior decorating would not be included in what is normally accepted as a major profession. But as the Senator knows, there are almost innumerable technical, scientific, and professional activities in our society, and there was no way that the committee could name everything that was to be included and everything that was to be excluded; so we used the phrase "major professions."

If a question were raised, I think it would have to go to the Ethics Committee for an opinion as to whether or not it was covered.

Mr. BELLMON. Would the Senator agree that it is a very dangerous precedent or proposition to build into our law, so that a person might run for the Senate and find out after he got here that he was not going to be able to serve?

Mr. NELSON. I cannot say that that is an issue that bothered me very much.

Mr. BELLMON. Let me ask this hypothetical question: Let us take the case of Dr. Nelson, who has spent 7 years getting his medical degree, going through his residency, and becoming qualified to practice. He comes to the Senate, and finds that he cannot any longer practice his medicine. But if, instead of practicing, he wished to teach, for instance, could Dr. Nelson teach medicine?

Mr. NELSON. On page 43, the report states:

> Engaging in part time teaching or study in a professional field does not constitute practicing a profession or rendering professional services and is therefore not affected.

I might say it is a remarkable coincidence that the Senator used the example of "Dr. Nelson." I did not know that he knew that my father graduated from

medical school in 1907 and practiced for 50 years.

Mr. BELLMON. I did know it.

Mr. NELSON. And was very much interested in politics, but could not give up his profession to come here, so he sent me in his place.

Mr. BELLMON. I might say that was probably an advantage to the Senate.

Mr. NELSON. I am sure it was an advantage to his patients.

Mr. BELLMON. But under the terms of the resolution, then, a doctor, lawyer, or architect could teach in his field if he chose?

Mr. NELSON. That is correct.

Mr. BELLMON. But could not practice his profession?

Mr. NELSON. Yes.

Mr. BELLMON. Taking the case of an insurance agent who comes here and wants to retain his selling ability, could he become, then, say, a broker for an oil company?

Mr. NELSON. What was the last part of the question?

Mr. BELLMON. If an insurance agent came here, he could no longer be an insurance agent, but could he, for instance, become a fuel broker? I cannot quite understand why these professions were picked out.

Mr. NELSON. Did the Senator ever take a close look at what goes on over in Maryland? There has been lots of publicity on that. Is he familiar with the insurance business in Illinois, or what is going on with the insurance business all around this country, when someone in the insurance business who is a great supporter of the Governor or someone else suddenly receives a whole lot of insurance business which he never had before?

That does not happen in the State of Wisconsin, or never has, but I will wager that once, twice, or three times a year a case like it arises. Maryland is the last one I have read about, in which certain friends of the people in power end up with large insurance contracts.

It is an area in which the possibilities for corruption or the appearance of corruption are obvious, and that kind of corruption has been well known for many years in this country.

I might say to the Senator that the House made no prohibition. The House simply provided that the earned income limits should apply to all these activities.

The Senate committee decided otherwise. My own view is that the important prohibition involved here is the one involving the practice of law. That is my personal view. That was not the majority view, as I recall it, when we took it up in the committee.

I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I am strongly opposed to any effort to change paragraph 6 of proposed rule 45 to dilute its effect on Senators and full-time Senate employees. I proposed the restriction in committee to prohibit practicing a profession for compensation, and do not believe it should be altered.

Paragraph 6 reflects the belief that the practice of a profession usually requires substantial amounts of personal involvement and time and may also present conflicts of interest, or in some cases, an appearance of such conflicts.

The most familiar problems in this area are posed by the practice of law by Members of Congress. I believe it is desirable to place a flat ban on that activity.

There are two problems which the ban is intended to reach: First the actual practice of law, where the Member is rendering personal services to his clients; and second, the so-called facade practice of law, where the Member is not practicing but is still receiving income from a firm, whether or not he is lending his name to the partnership from which he receives income. This provision also prohibits use of a Member's name as "of counsel" to a law firm even if he receives no income from that firm. While the practice of law poses special difficulties and conflicts because of the obligations imposed by the attorney-client privilege, the committee felt that other professional services also demanded a substantial time commitment and could pose conflict of interest problems. This paragraph reaches the major professions in addition to law, such as medicine, engineering, architecture, and similar types of activities. This paragraph is not intended to deal with jobs such as plumbers, auto mechanics, or hairdressers, which may be considered professional services, but rarely pose conflict of interest problems. Engaging in part-time teaching or study in a professional field does not constitute practicing a profession or rendering professional services and is therefore not affected by this paragraph.

Now, Mr. President, I shall address the personal involvement and time factor. The job of U.S. Senator is a full-time job, and if one is able to find time to render professional services for compensation, I seriously question his ability to render the commensurate service necessary to be a full-time Senator.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. THURMOND' I will yield in just a moment.

We deal with complex and intricate matters in the Senate, Mr. President, and I believe the public is entitled to no less than the full-time service of those charged with legislative responsibility.

It is easy to argue that law practice or other professional practice can be tolerated on the weekends or evenings, Mr. President, but unfortunately it is impossible to categorize and separate official duties from professional duties. A will which has to be probated or an architectural drawing which has to be sketched can too easily take precedence over a committee meeting or other official functions.

In a recent poll conducted by pollster Louis Harris, it was found that the public wants Members of Congress to be on the job "full time." By 54 to 37 percent, a majority of the public feels that "with the job so demanding, regardless what their occupations were in private life, Congressmen should give up their private careers and devote full time to Congress."

A 68–30-percent majority of the majority say they feel "very strongly about it." Although the public was willing to bend somewhat—for example in Members owning businesses and receiving a share of the profits without spending any time running these businesses on a day-to-day basis—on an up or down vote, a 54- to 37-percent majority still preferred Members of Congress who work full time on the job.

Mr. President, a second, more important argument advanced against allowing a Senator or full-time Senate employee to practice a profession for compensation is the serious potential for conflict of interest. In the same Harris poll I referred to earlier, a 59- to 33-percent majority of the people interviewed were bothered by a conflict-of-interest situation where a Congressman retains interest in a law firm if the firm does business with the Federal Government and the Congressman receives a share of the profits, even though the Congressman spends no time away from his official duties doing business for the firm.

Again, I shall use the law as an example, but the argument holds for other professions also. A famous Senate investigation of several years ago serves to illustrate my point. Cash payments were made to an implicated party by a lobbyist after the passage of favorable legislation. Reportedly they were made for "future legal fees." In the ensuing investigation, these "future legal fees" were never established to have been rendered, and the Rules Committee investigation concluded that the law firm played an important role in the questionable business and financial activities.

Mr. President, a conflict or potential conflict situation can easily develop in situations where a Member practices a profession for compensation. It is a significant conflict, in my judgment, to devote excessive time and attention to outside remunerative activities at the expense of the public interest. Likewise, there is a potential conflict in using the facilities of one's office or official position to further outside professional activities. Clientele of a Senator, officer, or employee may well increase by virtue of one's service in Congress. A potential conflict exists where there is an appearance of using an official position to further the interest of a client.

An excellent analysis of congressional law practice has been prepared by the City Bar of New York and has been published under the title, "Congress and the Public Trust." Mr. President, I would like to share with my colleagues the comments of former President of the American Bar Association, Ross L. Malone, and former Senator William E. Borah on this subject. Their remarks are equally applicable to other fiduciary relationships which are a part of rendering professional services for compensation.

Former ABA President Malone saw the relationship as follows:

> Inevitably, however, the legislature is going to consider proposed legislation affecting clients of his office. He may have accepted an annual retainer from others. While accepting a retainer in no sense involves a surrender of independence of either thought or action on the part of a lawyer, it is not realistic to say that he has the same

freedom of choice on matters affecting the client that would exist in the absence of such an arrangement. Regardless of the subjective effect upon him and his vote as a legislator, it is certain that the public would never believe—nor could it be expected to believe—that his vote would not be affected by his relationship with his client. A lawyer voting as a legislator on matters affecting the interests of a retained client invites justified criticism, if not distrust, not only of the lawyer but of the legal profession itself.

Senator Borah perceptively saw the same potential for conflict when he wrote on the lawyer and the public 60 years ago:

The relationship of client and attorney is the closest. Consciously or unconsciously he comes to feel that his client's demands are wholly just. Yet men will argue that a lawyer with a thirty or forty thousand dollar retainer from some client is perfectly fitted to shape legislation which his client will argue is all wrong, wholly unjust and vitally injurious to his business interests. I am not speaking now of a conscious corruption which some people assume to take place in legislation more often, affirmative corruption for which some one may be sent to the penitentiary when the same thing can be accomplished by that unconscious and subtle influence for which there is no punishment and which may even be justified by good people. Suppose every lawyer in the legislatures of the country or in Congress were in the employ of those great business interests engaged in interstate commerce. What do you think would be the necessity of employing lobbyists in order that no laws seriously affecting interests might be passed? A member of Congress is in an indefensible position who is called upon to legislate concerning those matters in which his clients may have an interest and which may concern them vitally.

Mr. President, the bottom line of this debate deals with contracting fiduciary relationships. The first obligation of a professional is to his client; the first obligation of a Senator is to his constituency. Mr. President, we cannot serve two masters, and paragraph 6 assures that we will not be put in such a position.

I am pleased to yield to the distinguished Senator from Oklahoma if he has a question.

Mr. BELLMON. I thank the Senator from South Carolina.

The Senator from South Carolina said he felt, and I agreed, that the Senate has become a full-time job, and that voters expect us to spend our full time here. I am curious. If he feels that way, why do we not move to strike all outside earnings? We allow, under terms of this bill, earnings on the outside of up to 15 percent of our salary. We could make those earnings in many, many fields, except the ones listed here.

Mr. THURMOND. The reason that was allowed is that Senators receive many invitations from colleges and universities, from educational institutions. It was felt that it might be worthwhile to allow a Senator to accept a reasonable number of those invitations in order to discuss the issues of the day. There are many paramount issues of the day which need to be taken to the people.

For that reason, the committee exempted 15 percent. As far as I am concerned, we could have eliminated the 15 percent. If a Senator is willing to go out and speak at colleges and universities, which is where most of the invitations originate, he does get to discuss the issues of the day. We think that is probably helpful, to do that in a reasonable way.

Now, if they are going to accept $40,000 or $50,000 in speaking engagements, that is a different thing. That is the reason we limited it to 15 percent.

The House, I might say, followed the same procedure. The House of Representatives limited the speaking engagements, honoraria, to 15 percent.

Mr. BELLMON. So it is the Senator's impression that all this bill allows is for a Member to earn 15 percent making speeches. He could not earn 15 percent running a filling station or working in a grocery store, or any activity except making speeches?

Mr. THURMOND. I think it is a different situation. If he is running a grocery store or a filling station, he is merely making money to put in his pocket. He is not contributing to the public good. If he is going out discussing paramount issues of the day before college audiences, high school or other places, we think he is contributing to the public good.

Mr. BELLMON. So this amendment prohibits a Senator from earning outside income by doing anything other than making speeches?

Mr. THURMOND. Well, it involves professional services.

Mr. BELLMON. As I read the bill, a Member can make 15 percent in outside income doing anything but being an engineer, real estate agent, insurance agent, attorney, physician, architect, consultant or activities of a similar character. Does the Senator agree?

Mr. THURMOND. That is true. In other words, I think we explained that in the report:

This paragraph reaches the major professions in addition to law, such as medicine, engineering, architecture and similar types of activities. The Committee also intends the ban to reach service as a real estate or insurance agent or consultant. This paragraph is not intended to deal with jobs such as plumbers, auto mechanics, or hairdressers, which may be considered professional services but rarely pose conflict of interest problems. Engaging in part time teaching or study in a professional field does not constitute practicing a profession or rendering professional services and is therefore not affected by this paragraph.

In other words, it is calculated that, where there is a fiduciary relationship, there could be a conflict. That is the point.

Mr. BELLMON. Let us take a very simple case: someone who raises, we shall say, and sells landscaping plants or shrubs to be put in people's lawns. This would be permitted under the terms of the bill, would it not?

Mr. THURMOND. I think it would.

Mr. BELLMON. Suppose that person called himself a landscape architect?

Mr. THURMOND. He can call himself what he wants to, but unless he is licensed as a landscape architect, he would not be one.

Mr. BELLMON. If he is licensed as a landscape architect, that becomes prohibited.

Mr. THURMOND. If he is licensed as a landscape architect and if that is his profession, rather than doing some lower type work, it would be different than that.

What we are trying to do, I say to the Senator, is provided that the people will get a full-time Senator for full-time pay.

Mr. BELLMON. It does not take any more time to be a landscape architect than it does to go out and dig holes and set plants in the ground. If you are limited to 15 percent of Senate income outside of the Senate, what I cannot understand is why we make these particular professions no-nos.

Mr. THURMOND. Where there is a fiduciary relationship. If he is a landscape architect and a U.S. Senator, that is a different thing. I think he could have a conflict there.

Mr. BELLMON. Let me take another case. We do not allow a Member of the Senate to be a physician under the terms of this bill. He cannot practice medicine.

Mr. THURMOND. That is correct.

Mr. BELLMON. Could a Member be a nurse?

Mr. THURMOND. I think probably, if he wanted to go out and do a lower type work, that is——

Mr. BELLMON. What is so evil about being a physician and so nice about being a nurse? I cannot understand this.

Mr. THURMOND. Because a physician has a higher degree of skill; there is a doctor-patient relationship there that you do not have with a nurse. You are in a different world when you are a doctor than when you are a nurse, so to speak, although they work together.

Mr. BELLMON. Is it an evil world?

Mr. THURMOND. No, it is not an evil world, it is a noble world. I have two brothers-in-law who are doctors; I have two nephews who are doctors; I have two brothers who are doctors. I think it is a noble profession. But if they want to come to the Senate, they should come here and give their time to the people.

Mr. BELLMON. I think the Senator has a point: Under the terms of this bill, there will be no more doctors coming to the Senate, because they know that during those 6 years, they are going to do nothing in their profession; they are going to get out of date, and they are going to lose their skills. So they are going to choose not to come to the Senate, and therefore, this body will be denied the services of those highly qualified professional people who are so valuable to the legislative process.

Mr. THURMOND. I would not think so. If they value their duties and they want to keep up, they can visit hospitals and go out and participate, so long as they do not do it for compensation. In other words, it would give them more time to study and do research and observe medical work and visit hospitals and learn what is going on there, so they can come back here and improve their professional work here, with regard to health, in the Senate.

Mr. BELLMON. Would the Senator agree that lawyers could do the same?

Mr. THURMOND. I think lawyers could do the same if they do not charge compensation.

Mr. BELLMON. They can practice law so long as they do not charge?

Mr. THURMOND. That is right, so long as they do not put their names on law offices or even on stationery that says "of counsel," and so on.

Mr. BELLMON. A lawyer can go before a court——

Mr. THURMOND. I realize that some of the answers to the questions the Senator is asking may appear to be contradictory in a way. What we are trying to drive at is to give the people a full-time Senator here.

Mr. BELLMON. Full-time except for 15 percent.

Mr. THURMOND. If we get a professional man who comes here and then goes home and practices medicine 2 or 3 days a week——

Mr. BELLMON. That is inconsistent. The Senator from South Carolina says he can do it except for 15 percent of his time.

Mr. THURMOND. I remember there used to be a lawyer here who would go down home 2 or 3 days a week and practice law and miss being up here. I wondered how he could miss his work up here and go back and practice law.

Mr. BELLMON. The Senator has agreed that this resolution allows a Member to go out and make 15 percent of his income doing other things. A person may make a speech and miss a session of the Senate on that account. That is permitted. I cannot understand what is so evil about these professions that they have become suddenly no-nos. It has nothing to do with time and being a full-time Senator. That is admitted in the measure.

Mr. THURMOND. We think there is a fiduciary relationship. We think with a professional man, he ought to give his time here or devote it to visiting places where he can bring back information to this body, to help this body legislate in a more effective way.

Mr. BELLMON. Does the Senator see any difference between being a professional engineer and being a professional nurse? Are they not both professions? The Senator has admitted that a Member can serve as a nurse, but this resolution prohibits him from serving as an engineer.

Mr. THURMOND. Personally, I think they are in different categories, myself. The committee thought that, or they would not put it in there.

Mr. BELLMON. It is my hope to convince the Senate to take it out. To me, it is ambiguous, meaningless, and would demean the Senate.

I am ready to vote.

The PRESIDING OFFICER (Mr. SARBANES). Do the Senators yield back their time?

Mr. BELLMON. I am willing to yield back my time.

Mr. THURMOND. Mr. President, I move to lay the amendment on the table.

The PRESIDING OFFICER. Before that is in order, all time must be yielded back.

Mr. THURMOND. Excuse me. We yield back our time.

The PRESIDING OFFICER. The Senator from Oklahoma yields back his time. All time has been yielded back.

Mr. THURMOND. Mr. President, I move to lay the amendment on the table.

The PRESIDING OFFICER. The question is on ageeing to the motion to lay on the table the amendment of the Senator from Oklahoma.

Mr. STEVENS. The yeas and nays have been ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered on the amendment. The pending business is the motion to lay the amendment on the table.

Mr. BELLMON. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. BELLMON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unnanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. I ask for the yeas and nays on the tabling motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, I thought I had moved to lay the amendment on the table.

The PRESIDING OFFICER. The yeas and nays have been ordered on the motion of the Senator from South Carolina to lay the amendment on the table. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, will the Chair clarify the motion?

The PRESIDING OFFICER. A rollcall on the motion to table is now in progress.

The clerk will continue to call the roll.

Mr. THURMOND. In other words, those in favor of the tabling motion, vote "aye"; those opposed, vote "nay."

The PRESIDING OFFICER. The Chair regrets it cannot interrupt the call of the roll on the motion to table.

The clerk will call the roll on the motion to table.

The assistant legislative clerk resumed and concluded the call of the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Maine (Mr. HATHAWAY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Montana (Mr. METCALF), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Illinois (Mr. STEVENSON), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from North Carolina (Mr. MORGAN) would vote "yea."

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 53, nays 23, as follows:

[Rollcall Vote No. 76 Leg.]

YEAS—53

Allen	Durkin	Melcher
Anderson	Eagleton	Metzenbaum
Bayh	Ford	Moynihan
Bentsen	Glenn	Nelson
Biden	Hart	Nunn
Brooke	Haskell	Pell
Bumpers	Heinz	Proxmire
Burdick	Hollings	Randolph
Byrd, Robert C.	Huddleston	Sarbanes
Cannon	Humphrey	Sasser
Case	Inouye	Schweiker
Chiles	Jackson	Sparkman
Church	Javits	Stafford
Clark	Kennedy	Stone
Cranston	Leahy	Talmadge
Culver	Mathias	Thurmond
DeConcini	Matsunaga	Williams
Domenici	McIntyre	

NAYS—23

Baker	Eastland	Pearson
Bartlett	Hansen	Percy
Bellmon	Hatch	Roth
Byrd, Harry F., Jr.	Helms	Stennis
	Laxalt	Stevens
Chafee	Lugar	Tower
Curtis	McClellan	Wallop
Danforth	Muskie	Young

NOT VOTING—24

Abourezk	Hayakawa	Packwood
Dole	Johnston	Ribicoff
Garn	Long	Riegle
Goldwater	Magnuson	Schmitt
Gravel	McClure	Scott
Griffin	McGovern	Stevenson
Hatfield	Metcalf	Weicker
Hathaway	Morgan	Zorinsky

So the motion to lay on the table Mr. BELLMON's amendment was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PERCY and Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order. Senators will please take their seats and clear the aisles.

The Senator from Illinois is recognized.

AMENDMENT NO. 133

Mr. PERCY. Mr. President, I call up my amendment No. 133.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an amendment numbered 133.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, line 3, strike out "and".

On page 26, line 6, strike out "works." and insert in lieu thereof "works, and".

On page 26, between lines 6 and 7, insert the following:

"(3) compensation for professional services.".

On page 27, line 13, insert "(a)" immediately after "3.".

On page 27, between lines 22 and 23, insert the following:

"(b) No Member shall engage in any outside business or professional activity or employment for compensation unless he reports in writing to the Secretary of the Senate upon the commencement and the termination of such activity or employment, including a description of the nature of such activity or employment. Any such report shall be made available for public inspection and copying.".

On page 28, strike out lines 12 through 19, and renumber paragraphs 7 through 12 of proposed rule XLV as paragraphs 6 through 11, respectively.

On page 54, line 18, strike out "9, and 10" and insert in lieu thereof "and 9".

Mr. PERCY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, this amendment, as I discussed with Senator BELLMON, is very similar to his amendment, but it adds one provision, and I will state that provision:

No Member shall engage in any outside business or professional activity or employment for compensation unless he reports in writing to the Secretary of the Senate upon the commencement and the termination of such activity or employment, including a description of the nature of such activity or employment. Any such report shall be made available for public inspection and copying.

Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senate will be in order. Senators will please take their seats.

Mr. PERCY. Mr. President, under this amendment, professional services would be treated like all other forms of outside earned income such as honoraria. Specifically, the amendment deletes the prohibition against the provision of professional services for compensation, but retains the provisions prohibiting outside activities which would conflict with the conscientious performance of official duties.

In addition, the amendment retains the provision requiring staff to report to their supervisor on any outside activities and the amendment adds a new provision requiring Senators to report to the Secretary of the Senate when they commence and terminate any such activities.

Finally, under the amendment, income received from providing professional services would be subject to the 15 percent of income limitation which applies to all other outside earned income.

Thus, while the amendment removes the prohibition against providing professional services for compensation, it limits the total amount of income which can be received from such activities and insures adequate disclosure.

Mr. President, the Senator from Illinois simply fails to understand the fine line of distinction being drawn by the floor managers between professional services which are prohibited, such as those by an attorney or by a real estate broker or by an insurance broker, from services rendered for earned income by a member of the staff who might have acquired some other type of skill, even with greater professional training, but which are permissible, subject only to the 15-percent limitation. This simply discriminates against those professions which have been specifically listed in "or activities of a similar character," whatever that may be.

I just do not find the degree of commonality in this area, and I really see no rhyme or reason why there should be such a limitation.

I am certainly aware we have argued thoroughly and completely the question that you should not divert an undue amount of time to outside activities, but that has been covered with the 15-percent limitation on earned income.

If a person can go out and earn that extra 15 percent with some skill he possesses, and the Senator from Illinois does not know any skill he possesses that could be sold for that particular fee nor have I taken such income in my 10 years in the Senate, for the life of me I do not understand why a person cannot do that. In some cases—such as teaching—the committee rules that eligible and acceptable up to the 15-percent limit. But if a person has gone out and gotten a certificate as an automobile mechanic, and had 3 years of professional training, he can earn money by repairing an automobile. We are talking essentially about staff members who may earn in excess of $25,000, but who may wish to pick up a little extra income in their extra time.

This certainly would apply, I should think, to anyone who has a skill as an interior designer. He may have gone to a school and gotten a certificate and may have even greater training than a real estate broker. But, according to the interpretation rendered by the floor manager, you could earn earned income in interior designer or as a carpenter, automobile repairman, but you cannot in certain of these other professions such as real estate.

I also tend to feel when you have staff members who have a legal degree and who are tempted by some law firms offering them $35,000 or $40,000, why can't they perform a simple service on a Saturday such as writing out a will or doing some sort of legal service that does not in any way interfere with their professional services to the Senate? They are required to report it and they must receive permission from their supervisor who certifies by that permission that it is not interfering with their duties, I think this is discrimination against certain professions.

In other words, I always thought the incentive was the more you educate yourself, the better trained you get, the more you ought to be rewarded, and in this case the lesser the training, the lower the skill, the more you can earn. You can earn your 15 percent by carpentry, you can earn it by being an automobile mechanic. I presume, although that person might have received greater training than someone in some other professional service such as a real estate broker or an insurance agent.

But it just seems to the Senator from Illinois that this is discrimination. The amendment does not affect the Senator from Illinois one iota, but it does affect, I think, hundreds, and possible 1,000 or more Senate staff members who possess skills they could be compensated for at no injury to anyone that I can see as long as it is reported to their supervisor and as long as it is a matter that the supervisor and the Ethics Committee has approved of and it is within the 15-percent earnings limitation.

So I would really like to ask my colleagues to give thought to this, and I hope they will do so overnight. I hope it will be agreeable to the floor manager and to the majority leader to set this vote over until some time tomorrow so that staff members and Senators can have an opportunity to listen to the arguments made by Senator BELLMON and to look at the language and see whether or not in any way this amendment goes against the grain of the spirit of what we are trying to accomplish.

I direct a question to my distinguished colleague. Perhaps the floor manager of the bill would like to respond to the comments that the Senator from Illinois has made. The Senator from Illinois is perfectly agreeable to set this vote off to any time certain tomorrow and to have a vote on it tomorrow. I think it would be in the interest of the Senate to let Senators have a chance to study this and let the staff take a look at it to see if it is not fair and equitable and to see whether it in no way undercuts or weakens or minimizes the intent and purpose of the floor manager, which I consider to be a noble intent and purpose, and which we all will certainly subscribe to in our final vote.

I would ask that time be given on this amendment for staff members and Members of the Senate to be able to take a look at it overnight to see whether or not it would not have some merit.

Mr. NELSON. Well, it seems to me it need not be looked at overnight. The Senator from Illinois was very eloquent in presenting his case, but it is the same proposition we just voted down 10 minutes ago.

It reminds me of a time when I was in law school and Professor Feinsinger called upon one of the young men to re-

cite the case, and he recited, gave the same recitation as the previous student had, exactly the same.

Professor Feinsinger said, "That is absolutely right. Homer did not write the Iliad, it was written by another man with the same name."

[Laughter.]

We just got through arguing exactly the same proposition. All the Senator changes, after the long time we have been on this, is that a report is required—another one of these OSHA reports should be made.

Mr. PERCY. If the Senator from Illinois would be offering the same amendment it would not be in order. I think I read into the record the distinction and difference between Senator BELLMON's amendment and my own.

Mr. NELSON. What is the difference?

Mr. PERCY. That is we have clearly indicated that no Member shall engage in any outside business or professional activity or employment for compensation unless he reports in writing to the Secretary of the Senate upon the commencement and the termination of such activity or employment, including a description of the nature of such activity or employment. Any such report shall be made available for public inspection and copying.

Certainly, it is subject to the 15-percent limitation.

I think there is enough of a difference so that the point of the Senator from Illinois is apparent. I would like the Senate to consider this overnight and not rush ahead with a vote because I just simply feel there was not enough time on that last amendment to have really had a chance to think through whether or not this in any way undercuts what we are trying to accomplish, and whether we are not losing sight really of what we are trying to accomplish. We are trying to embody a code of ethics in the Senate to make certain we are protecting the public interest.

But I cannot for the life of me see how this amendment would in any way detract from the public interest, and certainly it would help when an employee of the Senate, a member of the Senate staff, is not able to command honoraria, is not able to command lecture fees, so why could he not engage up to a 15-percent limitation in what he is able to do?

The Senator from Illinois feels if you take the time it takes to go out and make a speech, and if you get $1,000 or $2,000 for it in Seattle, he does not see how you can do that in less than the 24 hours necessary for preparing the speech, traveling out there, delivering it, and coming back home. Now that has taken 24 hours, and that is perfectly permissible and is allowable. But the regulations do not permit a staff member on a Saturday afternoon to sit there and write a will or to engage in any kind of activity that will bring compensation even though there is an earned income limit of 15 percent, and it might take the staff member only a couple of hours.

Now, what sense does that make? Can the Senator from Wisconsin explain to the Senator from Illinois what he is really trying to accomplish by this?

Mr. NELSON. Let me say to the Senator from Illinois that I think he is correct, that we ought to let this amendment lie overnight because the distinction between what the Senate just voted down and what the Senator has now offered is so subtle that it will take all night studying to find out what the meaningful distinction is, and I think they are entitled to study it for a while.

Mr. PERCY. I may get 22 votes.

Mr. NELSON. The last amendment by the Senator from Oklahoma eliminated that prohibition against the practice of the professions. That was tabled by 53 to 22.

Now the Senator from Illinois comes up with an amendment that eliminates the prohibition against the professions. However, when he eliminates that section, the Senator provides that there has to be a report.

That is the whole distinction, and it is not even that much because under the resolution, a report is already required.

Under the resolution, on any earned income, we have to report where the income came from, how much the income was.

So I agree with the Senator, I think those who do not have as quick a mind as the Senator from Illinois would need a good many hours.

Mr. PERCY. Or the Senator from Wisconsin.

Mr. NELSON. To figure out the subtle distinction between the two, if there is one, which I think not.

Mr. BELLMON. Wil the Senator yield?

Mr. PERCY. I shall yield in a moment.

I wonder if the Senator from Wisconsin would seriously describe the distinction between how it is possible for a person to have a profession, such as interior decorating, or such as automobile repairing, or such as bartending, and may have to attend many sessions of night school to learn how to mix all those drinks—I do not know—but how one could perfectly properly earn extra income with no restraints or restrictions whatsoever outside of the 15-percent limitation in those professions, but in the professions of real estate, or insurance, or law, they are prohibited from earning any income.

Now, why? What is the difference? What are we trying to accomplish or prove? That there is something more noble or less noble about one profession as against another?

Did the Senator from Oklahoma get a satisfactory answer to the distinction between these professions?

Mr. BELLMON. If the Senator will yield, the answer is no. I got no satisfactory answer.

The only answer was that we are trying to have a professional time Senate and, obviously, we are allowing Senators to earn 15 percent of their income outside of the Senate as long as they are in one of these professions.

I ask the Senator from Wisconsin, how about the oldest profession? Is it eliminated here?

[Laughter.]

Mr. NELSON. There is not anybody in this Chamber who could practice it, anyway.

[Laughter.]

Mr. PERCY. That is what brought up this whole ethics argument to start with, and I cannot find a word about that.

Mr. NELSON. I am prepared to yield back the remainder of my time, unless——

Mr. PERCY. Well, would the Senator from Wisconsin agree that we could hold this vote tomorrow sometime?

I thought there were some back to back votes tomorrow and the Senator from Illinois would be happy to tuck it in among those, either at the beginning or at the end.

Mr. NELSON. How much time is there left on the amendment?

The PRESIDING OFFICER. The Senator from Illinois has 20 minutes remaining, and the Senator from Wisconsin has 23 minutes remaining.

Mr. DANFORTH. Mr. President, before either of the Senators yield back their time, I wonder if I could make an inquiry of the Senator from Wisconsin?

Let me pose a hypothetical question. Supposing I were to offer a job on my staff to a practicing lawyer who has just completed the trial of a lawsuit, and he says to me, "I would very much like to come with you. There is only one remaining matter I want to clear up, I would like to write the brief for my case and then when it comes up for oral argument, which may be 6 months or a year from now, before the Court of Appeals, I would like to argue that appeal."

Can I hire that individual?

Mr. NELSON. I do not think there is anything in the resolution that would prohibit hiring, but there is a statute limiting practice in certain Federal agencies and certain courts by members, and employees of the U.S. Government, and that is already law. The resolution does not affect that.

Mr. DANFORTH. Supposing, though, that this potential employee, obviously, he is an attorney, and part of the agreement between the attorney and his client is that the attorney will handle the trial of the lawsuit and then any appeal that follows and he is going to be compensated for handling both the trial and the appeal.

Could this individual, after completion of the trial of the lawsuit, come to work for me, even though it would mean that over the next 6 months he would spend maybe 20 or 30 hours preparing a brief and preparing for oral argument and then would actually have to appear before an appellate court arguing the appeal?

Mr. NELSON. The way the Senator states the case, unless there was a specific statute about Federal employees, prohibiting Federal employees to appear in that court, I would not think anything in the rule would prohibit that.

The way the Senator states the case, I would assume that the rule of reasonableness would govern. I do not see anything unreasonable about that.

Mr. DANFORTH. Even if the individual were paid, say, $37,000 or $38,000 by me as a member of my staff, he could, on behalf of a client, appear and make an oral argument before an appellate court?

Mr. NELSON. If the income limitation

question is the one the Senator is raising, then I suppose it may be in limbo, so that the question would have to be checked with the Ethics Committee. But if, in fact, he had made, say, $50,000 on the case, but he had done 90 percent of the work and the last 30 hours and the appearance before the court only involved a modest amount of the whole fee, I think that issue could be handled.

Mr. DANFORTH. That is exactly what I am asking.

If he were paid over $35,000 as a member of my staff, would wrapping up this single matter in the appellate court, say a State court, say the Supreme Court of the State of Missouri, be prohibited?

Mr. NELSON. I have given you my reaction to it. But I would like to look at the resolution and respond tomorrow, because we do have a prohibition against the practice of law if the salary is over $35,000, and I do not think there is any de minimus provision in there. But I would want to look at that language and the report and answer that question tomorrow.

Mr. DANFORTH. I would like to say it is more than a hypothetical question. It has been more than a hypothetical situation which I have had to face in the last 3 months.

Mr. NELSON. I can see where that could happen.

Is the Senator from Illinois going to insist upon voting tomorrow?

Mr. PERCY. Mr. President, I would like very much to put it over until tomorrow. I understand that a number of other votes have been put over until tomorrow.

Mr. President, I ask unanimous consent that the vote on amendment No. 133 occur at the end of all of the other votes that have been ordered so far for tomorrow afternoon.

The PRESIDING OFFICER. Is there objection?

Mr. NELSON. Mr. President, I do not think the majority leader is here, so I reserve the right to object, because the majority leader was hoping there would be a vote tonight.

Mr. PERCY. The majority leader has returned to the floor now.

Mr. NELSON. The Senator from Illinois is requesting that the vote on the pending amendment—he would yield back all remaining time, I would yield back all remaining time, and the vote would occur at the end of the other votes that have been ordered for tomorrow.

Mr. ROBERT C. BYRD. Is this agreeable to the Senator from Wisconsin?

Mr. NELSON. No, it is not agreeable to the Senator from Wisconsin, but out of the generosity of my heart, I am willing to go along with it.

Mr. PERCY. The Senator from Illinois very much appreciates that, as does the Senator from Oklahoma.

Mr. ROBERT C. BYRD. Does the Senator from Wisconsin intend to move to table at that point?

Mr. NELSON. I assume the Senator from Illinois would yield back all his time, and I would yield back all my time and move to table.

Mr. PERCY. But the Senator from Illinois would very much appreciate a vote up or down on the amendment.

Mr. NELSON. Well, we will vote it down, then; would that be satisfactory?

Mr. PERCY. Well, up or down, but that the Senate be given a chance to express itself.

Mr. NELSON. Let me say to the Senator that I have never seen the distinction. If I vote to table something, I am against it.

I have told a number of Senators, because at that time there were 45 or 50 amendments, that it would make it impossible to have one vote up or down and another on a motion to lay on the table. But Senators know, at least, if there is a motion to lay on the table, that the motion was likely made by the manager of the bill. If the vote is up or down, an added explanation is needed.

Mr. PERCY. I would not think that. If the floor managers are for it, then the Senator from Illinois has never called for a record vote on anything that has ever been accepted by the floor manager. We do not have votes just to vote. I think Senators know an amendment has not been accepted if there is a vote up or down.

Mr. NELSON. The Senator from Wisconsin has made a classic, terrible blunder in making this argument to other Senators who accepted it. Having said to other Senators that I was going to move to table these amendments, although I made one exception today——

Mr. PERCY. I think there have been quite a few exceptions.

My point is that there is not an amendment we have had before us that really affects more of our very high quality people on the Senate staff than this amendment. I would ask Senators, out of consideration for our own staff and out of consideration for the fact that Senators may not have had a chance to think it through and see what an impact it has——

Mr. NELSON. Does the Senator——

Mr. PERCY. I am thinking about the women and children at home, about the orphans, about all those dependents of our professional people who are not going to work, who would rather play golf or do something else with their time, but if they want to work, we should not deprive them of the opportunity. After all, these are the only people in the United States who cannot moonlight, and we are really being very restrictive.

I am not asking for any change in the 15-percent limitation. It would not do any good, anyway. All I am saying is, let us not draw such a fine distinction, now that we have incentives to provide us with highly skilled staff members, let us not put in a disincentive of this kind.

If you are a doctor, for instance, and you have taken 6 years of medical school, you are in a profession, but you are prohibited from accepting anything. Even if you might have gone down the street to the scene of an automobile accident and helped the person involved, and maybe saved his life, you are prohibited, as a doctor, for accepting anything from the person who wants to pay you. But if you are a plumber, you can go fix a screw or a bolt some place and take $25 for that, or more, depending on the amount of time involved.

That does not make sense. This is a commonsense proposal, and I only ask Senators to take a look at this matter overnight, because a quick judgment on it will do more to reduce the living standards of some of our Senate staff members than anything I can think of.

It is really an unfair thing. Senate staff can legitimately say, "You Senators have taken care of yourselves; you are in public demand, you are going to go out and earn $8,600, or whatever it is, in speaking fees; you can go and lecture at Georgetown University; you have the name. We have built your name for you, but you have it; yet if we want to make just a little money staying right here engaging in some professional activity up to the 15 percent limitation, you still say we cannot do it, even though we are required to ask permission; and tell you when we commence the work and end the work. That seems very discriminatory."

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield to the Senator from South Carolina.

Mr. THURMOND. The Senator is a very able advocate. I would like to ask him, if he has a staff member back home making $25,000 a year, and he goes out and practices law or performs some other duties if he is not a lawyer, does the Senator not think the people back there would think he is already earning a good living, and ought to forego the practice of law?

Mr. PERCY. Mr. President, I can assure the Senator that the people from Illinois would not mind one bit. They would say, "More power to him; he cares enough about his wife and children that he is willing to work a little bit extra."

There is nothing unpopular about someone moonlighting, because many thousands have to do it.

We all know ourselves, is there any limitation on the number of hours, for example, these taxicab drivers work? In fact, you can talk to taxicab drivers who are insurance salesmen during the day and taxicab drivers at night.

I have nothing but admiration for people who do that. It is a fine example of the work ethic in operation. But what I cannot understand is how we can say to them, "You can do that if you do not have a professional skill, but if you have a professional skill that you have worked hard to acquire, then you are prohibited from using that skill, where, if you have a lesser skill and do not fall in the chosen categories, you can use that skill and earn money with no restrictions."

As I say, I just call this a commonsense amendment. I urge that Senators have a chance to think it out overnight, and if the Senator from Wisconsin, on thinking about it, would want to be a cosponsor of the amendment, or if he would like to offer the amendment and put it in his name, I would be happy to

do so, and I think a lot of people would feel very gratified if he would.

Mr. President, I believe the pending decision is whether or not my unanimous-consent request will be agreed to, or if there is objection to it or not.

Mr. NELSON. Mr. President, reserving the right to object, how much time is left on the amendment?

The PRESIDING OFFICER (Mr. DOMENICI). The Senator from Illinois has 18 minutes remaining. The Senator from Wisconsin has 13 minutes.

Mr. NELSON. Mr. President, let me ask the Senator from Illinois this: The fact of the matter is that this amendment is almost identical and does exactly the same thing as the amendment of the Senator from Oklahoma, except that it requires reporting. That is the only distinction.

I think everyone understood what he voted on when we voted to table the amendment of the Senator from Oklahoma, but I will say to the Senator from Illinois that if he is willing to yield back his time and vote right now, I would be willing to have an up-or-down vote.

This is now the third week we have been on this resolution. There are many amendments still left, and the difference between this amendment and the one we voted down 53 to 22 amounts to almost nothing. If the Senator would like to vote straight up and down right now, I yield back the remainder of the time, so we can proceed with the resolution.

Mr. PERCY. I would like to comment first on the difference in the amendment.

Mr. NELSON. If I have to listen to another hour on this amendment, I am going to move to table when the time expires.

Mr. PERCY. The Senator from Illinois would still like to comment very briefly. The difference is that a Senate employee is required to report to his supervisor, to the Senator, whether he intends to engage in an activity and give that Senator an opportunity to then judge whether or not it is in conflict with the conscientious performance of the staff member's duties. I think this shows whether we really have a good deal of control over the time and activities of a staff member or not. That distinction is significant. For that reason, I feel the amendment is not the same as the others. Though the intent is the same, the actual fulfillment is somewhat different. For that reason, I think it would obviously warrant a separate vote and I ask for a separate vote.

I would prefer to save the Senate's time by yielding back the remainder of my time and having the vote set for tomorrow. The Senator from Illinois simply cannot understand, when other Senators have been accorded this privilege when they have asked for it, why this particular amendment is of a separate category and classification which would require a vote tonight when many Senators have already gone home.

I have had at least five or six of my colleagues come up and ask whether I was going to insist on a vote tonight. I said no, that I would ask that it be carried over until tomorrow. I am sure Senators have departed feeling that the same courtesy would be extended to the Senator from Illinois which has been extended to other Senators throughout the course of the day. May the Senator ask how many votes are piled up now for tomorrow to be voted on in a sequential order?

The PRESIDING OFFICER. There will be five.

Mr. PERCY. What is the difference whether we have five or six? It would certainly save the time of the Senate. This Senator will yield back the remaining 15 minutes or so, we could go home and have dinner with our families, and come back and vote tomorrow.

Mr. NELSON. Did the unanimous-consent agreement set a time limitation on the votes?

The PRESIDING OFFICER. The votes are scheduled for 15 minutes.

Mr. NELSON. Fifteen minutes each?

The PRESIDING OFFICER. Yes.

Mr. NELSON. And we come in at 4 o'clock. That is 1 hour 15 minutes of straight voting. I will go over to tomorrow——

Mr. PERCY. I will ask unanimous consent that we reduce the time to 10 minutes after the first vote. Maybe the majority leader would like that.

Mr. NELSON. That is not what the agreement is. I have deep respect for the Senator from Illinois, but we are voting on the same proposition twice. It is almost subject to a point of order on the ground that there is no difference between what we voted on a little while ago and what we are discussing now. But that is all right. The record will make sure that nobody will be without notice. I will move to table tomorrow. It will be perfectly clear. If there is any Senator who does not know the difference between a tabling motion and a straight up-and-down vote the Senator and I will have conference and we will explain it before the vote.

Mr. PERCY. The Senator accepts that and considers it very fair. I would rather have the vote tomorrow than have it tabled.

Mr. NELSON. Mr. President, I ask unanimous consent that the vote on the pending amendment occur following those which are already scheduled by unanimous consent, and that I may reserve the right to move to table that amendment at that time.

The PRESIDING OFFICER. Is there any objection? Without objection, it is so ordered.

UNANIMOUS-CONSENT REQUEST

Mr. PERCY. Mr. President, I ask unanimous consent, and I can obviously not do so without the permission of the majority leader, considering that there are six votes tomorrow, 15 minutes apiece, in order to save the time of the Senate, that the first vote be 15 minutes and the subsequent votes be 10 minutes each, except for the last vote which shall be 15 minutes.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. NELSON. Does the Senator want 15 minutes because it will be hard to figure out what the last one is about?

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. ALLEN. Mr. President——

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ALLEN. Does the Senator from West Virginia wish to address the Senate?

Mr. ROBERT C. BYRD. I would like to have the attention of the Senator from Illinois.

Mr. President, the Senator from Illinois will note that I did not respond to his unanimous-consent request, and I had a reason. I would rather we would wait until tomorrow to determine whether or not those subsequent votes are 10-minute votes. I think some of them may very well be, but it could well be that on the second one we may want a 15-minute vote. I wonder if we should not vitiate this request at this time and do it tomorrow.

Mr. PERCY. That will be perfectly all right.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to vitiate the order providing for 10-minute rollcall votes on tomorrow after the first rollcall vote.

The PRESIDING OFFICER Is there objection?

Without objection, it is so ordered.

The Senator from Alabama.

MOTION TO RECONSIDER VOTE ON AMENDMENT NO. 110

Mr. ALLEN. Mr. President, I move to reconsider the vote by which amendment No. 110, by Mr. PERCY, was agreed to. I make this motion with the knowledge and consent of the distinguished Senator from Illinois. The purpose of my motion is to have an opportunity to offer an amendment which the committee has accepted. I discussed it with Mr. NELSON and with the minority staff.

This amendment, amendment No. 110, asks that the committee making this study of the need to place official nonreimbursable Senate expenses under Senate allowances requests the committee to consider increasing clerk hire allowances.

My amendment, which I will offer if the vote is reconsidered, merely adds the other facet of the study to say and/or to combine or merge official senatorial allowances. It is altogether likely that, by combining or merging these allowances, it might not be necessary to increase the dollar amount of the allowances. I presented this matter to the distinguished Senator from Wisconsin and also the distinguished Senator from Iowa (Mr. CLARK).

Mr. NELSON. The amendment we are dealing with which the Senator is moving to reconsider involved a study section of the resolution.

Mr. ALLEN. That is correct. There would also be a study.

Mr. NELSON. It just indicates the additional construction for a study. I have no objection.

Mr. ALLEN. Yes.

Mr. President, I move to reconsider the vote by which amendment No. 110 was

agreed to. I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

The motion was agreed to.

UP AMENDMENT NO. 107

Mr. ALLEN. Now, Mr. President, I call up amendment to amendment No. 110, which I have just explained.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an amendment to amendment No. 110.

The amendment to the amendment is as follows:

Amend amendment No. 110 as follows: On page 1 line 3 between the words "allowances" and "to" add the following: "and/or to combine or merge official Senatorial allowances".

Mr. ALLEN. Mr. President, I yield back the remainder of my time.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

Mr. PERCY. Let me say, Mr. President, that I fully support the amendment and appreciate very much the modification.

Several Senators addressed the Chair.

Mr. ALLEN. If the Senators will yield a moment, we have not yet agreed to the amendment, as amended.

The PRESIDING OFICER. The question is on agreeing to amendment No. 110, as amended.

Amendment No. 110, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes tonight.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

Mr. HELMS. Mr. President, will the Senator withhold that?

Mr. ROBERT C. BYRD. Yes.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ALLEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Hhe PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ACCREDITATION OF THE CENTRAL NEBRASKA GOODWILL INDUSTRIES

Mr. CURTIS. Mr. President, I congratulate the Central Nebraska Goodwill Industries, which is located at Grand Island, Nebr., on a well-deserved honor that has come to them.

The Commission on Accreditation of Rehabilitation Facilities, a private nonprofit group in Chicago, has named Central Nebraska Goodwill Industries as the first rehabilitation facility in the State of Nebraska to be accredited. This accreditation is a mark of excellence. It will be used as a guideline in the expenditure of some of the Federal funds for rehabilitation.

This recognition that has come to the Goodwill Industries at Grand Island is the result of dedicated work and concern on the part of the people involved. The Grand Island unit is a small agency operating on an annual budget of about $300,000. This accreditation illustrates what can be done on a very small budget when it is compared to Government expenditures.

I congratulate the Central Nebraska Goodwill Industries and all of the individuals who are associated with it and who supported it.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-987. A communication from the President of the United States transmitting proposals for supplemental appropriations for the fiscal year 1977 in the amount of $730,000,000 (with accompanying papers); to the Committee on Appropriations, and ordered to be printed.

EC-988. A letter from the Comptroller General of the United States transmitting a report entitled "Nationwide Food Consumption Survey: Need for Improvement and Expansion" (with an accompanying report); to the Committee on Agriculture, Nutrition, and Forestry.

EC-989. A letter from the Acting General Counsel of the Department of Defense transmitting a draft of proposed legislation to amend chapter 5 of title 37, United States Code, to make permanent the special pay provisions for reenlistment and enlistment bonuses, and for other purposes (with accompanying papers); to the Committee on Armed Services.

EC-990. A letter from the Secretary of Transportation transmitting a draft of proposed legislation to authorize appropriations for the Coast Guard for Fiscal Years 1978 and 1979, and for other purposes (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC-991. A letter from the Administrator of the National Aeronautics and Space Administration transmitting, pursuant to law, a list of the present and former NASA employees who have filed reports with NASA pertaining to their NASA and aerospace-related industry employment for the fiscal year ended June 30, 1976, plus the transition quarter ended September 30, 1976 (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC-992. A letter from the Vice President for Government Affairs of the National Railroad Passenger Corporation (AMTRAK) transmitting, pursuant to law, a report on the average number of passengers per day and the on-time performance at the final destination of each train for the month of January 1977 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-993. A letter from the Secretary of the Interior transmitting a draft of proposed legislation to authorize $15 million for the Government of Guam (with accompanying papers); to the Committee on Energy and Natural Resources.

EC-994. A letter from the Secretary of the Treasury transmitting a draft of proposed legislation to provide for increased participation by the United States in the International Development Association (with accompanying papers); to the Committee on Foreign Relations.

EC-995. A communication from the President of the United States transmitting a draft of proposed legislation to authorize security assistance programs for the fiscal years 1978 and 1979 (with accompanying papers); to the Committee on Foreign Relations.

EC-996. A communication from the President of the United States transmitting a draft of proposed legislation to authorize foreign development assistance programs for the fiscal years 1978 and 1979 (with accompanying papers); to the Committee on Foreign Relations.

EC-997. A letter from the Director of ACTION transmitting a draft of proposed legislation to further amend the Peace Corps Act (with accompanying papers); to the Committee on Foreign Relations.

EC-998. A confidential communication from the Comptroller General of the United States (PSAD-77-42, March 28, 1977) transmitting the status of the FFG-7 Class Guided Missile Frigate Shipbuilding Program (with an accompanying report); to the Committee on Governmental Affairs.

EC-999. A secret communication from the Comptroller General of the United States (PSAD-77-45, March 18, 1977) transmitting the status of the SSN-668 Class Attack Submarine Program (with an accompanying report); to the Committee on Governmental Affairs.

EC-1000. A confidential communication from the Comptroller General of the United States (PSAD-77-43, March 18, 1977) transmitting the status of the Light Airborne Multi-Purpose System Program (with an accompanying report); to the Committee on Governmental Affairs.

EC-1001. A secret communication from the Comptroller General of the United States (PSAD-77-67, March 18, 1977) transmitting mission effectiveness of U.S. Anti-armor Weapon Systems (with an accompanying report); to the Committee on Governmental Affairs.

EC-1002. A letter from the President of the Conference Board transmitting, pursuant to law, a status report and description of the Conference Board's Congressional Assistant Program for 1976 (with an accompanying report); to the Committee on Governmental Affairs.

EC-1003. A letter from the Executive Secretary to the Department of Health, Education, and Welfare transmitting, pursuant to law, a copy of a document "Final Regulation for amendment to State adult education programs under the Adult Education Act" which has been transmitted to the Federal Register (with accompanying papers); to the Committee on Human Resources.

EC-1004. A letter from the President of the Overseas Private Investment Corporation transmitting, pursuant to law, a copy of report on the administration of the Freedom of Information Act for the calendar year

1976 (with an accompanying report); to the Committee on the Judiciary.

EC–1005. A letter from the Acting Administrator of the Small Business Administration transmitting a draft of proposed legislation to provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–77 drought (with accompanying papers); to the Select Committee on Small Business.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM–105. Senate Joint Resolution No. 140 adopted by the General Assembly of the Commonwealth of Virginia ratifying the proposed amendment to the Constitution of the United States relating to denial of the right for failure to pay taxes; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION No. 140

"Whereas, the eighty-seventh Congress of the United States of America, in both Houses, by a Constitutional majority of two-thirds thereof, adopted the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"Senate Joint Resolution 29

"Proposing an amendment to the Constitution of the United States relating to the qualifications of electors

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

" 'Article—

" 'Section 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

" 'Sec. 2. The Congress shall have power to enforce this article by appropriate legislation.' "

"Now, therefore, be it

"*Resolved* by the Senate, the House of Delegates concurring:

"1. That the amendment to the Constitution of the United States of America herein set forth be, and the same is hereby, ratified and affirmed; and

"2. That certified copies of this joint resolution be forwarded by the Governor to the President of the United States, to the Secretary of the State at Washington, to the Administrator of General Services in Washington, to the President of the United States Senate, and to the Speaker of the House of Representatives of the United States."

POM–106. House Memorial 2001 adopted by the House of Representatives of the State of Arizona relating to construction of the Hualapai Hydroelectric Dam, and urging the Congress of the United States to approve construction of the Hualapai Hydroelectric Dam located in the inner gorge of the Colorado River within the boundaries of the Hualapai Indian reservation; to the Committee on Energy and Natural Resources:

"HOUSE MEMORIAL 2001

"A memorial relating to construction of the Hualapai Hydroelectric Dam, and urging the Congress of the United States to approve construction of the Hualapai Hydroelectric Dam located in the inner gorge of the Colorado River within the boundaries of the Hualapai Indian reservation

"Whereas, the Nation is faced with an energy supply inadequate to meet its rapidly increasing needs; and

"Whereas, preservation of our natural environment must be balanced with the development of energy needed to maintain a sound economy; and

"Whereas, electric energy produced in hydroelectric projects is highly desirable from the standpoints of reliability, cleanliness, efficiency and safety; and

"Whereas, highly desirable hydroelectric dam sites are still available in Arizona along the Colorado River; and

"Whereas, the Hualapai Hydroelectric Project (Bridge Canyon) is potentially a major clean energy source for supplying a significant amount of energy for the Southwest Region; and

"Whereas, it would take approximately six and three-quarter million barrels of oil, our single most-demanded fuel, per year to generate the electricity which can be developed from this project; and

"Whereas, the water which would be the power to run the hydroelectric generators is a vast renewable resource now being wasted down the river; and

"Whereas, income from the Hualapai Dam would provide the State with major financial support to help pay for the Central Arizona Project; and

"Whereas, the project would create more than twenty-five million dollars per year in revenue; and

Whereas, the project would utilize an estimated peak labor force of eight hundred fifty workers; and

"Whereas, the Hualapai Indians support construction of the dam on their reservation recognizing it as their only opportunity for economic development and full tribal employment; and

"Whereas, this project would not interfere with the free-flowing Colorado River through the Grand Canyon; and

"Whereas, construction of the dam will create a ribbon of blue in the narrow inner gorge, making the Hualapai section of the Colorado available to all for recreational uses.

"Wherefore your memorialist, the House of Representatives of the State of Arizona, prays:

"1. That the Congress promptly review the many benefits of hydroelectric development along the Colorado River, particularly the proposed Hualapai Project and take action to approve its construction at a time when the Nation could greatly use the electrical energy derived from it, and support the efforts of the Arizona Power Authority and the Hualapai Indian Tribe to preserve the viability of the Hualapai Dam site.

"2. That the Secretary of State of the State of Arizona transmit copies of this Memorial to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States and to each Member of the Arizona Congressional Delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. TALMADGE (for Mr. LONG), from the Committee on Finance, with amendments:

H.R. 3477. A bill to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform, together with additional, minority and supplemental views (Rept. No. 95–66).

By Mr. TALMADGE (for Mr. LONG), from the Committee on Finance, with amendments and an amendment to the title:

H.R. 4800. A bill to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes (Rept. No. 95–67).

By Mr. TALMADGE (for Mr. LONG), from the Committee on Finance:

S. Res. 126. An original resolution to waive section 303(a) of the Congressional Budget Act with respect to the consideration of H.R. 3477. Referred to the Committee on the Budget.

By Mr. JACKSON, from the Committee on Energy and Natural Resources, with amendments:

S. 36. A bill to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes (Rept. No. 95–69).

S. 37. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906), and for other purposes (Rept. No. 95–70).

LEGISLATIVE REVIEW DURING THE 94TH CONGRESS BY THE SENATE COMMITTEE ON RULES AND ADMINISTRATION—SPECIAL REPORT OF A COMMITTEE (REPT. NO. 95–68)

Mr. CANNON. Mr. President, pursuant to section 136 of the Legislative Reorganization Act of 1946, as amended, I submit a report on the oversight activities of the Committee on Rules and Administration during the 94th Congress.

The PRESIDING OFFICER. The report will be received and printed.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Peter F. Flaherty, of Pennsylvania, to be Deputy Assistant Attorney General.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. RANDOLPH, from the Committee on Energy and Natural Resources:

Robert L. Herbst, of Minnesota, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. RANDOLPH, from the Committee on Environment and Public Works:

James Gustave Speth, of the District of Columbia, to be a Member of the Council on Environmental Quality.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HARRY F. BYRD, JR., from the Committee on Armed Services:

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be general

Lt. Gen. John W. Roberts, [redacted] FR (major general, Regular Air Force), U.S. Air Force.

The following named officer under the provisions of title 10, United States Code, section 3066, to be assigned a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. John Rutherford McGiffert II, [redacted], U.S. Army.

Maj. Gen. Andrew W. McDonnell, U.S. Marine Corps, having been designated, in accordance with the provisions of title 10, United States Code, section 5232, for commands and other duties determined by the President to be within the contemplation of said section, for appointment to the grade of lieutenant general while so serving.

JOINT REFERRAL OF A BILL—S. 807

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that S. 807, a bill to amend the Small Business Act and the Federal Energy Research and Development Act of 1974, which was referred to the Energy and Natural Resources Committee on February 24, 1977, be jointly referred to the Select Committee on Small Business for the purpose of considering title I only of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. THURMOND:

S. 1134. A bill relating to the age and service requirements for the resignation and retirement of justices and judges of the United States; to the Committee on the Judiciary.

By Mr. PACKWOOD:

S. 1135. A bill for the relief of Young-soon Choi; to the Committee on the Judiciary.

S. 1136. A bill for the relief of So San Kim; to the Committee on the Judiciary.

By Mr. ANDERSON:

S. 1137. A bill to amend the Internal Revenue Code of 1954 to provide an additional itemized deduction for older individuals who rent their principal residences; to the Committee on Finance.

By Mr. SPARKMAN (by request):

S. 1138. A bill to amend the Foreign Assistance Act of 1961, as amended, to authorize additional authority for the Overseas Private Investment Corporation; to the Committee on Foreign Relations.

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 1139. A bill for the relief of Dr. John C. Hume; to the Committee on Armed Services.

By Mr. HART (for himself, Mr. RANDOLPH, Mr. BAKER, Mr. CULVER, Mr. STAFFORD, Mr. ANDERSON, Mr. WALLOP, Mr. BAYH, Mr. BUMPERS, Mr. CASE, Mr. HANSEN, Mr. HUMPHREY, Mr. MCGOVERN, Mr. METCALF, Mr. NELSON, Mr. RIEGLE, Mr. SARBANES, Mr. CHAFEE, and Mr. WILLIAMS):

S. 1140. A bill to encourage and assist the States to develop improved programs for the conservation of nongame species of native fish and wildlife, and for other purposes; to the Committee on Environment and Public Works.

By Mr. STONE:

S. 1141. A bill to amend title 38 of the United States Code to assist veterans with a permanent and total service-connected disability due to the loss or loss of use of one upper and one lower extremity to acquire specially adapted housing; to the Committee on Veterans' Affairs.

By Mr. SARBANES:

S. 1142. A bill for the relief of Kam Lin Cheung; to the Committee on the Judiciary.

By Mr. DOMENICI (for himself, Mr. RANDOLPH, Mr. GRAVEL, and Mr. STAFFORD):

S. 1143. A bill to assure more adequate supplies of water to the Nation; to the Committee on Environment and Public Works.

By Mr. PROXMIRE:

S. 1144. A bill to extend mortgage insurance and related authorities under the National Housing Act, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

S. 1145. A bill to amend the U.S. Housing Act of 1937 to provide authorizations for and amend laws relating to housing, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

S. 1146. A bill to amend the National Housing Act to increase maximum mortgage amounts, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. SCHWEIKER (for himself and Mr. HEINZ):

S. 1147. A bill to relieve the liability for the repayment of certain erroneously made contributions by the United States; to the Committee on the Judiciary.

By Mr. BROOKE:

S. 1148. A bill to authorize the Secretary of the Interior to erect a memorial in honor of the 56 signers of the Declaration of Independence in Constitution Gardens in the District of Columbia; to the Committee on Rules and Administration.

By Mr. BENTSEN (for himself, Mr. TOWER, Mr. LONG, and Mr. JOHNSTON):

S. 1149. A bill to recognize the joint development by the State of Texas and the State of Louisiana of a recurring and enviornmentally sound source of energy represented by the Toledo Bend Dam and Reservoir and exempt Sabine River Authority, State of Texas, and exempt Sabine River Authority, State of Louisiana, from charges for use, occupancy, and enjoyment of certain lands of the United States within the Sabine National Forest, Tex.; to the Committee on Energy and Natural Resources.

By Mr. HUMPHREY (for himself, Mr. HATHAWAY, Mr. ANDERSON, Mr. BAYH, Mr. MATHIAS, Mr. METCALF, Mr. ABOUREZK, Mr. SPARKMAN, Mr. MCGOVERN, Mr. BROOKE, Mr. CRANSTON, Mr. HEINZ, Mr. KENNEDY, Mr. WILLIAMS, Mr. LEAHY, and Mr. SARBANES):

S. 1150. A bill to amend title V of the Housing Act of 1949 to increase and extend authorities thereunder, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BENTSEN:

S. 1151. A bill granting the consent of Congress to an amendment to the Sabine River Compact entered into by the States of Texas and Louisiana; to the Committee on the Judiciary.

Br Mr. BENTSEN (for himself and Mr. SCHWEIKER):

S. 1152. A bill to amend the Act of August 24, 1935 (commonly referred to as the "Miller act" to exempt construction contracts not exceeding $25,000 in amount from the bonding requirements of such act, and for other purposes; to the Committee on Environment and Public Works.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ANDERSON:

S. 1137. A bill to amend the Internal Revenue Code of 1954 to provide an additional itemized deduction for older individuals who rent their principal residences; to the Committee on Finance.

Mr. ANDERSON. Mr. President, today I am introducing a bill to provide an additional itemized deduction for individuals over the age of 65 who rent their principal residences.

Under current tax laws, a homeowner may deduct the amount paid during a taxable year in real estate property taxes. Although renters pay property taxes as a part of their rent, they are not allowed to deduct that portion of their rent from their Federal income taxes.

Many of our senior citizens are living on fixed or limited incomes. I feel it is a great injustice to require them to pay additional taxes on money already spent paying city, county, or State property taxes, which are continuing to rise rapidly throughout the Nation.

I am proposing a system to allow older renters to deduct 25 percent of the amount they paid in rent during a taxable year from their Federal income tax. This bill also allows renters to use the Federal tax forms already in existence. They simply place 25 percent of their rent in the space provided for homeowner's deductible property taxes.

We have used a percentage successfully in developing State circuit breaker refunds for property tax relief in Minnesota. I believe incorporation of this principle into Federal law is needed.

Many of our senior citizens have already been priced out of owning their own homes. It is my hope that through this legislation we can keep them from being priced out of renting their own apartments.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was

ordered to be printed in the RECORD, as follows:

S. 1137

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as section 222, and by inserting after section 220 the following new section:

"SEC. 221. RENTAL OF PRINCIPAL RESIDENCE.

"In the case of an individual who has attained the age of 65 before the close of the taxable year, there shall be allowed as a deduction an amount equal to 25 percent of the amount paid or accrued by the taxpayer during the taxable year to rent his principal residence.".

(b) The table of sections for part VII of subchapter B of chapter 1 of such Code is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 221. Rental of principal residence.

"Sec. 222. Cross references.".

SEC 2 The amendments made by the first section of this Act shall apply with respect to taxable years beginning after December 31, 1977

By Mr. SPARKMAN (by request):

S. 1138. A bill to amend the Foreign Assistance Act of 1961, as amended, to authorize additional authority for the Overseas Private Investment Corporation; to the Committee on Foreign Relations.

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference a bill to amend the Foreign Assistance Act of 1961, as amended, to authorize additional authority for the Overseas Private Investment Corporation.

It has been requested by the President of OPIC and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD, together with a letter from the President of OPIC to the President of the Senate dated March 18, 1977.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1138

Be it enacted by the Senate and House of Representatives of the United States of America assembled, That title IV of Chapter 2 of Part I of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2191-2200), is amended as follows:

In section 235(a)(4), strike out "December 31, 1977" and insert in lieu thereof "September 30, 1978."

OVERSEAS PRIVATE
INVESTMENT CORPORATION,
Washington, D.C., March 18, 1977.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: On March 14, 1976, pursuant to section 607 of the Congressional Budget Act of 1974, OPIC transmitted to the 94th Congress a request for new budget authority for Fiscal Year 1978. We noted at that time that OPIC was considering a comprehensive proposal to submit to the Congress early this year based on OPIC's experience over the last three years in the formation of private associations to underwrite investment insurance in conjunction with OPIC.

Review of various legislative proposals with respect to OPIC presently is in process within the Executive Branch by an inter-agency committee. When this review is concluded, we will be in a position to transmit comprehensive recommendations to Congress with respect to OPIC's operations over the next four years.

Under Section 104 of the Government Corporation Control Act, OPIC's operating budget for each fiscal year is subject to congressional review and approval in conjunction with congressional review of the President's budget for that fiscal year. Thus OPIC's budget for FY 1978 was transmitted to Congress on January 15 as part of the President's budget. That budget reflects new budget authority for OPIC for Fiscal Year 1978 in the form of an increase from $100 million to $250 million in OPIC's borrowing authority under section 235(f) of the Foreign Assistance Act of 1961, as amended, to satisfy claims liabilities under investment insurance and reinsurance.

Because of the ongonig inter-agency review, and the improbability that OPIC would need to use any of its borrowing authority during FY 1978, the attached draft bill does not provide for increased borrowing authority for FY 1978. Although the comprehensive proposals to be submitted may include such a request, we would not ask that such new budget authority be available prior to Fiscal Year 1979. Accordingly, since the proposal would not involve new budget authority for FY 1978, congressional action would not be required under the Congressional Budget Act deadline of May 15 for reporting measures to the floor.

Consistent with the foregoing, the attached draft bill is limited to the extension of OPIC's authority to issue new investment insurance and investment guaranties from December 31, 1977, to September 30, 1978, the last day of Fiscal Year 1978. Such an extension coincides with the President's budget, which provides for the continued operation of OPIC through the end of the fiscal year.

The Office of Management and Budget has advised that there is no objection to the presentation of this draft bill to the Congress.

Sincerely yours,

MARSHALL T. MAYS.

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 1139. A bill for the relief of Dr. John C. Hume; to the Committee on Armed Services.

DR. JOHN C. HUME

Mr. SARBANES. Mr. President, Dr. John Hume of Baltimore, Md., left a secure job with the U.S. Public Health Service in 1961 after receiving written and oral assurances that his years of service with the PHS would count for purposes of retirement from the Air Force Reserve retirement program. Now that he has reached retirement age, he has found that these assurances were incorrect and has been told that he is neither eligible to receive retirement benefits from the Air Force Reserve nor from the Public Health Service retirement program. Senator MATHIAS and I are today introducing a bill to allow Dr. Hume's years of employment with the PHS to be counted so that he can receive retirement benefits from the Air Force Reserve. This legislation is needed to overcome the hardship Dr. Hume now faces as a result of his having relied on assurances he was given with respect to retirement benefits by responsible officials of the U.S. Government.

By Mr. HART (for himself, Mr. RANDOLPH, Mr. BAKER, Mr. CULVER, Mr. STAFFORD, Mr. ANDERSON, Mr. WALLOP, Mr. BAYH, Mr. BUMPERS, Mr. CASE, Mr. HANSEN, Mr. HUMPHREY, Mr. MCGOVERN, Mr. METCALF, Mr. NELSON, Mr. RIEGLE, Mr. SARBANES, Mr. CHAFEE, and Mr. WILLIAMS):

S. 1140. A bill to encourage and assist the States to develop improved programs for the conservation of nongame species of native fish and wildlife, and for other purposes; to the Committee on Environment and Public Works.

FEDERAL AID IN NONGAME FISH AND WILDLIFE CONSERVATION ACT OF 1977

Mr. HART. Mr. President, I am today reintroducing with 18 of my colleagues the Federal Aid in Nongame Fish and Wildlife Conservation Act which would authorize the Department of the Interior to distribute $20 million, $30 million, and $40 million to the States in fiscal years 1978, 1979, and 1980 for nongame fish and wildlife conservation programs.

Wildlife programs have in the past been directed primarily toward game species because the funding has been provided by sportsmen who pay excise taxes on hunting and fishing equipment. These sportsmen can rightly take pride in the fact that few game species have been reduced to threatened or endangered status.

At the same time, it is discouraging that a nation which has accepted the fact that all species of wildlife are important to maintain an environmental balance still spends so much of its wildlife management funds on a small percentage of all species: game animals. A 1975 report by the Wildlife Management Institute confirms that States have primarily sought to maintain sufficient numbers of game animals for hunting, fishing, and trapping while only coincidentally providing for other species of wildlife. That report, entitled "Current Investments, Projected Needs, and Potential New Sources of Income for Non-Game Fish and Wildlife Programs in the United States" was undertaken at the request of the Council on Environmental Quality and the U.S. Fish and Wildlife Service. This study showed that a total of 36 States conducted programs directed specifically toward nongame fish and wildlife in 1972. While their total budget for fish and wildlife management, research, and law enforcement programs totaled $176 million, only $3.3 million, or approximately 2 percent of the total, was used for nongame programs.

Of course, proper management programs for game animals will often benefit nongame species, but this is not always the case. The fact that all wildlife has important scientific, cultural, and nonconsumptive value leads to the conclusion that we cannot leave the management of nongame wildlife to chance. It seems clear that the only way to guarantee that this Nation's nongame

resource will receive the attention it deserves is to establish a new and separate funding source for nongame programs—an idea that has long been supported by the Audubon Society, the Environmental Defense Fund, the Sierra Club, Friends of the Earth, the Natural Resources Defense Council, the Wildlife Management Institute, and many other local and national conservation organizations.

Mr. President, this legislation will set up such a new funding source, authorizing the Federal Government to distribute funds to the States for nongame fish and wildlife conservation programs.

Activities which a State might undertake with this money include habitat acquisition and modification, census and monitoring programs to keep abreast of the population trends, protection of wildlife through improved law enforcement, and many other activities and programs. Under the provisions of this bill, the Federal Government would fund up to 75 percent of the cost of the programs approved by the Secretary of the Interior, with the remaining 25 percent to be funded by the State. To prevent a drain on traditional State funding sources, the legislation specifies that not more than 10 percent of the State's share of program costs in any individual year may be derived from the sale of hunting, fishing, and trapping licenses. Furthermore, not more than 25 percent of a State apportionment may be used for information and education programs, law enforcement, and extension services. This provision is intended to insure that primary emphasis will be placed upon fundamental research and management activities.

In addition, to encourage the development of programs on an ecological rather than a geographical unit basis, the legislation would authorize the Secretary to fund up to 90 percent of any program which is undertaken jointly by two or more States.

Finally, the legislation would require all Federal agencies with land management responsibility to review their programs to determine whether these programs can be reasonably modified to include nongame wildlife conservation. Federal departments and agencies would be authorized to enter into cooperative agreements with the States to carry out these programs.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1140

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Aid in Nongame Fish and Wildlife Conservation Act of 1977".

SEC. 2. DECLARATION OF POLICY.

(a) Findings.—The Congress finds and declares the following:

(1) Nongame species of native fish and wildlife are of ecological, economic, educational, esthetic, historical, recreational, and scientific value to the Nation and its people.

(2) The improved conservation of these species, including retention, maintenance, and improvement of their habitat, would help assure a healthier and more esthetically pleasing environment for all Americans.

(3) Urban dwellers have insufficient opportunity to participate in recreational and other programs designed to foster human interaction with nongame wildlife and, thereby, a greater appreciation and awareness of the environment.

(4) Existing State programs for nongame fish and wildlife species have been supported largely on the basis of hunting and fishing license revenues and excise taxes on certain hunting and fishing equipment. These traditional financing mechanisms are not adequate to meet the needs of programs for both nongame and game species, and they must be supplemented.

(5) The States should be encouraged to develop, expand, and maintain, in urban and non-urban areas, programs for the conservation of nongame species of native fish and wildlife.

(b) Purpose.—It is the purpose of this Act—

(1) to provide financial and technical assistance to the States for the development, expansion, and maintenance of conservation programs for nongame species of native fish and wildlife; and

(2) to direct that all Federal departments and agencies utilize this statutory and administrative authority, to the maximum extent practicable, actively seek to conserve and to promote conservation of, nongame species of native fish and wildlife and the habitats of such species, in furtherance of the policy of this Act.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) The terms "conserve," "conserving" and "conservation" mean to use, and the use of, methods or procedures which are necessary to insure, to the extent practicable and desirable, the continued existence of populations of nongame species of native fish and wildlife. Such methods and procedures may include any activity associated with scientific resources management, such as research, census, law enforcement, habitat acquisition and development, information and education, live trappings, and transplantations.

(2) The term "fish and wildlife" means any member of the animal kingdom, including without limitation any species of mammal, bird, fish, reptile, amphibian, mollusk, crustacean, arthropod, or other invertebrate which, with respect to a particular State, is native to that State.

(3) The term "resignated State agency" means a commission, department, division, or other unit of a State government which is certified to possess legal authority regarding nongame animals which occur in such State, as required under subsection 5(e).

(4) The term "nongame species" means and includes wild mammals, birds, fishes, reptiles, amphibians and invertebrate animals that (A) are not ordinarily pursued, sought, trapped or otherwise taken for sport, food, or commercial purposes, (B) are not subject to open seasons provided by law or regulation for such pursuit, seeking, taking or trapping, (C) offer benefits in the form of cultural and scientific values or non-consumptive recreation, and (D) are not an endangered species.

(5) The term "plan" means a comprehensive and continuing program for the conservation and rehabilitation of nongame species of fish and wildlife under the jurisdiction of any State. Such plans may include a number of nongame wildlife projects.

(6) The term "project" means an undertaking designed to conserve or rehabilitate nongame species of fish and wildlife.

(7) The term "Secretary" means the Secretary of the Interior, directly or through the United States Fish and Wildlife Service, as appropriate.

(8) The term "species" means, with respect to fish or wildlife, any species, any subspecies, and any other group of fish or wildlife of the same species or smaller tax in common spatial arrangement which are capable of interbreeding.

(9) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, the Commonwealth of the Mariana Islands, and the Trust Territory of the Pacific Islands.

SEC. 4. NONGAME FISH AND WILDLIFE CONSERVATION PROGRAM.

(a) PROGRAM.—The Secretary shall cooperate with the States in programs for the conservation of nongame species of native fish and wildlife by providing, through designated State agencies, financial assistance to carry out approved plans or projects for the conservation of such species. Such assistance shall be provided pursuant to the formula set forth in section 5(c) and in accordance with the requirements of sections 5 (e) and (f).

(b) TRANSFER OF PERSONNEL AND EQUIPMENT.—The Secretary may, in assisting the States in carrying out programs under subsection (a), assign or transfer personnel and equipment and share scientific information, in such manner as the Secretary deems appropriate.

SEC. 5. NONGAME FISH AND WILDLIFE CONSERVATION FUND.

(a) UNEXPENDED FUNDS.—Any amount apportioned to a State pursuant to subsection (b) which is unexpended or unobligated at the close of two fiscal years may be used by the Secretary, during the succeeding two fiscal years, to assist other States in carrying out approved nongame conservation plans or projects. Any amount granted to any State under this paragraph shall be supplemental to, and shall not be charged against, any funds apportioned to such State under subsection (c). Any amount which is not paid or obligated by the Secretary pursuant to this paragraph after the close of the second such two-year period shall be made available for expenditure by the Secretary in carrying out any program administered by the Fish and Wildlife Service which serves the nongame fish and wildlife resource.

(b) ADMINISTRATIVE EXPENSE.—The Secretary may use not to exceed eight percent of funds appropriated pursuant to this Act for the expenses incurred in administering this Act, including the study authorized by section 10. Such sums shall be available until the expiration of the next succeeding fiscal year. If any such amount remains unexpended by the Secretary at the close of such fiscal year, the Secretary shall, within 60 days thereof, apportion such amount to State agencies on the same basis and in the same manner as is provided for other amounts authorized by subsection (c) to be apportioned among the States for such fiscal year.

(c) APPORTIONMENT.—The Secretary, after making deductions under subsection (b), shall, subject to the provisions of section 6, apportion the remaining appropriated funds among the several States for each fiscal year in the following manner:

(1) One-half in the ratio which the area of each State bears to the area of all of the States; and

(2) One-half in the ratio which the population of all States; except that no State shall receive less than one-half of one percent, nor more than five percent, of the total amount apportioned.

(d) CERTIFICATION.—For each fiscal year, the Secretary shall certify to the Secretary of the Treasury and to each designated State

agency the sum which the Secretary has estimated to be deducted for the administration of this Act under subsection (b) and the sum which the Secretary has apportioned to each State.

(e) SUBMISSIONS AND CONSIDERATION.—If a State wishes to avail itself of the benefits of the Act, it shall certify to the Secretary that it has a State agency (which shall be identified) which has adequate statutory and administrative authority and the necessary resources and personnel to conserve nongame species of native fish and wildlife, and it shall make submissions to the Secretary in accordance with paragraph (2) or (3). The Secretary shall consider any such submissions and make determinations thereon pursuant to paragraph (4).

(2) The State shall prepare and submit a comprehensive fish and wildlife resource management plan to the Secretary, with respect to the conservation of the native nongame species under its jurisdiction. Any such plan shall—

(A) be submitted in such form and with such content as the Secretary shall prescribe;

(B) include a description of all applicable methods of conservation to be used in the plan and projects to be carried out and projections as to possible future such plans and projects;

(C) indicate the general chronological order in which phases of the comprehensive plan should be carried out over a period of years;

(D) be designed to perpetuate the species covered for the cultural, esthetic, scientific, and recreational enrichment of the State and its residents and visitors;

(E) be based on the State's projections as to the needs of such species and the desires and needs of its residents and visitors for a period of not less than 15 years; and

(F) provide for such conservation for a period of five or more years, and shall include a provision for review and revision at regular intervals, not to exceed three years.

(3) A State may elect instead to avail itself of the benefits of this section by preparing and submitting a proposal to the Secretary for a conservation project with respect to one or more native nongame species. Any such proposal shall be submitted in such form and with such content as the Secretary shall prescribe, and shall include a detailed description of the project involved.

(4) The Secretary shall study and evaluate any submission received under paragraph (2) or (3). If the Secretary finds that a comprehensive plan submitted under paragraph (2) or a project submitted under paragraph (3) conforms to standards and criteria established by regulation by the Secretary, such plan or project may be approved. In the case of a project plan, the Secretary shall not grant final approval until the State furnishes such surveys, specifications, and additional information as the Secretary requests, and subject to the Secretary's approval thereof. In the case of a comprehensive plan, the Secretary shall condition approval on substantiality of character and design. Upon approval, the Secretary shall notify the designated State agency of such State and shall immediately set aside, from funds apportioned under this Act, up to 75 percent of the cost of implementing segments of any comprehensive plan involved or of the total estimated cost of the project involved. The non-Federal share may, in the discretion of the Secretary, be provided by the State in the form of money, in-kind contributions, or real property. In-kind contributions may be in the form of personal services rendered by volunteers who possess qualifications, by training or experience, to assist in surveys, censuses, or other scientific studies of nongame species: provided, that standards for the qualifications of such volunteers and the value of such in-kind services shall be in accordance with regulations issued by the Secretary under this Act. The value of any such real property shall be determined by the Secretary, whose decision shall be final.

(5) If any Federal funds provided for an approved plan or project are used or applied for any other purpose, the State involved shall replace or return such funds before it may receive any additional apportionment under this Act.

(f) Project or Plan Funding.—(1) When the Secretary finds that any project which is described in a comprehensive plan, or which is approved, under subsection (e), has been completed or, in the case of research relating to nongame species, that it is being conducted, in compliance with the Secretary's specifications, the Secretary shall pay the amount set aside for such project to the State involved. The Secretary may, in his discretion, make periodic payments as such a project progresses; except that the amount of any such periodic payment shall not exceed the United States pro rata share of the project. If a State has prepared a comprehensive plan under subsection (e)(2), which has been approved under subsection (e)(4), the Secretary may, in his discretion and under such rules and regulations as he may prescribe, advance funds to such State for financing the United States pro rata share agreed upon between the designated State agency and the Secretary. The Secretary and the applicable designated State agency may jointly decide at what times and in what amounts payment shall be made under this Act. Such payments shall be made by the Secretary to such official, officials, or depository, as may be designated by such agency in accordance with the laws of such State.

(2) Any construction work and labor performed in conjunction with an approved plan or project shall be performed in accordance with the laws of such State and under the direct supervision of the designated State agency, subject to the inspection and approval of the Secretary and in accordance with the rules and regulations issued under this Act.

(3) Administrative costs, in the form of overhead or indirect costs for services provided by State central service activities outside of a State agency having primary jurisdiction over the nongame fish and wildlife resources of a State, which may be charged against programs or projects supported by the fund, shall not exceed, in any fiscal year, three percent of the apportionment for such year to such State.

(4) Not more than ten percent of the State's share of program costs in any year may be from funds derived from the sale of hunting, fishing, and trapping licenses and permits.

(5) Not more than 25 percent of a State apportionment under this Act may be used for information and education programs, law enforcement, and extension services.

(g) Increased Federal Share.—Whenever two or more States have a common interest in a nongame species of native fish and wildlife and jointly undertake a program or project agreement with the Secretary for conservation of such species, the Federal share of the cost involved may be up to 90 percent.

SEC. 6. PAYMENT OF FUNDS TO, AND COOPERATION WITH RESPECT TO CERTAIN DESIGNATED AREAS.

The Secretary may cooperate with the Secretary of Agriculture of the Commonwealth of Puerto Rico, the Governor of Guam, the Governor of the Virgin Islands, the Governor of American Samoa, and the Mayor of the District of Columbia in the conduct of nongame fish and wildlife conservation programs. Any such program shall be conducted pursuant to such terms and conditions as the Secretary deems fair and equitable, and which are likely to be effective for such purpose. The Secretary may apportion to such jurisdictions, out of the money available for apportionment under this Act, such sums as the Secretary shall determine; except that such sums shall not exceed (1) for Puerto Rico, one-half of one percent; (2) for Guam, one-sixth of one percent; (3) for the Virgin Islands, one-sixth of one percent; (4) for American Samoa, one-sixth of one percent; (5) and for the District of Columbia, one-half of one percent, of the total amount apportioned for one year. The Secretary shall not require any cooperating agency to pay an amount which will exceed 25 percent of the cost of the project involved. Any unexpended or unobligated balance of any such apportionment shall be available for expenditure in any such jurisdiction in the succeeding fiscal year on any approved project and, if unexpended or unobligated at the end of such fiscal year, may be made available for expenditure by the Secretary in carrying out any program administered by the Fish and Wildlife Service which serves the nongame wildlife resource.

SEC. 7. COOPERATION AND COORDINATION.

(a) IN GENERAL.—All Federal departments and agencies shall, to the maximum extent practicable, cooperate and coordinate their programs and activities with the States in establishing and maintaining programs for the conservation of nongame species of native fish and wildlife.

(b) REVIEW OF EXISTING PROGRAMS.—Each Federal department and agency which has management authority over land and water resources shall, within one year after the date of enactment of this Act, review each of its existing programs for lands, waters, and interests in lands and waters subject to its control or authority to determine which of such programs, if any, can be extended or modified, without jeopardizing the purposes of such programs, to include the conservation of nongame species of native fish and wildlife as authorized by this Act. Upon making an affirmative such determination, any such department or agency shall notify the appropriate State agency and cooperate with such agency in the establishment of conservation efforts with respect to nongame species of native fish and wildlife.

(c) COOPERATIVE AGREEMENTS.—All Federal departments and agencies are authorized to enter into cooperative agreements with State agencies under subsection (b). Each such cooperative agreement shall—

(1) specify those areas in which such programs will be implemented;

(2) provide, where appropriate, for habitat improvements or modifications designed to conserve such nongame species;

(3) provide, to the extent practicable, for educational and recreational programs to foster greater appreciation and understanding of such nongame species; and

(4) contain such other terms and conditions as the Federal department or agency, or the State agency, deems necessary and appropriate to carry out the declaration of policy of this Act.

SEC. 8. AUTHORIZATION FOR APPROPRIATIONS.

There are hereby authorized to be appropriated to carry out the purposes of this Act for fiscal year 1978, the sum of $20,000,000, for fiscal year 1979, the sum of $30,000,000, and for fiscal year 1980, the some of $40,000,000.

SEC. 9. ADDITIONAL REGULATIONS.

The Secretary is authorized to promulgate any rules and regulations or any amendments to existing rules and regulations which are deemed necessary to carry out the provisions of this Act.

SEC. 10. STUDY.

The Director of the United States Fish and Wildlife Service, in consultation with the

Chairman of the Council on Environmental Quality, shall conduct, out of funds available for the administration of this Act, such study or studies as may be necessary to determine (1) the best means of funding projects under this Act, and (2) ways and means of coordinating the program authorized by this Act with existing programs of the Fish and Wildlife Service involving fish and wildlife. On or before the expiration of the twenty-four month period following the date of the enactment of this Act, the Director shall report to the Congress the result of such study or studies, together with his recommendations with respect thereto.

By Mr. STONE:

S. 1141. A bill to amend title 38 of the United States Code to assist veterans with a permanent and total service-connected disability due to the loss or loss of use of one upper and one lower extremity to acquire specially adapted housing; to the Committee on Veterans' Affairs.

Mr. STONE. Mr. President, I am today introducing a bill to extend the Veterans' Administration specially adapted housing grant to veterans who have a service-connected wound, disease, or injury resulting in the loss or the loss of use of one upper and one lower extremity.

Under present law (38 U.S.C. 801) a maximum of $25,000 is authorized to assist severely disabled veterans in adapting or acquiring homes with special facilities made necessary by the nature of their disabilities. Veterans are eligible for this assistance if they have a compensable permanent and total service-connected disability that has resulted in:

First, the loss or loss of use of both lower extremities such as to preclude locomotion without the aid of braces, crutches, canes, or a wheelchair; or

Second, blindness in both eyes, having only light perception, plus loss or loss of use of one lower extremity; or

Third, the loss or loss of use of one lower extremity together with the residuals of organic disease or injury which so affect the functions of balance or propulsion as to preclude locomotion without resort to a wheelchair.

At the recent National Convention of the Disabled American Veterans a resolution was adopted calling for enactment of the legislation I am introducing today.

I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION No. 176

Special adapted housing for veterans with service-connected loss or loss of use of one upper and one lower extremity

Whereas, Title 38, U.S. Code, Section 801, provides $25,000 to certain eligible service-connected disabled veterans to provide specially adapted housing; and

Whereas, disabled veterans suffering from the loss or loss of use of one upper and one lower extremity are now excluded from this benefit; and

Whereas, in many instances the loss or loss of use of one upper and one lower extremity precludes locomotion without the aid of braces, crutches, canes, or a wheelchair; NOW

Therefore, be it resolved by the Disabled American Veterans in National Convention assembled in Miami Beach, Florida August 1–5, 1976, that Title 38, U.S. Code, Section 801, be amended to include those veterans who have a service-connected disease or injury resulting in the loss or loss of use of one upper and one lower extremity.

Mr. STONE. Mr. President, similar legislation has been introduced in the House.

Adding this new category of eligible veterans is in keeping with modifications in eligiblity that have been made over the years and the intent of Congress when it created the specially adapted housing grant—allowing a severely disabled, service-connected veteran to live comfortably and move about freely within the confines of his own home.

This modification can be made at a low cost. The Veterans' Administration statistics show there are 2,441 veterans who would become eligible should this modification be made. The initial cost—not considering the provisions of law governing medical feasibility and those veterans who would adapt their existing homes—would at most be $61 million. Quite likely it would be much less than this figure and subsequent yearly costs would add very little to the present ongoing program.

By Mr. SARBANES:

S. 1142. A bill for the relief of Kam Lin Cheung; to the Committee on the Judiciary.

KAM LIN CHEUNG

Mr. SARBANES. Mr. President, I am today introducing a bill for the relief of Kam Lin Cheung, a citizen of China, who presently resides in Maryland. Mrs. Cheung is 78 years old and is residing with her godson and his family in Baltimore, Md. Without this legislation she would be forced to return to Hong Kong, where she has no relatives, since she has been unable to pass the literacy requirement for permanent residence status. Since her godson is not a blood relative, she cannot utilize the provision of the law which would allow her to stay in this country as a member of the immediate family and this private legislation is, therefore, necessary to allow her to receive such status.

Legislation granting Mrs. Cheung permanent residence status passed both the House and Senate in different forms during the 94th Congress, but the differences between these two versions were not resolved before the end of the session. Mr. President, this is a most meritorious case and I am hopeful that the Congress will enact this legislation so that Mrs. Cheung will be allowed to remain in the United States with the only family she knows.

By Mr. DOMENICI (for himself, Mr. RANDOLPH, Mr. GRAVEL, and Mr. STAFFORD):

S. 1143. A bill to assure more adequate supplies of water to the Nation; to the Committee on Environment and Public Works.

WATER SUPPLY ACT OF 1977

Mr. DOMENICI. Mr. President, drought is afflicting many portions of this great land. While some areas have received rain in recent days, while the Congress has moved to alleviate the danger this summer, and while President Carter has announced a proposed drought relief package, the Nation must act more aggressively to head off the threats of future drought.

Mr. President, I am today introducing legislation that will ameliorate our national water supply outlook, and improve the scope of Federal policy. When implemented, it should assure that many sections of the Nation will have a more certain supply of water in coming years.

Mr. President, I am pleased that three of my colleagues have joined me in sponsoring this bill: The distinguished chairman of the Committee on Environment and Public Works, Mr. RANDOLPH, the chairman of the Water Resources Subcommittee, Mr. GRAVEL, and the ranking Republican member of the full Environment and Public Works Committee, Mr. STAFFORD.

As this Nation lacks an energy policy, we also lack a water policy. That deficiency could eventually threaten the survival of communities, regions, and economic sectors of the Nation. We must establish a more focused national water policy, with more effective planning.

The Water Resources Council was established 12 years ago "to maintain a continuing study of the relation of regional or river basin plans and programs to the requirements of larger regions of the Nation and of the adequacy of administrative and statutory means for the coordination of water and related land resources policies and programs," and to issue "principles, standards, and procedures for Federal participants in the preparation of comprehensive regional or river basin plans and for the formulation and evaluation of Federal water and related land resources projects."

While the WRC has fulfilled its mission to issue coordinated "principles and standards," I am not convinced that it has made any meaningful "continuing study" of plans or policy. In a new study dated March 23, 1977, the General Accounting Office has concluded that "problems have come to GAO's attention which raise doubts about the reliability and usefulness" of the WRC's current national water assessment.

I cannot offer the Senate any comprehensive solution to such problems. I do not know whether the lack of any coherent approach and policy results from the inherent regional conflicts of the Nation, or whether it is the result of an unfocused Federal program spread throughout many agencies. But we must find solutions.

This bill authorizes the U.S. Army Corps of Engineers to undertake regional water supply projects. This is new authority for the corps, although the corps has been on the fringes of this problem for years. This bill will enable the corps to bring its recognized expertise to improve the national availability of water. This legislation has several precedents in existing practice, but precedents that have failed so far to achieve adequate solutions.

Since 1958 (Public Law 85–800), the Corps of Engineers has had the authority to design multipurpose projects that include water supply. But the basic purpose of the project must be something else, such as flood control, not water sup-

ply. This piggyback approach is inadequate.

In 1965, Congress enacted Public Law 89-298 that authorized the Northeastern United States water supply effort. That authority permits development of single-purpose water supply projects by the corps in the Northeast portion of the Nation. These proposals will soon be sent to the Congress for review.

And since 1939, the Bureau of Reclamation has had the authority to develop projects specifically designed to provide municipal and industrial water supply. But this authority has been used sparingly; Bureau projects, justified by municipal water supply, are rare.

The bill I am introducing today would broaden the authority now given to the Bureau and to the Northeastern region of this Nation. It would establish a national approach, but on a basis that will discourage anything resembling an uneconomic boondoggle. The beneficiaries of each project will eventually repay the full cost of the project, as required in other water supply projects.

This bill is one of several that I have introduced that seeks to address various aspects of national water issues. Earlier in this session, I introduced S. 846, a bill to broaden the responsibility of the Office of Water Research and Technology, and to strengthen the Government's very important saline water program. I also introduced S. 772, legislation to modernize some of the aspects of the general Corps of Engineers program. I mention these bills because the Subcommittee on Water Resources, on which I am honored to serve as the ranking member, has scheduled several days of hearings, beginning March 31, into water policy issues.

It is my hope that these three bills will stimulate new approaches during those hearings, new approaches on how to develop a national water policy. I hope that these bills will serve as part of the base of issues that our subcommittee can use as it develops new legislative initiatives later this year. We should receive information about the subcommittee's new and broader responsibilities that could enable us to move, as a nation, toward more effective and efficient use of water for all purposes.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1143

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Water Supply Act of 1977".

SEC. 2. Because many regions of the nation confront water shortages that can be expected to continue or to increase, and because such shortages are, in part aggravated by a lack of any coordinated, national policy for the efficient and productive use and reuse of water, the Congress declares that there is a national interest in the development of new water supplies, on an economical basis, for domestic, municipal, industrial, and other public purposes.

SEC. 3. (a) In carrying out a policy to encourage a more efficient use and supply of water as a way to benefit municipal, industrial, and agriculture development, individuals, wetland preservation, fish and wildlife protection, and other national purposes, the Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to survey, plan, construct, and operate projects for the storage of water needed to meet present and anticipated demand, and for its transportation to regions of the nation with present or anticipated water shortages, *Provided* that each such project must be specifically authorized by law enacted subsequent to this Act.

(b) The costs allocated to water supply in any project constructed as a result of the authority of subsection (a) of this section shall be repayable, with interest, by the water users over a period of not more than fifty years from the date that water is first delivered, pursuant to contracts with municipalities or other public organizations. Such contracts shall be precedent to the commencement of construction of any unit or stage of the project. The contracting organization shall be responsible for the disposal and sale of water surplus to its requirements, but revenues therefrom shall be used only for payment of operation and maintenance costs, interest, and retirement of the obligation assumed in the contract.

(c) The interest rate used for computing interest during construction and interest on the unpaid balance of the costs of the project allocated to municipal water supply shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction is commenced, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for fifteen years from date of issue.

By Mr. PROXMIRE:

S. 1144. A bill to extend mortgage insurance and related authorities under the National Housing Act, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

EXTEND MORTGAGE INSURANCE

Mr. PROXMIRE. Mr. President, I am introducing, at the request of the Administration, a bill to extend: First, the insuring authority of the Federal Housing Administration, Second, the Federal Flood Insurance program; Third, the authority of the Secretary of HUD to set maximum interest rates on FHA and Veterans Administration mortgages; Fourth, the Government National Mortgage Association "Brooke-Cranston" tandem plan.

The bill would extend the basic authority of FHA to insure mortgage loans through September 30, 1978. The provision of this insurance of mortgages made by private lenders is the central function of FHA. By insuring that the loan will be repaid to the lender, FHA enables lenders to make loans on more favorable terms than they otherwise might, or, in some cases, to extend loans which they might otherwise not offer at all. FHA provides this mortgage insurance on mortgages under a number of programs established by the National Housing Act. Some of these programs are unsubsidized, and some provide subsidies to accomplish special housing goals. At present, most of these authorities are scheduled to expire on June 30, 1977, while a few will expire on September 30, 1977.

The bill would also extend the National Flood Insurance program for 15 months. The administration is requesting this extension in order to permit the Secretary of Housing and Urban Development to continue to make flood insurance available to property owners in flood-prone areas under both the emergency and the regular programs, while a broad review of Federal insurance activities is being conducted.

Under existing law, the authorities for the emergency and regular programs expire June 30, 1977. The bill would establish September 30, 1978, as the new expiration date.

The emergency flood insurance program authorizes the Federal Insurance Administration of HUD to provide subsidized insurance in communities which elect to participate in the program and for which detailed flood hazard elevation studies are not completed and actuarial rates are not available.

Extension of the emergency program is essential to assure the availability of insurance in these communities until they can convert to the regular program. The National Flood Insurance Act of 1968 requires that all detailed maps required for establishing actuarial rates be completed by August 1, 1983. Because there is no possibility that the mapping will be completed by September 30, 1977, extension of the emergency program is essential.

Under the regular program, the Secretary of HUD is authorized to write flood insurance contracts for property owners at a reasonable cost. Because such insurance is not readily available in all areas from the private sector, and because the availability of Federal coverage is an important incentive for localities to adopt and enforce flood plain management measures, continuation of the program beyond the present authorized period is necessary.

Some 15,000 communities in the Nation are dependent upon the flood insurance program for protection against loss. This bill would continue that protection.

The bill also contains a provision extending the Secretary of HUD's authority to establish maximum interest rates which may be charged on FHA-insured and VA-guaranteed mortgages. At present, the interest rate for these loans is statutorily limited to 6 percent, except that the Secretary of HUD has the power to set a maximum above that rate in order to approximate market rates. This authority is scheduled to expire on June 29, 1977.

S. 1144 further contains a provision extending the GNMA emergency tandem plan, known as the "Brooke-Cranston" program, through September 30, 1978. This program was established by the Emergency Home Purchase Assistance Act of 1974, to make below-market rate loans available through HUD when, in the opinion of the Secretary, emergency conditions exist in the mortgage market and the economy. The loans are originated by private lenders at below-market rates—currently 7½ percent—and are then sold to GNMA, an agency within HUD, with the lender recouping a market return. GNMA in turn can hold the loans or can resell them as whole mortgages or as mortgage-backed securities.

HUD currently has funds available to purchase loans under this standby program, and is requesting that its authority to do so be extended through fiscal year 1978.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1144

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Section 2(a) of the National Housing Act is amended by striking out "June 30, 1977" in the first sentence and inserting in lieu thereof "October 1, 1978".

(b) Section 217 of such Act is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1978".

(c) Section 221(f) of such Act is amended by striking out "June 30, 1977" in the fifth sentence and inserting in lieu thereof "September 30, 1978 (June 30, 1977, in the case of a mortgage insured under the provisions of subsection (d)(2))".

(d) Section 235(m) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

(e) Section 236(n) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

(f) Section 244(d) of such Act is amended—

(1) by striking out "June 30, 1977" in the first sentence and inserting in lieu thereof "September 30, 1978"; and

(2) by striking out "October 1, 1977" in the second sentence and inserting in lieu thereof "October 1, 1978".

(g) Section 245 of such Act is amended by striking out "September 30, 1977" where it appears and inserting in lieu thereof "September 30, 1978".

(h) Section 809(f) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(i) Section 810(k) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(j) Section 1002(a) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(k) Section 1101(a) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

SEC. 2. The National Flood Insurance Act of 1968 is amended—

(1) in section 1319, by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1978"; and

(2) in section 1336(a), by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

SEC. 3. Section 3(a) of the Act entitled "An Act to amend chapter 37 of title 38 of the United States Code with respect to the veterans' home loan program, to amend the National Housing Act with respect to interest rates on insured mortgages, and for other purposes", approved May 7, 1968, as amended (12 U.S.C. 1709–1), is amended by striking out "June 30, 1977" and inserting in lieu thereof "October 1, 1978".

SEC. 4. Section 3(b) of the Emergency Home Purchase Assistance Act of 1974 is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

By Mr. PROXMIRE:

S. 1145. A bill to amend the U.S. Housing Act of 1937 to provide authorizations for and amend laws relating to housing, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

HOUSING AUTHORIZATION ACT, FISCAL YEAR 1978

Mr. PROXMIRE. Mr. President, I am introducing, at the request of the administration, a bill to provide authorizations for various housing programs during fiscal year 1978.

The proposed legislation would provide funding for: First, the conventional and leased—section 8—housing assistance programs carried out under the U.S. Housing Act of 1937, and for operating payments under that act; second, the urban homestead program begun in 1974; third, the mapping program authorized by the Flood Insurance Act of 1968; and fourth, for the research program conducted by HUD under the Housing and Urban Development Act of 1970.

The new authorizations are needed to enable HUD to carry out its commitments:

To assist 400,000 units of housing for lower income Americans during fiscal year 1978; to expand by some 3,000 units the successful urban homestead demonstration; to conduct necessary surveys of flood-prone areas in order to meet the 1983 completion date set by law; and to carry out a meaningful program of research in order to improve our future housing and community development programs.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1145

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Housing Authorization Act, Fiscal Year 1978".

AMENDMENTS TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 2. (a) The first sentence of section 5 (c) of the United States Housing Act of 1937 is amended—

(1) by striking out "and" immediately following "July 1, 1975," the first time it appears; and

(2) by inserting immediately after "on October 1, 1976," the following: "and by $1,232,120,000 on October 1, 1977,".

(b) Section 8(c)(4) of such Act is amended by striking out the following: "(i) if the unoccupied unit is in a project insured under the National Housing Act, except pursuant to section 244 of such Act, or (ii)".

(c) Section 9(c) of such Act is amended—

(1) by striking out "and" immediately following "on or after July 1, 1976,"; and

(2) by inserting immediately before the period at the end thereof a comma and the following: "and not to exceed $665,000,000 on October 1, 1977".

URBAN HOMESTEADING DEMONSTRATION

SEC. 3. Section 810(g) of the Housing and Community Development Act of 1974 is amended by striking out "and not to exceed $5,000,000 for the fiscal year 1978" and inserting in lieu thereof "and not to exceed $15,000,000 for the fiscal year 1978".

FLOOD INSURANCE STUDIES

SEC. 4. Section 1376(c) of the National Flood Insurance Act of 1968 is amended by inserting immediately before the period at the end thereof a comma and the following: "not to exceed $108,000,000 for the fiscal year 1978, and such sums as may be necessary for each fiscal year thereafter".

RESEARCH AUTHORIZATION

SEC. 5. The second sentence of section 501 of the Housing and Urban Development Act of 1970 is amended by inserting immediately before the period at the end thereof a comma and the following: "not to exceed $60,000,000 for the fiscal year 1978, and such sums as may be necessary for each fiscal year thereafter".

By Mr. PROXMIRE:

S. 1146. A bill to amend the National Housing Act to increase maximum mortgage amounts, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. PROXMIRE. Mr. President, I am introducing, at the request of the administration, a bill: First, to increase maximum mortgage amounts that may be insured under the mortgage insurance program established by the National Housing Act; second, to reduce downpayment requirements for home purchases under FHA programs; and third, to place the Housing for the Elderly program authorized under section 202 of the Housing Act of 1959 on budget.

In introducing this bill at the request of the administration, I wish to indicate that I have, at this time, some serious reservations concerning the proposed increase in the FHA maximum mortgage amounts and the section 202 budget provision. The Committee on Banking, Housing, and Urban Affairs will, in several weeks, conduct hearings concerning these and other proposals now pending before the committee. I believe that these hearings will enable the committee to decide the merits of the administration's legislative package.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1146

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

INCREASE IN MAXIMUM MORTGAGE AMOUNTS UNDER REGULAR FHA ONE- TO FOUR-FAMILY MORTGAGE INSURANCE PROGRAMS

SECTION 1. (a) Section 203(b)(2) of the National Housing Act is amended by striking out "$45,000", "$48,750", and "$56,000" wherever they appear and inserting in lieu thereof "$60,000", "$65,000", and "$75,000", respectively.

(b) Section 222 (b) (2) of such Act is amended by striking out "$45,000" and inserting in lieu thereof "$60,000".

(c) Clause (A) of the third sentence of section 234 (c) of such Act is amended by striking out "$45,000" and inserting in lieu thereof "$60,000".

(d) Section 235 of such Act is amended—

(1) by striking out, in the last proviso in subsection (b) (2), "$25,000", "$29,000", "$29,000", and "$33,000" and inserting in lieu thereof "$34,000", "$40,000", "$40,000", and "$46,000", respectively;

(2) by striking out, in subsection (i) (3) (B), "$25,000", "$29,000", "$29,000", and "$33,000" and inserting in lieu thereof "$34,000", "$40,000", "$40,000" and "$46,000", respectively;

(3) by striking out "and" at the end of subparagraph (B) of subsection (i) (3); and

(4) by redesignating subparagraph (C) of subsection (i) (3) as subparagraph (D) and inserting immediately following subparagraph (B) a new subparagraph (C) reading as follows:

"(C) involve, in the case of a dwelling unit other than a condominium or cooperative unit, a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Secretary shall approve) in an amount not to exceed $34,000 ($40,000 in any geographical area where the Secretary authorizes an increase on the basis of a finding that cost levels so require), except that with respect to any family with five or more persons the foregoing limits shall be $40,000 and $46,000, respectively; and".

DECREASE IN DOWNPAYMENT REQUIREMENTS

SEC. 2. (a) Section 203 (b) (2) of the National Housing Act is amended—

(1) by striking out, in clause (i) of the first sentence, all the parenthetical language which begins "(but, in any case";

(2) by striking out clauses (ii) and (iii) in the first and second sentences and inserting in lieu thereof in each sentence "and (ii) 95 per centum of such value in excess of $25,000."; and

(3) by inserting immediately after the second sentence the following: "Notwithstanding any other provision of this section, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, the principal obligation of the mortgage shall not exceed 90 per centum of the entire appraised value of the property as of the date the mortgage is accepted for insurance, unless construction of the dwelling was completed more than one year prior to the application for mortgage insurance, or the dwelling was approved for guaranty, insurance, or direct loan under chapter 37 of title 38, United States Code, prior to the beginning of construction."

(b) Section 222 (b) (3) of such Act is amended by striking out clauses (ii) and (iii) and inserting in lieu thereof "and (ii) 95 per centum of such value in excess of $25,000;".

(c) The third sentence of section 234 (c) of such Act is amended by striking out clauses (A) (ii) and (A) (iii) and inserting in lieu thereof "and (ii) 95 per centum of such value in excess of $25,000,".

HOUSING FOR THE ELDERLY

SEC. 3. Effective for fiscal years beginning on or after October 1, 1977, section 202 (a) (4) (B) of the Housing Act of 1959 is amended by striking out "(i)" after "(B)" and by striking out subparagraph (ii).

By Mr. SCHWEIKER (for himself and Mr. HEINZ):

S. 1147. A bill to relieve the liability for the repayment of certain erroneously made contributions by the United States; to the Committee on the Judiciary.

Mr. SCHWEIKER. Mr. President, today I am introducing a bill for the relief of six Pennsylvania libraries which have been placed in an awkward position by the Federal Government. The Federal Disaster Assistance Administration is demanding from them repayment of $561,066.09 which they received as disaster payments after Hurricane Agnes.

Under most circumstances, I would commend the tenacity of our Federal auditors. Considering the size of this year's Federal budget—over $400 billion—any sums we might recover for our depleted Treasury would seem prudent. However, the circumstances of these six libraries deserves a closer look. I have included at the end of my statement a summary prepared by FDAA detailing their claims.

Pennsylvania, more than any other State, suffered extensive damage from tropical storm Agnes in June 1972. Damage nationwide was so great that Congress wisely adopted, for all States hit by Agnes, a special relief package to help individuals and businesses repair or replace their losses. In addition, section 252(a) of Public Law 91-606, which was law at the time of the Agnes disaster, provided Federal assistance to State and local governments to restore public facilities belonging to such State or local governments which were damaged or destroyed by a major disaster.

Subsequent to the President declaring Pennsylvania a major disaster area, making State and local government facilities eligible for Public Law 91-606 assistance, the Federal Disaster Assistance Administration approved project applications for Federal assistance from a large number of local governments in Pennsylvania. Included among them were applications for damages to these six privately owned library facilities covered by this bill.

Mr. President, I see no evidence of attempted fraud on the part of these libraries. They suffered damages at the hands of tropical storm Agnes, were informed they were eligible for disaster relief, and their applications for relief were approved by the Government. For example, it was pointed out in 1972 to State and Federal officials that although the Shippensburg Public Library received funds from the Borough of Shippensburg and the school district, it was privately owned. But disaster relief aid was still granted.

I cannot dispute the Federal Disaster Assistance Administration when it now claims these six Pennsylvania libraries in fact should not have received funds under Public Law 91-606. The law is clear. Privately owned facilities are not eligible to receive grants. But I am not here today demand to know who is at fault for this payment error or requesting a significant change in Federal law. I am asking Congress to recognize the tenuous financial position in which these libraries will be placed if they are forced to repay FDAA and am encouraging it to adopt this special relief measure.

I have been informed by FDAA that this is a unique situation. These are the only privately owned libraries nationwide which erroneously received disaster relief payments under section 252(a) of Public Law 91-606.

The roots of the community library system go back to our prerevolutionary period when most libraries were privately owned and looked to community generosity for support. Since then, community libraries, both privately and publicly supported, have made valuable contributions in the United States. They frequently double as community centers and make a variety of educational programs available to the general public which frequently cannot be obtained by the average person because of cost or rarity. I would be greatly distressed if we are to turn our backs on these six libraries and force them to raise over one-half million dollars for Uncle Sam to pay for damages received from the worst disaster in Pennsylvania's history.

Mr. President, I strongly recommend this bill to my colleagues and respectfully urge its early passage.

I ask unanimous consent that the summary of the bill be printed in the RECORD.

There being no objection, the summary of the bill was ordered to be printed in the RECORD, as follows:

FISCAL SUMMARY—INELIGIBLE LIBRARIES AFFECTED BY TROPICAL STORM AGNES

Project application and library	Cost of restoration	Refund due Federal Government
OEP 340-DR—		
60-1, Himmelreich	$4,136.68	$4,136.68
49-1, Milton	21,869.89	21,869.89
21-7, Shippensburg	12,827.45	12,827.45
21-9, West Shore	26,772.12	26,772.12
40-57, Osterhout, city of Wilkes-Barre	[1] 565,423.42	[1] 446,474.00
40-20, West Pittston	[2] 48,985.95	[2] 9,984.40
Total	680,015.51	561,066.09

[1] $565,423.42 is the approved audited claim for the Osterhout Library. Final payment has not been made, so that only the advance of $446,474 is due the Federal Government.

[2] A claim of $48,985.95 for the West Pittston Library has been received but not audited. The remainder of the West Pittston Borough project application claim has been audited and approved for $23,362.60. The refund due the Federal Government of $9,984.40 reflects the difference between an advance of $33,347 for the library and the final amount of the West Pittston Borough claim.

Note: Funds have been used for general flood restoration work, including debris clearance, structural repair, and the replacement of contents of the libraries.

By Mr. BROOKE:

S. 1148. A bill to authorize the Secretary of the Interior to erect a memorial in honor of the 56 signers of the Declaration of Independence in Constitution Gardens in the District of Columbia; to the Committee on Rules and Administration.

Mr. BROOKE. Mr. President, I am introducing today legislation authorizing the Secretary of the Interior to erect a memorial in honor of the 56 signers of the Declaration of Independence.

The American Revolution Bicentennial Board has passed a resolution that it would be fitting to pay tribute to the signers of the Declaration of Independence by erecting a memorial on an appropriate site in the District of Columbia. One likely site is the area known as Constitution Gardens, which comes under the jurisdiction of the National Park Service.

No appropriations will be required for design and erection of the memorial, which will be funded solely from nonappropriated funds of the American Revolution Bicentenntial Administration, which funds the Board has approved for this purpose, and which the Administration is prepared to transfer to the Secretary of the Interior. Thus this memorial to the signers of the Declaration of Independence will also be a permanent legacy of the Nation's Bicentennial.

Finally, Mr. President, all of us serving on the Board have emphasized that such a memorial be both functional and suitable to the overall design and purpose of the site.

I ask unanimous consent that this bill be printed in its entirety in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1148

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") may erect a memorial in honor of the fifty-six men who signed the Declaration of Independence, such memorial to be erected on a suitable site selected by the Secretary, after consultation with the National Commission of Fine Arts and the National Capital Planning Commission, in the area known as Constitution Gardens, or other appropriate location, in the District of Columbia.

SEC. 2. The Administrator of the American Revolution Bicentennial Administration (hereinafter in this Act referred to as the "Administrator") shall prepare, in consultation with the American Revolution Bicentennial Board, the Secretary, the National Commission of Fine Arts, and the National Capital Planning Commission, the design and plans for the memorial authorized by the first section.

SEC. 3. (a) Not to exceed $500,000 of the funds, other than appropriated funds, which are available to the American Revolution Bicentennial Administration under the Act entitled "An Act to establish the American Revolution Bicentennial Administration, and for other purposes," approved December 11, 1973 (87 Stat. 697), and as approved by the American Revolution Bicentennial Board, may be used to carry out the provisions of the first two sections of this Act.

(b) Of the funds described in subsection (a) which are not used by the Administrator in carrying out the provisions of section 2, the Administrator shall transfer to the Secretary such sums as may be necessary to enable the Secretary to carry out the provisions of the first section of this Act.

SEC. 4. (a) The construction of the memorial authorized by the first section may not begin unless the Secretary determines that sums expended in carrying out the first two sections of this Act will not exceed $500,000. Such determination shall be made in consultation with the Administrator if the American Revolution Bicentennial Adminstration has not terminated pursuant to section 7 of the Act of December 11, 1973 (87 Stat. 701).

(b) The authority contained in the first section shall expire unless the construction of the memorial authorized by such section is begun within two years after the date of the enactment of this Act.

SEC. 5. (a) The maintenance and care of the memorial authorized under the first section shall be the responsibility of the Secretary.

(b) There are authorized to be appropriated for the fiscal year beginning on October 1, 1977, and each fiscal year thereafter such sums as may be necessary to carry out the provisions of subsection (a).

SEC. 6. No funds other than funds described in section 3 and funds authorized to be appropriated in section 5(b) may be used by the Administrator or the Secretary to carry out this Act.

SEC. 7. The Secretary shall carry out any functions of the Administrator under this Act after the termination of the American Revolution Bicentennial Administration pursuant to section 7 of the Act of December 11, 1973 (87 Stat. 701), provided that the Secretary shall consult with those persons who were members of the American Revolution Bicentennial Board on the date of its termination.

By Mr. BENTSEN (for himself, Mr. TOWER, Mr. LONG, and Mr. JOHNSTON):

S. 1149. A bill to recognize the joint development by the State of Texas and the State of Louisiana of a recurring and environmentally sound source of energy represented by the Toledo Bend Dam and Reservoir and exempt Sabine River Authority, State of Texas, and exempt Sabine River Authority, State of Louisiana, from charges for use, occupancy, and enjoyment of certain lands of the United States within the Sabine National Forest, Tex.; to the Committee on Energy and Natural Resources.

TOLEDO BEND DAM AND RESERVOIR

Mr. BENTSEN. Mr. President, I introduce for myself, and for Senator TOWER, Senator LONG, and Senator JOHNSTON, legislation that would free the Texas and Louisiana Sabine River Authorities from heavy fees that the Federal Power Commission is trying to levy on the Toledo Reservoir project.

Mr. President, one of the few bright spots in this country's energy picture is hydroelectric power. Although limited in its availability, it is a great resource for certain areas and a stable source of low cost electric power. In the case of the Toledo Bend project, its generation carries the additional benefit that the project was completely financed and constructed by non-Federal sources; the Federal taxpayer was not out any expense for the Toledo Bend project.

Yet beyond the local benefits of electrical and water supply, the United States has benefited substantially from the project in terms of siltation control, improved navigation on the Sabine River, fish and wildlife conservation and recreational benefits. While it is typical at this time to criticize water projects, here is a project that has been of great benefit, yet no cost to the Federal Government.

The project is operated by two nonprofit, State governmental agencies, the Texas and the Louisiana Sabine River Authorities. The electricity is being sold under long term contract and all concerns have benefited from a very stable and agreeable situation.

However, this situation has been interrupted by the Federal Power Commission in its effort to levy a charge against the project because some of the reservoir's water backs up over Government property. For the inception of the project, it was made known that the project could not financially compensate for this situation, yet the construction permit was issued by the FPC. Later, once the project was complete, and the electricity sold under contract, the FPC levied an annual charge of $84,000. When the authorities appealed, and asked that the FPC consider the benefits that the United States was gaining from the water quality and the expansion of the wetlands, as well as the electrical production, the FPC responded by raising the ante to an estimated $334,600 by 1979.

Mr. President, this is an awkward situation. We have an energy crisis in this country and our citizens are very concerned over the rising cost of energy. We have a locally funded energy project supplying low-cost electricity to people under long-term contracts. And we have the Federal Power Commission trying to tax a nonprofit river authority that can meet the obligation only by going through the lengthy and painful legal process of breaking its supply contracts, or turning the project over to the Government. The local citizens will ultimately have to pay the price in higher electrical rates which seems highly unfair to those of us introducing this bill. On the one hand, our Government is concerned over rising energy costs and on the other is taking action to raise the costs paid by the citizens in the area of the Toledo Bend project.

I hope my colleagues will understand this problem and join us in supporting this measure.

By Mr. HUMPHREY (for himself, Mr. HATHAWAY, Mr. ANDERSON, Mr. BAYH, Mr. MATHIAS, Mr. METCALF, Mr. ABOUREZK, Mr. SPARKMAN, Mr. MCGOVERN, Mr. BROOKE, Mr. CRANSTON, Mr. HEINZ, Mr. KENNEDY, Mr. WILLIAMS, Mr. LEAHY, and Mr. SARBANES):

S. 1150. A bill to amend title V of the Housing Act of 1949 to increase and extend authorities thereunder, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

RURAL HOUSING ACT OF 1977

Mr. HUMPHREY. Mr. President, I am delighted to introduce legislation today to begin the task of bringing adequate housing to rural America. Joining me in sponsoring this legislation, are Senators HATHAWAY, ANDERSON, BAYH, MATHIAS, METCALF, ABOUREZK, SPARKMAN, MCGOVERN, BROOKE, CRANSTON, HEINZ, KENNEDY, WILLIAMS, LEAHY, and SARBANES.

Much has been written in the recent period about the housing crisis in our Nation's large cities. That crisis exists and is very real. At the same time, there is an even bigger crisis and the despair it causes is no less intense than that caused by its urban counterpart.

This crisis is in the rural areas and small towns of our Nation. These rural housing problems are off the beaten track, away from the roving eye of the Nation's media. But they are there, and despite the fact that rural America has only 30 percent of the Nation's population it suffers almost 50 percent of its poverty and nearly 60 percent of the substandard housing.

These rural people who must often exist under subhuman conditions are in every State of the Union. In the best of States, there is seldom less than 6 percent of the housing which is substandard. And this figure goes as high as 25 and 30 percent in some States. This is clearly unacceptable.

The people most afflicted by this shame are the poor, the elderly, minorities, farmworkers—those often forgotten. How we as a nation serve the housing needs of these people is a measure of our society. I'm afraid we have not nearly measured up to the problem.

Assuring all Americans the opportunity for decent housing has been a national goal for over 25 years. While there have been advances in the efforts to improve housing conditions in our country, there is obviously much that remains to be done. Nowhere is this more true than in rural areas of our country.

Recent rising costs of energy, taxes, construction, and inflation generally have played havoc with the lives of all people, but especially the poor in rural

areas. The real test of how we meet our national housing goals is how well we serve the housing needs of low- and moderate-income people. After all, it is no real problem to provide decent housing for wealthy people.

The reasons for the higher level of rural housing deprivation are no secret. They include deeper poverty, population dispersal, lack of credit resources, and limited institutional development. In other words, the areas with the greatest housing needs are least able to effectively deal with the problem.

To meet these special needs of rural people, we have developed a unique agency, the Farmers Home Administration. The FmHA, which serves rural America directly from 1,750 county offices, has the authority to make direct loans to farm and nonfarm families alike. Over the years, the FmHA has offered the best system to serve the special needs of rural America.

However, in the past several years, it has become obvious to me and many of my colleagues that even this fine agency with its dedicated staff has serious problems in adequately performing its legislative mandate to serve low- and moderate-income families. The cost factors cited above are among the reasons for this difficulty but in addition the FmHA also lacks the legislative authority to do the job in many cases. In addition, we have seen examples of a failure to use the authority which is available.

This bill which is being introduced today will correct a number of deficiencies and limitations in the present law and its administration and will make it possible once again for the FmHA to meet its legislative mandate to serve the housing needs of low and moderate income people in rural areas. We also will need to take other steps to strengthen the operations of the FmHA, most particularly increasing its staff.

Mr. President, the future of rural America is of vital importance to all of us. Without a healthy and vibrant alternative to our Nation's large cities we will continue to push the problems of one area of the country on the others, solving neither. We can, and we must, make the national goal of decent homes in a suitable environment a reality for all of our citizens. This bill goes a long way to meet that promise for all rural people.

There are several sections of the bill which are technical in nature and there are provisions to extend expiring FmHA rural housing authorities. These should generate few problems. However, there are other provisions which are more innovative and undoubtedly will require further consideration.

I am pleased that Senator MORGAN has indicated a willingness to hold hearings on the rural housing program and this bill as well as other related legislation.

Mr. President, at this time I would like to highlight what we feel to be the major provisions of this important bill.

Strengthening the ability of the FmHA to meet the housing and related needs of low and moderate income rural people in this changing time is the major goal of the Rural Housing Act of 1977

This would be done in several ways. First, a number of present authorities would be expanded. Program authorizations which expire this year would be extended for three years, at modestly higher levels. Water and sewer grants would be increased from a maximum of 50 percent of development costs to 75 percent, to bring the FmHA program more in line with EPA's predominately urban program.

FmHA would be directed to carry out an expanded research program through its own research department, which it currently does not have. It is incredible that this agency which made over $7 billion in loans and grants in 1976 has no research capacity of its own.

FmHA site loans would be extended to private builders—currently it is restricted to nonprofit and public agencies—as long as at least 50 percent of the sites developed would be provided for low income borrowers.

A second type of change which would be created by the Rural Housing Act of 1977 would be to clarify a number of existing provisions. The bill would make clear that handicapped individuals and families are to receive the same benefits afforded to elderly people and that FmHA funds can be used to build congregate housing for the elderly and handicapped. The requirement in the Agriculture Appropriations Acts that 60 percent of FmHA funds be used to serve low income families would be made part of the authorizing legislation.

A third type of amendment included in the Rural Housing Act of 1977 would require the Secretary to implement beneficial provisions which have been on the books for years, but have not been implemented. These include escrowing of taxes and insurance for FmHA borrowers, without forcing any individual borrower to use this service if he chooses not to and use of the moratorium on payments for a borrower threatened with foreclosure. It also includes mandatory implementation of the rural rent supplements which Congress has tried unsuccessfully to force FmHA to implement since its authorization in August 1974.

Finally, the Rural Housing Act of 1977 would create several significant initiatives for the FmHA. However, only the last of these would involve significant costs. The bill would provide FmHA with the authority to compensate FmHA borrowers whose houses have serious defects which the FmHA inspection should have, but did not disclose. HUD borrowers already are protected by a similar provision.

A second initiative would be to establish a formal appeals procedure for applicants for FmHA assistance who have been arbitrarily denied assistance. The great advantage to the FmHA county office system is that Federal employees are easily accessible to rural people. But that same dispersion of employees offers the potential for abuse and this appeals procedure is intended to afford protection to applicants. FmHA already has an appeals procedure for builders threatened with disbarment. Loan and grant applicants deserve the same consideration.

A third initiative would recognize the need for energy conservation, which is a national priority, by requiring FmHA borrowers to include energy saving devices and techniques in their housing. The bill would also urge flexibility in the use of plentiful energy sources as alternatives to the present high fuel costs.

While this bill is generally very modest, the Rural Housing Act of 1977 does include one far reaching provision. Over the past few years inflation in construction and land costs, rising taxes and skyrocketing fuel costs have made homeownership possibilities for most Americans increasingly unlikely.

The FmHA single family homeownership program has stood as a beacon of light in an otherwise darkened situation. However, even this fine program has faced increasing difficulties in meeting the homeownership needs of truly low-income people in rural areas. The past administration solved the problem of how to serve low-income people in the face of increased costs by simply increasing the income limits for those defined as low-income. This is an obvious evasion of responsibility.

This bill would provide a homeownership option for those unable to use the regular FmHA programs by making available the same type of subsidy mechanism currently being used under the HUD section 8 rental program. Certainly if we can assist private owners to develop equity in rental properties, we can do the same for low-income borrowers. However, at the same time, to make clear that this is a housing program and no more, a recapture provision has been included to prevent windfall profits in the sale of any such assisted housing.

This and other provisions of the bill deserve careful consideration by the Congress if we are to develop a better housing program for rural America.

Mr. President, I ask unanimous consent that the text of this bill as well as a summary of its main features be included at this point in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 1150

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rural Housing Act of 1977".

HOUSING FOR THE ELDERLY AND HANDICAPPED

SEC. 2. (a) Title V of the Housing Act of 1949 is amended by striking out "elderly persons" and "elderly persons or elderly families" wherever they appear and inserting in lieu thereof "elderly or handicapped families".

(b) Section 501 (b)(3) is amended to read as follows:

"(3) For the purposes of this title, the term 'elderly or handicapped families' means families which consist of two or more persons, the head of which (or his or her spouse) is at least sixty-two years of age or is handicapped. Such term also means a single person who is at least sixty-two years of age or handicapped. A person shall be considered handicapped if such person is determined, pursuant to regulations issued by the Secretary, to have an impairment which (A) is expected to be of long-continued and indefinite duration, (B) substantially impedes his ability to live independently, and (C) is of such a nature that such ability could be improved by more suitable housing conditions, or if such person is a developmentally

disabled individual as defined in section 102 (a)(5) of the Developmental Disabilities Services and Facilities Construction Amendments of 1970. The Secretary shall prescribe such regulations as may be necessary to prevent abuses in determining, under the definitions contained in this paragraph, the eligibility of families and persons for admission to and occupancy of housing constructed with assistance under this title. Notwithstanding the preceding provisions of this paragraph, the term 'elderly or handicapped families' include two or more elderly (sixty-two years of age or over) or handicapped persons living together, one or more such persons living with another person who is determined (under regulations prescribed by the Secretary) to be essential to the care or well-being of such persons, and the surviving member or members of any family described in the first sentence of this paragraph who were living, in a unit assisted under this title, with the deceased member of the family at the time of his or her death.".

ESCROW ACCOUNTS FOR PAYMENTS OF TAXES, INSURANCE AND OTHER EXPENSES

SEC. 3. The first sentence of section 501(e) of the Housing Act of 1949 is amended by striking out "may" the first place such word appears and inserting in lieu thereof "shall".

RURAL HOUSING RESEARCH

SEC. 4. (a) Section 506 (b), (c), and (d) of the Housing Act of 1949 is amended to read as follows:

"(b) The Secretary is further authorized and directed to conduct research, technical studies, and demonstrations relating to the mission and programs of the Farmers Home Administration and the national housing goals defined in section 2 of this Act. In connection with such activities, the Secretary shall seek to promote the construction of adequate farm and other rural housing, with particular attention to the housing needs of the elderly, handicapped, migrant and seasonal farmworkers, Indians, and other identifiable groups with special needs, for the purpose of stimulating construction, improving the architectural design and utility of such dwellings and buildings, and utilizing new and native materials, economies in materials and construction methods, and new methods of production, energy conservation, distribution, assembly, and construction, with a view to reducing the cost of such dwellings and buildings and adapting and developing fixtures and appurtenances for more efficient and economical farm and other rural housing use.

"(c) The Secretary is further authorized to carry out a program of research, study, and analysis of rural housing in the United States for the purpose of developing data and information on—

"(1) the adequacy of existing rural housing;

"(2) the nature and extent of current and prospective needs for rural housing, including needs for financing, subsidies, improved design, utility, comfort, and the best methods of meeting such needs;

"(3) the adequacy of the rural housing stock to meet the special needs of the elderly, the handicapped, farmworkers and Indians and the best methods of meeting such needs;

"(4) problems faced by rural people, including farmers, eligible under section 501 in purchasing, constructing, improving, altering, repairing, and replacing their housing;

"(5) rural growth patterns and the interrelation of rural housing problems and the problems of housing in urban and suburban areas;

"(6) the status of community facilities and services in rural areas, problems resulting from inadequate facilities and services and recommendations to alleviate any problems found; and

"(7) any other matters bearing upon the provision of adequate rural housing and related community facilities.

"(d) In order to carry out this section, the Secretary shall establish a research division within the Farmers Home Administration which shall have authority to undertake, or to contract with any public or private body to undertake, research authorized by this section.".

(b) Section 506 of such Act is further amended by adding at the end thereof a new subsection as follows:

"(f) The Secretary shall conduct a study of the location, numbers, quality, condition and cost to occupants, of migrant farm labor housing units, and report the results of such study to the Congress within one year after the date of enactment of the Rural Housing Act of 1977, together with recommendations for correcting any deficiencies discovered in location, numbers or condition of the housing available for migrant farm laborers, and the extent to which existing authority has been utilized and the need for any new authority.".

COMPENSATION FOR CONSTRUCTION DEFECTS; AND LIMITATIONS ON ADMINISTRATIVE AUTHORITY

SEC. 5. Section 509 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsections:

"(c) The Secretary is authorized, with respect to any dwelling or other structure built or purchased (but not previously occupied) with financial assistance authorized by this title which he finds to have structural or other conditions not in conformance with such standards as he has prescribed under subsection (a), to make expenditures for (1) correcting such defects, (2) paying the claims of the owner of the property arising from such defects, or (3) acquiring title to the property, if such assistance is requested by the owner of the property within three years after financial assistance under this title is rendered to the owner of the property or, in the case of property with respect to which assistance was made available more than three years prior to the date of enactment of the Rural Housing Act of 1977 within eighteen months after such date of enactment.

"(d) The Secretary is authorized, with respect to any previously occupied dwelling or other structure purchased with financial assistance authorized by this title which he finds to have structure or other conditions not in conformance with such standards as he has prescribed under subsection (a), to make expenditures for (1) correcting such defects, (2) paying the claims of the owner of the property arising from such defects, or (3) acquiring title to the property, if such assistance is requested by the owner of the property within eighteen months after financial assistance under this title is rendered or, in the case of property with respect to which assistance was made available more than eighteen months prior to the date of enactment of the Rural Housing Act of 1977, within eighteen months after the date of enactment of such Act.

"(e) The Secretary shall make any expenditures authorized by subsections (c) and (d) after finding that structural or other conditions are not in conformance with such standards as he prescribed under subsection (a). If the Secretary subsequently establishes that the defect is one that did not exist, or was not caused by a condition that existed, on the date that financial assistance under this title was rendered and is not such a defect that a proper inspection of the property, or the plans and specifications for construction, could reasonably be expected to disclose, the Secretary may convert the assistance provided into a loan in accordance with section 502. Alternatively, the owner may request that the Secretary make his determination concerning the defect prior to making expenditures for the purpose of repairing the defect. In the case of property which is subject to subsection (c) and which was acquired more than three years before the date of enactment of the Rural Housing Act of 1977 or property which is subject to subsection (d) and which was acquired more than two years before the date of enactment of such Act, the Secretary is authorized to withhold assistance if the applicant for assistance does not establish that the defect is one that existed, or was caused by a condition that existed on the date the financial assistance under this title was rendered and is such a defect that a proper inspection of the property or the plans and specifications for construction, could reasonably be expected to disclose. The Secretary may require from the seller of, or contractor for, any property receiving financial assistance under this title an agreement to reimburse the Secretary for any payments made with respect to any such property under either subsection (c) or (d). Expenditures pursuant to subsection (c) or (d) may be paid from the Rural Housing Insurance Fund created by section 517.

"(f) The Secretary shall issue rules and regulations for the orderly processing of applications for assistance under subsection (c) and (d) and rules and regulations providing for due process review of any determination made by the Secretary denying assistance under subsection (e). The Secretary shall also maintain records at a single location of all requests for assistance filed and the disposition of the requests.

"(g) Nothing in this section shall be construed as precluding judicial review of any decision of the Secretary denying assistance under this section or as precluding any owner from seeking remedies under any other provision of law.

"(h) Notwithstanding any other provision of law, the Secretary shall implement the provisions of this title so that agriculture and forest lands are preserved and protected to the maximum extent practicable and shall not preclude the implementation of the provisions of this title in any place exclusively on the basis of actual or projected population.".

FORECLOSURE PREVENTION

SEC. 6. Section 510 (d) of the Housing Act of 1949 is amended by adding at the end thereof the following: "In no event may foreclosure or transfer action be initiated against any borrower unless such borrower has been given prior notice and consideration of the provisions of section 505 on the availability of the moratorium on payments under such section.".

APPEALS PROCEDURE

SEC. 7. Section 510 of the Housing Act of 1949 is further amended by redesignating paragraphs (g), (h), and (i) as paragraphs (h), (i) and (j), respectively, and by inserting after subsection (f) a new paragraph (g) as follows:

"(g) issue rules and regulations protecting the rights of all persons and organizations applying for or receiving assistance under any of the sections of this title over which the Secretary has authority. Such rules and regulations shall provide that, whenever any person or organization has applied for assistance under this title and such assistance is denied for reasons other than the availability of funds, or whenever a decision has been made to terminate or reduce assistance under this title to any person or organization which is already receiving such assistance, such person or organization will be given:

"(1) adequate written notice of the reasons why assistance was denied, reduced, or terminated;

"(2) adequate written notice that such person or organization has a right to appeal the decision at a hearing held in accordance with the provisions of this section;

"(3) an opportunity to appeal any decision denying, reducing, or terminating such

assistance to an impartial official who has the authority to reverse such a decision after having conducted a hearing within a reasonable time after it has been requested by the person or organization affected by the adverse decision, at which hearing the appellant shall have the right to (A) present evidence through witnesses or otherwise, (B) inspect records and data in the possession of the Secretary which pertain to the appeal, (C) cross examine witnesses, (D) be represented by counsel, and (E) have the hearing officer make the decision on the record, in writing, stating the reasons for the decision;

"(4) an opportunity to have the decision of the hearing officer reviewed by the Secretary.

Such rules and regulations shall also provide that, whenever any person or organization has had assistance reduced or terminated and, as a result of an appeal or otherwise, it is subsequently determined that such assistance was erroneously or improperly withheld, such person or organization shall be entitled to receive all benefits and assistance that have been withheld as a result of the original decision to reduce or terminate such assistance.".

ASSISTANCE AUTHORIZATIONS

SEC. 8. (a) Clause (b) of section 513 of the Housing Act of 1949 is amended to read "(b) not to exceed $100,000,000 during the period beginning Otcober 1, 1977 and ending September 30, 1980;"

(b) Clause (c) of such section is amended to read "(c) not to exceed $100,000,000 during the period beginning October 1, 1977 and ending September 30, 1980;"

(c) Clause (d) of such section is amended by striking out the semicolon at the end of such clause and inserting in lieu thereof a comma and the following: "and not to exceed "$10,000,000 for each fiscal year beginning after September 30, 1977, and ending September 30, 1980;".

(d) Section 514(d) of such Act is amended by striking "$25,000,000" and inserting in lieu thereof "$50,000,000".

(e) Section 515(b)(5) and 571(a)(1) of such Act are each amended by striking "June 30, 1977" and inserting in lieu thereof "September 30, 1980".

(f) Section 523(f) of such Act is amended by inserting "and for each fiscal year beginning after September 30, 1977, and ending September 30, 1980, such sums, not in excess of $20,000,000 for any such fiscal year," immediately after "$10,000,000 for any such fiscal year," in the first sentence; and by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1980" in the second sentence.

(g) Section 523(g) of such Act is amended by striking out the period at the end of the first sentence and inserting in lieu thereof a comma and the following: "and not to exceed $5,000,000 for each fiscal year beginning after September 30, 1977, and ending September 30, 1980.".

(h) Section 525(c) is amended by inserting after the first sentence the following sentence: "There are also authorized to be appropriated for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980, not to exceed $10,000,000 for the purposes of subsection (a) and not to exceed $10,000,000 for the purposes of subsection (b).".

CONGREGATE HOUSING FOR ELDERLY AND HANDICAPPED FAMILIES

SEC. 9. (a) Section 515(c) of the Housing Act of 1949 is amended by adding at the end thereof a new sentence as follows: "However, specifically designed equipment required by elderly or handicapped families shall not be considered elaborate or extravagant.".

(b) Section 515(d)(1) of such Act is amended by adding at the end thereof the following: "and such term also means Congregate Housing facilities for elderly or handicapped families who require some supervision and central services, but are otherwise able to care for themselves. Such housing for the handicapped may be utilized in conjunction with educational and training facilities.".

(c) Section 515(d)(3) of such Act is amended to read as follows:

"(3) The term 'Congregate Housing' means housing in which (A) some of the units may not have kitchen facilities, (B) there is a central dining facility to provide wholesome and economic meals for elderly and handicapped families, and (C) provision is made for supervisory assistance personnel, including living quarters for a limited number of such personnel.".

FINANCIAL ASSISTANCE TO PROVIDE LOW-RENT HOUSING FOR DOMESTIC FARM LABOR

SEC. 10. Section 516(e) of the Housing Act of 1949 is amended by adding at the end thereof a new sentence as follows: "The Secretary shall not give priority for funding under this section to any one of the groups over the others listed in subsection (a).".

PROVIDING FOR A DIVISION OF INSURED RURAL HOUSING LOANS

SEC. 11. Section 517 of the Housing Act of 1949 is amended by adding at the end thereof a new subsection as follows:

"(n) At least 60 per centum of the loans made pursuant to section 502 and at least 60 per centum of the loans made pursuant to section 515 shall benefit persons of low income.".

THE USE OF AUTHORIZED RURAL HOUSING FUNDS

SEC. 12. Section 517 (c) of the Housing Act of 1949 is amended by adding at the end thereof a new sentence as follows: "The Secretary shall utilize such funds in a manner that will assure their maximum availability and use during peak construction periods.".

CHANGES IN THE GUARANTEED HOUSING LOAN PROGRAM

SEC. 13. (a) Section 517 of the Housing Act of 1949 is further amended by adding after subsection (n), as added by section 11 of this Act, a new subsection as follows:

"(o) Loans guaranteed under this section shall be made only in the case of persons with above-moderate incomes.".

(b) Section 517(e) of such Act is amended by inserting after the first sentence a new sentence as follows: "The guaranteed loan program under this title shall be operated separately from the insured loan program operated under this title and no funds designated for one program may be transferred to another program.".

(c) Section 310(C)(a)(2) of the Consolidated Rural Farm and Development Act is amended by inserting "(which the Secretary has determined to be without adequate credit resources)" after the word "areas".

(d) Clause (3) of section 310(C)(a) of such Act is amended by striking out all after the word "shall" and inserting in lieu thereof the following: "be processed only by the State offices of the Farmers Home Administration or such other regional offices as may be designated.".

HOMEOWNERSHIP SUBSIDY FOR LOW AND MODERATE INCOME PERSONS

SEC. 14. (a) Section 521(a)(1) of the Housing Act of 1949 is amended by inserting after the phrase "a rate determined annually," the phrase "or more often when warranted and requested by the Secretary."

(b) Section 521(a)(1) of the Housing Act of 1949 is amended by adding at the end thereof the following: "The Secretary shall make available to persons of low income who cannot otherwise afford to repay a loan under section 502 and this section the difference between an amount equal to the sum of the mortgage payments, including principal and interest, taxes, insurance, utilities, and maintenance and an amount equal to 15 percent of gross annual income. In any case in which assistance is made available under the preceding sentence, the Secretary shall place in escrow amounts paid for taxes and insurance and shall institute procedures to recapture payments made by him under such preceding sentence in the event of profitable sale of the property, but the amount of the payments recaptured shall not, as determined by the Secretary, prevent the borrower from having the resources needed to relocate.".

RURAL RENTAL ASSISTANCE

SEC. 15. (a) Section 521(a)(2)(A) of the Housing Act of 1949 is amended by striking out "may" wherever it appears, except in clause (i), and inserting in lieu thereof "shall".

(b) Section 521(a)(2)(A) of such Act is further amended by inserting after "rental" the second time such term appears in the first sentence a comma and "congregate, or cooperative".

(c) Section 521(a)(2)(A) of such Act is further amended by striking out "income" after "25 percent of" and inserting in lieu thereof "adjusted annual income (as heretofore defined by the Secretary for purposes of determining eligibility for housing financed under sections 502 and 515).".

(d) Section 521(a)(2)(A) is further amended by striking the number "20" where it appears twice and inserting in lieu thereof the number "30".

(e) Section 521(a)(2)(A)(i) is further amended by inserting "or by a loan under section 514" after "section 515 for elderly housing" and before "or by a loan under section 514 and grant under Section 516."

(f) Section 521(a)(2)(A)(ii) is redesignated as section 521(a)(2)(A)(iii) and a new section 521(a)(2)(A)(ii) is added to read as follows:

"(ii) when market conditions indicate that a substantial need exists for subsidized family housing that cannot be met without a greater percent of rental assistance, the Secretary shall make such payments without respect to the 30 percent limitation, and".

MUTUAL AND SELF-HELP HOUSING

SEC. 16. Section 523(b)(1)(A) of the Housing Act of 1949 is amended by inserting "or land" after "options".

SITE LOAN CHANGES

SEC. 17. (a) Section 524(a) of the Housing Act of 1949 is amended by striking out in the second sentence beginning with "prescribed" all down through "1 per centum," and inserting in lieu thereof "of 3 percent".

(b) Section 524(a) of such Act is further amended by adding at the end thereof the following: "The Secretary may guarantee loans made by banks and other public and private lending institutions to limited profit developers at the market rate. The authority for loans guaranteed under this section shall be separate from the authority for insured loans under this section. Making and servicing of such guaranteed loans may be conducted only by the State office of the Farmers Home Administration. At least 50 percent of the sites developed under the guarantee site loan program shall be used to serve needs of persons of low income.".

LOANS ON LAND WITH REMOTE TITLE CLAIMS

SEC. 18. (a) The Housing Act of 1949 is amended by adding at the end of title V a new section to read as follows:

"LOANS ON LAND SUBJECT TO REMOTE CLAIMS

"SEC. 528. The Secretary may make loans on land where the title is otherwise uninsurable by private insurance companies because of remote claims or encumbrances to enable otherwise eligible persons holding such land to benefit from assistance under this title. In the event of a court decision adverse to the title claim of any person holding any such loan after assistance has been made available to such person under this title, the Secretary may use the funds of

the Rural Housing Insurance Fund to pay the holder of such remote claim or encumbrance and any funds so expended shall be reimbursed by annual appropriations.".

(b) Section 517(j)(3) of such Act is amended by inserting "including payments under section 528," after "Fund,".

(c) Section 521(a)(1) of such Act is amended by striking out "and 515" and inserting in lieu thereof a comma and "515, and 528".

ASSISTANT SECRETARY FOR EQUAL OPPORTUNITY

SEC. 19. (a) In addition to the Assistant Secretaries of Agriculture now provided for by law, there shall be an additional Assistant Secretary of Agriculture for Equal Opportunity who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) Section 5315(11) of title 5, United States Code, is amended to read as follows:

"(11) Assistant Secretaries of Agriculture (6).".

WATER AND SEWER GRANTS

SEC. 20. (a) Section 306(a)(2) of the Consolidated Farm and Rural Development Act is amended to read as follows:

"(2) The Secretary is authorized to make grants aggregating not to exceed $500,000,000 in the fiscal year beginning October 1, 1976, $750,000,000 in the fiscal year beginning October 1, 1977, and $1,000,000,000 in any fiscal year thereafter to such associations to finance specific projects for works for the development, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. Grants made under the authority of this paragraph may range from 25 to 75 percent of the development cost of the project depending on the need of the community as defined by the Secretary. The Secretary, as a goal, shall direct at least one-third of the funds under this authority to communities on a 75 percent grant basis with at least an additional third provided on a 50 percent grant basis. If an association receives a 25 percent grant from other sources, a project's economic feasibility shall be based exclusively on the association's ability to meet normal operation and maintenance costs of the proposed system.".

ENERGY CONSERVATION

SEC. 21. The Housing Act of 1949 is amended by adding after section 528, as added by section 19 of this Act, a new section to read as follows:

"ENERGY CONSERVATION

"SEC. 529. (a) The Secretary is directed to withhold assistance authorized under sections 502, 514, 515, and 516 of this Act from any otherwise eligible borrower, who after January 1, 1978, fails to incorporate into any structure commenced by such borrower after that date such energy conserving construction techniques, design features, and materials as may be necessary to substantially reduce energy consumption. The additional costs such construction may entail to reduce energy consumption may not exceed the estimated cost of the energy savings over a ten-year period. The Secretary shall take the long-term energy savings into account in determining eligibility under sections 502, 514, 515, and 516 and shall not deny assistance as a result of any increased construction costs due to energy saving devices or techniques that are to be included in the structure.

"(b) The Secretary is directed to encourage the inclusion in all housing constructed with assistance under this Act, locally available space heating systems, including, but not limited to, coal and wood burning stoves, fireplaces or furnaces, heat pumps, low-cost solar or wind powered systems, or any combination of such systems. The cost of such space heating systems may be included in the loan to any eligible borrower when it is determined to be economically feasible for the initial borrower, or to any subsequent borrower who may seek assistance under the provisions of section 502 or 504 to replace or modify an existing space heating system.

"(c) The Secretary is directed to establish minimum standards for implementing the provisions of subsections (a) and (b).".

SUMMARY OF RURAL HOUSING ACT OF 1977

Section 1. Title:

May be cited as the "Rural Housing Act of 1977".

Section 2. Handicapped:

Would amend FmHA legislation to allow program to serve handicapped. (Parallels an amendment to HUD legislation in 1974.)

Section 3. Escrow Accounts:

Would require FmHA to set up escrow system (but use would be optional with purchaser, except as specified for deep subsidy program).

Section 4. Rural Housing Research:

Would create an in-house research capacity, in FmHA, and direct emphasis on rural housing needs, with particular attention to special groups, such as handicapped, farmworkers, and Indians; rural growth patterns; and rural community facilities and services. $10 million annually would be authorized. The present authorization is for $1 million and even this miniscule amount goes unused.

Section 5. Compensation for Structural Defects and Limitations on Administrative Authority:

Would make FmHA responsible for remedying defects, for three years with new housing and eighteen months with existing housing.

Repairs would be made as soon as determined to be needed. If subsequently found not to be the fault of the builder or FmHA inspector, the cost would be added to the loan. Similar authority already exists for HUD.

Would also direct Secretary to preserve and protect agriculture and forest land and would provide that Secretary may not preclude use of Title V programs in any place on basis of actual or projected population alone. Intended to eliminate proposed policy which would preclude FmHA financing of new subdivisions not contiguous to an existing community with sewer, water and other services already in place. This would maintain the flexibility in the current law.

Section 6. Foreclosure Prevention:

Would provide that no foreclosure or transfer action could be initiated by FmHA against any borrower without prior notice and consideration of the moratorium on payments provided under Section 505 of the act. (This provision has been in law since 1949, but has been implemented only since 1975, and goes virtually unused. Provides for moratorium on principal and interest, and cancellation of interest, if borrower's difficulty is beyond his/her control.)

Section 7. Appeals Procedure:

Provides for a mandatory appeals procedure for applicants who are denied loans under FmHA programs (now only limited appeals under 507 are available).

Section 8. Assistance Authorizations:

Would extend all expiring authorizations through September 30, 1980, providing the following amounts:

Section 504 home repair loans and grants—$100 million for 3 years.

Section 516 farm labor housing grants—$100 million for 3 years.

Section 506 rural housing research grants—$10 million annually.

Section 514 farm labor housing loans—$50 million annually.

Section 515 rural rental housing loans—no dollar limit.

Section 523 self-help technical assistance grants—$20 million annually.

Section 524 self-help site loans—$5 million annually.

Section 525 technical assistance grants and seed money loans (not self help)—$10 million annually.

Section 9. Congregate Housing for the Elderly and Handicapped:

Would permit construction of congregate housing under the 515 rental program. Similar to authority available to HUD.

Section 10. Farm Labor Housing:

Would provide that applications for funds from private and nonprofit organizations be considered on the same basis as applications from public bodies.

Section 11. Allocation of Loan Funds to Low-income Applicants:

Would require that no less than 60 per cent of all insured single family 502 loans and 515 rental housing loans go to low income families as defined by the Secretary. Replaces a provision to this effect that has been included in the annual FmHA appropriations legislation.

Section 12. Use of Authorized Rural Housing Funds:

Provides that the Secretary shall allocate funds "to assure their maximum availability and use during peak construction periods", an effort to prevent the arbitrary imposition of monthly allocation formulas which hamper the effective use of housing funds.

Section 13. Changes in the Guaranteed Loan Program:

Would limit the program to applicants with above-moderate incomes, separate guarantee authority from loan authority, and provide for processing by state or regional offices.

Section 14. Home Ownership Subsidy for Low and Moderate Income Persons:

Would authorize FmHA to subsidize the difference between 15 percent of gross annual income of a very low income household and the costs of principal and interest, property taxes, insurance, utilities and maintenance. Also establishes a provision to recapture Federal subsidy dollars in case of a profitable sale.

Section 15. Rural Rental Assistance:

Would require implementation of the rural rent supplement program, make it clear that occupants of congregate and cooperative housing would qualify, make clear that rents are 25 percent of adjusted annual income, and increase proportion of units that could be subsidized from 20 percent to 30 percent in any project.

Section 16. Mutual and Self-help Housing:

Would authorize site loans to Section 523 self-help technical assistance grantees for purchase of sites as well as options.

Section 17. Site Loans:

Would reduce site loan interest rate for nonprofit corporations to 3 percent and would provide a new guarantee program for site loans for limited dividend developers agreeing to provide at least 50 percent of the sites to low income families.

Section 18. Remote Titles:

Would authorize FmHA to make loans where private insurance companies will not provide title insurance solely because of remote claims or encumbrances on title.

Section 19. Equal Opportunity:

Would establish an assistant secretary for equal opportunity within the Department of Agriculture.

Section 20. Water and Sewer Grants:

Would increase authorization from present $300 million to $500 million in FY 1977, $750 million in FY 1978, and $1 billion in FY 1979. Would require that 25 percent to 75 percent of cost of each project be grant, with at least one third at the 75 percent grant level and another third at the 50 percent

grant level. EPA's current program is on a straight 75 percent grant basis.

Section 21. Energy Conservation:

Would mandate use of energy conservation construction techniques and standards in all new housing financed by FmHA.

RURAL HOUSING REFORM

Mr. HATHAWAY. Mr. President, I am pleased to join a number of my distinguished colleagues in sponsoring the Rural Housing Act of 1977.

We are introducing this measure today and are hopeful that it will receive prompt consideration by the Senate Banking, Housing and Urban Affairs Committee, and by the full Senate thereafter.

This bill contains a number of sections, any one of which would improve the efficiency of our rural housing programs. Taken together, these changes promise the kind of comprehensive reform so necessary if the housing needs of our rural areas are to be met in a meaningful fashion.

With regard to the particular needs of citizens in rural areas for better housing, I would like to cite a couple of statistics.

In 1973, the Joint Center for Urban Studies of Harvard-MIT estimated that there were 13.1 million households suffering from "housing deprivation" and of these more than 5 million, or 38 percent, were nonmetropolitan.

In 1974, the ratio of substandard housing to public housing was 5 to 1 for urban counties, and 17 to 1 for rural counties.

The incidence of substandard housing in nonmetropolitan areas was 3½ times that in metropolitan areas in 1974.

The amendments included in this bill focus entirely on title V of the Housing Act of 1949, which is the implementing legislation for the rural housing programs of the Farmers Home Administration. This focus is particularly appropriate for my constituents since Farmers Home rural housing programs have in recent years played a critical role in providing decent housing to all Americans and have been particularly important in the State of Maine. I would hope that the Farmers Home Administration can continue to fulfill its vital role and that all Americans in all parts of the country will ultimately be provided with adequate homes.

FMHA LOANS ON LAND WITH REMOTE TITLE CLAIMS

One of the sections of this bill will be particularly useful to citizens in the State of Maine. This section stipulates that the Secretary of Agriculture shall continue to make loans for the purpose of construction on lands subject to remote title claims which might otherwise render title to such land uninsurable due to the potential encumbrance posed by such claims.

The need for such legislation is pointed out by the present situation in the State of Maine. In this regard, I would like to quote from a portion of S. 842, a bill introduced by Senator MUSKIE and myself on March 1, 1977:

(1) there are currently pending aboriginal land claims by the Passamaquoddy and Penobscot Indian Tribes of the State of Maine which may involve over 40 percent of the land area of the State of Maine and which may result in a cloud on the title of the potentially affected land areas;

(2) these aboriginal land claims were presumed extinguished by conquest, abandonment or by treaties entered into in the late eighteenth and early nineteenth centuries;

(3) the mere pendency of these claims for the return of aboriginal lands may result in irreparable damage and substantial adverse consequences for the State of Maine and its citizens which consequences are disproportionate to the ultimate resolution of the litigation;

(4) while the legal basis for the claims rests in large part on the alleged failure of the Federal Government to carry out its trust responsibility to the Passamaquoddy and Penobscot Indian Tribes, the burden of the claims falls upon the State of Maine and present day good-faith titleholders in the State of Maine.

While these claims have an impact on all legal relations involving the lands subject to such claims, this section of the bill introduced today would insure needed stability in the vital area of family housing.

Thus far, despite the pending court case in Maine, Farmers Home has continued to approve and authorize housing loans on lands potentially affected by that suit. I have received assurances from FmHA that it will continue to do so for the foreseeable future.

This administrative determination is gratifying and appreciated by the people of Maine. But at the same time, in order to provide the kind of long-term predictability and security which is so necessary in this area, it would be of great benefit to write this understanding directly into Federal law, and this bill would achieve this goal.

It is important to emphasize that this provision has broader applicability than to the State of Maine. It is my understanding that it is of particular relevance to parts of the Southwestern and Southeastern United States, to Alaska, and to Appalachia, all of which have some incidence of remote title clouds.

This section also provides that, in the event of title findings by the courts which are in favor of the remote claimholders and adverse to the Farmers Home loanholders, in any area of the Nation, the Secretary of Agriculture may utilize funds from the rural housing insurance fund to pay the holders of remote claims any damages awarded by the courts with respect to such property.

These provisions, if enacted, allow the many families in Maine and elsewhere who live in homes subject to Farmers Home loans to know that they would be able to continue to live there without regard to the findings of the courts, and would also provide a mechanism for the payment of any damages awarded with respect to these homes from a Federal source, the rural housing insurance fund.

While these provisions directly affect only Farmers Home property, they do represent an important first step in providing through Federal mechanisms the long-term security and predictability in this area which is of vital concern to my own constituents and to many other citizens throughout the country. I am pleased to be joined by many of my distinguished colleagues in introducing this important legislation.

ENERGY CONSERVATION

Another section of this bill of particular interest to the State of Maine is the section dealing with energy conservation. Recently, Federal Energy Administrator John O'Leary said that with appropriate construction techniques we could reduce our national home heating bill by 30 percent. This savings is of great significance when one considers that home heating accounts for 20 percent of our national energy needs.

But this is of even greater significance for areas of the country such as Maine where severe winters, particularly the current one, have impacted so heavily on family budgets.

This section would mandate that the Secretary of Agriculture incorporate energy conservation construction techniques into all housing financed by FmHA, without being constrained by current standards or regulations.

This language is necessary because current regulations paradoxically discourage and inhibit energy conservation.

For example, I have heard from a number of constituents in Maine who have informed me that they have been barred from including a fireplace in their FmHA home. FmHA officials respond that the regulations are drafted on a nationwide basis and that their research concludes that in many parts of the country, fireplaces do not represent a sound energy investment—due to costs of wood and energy losses through the chimney when the fireplace is not being utilized. But in Maine, where wood is readily available in quantity these arguments do not seem to hold any weight and it is time that the FmHA regulations recognized these critical regional differences.

This section would correct these difficulties by directing the Secretary to encourage, rather than discourage, the utilization of alternative, locally available heating systems.

In addition, this section would alter the way housing costs are currently viewed by Farmers Home, and would require it to consider the long-term, life-cycle cost of the house and its associated energy costs. It would allow the Secretary to extend loan assistance in larger amounts for initial construction costs, if those costs are matched by associated energy savings in subsequent years.

It would also limit the authority of Farmers Home to finance housing unless it utilized building techniques and design materials which would substantially reduce energy consumption.

These adjustments in philosophy and direction are vitally necessary and sen-

sible—for it makes little sense for the contractor and the buyer to save a few hundred dollars or a few thousand, on initial construction costs if these costs will later be dwarfed by the increased energy expenditures necessitated by the lack of a fireplace or the absence of fully adequate insulation, and so on.

While this section clearly allows for increased initial housing costs if counterbalanced by subsequent energy savings, it is my view that once Farmers Home abandons rigid design concepts and prior methods, a lower cost energy-conserving design might result. This past year the State of Maine Planning Office, the Maine State Housing Authority, and the Sam Ely Community Services, Inc., jointly sponsored an architect's competition to develop alternative housing designs.

So that my colleagues might be aware of the great potential of alternative housing designs, as well as the need for greatly increased coordination among Federal, State, and local authorities on these issues, I ask unanimous consent that an article titled "Low Cost Housing," by Peter Cox which appeared in the Maine Times issue of October 1, 1976, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LOW COST HOUSING

A well designed, contractor-built home for less than $20,000. Is it possible?

The federal government, with massive funds and huge projects, has failed to come up with such a home. The classic home financed by Farmers Home Administration (FmHA) with low-interest mortgages costs from $30,000 to $35,000 to build. And the box-like 20 by 40 foot houses tend to be poorly designed, energy inefficient and poorly constructed.

The first step has already been completed in making available to Maine people a truly low-cost home. One, a little offbeat, could be built for $13,000.

Several would cost less than $20,000 and by the time one hits the $20,000 to $30,000 range, the houses look downright sumptuous.

The designs are the result of what may be Maine's first architectural competition, sponsored by Sam Ely Community Services, Inc. and the State Planning Office. There was no prize for the winners, but the plans for the houses will go on tour, and any person who wants one built and who can qualify financially, is guaranteed to receive the money. Several Maine banks have said they would finance the houses and if necessary (due to the buyer's financial status) the Maine State Housing Authority will be a loan guarantor.

A few Maine banks have already been financing alternative housing, most notably owner-built homes of the Shelter Institute type. But with this project, the number of banks participating broadened considerably.

According to Philip F. Harris of the State Planning Office, the idea for the competition germinated last fall at some seminars on alternative housing. Participants felt they had to prove to the federal government and to the banks that good, low-cost housing is possible.

They decided to have a competition which architects and non-architects alike could enter. (All the winners are architects.) No federal funds would be sought. And the competition would not include owner-built homes, part of whose economy comes from labor savings.

The submitted designs would include contractor prices and the techniques would have to be familiar ones to contractors, or at least, techniques which any contractor could quickly understand.

Added to the criteria were energy conservation and proper use of resources.

The judges were broad based: a consumer, a banker, an architectural historian, an architect, a contractor, an energy expert, a representative of Farmers' Home and others.

One entrant presented a garrison-type house of the sort found in housing tracts a few years ago. That was shot down by the architectural historian, among others.

Several designed houses with solar collectors for space heating, but the energy expert pointed out that almost all of these contained major flaws, probably because the designers didn't know enough about solar energy. In fact, Richard Hill, Maine's reigning alternative energy expert, pointed out that the idea of a slanted glass roof to catch the winter sun's rays is more suited to the Southwest than to Maine. In Maine, the winter sun is so low on the horizon that the vertical wall can accept the available heat.

Several designs included berms: houses built with the first floor under pushed-up dirt, much like a potato house. None of these was a winner.

The winners, in fact, most of the entries, used passive solar heat. In other words, the living sides were facing south with large windows. Bedrooms and services were on the north side, with very small windows.

Highly occupied rooms tended to be open, so they would be easy to heat. Most were set up to handle wood stoves. (Current FmHA houses have no chimneys.) One winner actually had a wood burning furnace and a Clivus-Multum composting toilet. However, such details didn't have particular effect on the judging because such decisions would be left to the home owner and would not significantly affect the cost.

All of the homes tended to be much more heavily insulated than traditional homes. Floor plans were flexible among the winners. Modular (interchangeable) design was common; and additions could be easily made although most had 2-3 bedrooms, a full bath and an extra toilet. Besides being less expensive to build, the winners were also much less expensive to maintain and operate.

The designs went on tour at the Maine State Museum last week. Today (Oct. 1) is the last day there.

They will be at the Maine Audubon Energy Fair on Oct. 16 and 17 and, after that, at an energy fair in Farmington.

Anyone may use one of the designs. (Architect's fees are included in construction costs.) The houses may either be financed on one's own or through one of the participating banks.

Of course, some of the houses may be built more than once. But they are not meant to be mass produced.

Harris of the State Planning Office pointed out that manufactured housing or even manufactured-component housing is initially expensive due to the capitalization of equipment and plant. While there might be some panel cutting before lumber is moved to the site, the houses are all designed to be built at the site.

One irony is that even at half the price of an FmHA house, the monthly payments on one of the Maine houses would still be more than the payments on the FmHA house. That's because of mortgage rates. Even under the Maine State Housing Authority guarantee, mortgage rates would still be about 9 percent. FmHA can mortgage for one and two percent if the family involved has a low enough income. Evenutally the federal government may agree to finance such alternative housing.

Winners were Steven Moore and John Weinrich of Rumford Point, C. Richard Malm of North Blue Hill and William R. Sepe of Camden. Designs by the Maine Group of Rockport and David A. Joy of Alfred received honorable mentions. The Maine Group house was the most elegant looking and also one of the most expensive at $29,000. Nicholas Holt of Ellsworth received special mention for his design of a house that would cost only $13,000—By PETER W. COX.

RURAL HOUSING RESEARCH

Mr. HATHAWAY. Mr. President, to help foster these energy conservation goals as well as the great number of other programs of FmHA, it appears necessary that this agency be given an increased budget in order to conduct its own research. In fiscal year 1976 and the transition quarter FmHA made almost 250,000 loans and grants totaling over $7 billion. Yet its research budget was $1 million and apparently none of this has been used. The Department of Housing and Urban Development has a budget of $50 to $60 million per year, yet very little of this is devoted to rural housing.

This bill would increase FmHA research funding to $10 million and would thereby give this agency a long-needed research potential to come up with long-term solutions and programs to remedy the problems of rural America.

ESCROW ACCOUNTS

I am particularly pleased that this omnibus legislation contains one of the provisions included in S. 605, a bill I introduced on February 3 of this year.

This would modify a provision in existing law which authorizes the Secretary of Agriculture to set up escrow accounts in connection with rural housing loans for the purpose of prepaying local taxes, insurance, and other such expenses, as the Secretary deems appropriate.

A section of this bill would require the Secretary to set up such accounts. The Secretary, while currently authorized to do so, has not acted because it is his view that the authority is discretionary and because, according to the Secretary, administration of such accounts, could represent a costly administrative expense.

The provision authorizing the Secretary to set up these accounts as contained in section 501(e) of the Housing Act of 1949, as amended, was added by section 505 of the Housing and Community Development Act of 1974. During the Senate's deliberation of this latter legislation, I was a member of the Senate Committee on Banking, Housing and Urban Affairs which had jurisdiction over the bill.

At that time, I supported these provisions and felt them to be desirable and necessary to ease the burden of tax and insurance payments on low-income families by making such payments due periodically in smaller installments, rather than annually, all at once in a lump sum. In this regard, I would refer to that committee's report in describing then section 504—later became 505 due to an additional section being added.

ESCROW ACCOUNTS FOR TAXES, INSURANCE AND OTHER EXPENSES

Section 504 of the bill would amend section 501 of the Housing Act of 1949 to authorize the Secretary of Agriculture to establish a system of escrow accounts to enable borrowers to budget for the payment of taxes, insurance, and such other necessary expenses as the Secretary may deem appropriate. This provision would make it possible to ease the burden on low-income families and other rural housing borrowers by letting them pay their taxes and insurance in monthly installments along with the payments of interest and principle on their mortgage loans, instead of having to pay these once each year in a lump sum. It permits the Farmers Home Administration to offer the same escrow services which are required in connection with loans insured by the Federal Housing Administration and are optional under Veterans' Administration insured loans.

Further, it was my impression that such authority was mandatory and that the Secretary ought to implement this authority in setting up these accounts as soon as was feasible.

While I can understand reluctance on the part of the Secretary to undertake new burdens and administrative duties, it would seem that the prior legislative intent required this, and that when the burdens upon the Secretary are weighed against the potential burden on the program participants and their communities, in the absence of escrow procedures, the Secretary's reasons would not hold up.

In any event, in order to clarify this situation, section 2 would amend the existing law to make the implementation of escrow procedure mandatory.

COMPENSATION FOR CONSTRUCTION DEFECTS

Many of my constitutents have written to me concerning construction defects in FmHA housing. Under the current statutory structure, there is unfortunately little recourse for these individuals short of protracted and expensive court action.

A section of this bill would remedy this situation and would protect owners against latent defects which do not always manifest themselves in the final FmHA inspection process. This section would also give FmHA a powerful tool in dealing with the small minority of contractors which might be tempted otherwise to cut costs or indulge in shoddy construction methods.

This proposed legislation would conform FmHA provisions to those already in effect for HUD–FHA financed housing. It sets up a mechanism for providing those who purchase new housing within the last 3 years or subsequent to enactment of this act, with compensation for any construction defects discovered within the first 3 years of occupancy.

Purchasers of existing housing would be protected for the first 18 months of occupancy. Those who purchased new housing more than 3 years prior to the effective date, or existing housing more than 18 months prior to the effective date of this legislation, would still be able to receive compensation if claims are filed within 18 months after passage of this legislation.

Those who purchased existing housing more than 2 years prior to the passage of the act or new housing more than 3 years prior would also be eligible, but would be faced with the burden of demonstrating that the defect existed at the time of purchase and should have been discovered by a proper inspection.

Under this section, the Secretary would be required to make the expenditure necessary to remedy the defect as soon as the determination was made that it existed. If it were later determined that the defect was not the fault of the contractor or the FmHA inspector, then the funds expended would be considered a loan rather than a grant.

This section would also authorize the Secretary to enter into agreements with contractors and sellers of FmHA-financed property to require them to reimburse FmHA for any expenditures made by the agency under this section. In this way, those responsible for the defect will foot the bill, and not the innocent purchaser or the Federal Government. But FmHA will be required to be diligent in examining defects, determining whether they are compensable, and then pursuing those responsible.

The amendment provides purchasers with an appeals procedure in the event they are dissatisfied with the initial handling of their complaint by FmHA. It also mandates that FmHA authorities in Washington maintain records on all complaints and their disposition.

While it provides needed protection for purchasers, this system also seems likely to instill sound construction methods and thorough inspections to deter and thereby eliminate many of the problems under the current structure.

HOUSING FOR HANDICAPPED AND CONGREGATE HOUSING FOR ELDERLY AND HANDICAPPED

This legislation also includes sections which clearly specify handicapped individuals are eligible for participation in Farmers Home housing programs. While they have not been specifically excluded, their ability to participate has been limited because their special housing requirements have not been recognized and incorporated into their regulations governing these programs.

These sections will insure that prior oversights are corrected and that handicapped individuals have full and equal access to rural housing financed by Farmers Home.

Further, this legislation recognizes the need for congregate housing facilities in rural areas for handicapped and elderly, as a means to preserve their dignity and meet their special needs. Such facilities would allow these individuals freedom from institutionalized, extended care facilities while at the same time offering some supervisory assistance and centralized kitchen and dining facilities to offer economic and nutritious meals.

ADMINISTRATIVE PROVISIONS: ALLOCATION FORMULAS AND APPEALS PROCEDURES

This legislation contains a section to remedy an administrative problem in the allocation of Farmers Home loan funds. In the past year, Farmers Home has determined to institute a monthly allocation system by which each region, State, and county is empowered to obligate only one-twelfth of its annual loan funds in any given month. This is ostensibly intended to prevent such funds from being over-obligated in the early months of the fiscal year, and thereby avoid the problem of having none left at the end of the year.

But in fact, this system ignores the cycles of housing construction and the need for far greater funds in the peak construction and sales months. This system ends up by curtailing seasonal peak activity and sets aside such funds for months in which these funds are ordinarily not needed. Consequently, buyers and builders must wait extra months for their turn, with concomitant costs associated with buyers obtaining interim rental housing and builders payment of interest on materials and payroll costs. At the present time, there are over 100,000 applications backed up nationwide. All of this could be avoided if FmHA structured its annual allocation formula around these sorts of considerations and did not insist on an arbitrary one-twelfth per month division of funds.

Also, this legislation would set up appeals procedures for individuals, who are denied loan assistance. Currently, for every application which is approved by FmHA, another is rejected. In most cases, this is the end of the line for those seeking assistance—they have no further recourse. At the same time, however, FmHA has appeals procedures for contractors who are threatened with debarment from participation in the FmHA programs.

It therefore seems appropriate that families affected by FmHA decisions should be able to avail themselves of some review procedure.

This bill would require that all denied assistance be given a written statement of the reasons for denial and notice of their opportunity to appeal. At an appeals hearing, they would have access to records, data, and so on, and if they demonstrated they met the applicable eligibility criteria, the original denial would be overruled.

WATER AND SEWER FUNDS

Adequate water and sewer facilities are greatly needed in a large number of rural communities. Over 30,000 rural communities lack adequate water systems, and over 4,000 lack proper sewer facilities. While it was estimated several years ago that $12 billion was necessary to remedy this situation, FmHA has had the authority to spend $300,000 per year. Even this sum, however, has not been fully utilized due to administrative entanglements.

This legislation would authorize $500 million for the upcoming fiscal year, $750 million the following year, and $1 billion thereafter. It would mandate that at least one-third of these funds be allocated as 75 percent grants toward total construction costs to eligible communities with at least another one-third or a 50 percent basis, rather than the restrictive 20- to 30-percent formula used now.

It would also mandate that the designs utilized be the most economic possible, thereby avoiding excess maintenance costs in future years.

RURAL RENT ASSISTANCE

Section 515 rural rental assistance as authorized by the Housing and Community Development Act of 1974, has never been implemented. Instead, FmHA entered into an understanding with HUD that its section 8 program would serve as a substitute, since the goals of the latter were similar. But this ignored the problems of delivering section 8 assistance to rural areas and the need for direct action by FmHA with its own program. This matter is before the U.S. District Court for the District of Columbia and Secretary Bergland has been ordered to show cause why section 515 should not be directly implemented.

This bill would require 515 assistance be implemented, and if enacted would avoid further court deliberations. More important, it would bring needed rental assistance to rural families—also to those in congregate housing.

HOME OWNERSHIP SUBSIDY FOR LOW- AND MODERATE-INCOME PERSONS

This bill would also provide FmHA with an additional means to assist low-income rural families with housing costs. It would authorize the agency to subsidize the difference between 15 percent of the gross income of very low-income households and the cost of the house, taxes, insurance, et cetera. This parallels the formula already in effect for HUD section 8 rental assistance.

There are ample safeguards against this subsidy later creating a windfall for the participants by requiring that some of the profits from sale of such property be recaptured and applied to the subsidy costs.

COMPREHENSIVE APPROACH TO RURAL HOUSING NEEDS

I am enthusiastic about this bill because it approaches our rural housing problems on a comprehensive basis and promises long-term solutions. I look forward to working for its passage and to its subsequent utilization in helping so many of my constituents.

Mr. ANDERSON. Mr. President, I am pleased to join my distinguished Minnesota colleague, Senator HUMPHREY, as a cosponsor of S. 1150, the Rural Housing Act of 1977.

Mr. President, Minnesota has a distinguished record in housing for rural areas. In 1971, at my urging, the Minnesota Legislature established a Minnesota Housing Finance Agency, giving the State a housing policy and commitment for the first time.

During subsequent years, the fiscal capacity of the agency was strengthened and commitments were made to housing assistance for families in outstate Minnesota, families with low incomes, Indian families, loans and grants for rehabilitation of homes, and other housing needs of Minnesotans throughout the State.

Minnesota now has the most comprehensive State housing program in the Nation. In large and small communities throughout the State, the State's credit and direct State funds are being used to add to available housing and improve the stock of existing housing. For example, it was my privilege as Governor of Minnesota to be present at the home of the Wes Radke family at Tracy, Minn., on September 15, 1975, to present the Radkes with the first rehabilitation loan check approved under the program. Tracy is a community of 2,500 in rural southwestern Minnesota.

Mr. President, our Minnesota Housing Finance Agency has provided housing assistance to more than 22,000 Minnesota families during the past 3 years, including financing of apartments, single-family dwellings, and rehabilitation of existing housing. More than half these families live outside our seven-county Twin Cities metropolitan area, and more than one-third of these outstate families are located outside any of our larger cities.

I mention these facts, Mr. President, because one of the reasons for the establishment of our strong outstate Minnesota effort was the inadequacy of Federal housing programs, particularly those under the administration of the Farmers Home Administration. Senator HUMPHREY's legislation addresses many of the concerns we have had in Minnesota as we tried to provide and maintain decent housing for people everywhere in our State.

Through the improvements provided in S. 1150, we look forward to a stronger State-Federal partnership to improve housing in rural Minnesota and the many other rural areas of America that need a strong Federal housing effort.

Mr. MATHIAS. Mr. President, the Farmers Home Administration of the U.S. Department of Agriculture is a unique agency. It provides direct housing and related services to people in the vast rural areas of our country and generally it does so successfully. These services include grants and loans for farms and nonfarm housing, community facilities, and business and industrial development. While FmHA has generally been successful, it has also faced serious obstacles—some administratively created, some through legislative shortcomings. Its mandate to house low income rural people has grown more and more difficult to meet as land and construction costs, property taxes and utilities have all dramatically increased.

The Rural Housing Act of 1977, which I am cosponsoring, is a modest attempt to plug the gaps in the FmHA program through a series of 21 amendments to the existing programs. The amendments range from a long overdue inclusion of the handicapped as direct beneficiaries of the FmHA programs, to inclusion of energy conserving techniques in FmHA-financed housing, to mandating escrow accounts to help FmHA borrowers budget for their tax and insurance payments. One innovative provision permits FmHA to finance congregate housing for the elderly.

The bill also includes several new program approaches which are sorely needed. Foremost among these is a subsidy which would make homeownership a possibility for those who are currently too poor to be assisted through the regular homeownership program—about 1.8 million households nationwide. In Maryland alone, almost 2,250 loans for $53.8 million were made by the FmHA in the 15-month period of fiscal year 1976 and the transition quarter. Many thousand more could not be approved because the families could not afford a loan even at a 1-percent interest rate. The new homeownership subsidy included in this bill would provide FmHA with the ability to assist these families.

For too long emphasis has been placed on the housing crisis in the cities and people have assumed that life in rural areas is bucolic and trouble-free. There is no denying a crisis exists in urban America; however, a different, but no less severe, crisis prevails in rural America as well.

Many of the amenities which are now commonplace in urban areas and taken for granted are not in existence in rural areas. The fact that our rural population is spread out and credit sources are few and far between have hindered the development of decent housing, adequate water and sewer facilities, and local economic activities.

The Rural Housing Act of 1977 is a significant step toward improving FmHA's ability to deal with the housing and related development problems of rural America.

RURAL HOUSING ACT OF 1977

Mr. CRANSTON. Mr. President, I am pleased to join with my distinguished colleague from the State of Minnesota (Mr. HUMPHREY) and several of our colleagues in introducing today the Rural Housing Act of 1977, a bill to improve the quality of rural housing in America by amending title V of the Housing Act of 1949.

The need to move forward in this area is clear. Over 11 million Americans still live in substandard housing in rural areas. These people must look to the Farmers Home Administration to get an adequate place to live for themselves and for their families. Yet, under the previous two administrations, there were policies of impoundment, footdragging, and delay when it came to implementing the programs Congress enacted to redress the situation.

The legislation being introduced today has four major purposes. First, it proposes to extend and to expand current authorizations for rural housing programs and for rural water and sewer programs. Second, it proposes to correct and to perfect language in the existing legislative authority. Third, it proposes to require the Farmers Home Administration to implement heretofore unimplemented provisions in existing law. Finally, it broadens the Farmers Home Administration's ability to finance low-income housing by authorizing deeper subsidies for very low-income families, and it provides procedures to redress certain grievances against the Farmers Home Administration.

Mr. President, while I endorse wholeheartedly the goals of this legislation, I

have reservations about some of the provisions. I question whether the level of authorizations requested in sections 8 and 20 can be effectively and efficiently utilized at this time. I also have a number of questions about the "deep subsidy" home ownership program proposed in section 14 and the liability provisions in section 4. I am pleased that Senator MORGAN, as chairman of the Senate Banking Committee's new Subcommittee on Rural Housing, has already scheduled a hearing on this legislation for April 29, and I am hopeful that my questions will be addressed at that time.

Mr. President, I would also like to note that I understand that President Carter will nominate in the near future a new Administrator for the Farmers Home Administration. Because congressional budget procedures require that all authorizing legislation must be reported to the Senate by May 15—a short 7 weeks away—I believe Congress must begin to move forward in this area now. However, it is my hope that when the new Administrator is confirmed by the Senate we can work together closely to develop the most effective and viable program possible to provide decent, affordable shelter for rural Americans.

By Mr. BENTSEN:

S. 1151. A bill granting the consent of Congress to an amendment to the Sabine River Compact entered into by the States of Texas and Louisiana; to the Committee on the Judiciary.

SABINE RIVER COMPACT

Mr. BENTSEN. Mr. President, today I am introducing a bill to grant the consent of Congress to an amendment to the Sabine River Compact entered into by the States of Texas and Louisiana.

Nearly 30 years ago, officials in the States of Texas and Louisiana, recognizing the vast potential of the Sabine River which acts as a boundary between the two States, entered into an agreement to construct and maintain a dam and hydroelectric facility. Since the project involved interstate agreement, the consent of Congress was required. Congressional consent was given through Public Law 578, 83d Congress. Since that time, the Sabine River Authority has constructed and maintained without Federal assistance a multipurpose facility which includes a water conservation reservoir and a hydroelectric plant.

Mr. President, the purpose of my bill is to address a problem arising from a restrictive clause in the compact's preamble. Although the preamble recognizes pollution and salt water intrusion as potential problems, it states that the compact is limited to the equitable apportionment of the waters of the Sabine River. And, indeed, when the compact was entered into, utilization and conservation of this precious resource were of overriding concern. However, in the intervening years, pollution and salt water intrusion have become increasing problems. Yet, the authority feels that it is precluded from dealing with these problems because of the restrictive nature of the preamble clause.

The original compact was amended by the Texas Legislature in 1973 and by the Louisiana Legislature in 1974 to allow the Sabine River Authority to initiate programs to alleviate pollution and salt water intrusion problems. Specifically, the amendment agreed to by the legislatures would strike out the last paragraph of the preamble which reads as follows:

It is recognized that pollution abatement and salt water intrusion are problems which are of concern to the States of Louisiana and Texas, but inasmuch as this Compact is limited to the equitable apportionment of the waters of the Sabine River and its tributaries between the States of Texas and Louisiana, this Compact does not undertake the solution of those problems.

My bill would provide the consent of Congress which is necessary in order for the amendment to become effective.

By Mr. BENTSEN (for himself and Mr. SCHWEIKER):

S. 1152. A bill to amend the act of August 24, 1935 (commonly referred to as the "Miller Act") to exempt construction contracts not exceeding $25,000 in amount from the bonding requirements of such act, and for other purposes; to the Committee on Environment and Public Works.

Mr. BENTSEN. Mr. President, today I am introducing legislation that will make more Federal Government contracts accessible to small businessmen in the construction industry.

My bill would amend the so-called Miller Act to increase the bonding requirement minimum from $2,000 to $25,000. Under the law as it stands now, a contractor must furnish the Government with performance and payment bonds for the construction, alteration, or repair of any public building or public works contracts exceeding $2,000. This provision has been in effect since 1935 when the law was originally enacted. Clearly, the periods of inflation we have experienced since that time have rendered this figure unrealistic and obsolete.

Mr. President, it is difficult for some minority or other small businessmen, with limited resources and limited finances, to arrange a bond. This problem arises to some degree from a reluctance on the part of surety companies to bond small contractors for larger projects unless they have past experience for a particular job. Further, in a study conducted at the University of Texas, bonding agencies and companies frankly admitted that they hesitate to bond any small company—especially on an initial bond, because the commissions and profits sometimes do not cover all of the administrative expenses of processing a contractor's application for a bond. Without the required bonds, minority and other small businesses fighting for a chance in the industry, are not allowed to bid on Government contracts over $2,000.

Mr. President, when the Miller Act was first enacted back in 1935, contracts below $2,000 provided substantially more experience for contractors than jobs below that dollar figure do today. The amount needs to be changed to bring it more in line with today's economic realities. With my bill, small contractors will have the opportunity to develop a broader record of experience and improve their ability to graduate to larger jobs. Without that experience, not only do they have difficulty obtaining bonding, but they are also frustrated in their efforts to grow and develop as a company. We could alleviate both of these problems by providing the small contractor greater opportunity to participate in public works contracts and prove his performance ability.

ADDITIONAL COSPONSORS

S. 76

At the request of Mr. STONE, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Vermont (Mr. LEAHY), the Senator from Utah (Mr. HATCH), and the Senator from Pennsylvania (Mr. SCHWEIKER) were added as cosponsors of S. 76, a bill to amend title XVIII of the Social Security Act to authorize a payment under the medicare program for certain services performed by chiropractors.

S. 123

At the request of Mr. INOUYE, the Senator from New Jersey (Mr. CASE), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 123, a bill to amend the Social Security Act to provide for the payment of services by psychologists, and for other purposes.

S. 129

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 129, a bill to restore the wartime recognition of certain Filipino veterans of World War II and to entitle them to those benefits, rights, and privileges which result from such recognition.

S. 269

At the request of Mr. PEARSON, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 269, the Emergency Farm Credit Act of 1977.

S. 274

At the request of Mr. THURMOND, the Senator from Pennsylvania (Mr. SCHWEIKER) and the Senator from Delaware (Mr. ROTH) were added as cosponsors of S. 274, a bill to prohibit unionizing the military.

S. 528

At the request of Mr. WILLIAMS, the Senator from Washington (Mr. JACKSON) was added as a cosponsor of S. 528, a bill relating to collective bargaining contracts.

S. 684

At the request of Mr. PROXMIRE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 684, a bill to establish a Federal Bank Commission to administer all Federal laws relating to the conduct of the banking business, both foreign and domestic, including such laws relating to the chartering of banking institutions and their branching activities, bank holding companies and their activities, Edge Act corporations and their activities, and the examination, supervision, and regulation of banking institutions under Federal law.

S. 801

At the request of Mr. McINTYRE, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 801, a bill to amend title I of the Housing and Community Development Act of 1974 for the purpose of providing that units of general local government which are not metropolitan cities or urban counties and which are receiving grants under the hold-harmless provisions of such title shall be entitled, after fiscal year 1977, to continue to receive at least the amount to which they are presently entitled under such provisions.

S. 924

At the request of Mr. WILLIAMS, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 924, a bill to provide for equal treatment of craft and industrial workers and to establish a national framework for collective bargaining in the construction industry.

S. 1011

At the request of Mr. ROTH, the Senator from Alabama (Mr. ALLEN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Utah (Mr. GARN), the Senator from Utah (Mr. HATCH), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. McCLURE), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1011, a bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

S. 1040

At the request of Mr. ROTH, the Senator from Alabama (Mr. ALLEN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Utah (Mr. GARN), the Senator from Utah (Mr. HATCH), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. McCLURE), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1040, a bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation.

S. 1046

At the request of Mr. SCHWEIKER, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of S. 1046, a bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it.

S. 1065

Mr. BAKER. Mr. President, at the request of the Senator from Michigan (Mr. GRIFFIN), who is absent on official business, I ask unanimous consent that the Senator from Utah (Mr. GARN) be added as a cosponsor of S. 1065, a bill pertaining to unemployment compensation and school employees.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 1120

At the request of Mr. HUMPHREY, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1120, a bill to support spinal cord injury centers.

S. RES. 105

At the request of Mr. NELSON, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Alaska (Mr. GRAVEL), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of Senate Resolution 105, a resolution calling for a White House Conference on Small Business.

S. RES. 126—ORIGINAL RESOLUTION REPORTED WAIVING SECTION OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO CONSIDERATION OF H.R. 3477

(Referred to the Committee on the Budget.)

Mr. TALMADGE (for Mr. LONG), from the Committee on Finance, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 126

Resolved, That (a) pursuant to section 303(c) of the Congressional Budget Act of 1974, section 303(a) of such Act shall not apply with respect to the consideration in the Senate of the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments to reduce individual and business taxes, and to provide tax simplification and reform;

(b) That waiver of this section is necessary in order to enable the Senate promptly to consider legislation providing urgently needed economic stimulus measures; and further

(c) That no point of order shall lie under section 401(b) of the Budget Act with respect to consideration of title I of such bill, the budgetary impact of which has already been considered by the Congress in its deliberations on the third concurrent resolution on the budget for fiscal year 1977.

NOTICES OF HEARINGS

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. MUSKIE. Mr. President, I wish to announce that the Subcommittee on Intergovernmental Relations will hold a hearing on S. 904, the Federal Program Information Act on Tuesday, April 5, 1977.

The Program Information Act would establish a center within OMB which would serve as a source of information about Federal domestic assistance programs and other forms of Federal aid. The information would be maintained by the center, and the information would be made readily available to citizens and communities expressing interest in locating sources of Federal aid.

The hearing will begin at 10 a.m. in room 3302 of the Dirksen Senate Office Building.

BLACK LUNG BENEFITS HEARINGS

Mr. RANDOLPH. Mr. President, on March 18 I announced a schedule for hearings on the operation of the black lung benefits program, title IV of the Federal Coal Mine Health and Safety Act. That notice appeared at page S4377 of the RECORD.

The hearing, previously scheduled for Tuesday, April 5, has been changed to Wednesday, April 6, at 10 a.m., in room 4232, Dirksen Office Building. The hearing scheduled for Monday, April 4, remains unchanged.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. GLENN. Mr. President, the Governmental Affairs Committee has added March 31 as an additional hearing date on S. 826. The witnesses for that date will be: The Honorable FLOYD K. HASKELL, of Colorado, chairman, Energy Production and Supply Subcommittee; the Honorable Judge Dorothea Baker, president, Federal Administrative Law Judge Conference; the Honorable Philip Loomis, Commissioner, Securities and Exchange Commission; and a representative from the Department of Housing and Urban Development.

ADDITIONAL STATEMENTS

CUBA

Mr. HARRY F. BYRD, JR. Mr. President, to those in the Congress and in the White House who are seeking to have the United States build up the Cuban economy, I invite attention to an editorial in the March 28 issue of U.S. News & World Report.

Written by Marvin Stone, it is captioned simply "Cuba."

I quote only one paragraph:

Cuba still resolutely exports violence and revolution. Not only do Cuba troops remain in Angola, but it is now clear that Castro and Russia's Brezhnev are teaming up to wipe out American influence in all of Africa.

I ask unanimous consent that the text of the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CUBA

(By Marvin Stone)

CUBA.—Jimmy Carter seems to be misjudging badly the will of millions of Americans by moving in haste to restore normal relations with Castro in Havana. Perhaps the White House should be reminded of the following:

Cuba still resolutely exports violence and revolution. Not only do Cuban troops remain in Angola, but it is now clear that Castro and Russia's Brezhnev are teaming up to wipe out American influence in all of Africa.

Cuba refuses to renounce its anti-U.S. crusade in this Hemisphere, including support for the independence movement in Puerto Rico.

Cuba gives no evidence that it will free the handful of U.S. citizens it has jailed, much less the possibly 15,000 Cuban political prisoners.

Cuba gives even less indication that it will pay off the 1.8 billion dollars in compensation claimed by Americans for property that was seized after Castro came to power in 1959.

Cuba under Castro is still a bad neighbor. It is ironic that we should be aiming to remove the trade embargo against Cuba at the very time we are tightening one against Rhodesia.

UGANDA AND HUMAN RIGHTS

Mr. CASE. Mr. President, one of the difficulties in dealing with a person such as President Amin of Uganda, whose government is accused of murdering thousands of Ugandans, is the reluctance

of the world community to take action or even vigorously protest such gross violations of human rights.

An illustration of this was provided in the recent refusal of the U.N. Commission on Human Rights to take up two proposals by Britain—backed by the United States—to look into the current situation in Uganda.

President Carter, in his recent United Nations speech, proposed that the U.N. Human Rights Commission be moved from Geneva to New York, on the theory that the press might then cover its activities more extensively. Although the idea has some merit, the problem is not so much with the location of the Commission's offices but its composition and the attitudes of some of its members. It is incumbent upon the United States and other members of the U.N. to make an "honest woman" of the U.N. Human Rights Commission.

One useful step suggested by President Carter is the establishment of a special Commissioner on Human Rights, similar to the one on Refugees, or the State Department's Coordinator for Human Rights and Humanitarian Affairs.

I ask unanimous consent to print in the RECORD, a background article from the Baltimore Sun and several other recent articles, including one describing how vulnerable Uganda was to the fuel embargo last July.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Mar. 27, 1977]

THE U.N. HAS A SORRY HUMAN-RIGHTS RECORD

(By Louis Halasz)

NEW YORK.—President Carter's recent call on the United Nations to support protection of human rights was addressed to the wrong audience. The reason: The overwhelming majority of the 147 U.N. member states violate the rights of their own citizens.

The State Department, bending over backwards, has found that out of 82 countries that receive U.S. aid, in only 23 are the rights of people respected. It is a safe assumption that hardly any of the other 65 U.N. member states that do not share the American bounty could be proven innocent of human-rights violations. In short, only about 15 per cent of the nations in the global club can be counted upon to agree with Mr. Carter, that "no member of the United Nations can claim that mistreatment of its citizens is solely its own business."

Explorations with a variety of U.N. diplomats bear out this sombre conclusion. Soviet and East European delegates do not even accept Mr. Carter's good faith in his advocacy of human rights; as they see it, Washington has found a new and dangerously effective weapon with which to "destabilize" Soviet bloc security.

The majority of Third World diplomats are leery, to say the least. "It is contentious," comments an Asian friend, explaining that even the world's great religions cannot agree on what is good and moral.

Another diplomat, this one from Africa, warns that "you have to watch out for the trade-off public postures and basic national interests."

Finally, a Latin American acquaintance feels that attacks by Washington on certain practices elsewhere "could arouse narrow-minded jingoism in the target countries, uniting the abused opposition behind the oppressive regimes."

Even Western diplomats, with the exception of the Scandinavians, mainly the Swedes, worry that Mr. Carter's emphasis amounts to an "overkill," which in the end could prove "highly counter-productive."

Nowhere was this unenthusiastic reception of the new American administration's policy more evident than in the recent session of the U.N.'s Human Rights Commission in Geneva, despite the efforts of Allard K. Lowenstein, who headed the American mission.

That ought not surprise anyone who takes an even cursory look at that curious agency. Out of its total of 32 member nations, there are no more than 8 whose hands are reasonably clean in the matter of human rights, the rest are mainly Communist and unaligned delegations that can be trusted never to detect the beam in their own eyes but see it in those of others.

In fact, the president of the commission, Aleksander Bozovic, comes from Yugoslavia, birthplace and jail location of one of the postwar world's first and most famous persecuted dissidents, Milovan Djilas. Mr. Bozovic lost no time in publicly berating the press covering the session for its particular interest in a Lowenstein proposal that would have asked the Soviet Union to provide information about "the arrest and detention in the U.S.S.R. of persons who have been active in the cause of promoting human rights."

That a vice president of the commission is from Cuba and that one of its members is from Uganda is only an additional comment on the competence of this particular kangaroo court to protect people against governmental abuses. The record of the Geneva session proves it all:

British attempts, first in private then in public, to have the commission investigate Marshal Idi Amin's murders in Uganda were stymied. On the other hand, there was again ample public discussion of human rights violations committed by John Voster's government in South Africa, by the military junta of President Augusto Pinochet of Chile, by Israel in the occupied Arab territories, and even by U.S. troops in South Korea.

Though Mr. Lowenstein claims success in getting the cause of Soviet dissidents aired at all, over the outcries of old Soviet hand Valerian A. Zorin about "unwarranted interference in our internal affairs," the fact still remains that at the end he had to refrain from pressing the U.S. demand, since his motion would have suffered a defeat.

Against this background, the self-flagellation by Mr. Lowenstein's deputy, Brady Tyson—who later was called home for his indiscretion—concerning the U.S. destabilization of the Salvador Allende regime in Chile sounded rather disingenuous, to say the least.

Finally, in a sort of clowning glory, it may be noted that out of the 20 "human rights fellowships" awarded by the commission in the current year two went to "experts" from the Soviet Union and Uganda.

Echoing the comment of Mr. Lowenstein, Andrew Young, the U.S. ambassador to the U.N., claims success in Geneva in that the American efforts prevented a repetition of the equation of Zionism with racism. But the Arabs, noting African disinclination to follow them down this particular garden path, had already given up that odious game last fall, during William W. Scranton's tenure as chief U.S. delegate.

In any case, the Israeli ambassador, Chaim Herzog, does not think much of this argument. "The human rights commission," he said in a recent address, "condemned Israel, as well could be expected, but at the same time rejected a discussion of the massacre of black Christians which is going on in Uganda and which was going on at the time that the President of United States spoke to members of the General Assembly."

Mr. Carter asked that "the entire U.N. Human Rights Division be moved back (to New York), where attention of the press corps can stimulate us to deal honestly with this sensitive issue." The division had been moved to Geneva a few years ago at the insistence of the Soviet Union, so that this particular U.N. activity would be put out of sight, and thus out of mind.

The United States is a mighty country, but denizens of U.N. headquarters would be willing to eat their hats if Mr. Carter's proposal ever succeeded over strenuous Soviet objections and the unwillingness of so many member nations to have the spotlight of world attention focused on their unsavory practices.

EMBARGO ALMOST FORCED AMIN OUT, EX-AIDE SAYS

(By Roger Mann)

Special to The Washington Post

NAIROBI, KENYA, March 26.—Last July during the height of Uganda's fuel crisis, President Idi Amin made preparations to abdicate and take up asylum in Libya, a high-ranking Ugandan army officer who fled to Kenya earlier this month said today.

The officer, who refused to be identified, revealed that by the time Kenya resumed Uganda's fuel supplies after a six-week halt, Amin had already flown his two present wives and many of his children to Libya.

"If the crisis had continued another week or two there would have been a change in Uganda," said the officer, who has served with Amin since 1960 and who has held prominent government posts since Amin seized power in 1971.

At the time, the critical shortage of fuel stopped all civilian and military traffic. Fuel supplies were resumed after pressure from William Eteki, the secretary general of the Organization of African Unity. Eteki was also instrumental in ending the hostilities that brought the two countries to the brink of war.

The fuel supplies had been cut off by Kenya amid growing hostility between the two countries, which reached a high point after the Israeli raid on Entebbe airport that freed more than 100 hostages from pro-Arab hijackers.

Kenya claimed that it cut Uganda's fuel supplies because Uganda was not paying its bills. Uganda was so short of fuel by the end of the blockade that it would have been unable to fight. Soldiers were calling for Amin's resignation.

The refugee officer called Amin, "the second Hitler." He has joined many other Ugandan exiles in calling for international sanctions to bring down Amin's dictatorship.

He is pessimistic that Ugandans themselves will be able to get rid of Amin. "Exiles," he said, "have no money. We all have people inside the country and, if any of us are suspected, Amin will kill all of our relatives there."

"Only international aggression or economic pressure will bring Amin down," he said. The officer called on all countries to sever trade and diplomatic links with Uganda.

Meanwhile, the Nairobi Standard newspaper reported today that a clandestine resistance group inside Uganda, the Uganda People's Passive Resistance Front, intends to poison Ugandan coffee and tea in an attempt to cut off the money for Amin's military supplies.

The group was quoted as saying, "We shall naturally be saddened by any loss of life resulting from contact with contaminated Ugandan goods, but you must hold Amin and yourself responsible."

No spokesman for the resistance group could be found in Nairobi. Observers believe that the group is more likely to be the invention of exiles in Kenya than an authentic

internal resistance movement. It is also thought that the likelihood of crop poisoning is small.

[Amin accused the U.S. Central Intelligence Agency today of using Christian denominations as a cover for subversion and said he would prohibit all foreign aid to churches in his country, according to Uganda radio, which was monitored in Nairobi by news agency.]

FORMER AIDE SAYS AMIN ORDERED DEATHS HIMSELF

(By Roger Mann)

NAIROBI, March 27.—A high-ranking Ugandan army officer who held senior posts in President Idi Amin's government until he fled to Kenya earlier this month says that "Amin personally gave the order that all Lango and Acholi soldiers should be killed."

The officer, who refused to be identified, is one of the most important Ugandans to have left the country in recent weeks. He said that the orders were circulated throughout the country to army commanders via military radio a few days after the death of Anglican Archbishop Janani Luwum and two Cabinet ministers last month. He said he also was given the orders directly by one of President Amin's secretaries.

The officer escaped from Uganda earlier this month after he had been forewarned that his name was on the death list. "They were hunting Christians not because we made mistakes but just for the sake of killing Christians," he said.

The officer, who has served with President Amin in the army since 1960 before independence, said that when Amin, a Moslem, took over in 1971 less than 5 per cent of the army was Moslem. The figure is now probably over 20 per cent, he said.

"That 20 per cent is terrorizing the other 80 per cent whose morale is very low," the officer said. About 15 per cent of Uganda's people are Moslem, while 50 per cent are Christian and the rest Animist.

He blamed the current wave of Christian killings on jealousy. "Christians are better educated than Moslems and by virtue of their education and ability they have been holding positions of responsibility," he said.

Most of the Moslems, he said, are found in the dread State Research Bureau, which is the army's intelligence unit and is reportedly responsible for most of the killings in Uganda. There are very few Ugandan Christians in State Research, which is made up predominantly of members of Amin's own Kakwa and related West Nile tribes and mercenaries from the Sudan, Zaire, Rwanda and Burundi.

The main function of State Research is "to insure the security of the president, not the country. Its members have full powers to kill people who are suspected of being uninterested in the government," the officer said.

Other Moslems are now commanding officers. Some of these, including the vice president, Gen. Mustafa Adrisi, are reportedly illiterate, although Uganda once had the highest standard of education in East Africa. Amin himself is believed to have left school after the fourth grade.

The officer believes he was on State Research's death list because he was a Christian in a high position.

The main targets are the Lango and Acholi in the army. The officer was unable to give precise figures and said he saw only 40 bodies himself but from reports he is convinced that "very many," perhaps 1,000 Lango, Acholi and other Christian soldiers have been killed since Anglican Archbishop Luwum died six weeks ago.

"It is not a new thing to see dead bodies along the roadside in Uganda," he said. When Amin seized power from Milton Obote in 1971, Lango and Acholi comprised about half of the country's 10,000-man army. Most of them were suspected of being loyal to Obote, a Lango, and many of them were killed in 1971 and 1972.

When the recent wave of killings began last month just after the death of Archbishop Luwum, only the 3d Infantry Battalion had significant numbers of Lango and Acholi. The officer said "they were merely shot or butchered like cows."

[From the Washington Star, Mar. 27, 1977]

AMIN MAY BAR AID TO CHURCHES

NAIROBI, KENYA—Ugandan President Idi Amin accused the American CIA yesterday of using Christian denominations as a cover for subversion and said he would bar all foreign aid to churches in his country.

"Imperialist agents and the CIA are using the church as a weapon for subversive activities and assassinations," Uganda radio quoted Amin as saying.

The broadcast, monitored here, said Amin "reminded the church leaders not to involve the church in politics because if they do, the people will lose confidence in them. They should only preach the word of God and not politics and pray for peace and not bloodshed."

Amin has often accused missionaries of being CIA agents, and it was not clear whether the scores of British and American missionaries in the country would be affected by Amin's latest statement.

"Uganda is a rich state," Amin said. "And there is no reason why religious denominations should beg from poor Europeans and Americans, to whom Uganda is in a position to give financial aid."

Christian leaders in Africa have accused Amin, a member of Uganda's Moslem minority, of murdering large numbers of Christians in his East African country.

The charges were leveled following the death last month of Anglican Archbishop Janani Luwum, who Amin said died in a car accident shortly after being arrested for subversion.

Unofficial reports which cannot be confirmed say Luwum was murdered by Amin's agents.

Last Friday, Dr. Donald Coggan, the archbishop of Canterbury and spiritual head of the Anglican church, told reporters he prayed for Amin's overthrow.

Amin, who claims to talk directly to God, said the world would see "which of them will meet God first." Amin said he had invited Coggan to Uganda so he could learn the facts instead of lies "spread by Jews and exiled Ugandan churchmen."

In London, Coggan said he had received no invitation and probably would not visit Uganda if he did.

Meanwhile, a group calling itself "The Ugandan People's Passive Resistance Front" sent letters to journalists in Nairobi threatening to poison Uganda's coffee and tea exports in an effort to topple Amin.

"We ask the world not to touch Ugandan goods or else face the consequences," the mimeographed statement read.

The letters, mailed from the Ugandan capital of Kampala, claimed revenue from the sale of Ugandan tea and coffee "is being used to buy arms for genocidal practices."

OIL SPILL LIABILITY

Mr. BIDEN. Mr. President, one of the most serious environmental problems facing the Nation today is the problem of oilspills. That is why I introduced S. 121, the Federal Oil Pollution Liability and Compensation Act of 1977 on January 10. That legislation is intended to replace the present hodgepodge of laws with one comprehensive liability law that will assure those whose property is damaged or livelihood ruined by an oilspill have a good basis for recovering damages.

Strong comprehensive oilspill liability legislation must be the cornerstone of any effort to deal with oil pollution problems. We must, of course, deal with issues of tanker safety and operation. I am cosponsoring legislation to deal with these. However, it is clear that Government regulation and enforcement is not and should not be our whole answer to the oil pollution problem. As petroleum operations increase, the potential for spills will be greater and the effectiveness of Government administration and enforcement efforts to control oilspills will decrease.

Mechanical improvements are not enough. Of equal importance is that we encourage careful handling of oil cargoes and storge by placing responsibility for the damage caused by careless actions on those who cause a spill. Until those persons directly responsible for operations involving petroleum are given an incentive to prevent spills the problem will not be solved.

The need for adopting strong liability legislation is made clear by an article appearing in the Wall Street Journal on March 15. The story, written by John D. Williams, was headlined: "Oil-Tanker Fleets Seek To Increase Safety, But the Accident Rate Remains at 10 a Day." Just that headline demonstrates the need for pollution liability legislation. This article, while citing efforts underway to improve operations, shows the near inevitability of some spills. This story gives a good picture of the problems of petroleum transportation today that require prompt adoption of oil pollution liability and compensation legislation such as I have introduced. Therefore, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OIL-TANKER FLEETS SEEK TO INCREASE SAFETY, BUT THE ACCIDENT RATE REMAINS AT 10 A DAY

(By John D. Williams)

The owners and users of the world's tanker fleets—fleets critical to the global economy but perilous to the environment—are taking a variety of actions to head off giant oil spills.

Pressure on the industry, from the U.S. Coast Guard, the public and other quarters, has intensified since the tanker Argo Merchant broke up 27 miles off Massachusetts last December. That accident released 7.6 million gallons of oil in the biggest spill to date so close to the U.S., and it focused attention on a global problem.

Authorities say that since 1964, accidents destroying 198 tankers have caused 1,054 deaths and befouled the seas with half a billion gallons of petroleum. While the industry insists that unavoidable "human error" is behind the majority of tanker accidents, it also says that steps are being taken to make tankers safer.

Tanker fleets say they are investing more dollars in navigational equipment and manpower training. In addition the companies that charter tankers from others say they are probing harder into the seaworthiness of ships and the accountability of the owners. And some ports say they are taking new measures to control harbor traffic.

CONTINUED CASUALTIES

These measures haven't made a mark yet. According to the American Hull Syndicate, an insurance group, 10 casualties are still occurring each day—the pace of recent years—among the world's 4,500 tankers. Although not all accidents are serious enough to result in oil spills, "even brand new tankers with top-notch crews employed by the finest oil companies need to perform in an essentially better manner," says Arthur McKenzie, director of the independent Tanker Advisory Center, which compiles information on tanker accidents.

The industry says that some accidents will be headed off with the spread of navigational controls. The U.S. Coast Guard is requiring tankers plying U.S. waters to have radar, a gyrocompass and a magnetic compass, beginning June 1. The Coast Guard long has permitted the tankers to have only radio direction finders and depth-recording devices, but it reconsidered its position after the highly publicized Argo Merchant incident just outside U.S. waters.

Many of the biggest tankers—which don't enter U.S. waters because the ports are too shallow—already have modern, electronic navigation systems that go way beyond the Coast Guard requirement. But many smaller tankers have little navigational equipment, or pay little attention to maintaining and operating what they have.

For example, the Argo Merchant, according to depositions in insurance litigation after its grounding, had an imperfect gyrocompass and employed an unskilled seaman on one watch as a helmsman even though he didn't know how to steer. (Thebes Shipping Inc., owner of the Argo Merchant, concedes that the gyrocompass wasn't fully functional but insists that all the helmsmen were qualified.)

PLEASE DO NOT USE

And a former officer on another tanker, who declines to be identified, recalls that the owner put a "Please Don't Use" sign on a gleaming new radar device, lest somebody break it; the ex-officer claims it was installed simply to be there whenever an insurance inspector showed up.

However, most tankers are expected to make use of new navigating aids once they are installed. "If the Coast Guard enforces its new June 1 regulations, there certainly will be fewer accidents," says William Gray, senior adviser in the logistics department of Exxon Corp., which owns 150 tankers, the world's largest fleet in tonnage. All the Exxon tankers already meet or exceed the Coast Guard requirements, and 45 are installing computer-aided collision-avoidance systems that go far beyond them.

Manpower training is another area to which tankers owners are devoting more dollars. Exxon, for example, says it will spend $4 million on training of tanker crews this year, up from $3 million last year and double the 1972 level.

More tanker officers are being trained—like airplane pilots—with equipment that stimulates the conditions of the actual job. At New York's La Guardia Airport, for example, is a simulator consisting in part of a semicircular screen onto which pictures of a harbor are projected; trainees use navigation instruments identical to those in a tanker's bridge to "steer" through the harbor.

The La Guardia simulator, run by Flight-Safety International Inc., is outfitted with Sperry Rand equipment to project conditions in six important ports, including one in Saudi Arabia. About 300 Texaco Inc. tanker officers, among others, are scheduled to train on it during the next five years.

DECREPIT TANKERS

One they are trained, officers may have better tankers to sail, for added attention is being paid to just how shipshape many tankers are. It's generally recognized that older tankers, although they pass regular insurance inspections, are more accident-prone than new ones. "There's some right old rubbish afloat," says an official of the Royal Dutch-Shell Group. "The problem is—just as with old autos—how do you get rid of them?"

The insurers themselves are apparently doing little about the problem. One insurance official, who declines to be identified, says, "The marine underwriters are in a position to put bad actors of the seas through insurance pricing—but the race for the dollar is such that they have to take business that they otherwise would be wary of." He adds, however, that at least his own company is saddling oil importers with higher cargo-insurance rates if they "ship on these old tubs."

Oil companies, which turn to independent tankers for about half their shipping needs, increasingly say they are refusing to hire the rust buckets. Texaco, for example, has just doubled (to 20) the number of questions it asks before hiring a tanker. It now asks, for example, if the tanker has been involved in any oil spills during the past year. And Chevron Shipping Co., a unit of Standard Oil Co. of California, says it is undertaking inspections of tankers it charters for a year or more.

HIDDEN OWNERS

Oil companies also hope to identify the owners of independent tankers. Apparently to avoid taxes or personal liability, owners often register the tankers in the names of obscure corporations; nations eager for registration fees (notably Liberia, where the Argo Merchant was registered) have readily cooperated with owners seeking anonymity.

Asserting that hidden owners can't be held accountable for tanker safety, some oil companies now are attacking this anonymity. Chevron Shipping Co. says it will no longer charter a tanker whose ownership can't be traced. "We don't want to do business with anybody we don't know," says Lawrence C. Ford, Chevron's president.

Formal controls over harbor traffic should also lead to increased tanker safety, some cities figure. Traditionally, ships jockey among themselves to gain entry to port. But after two tankers collided in San Francisco Bay in 1971, causing an oil spill that cost $5 million to clean up, Congress adopted a Port and Waterways Safety Act and some U.S. ports moved to control traffic.

Now, Seattle port officials require vessels entering Puget Sound to report their positions by radio; the ships receive entry instructions much as airplane pilots receive orders from traffic controllers. And at least two other ports, San Francisco and Galveston, are offering "vessel traffic services," enabling ships to receive traffic information by radio.

Still, "Our harbors are too congested, and there presently isn't enough information for mariners to make safe decisions," a Coast Guard official in Washington says. Rotterdam and other European ports have far more advanced controls than the U.S., other authorities say.

DOUBLE HULLS URGED

Nobody seems to doubt that more tanker accidents will occur, so some observers are calling for stronger ships that will hold up better in accidents. The Tanker Advisory Center's Mr. McKenzie, for example, says that tankers should be constructed with double hulls. But tanker owners claim a double-hulled ship, while more costly, would sink deeper than an ordinary tanker if the hull were pierced, requiring more oil to be jettisoned to maintain buoyancy.

According to tanker operators, the Shell-owned tanker Metula would have spilled 61 million gallons of oil (rather than the 15.3 million gallons it actually spilled) if it had had a double bottom when it broke open off South America in 1974. (That would have been twice as big as the record spill when the tanker Torrey Canyon broke up off the English coast in 1967.)

Owners and critics agree on at least one construction measure, however. All are supporting the addition of so-called inerting systems inject carbon dioxide into empty tanks, displacing oxygen and thus reducing the potential for fires and explosions.

Late in 1969, three tankers blew up in separate incidents even though they had only ballast water in their tanks; authorities blamed electric sparks and the presence of oxygen. Since then, the inerting systems have been added to many tankers.

CONTROLLING GENETIC RESEARCH

Mr. DOMENICI. Mr. President, the growing debate over the future of research on recombinant DNA has reached national proportions as witnessed by the recent hearings in the House and by numerous scientific colloquia, magazine and newspaper articles, and television specials.

Along with the increased interest in this issue has emerged a widening polarity between those who urge that the work continue and those who demand an immediate ban. I fear that this polarity, attended by growing emotionalism, is diverting our attention away from many of the fundamental questions with which we, as a nation and a Congress, must deal regarding DNA research.

On March 24 the Washington Post offered an editorial which, in my judgment, is balanced, thorough, thoughtful, and very pertinent to this subject. So that my colleagues in the Senate might share in the wisdom of this editorial as they ponder this issue during the upcoming Health Subcommittee hearings on DNA, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CONTROLLING GENETIC RESEARCH

There are few areas of scientific research that hold as much hope, and danger, as genetic experimentation. In the future may lie such developments as the creation of oil-eating bacteria that would eliminate much of the damage caused by oil spills, and such spectacular developments as breakthroughs in the cure and prevention of many diseases and human disabilities. But also in the future may lie the possibility that organisms may be created which man cannot control. It is even conceivable that some scientists might choose to tinker malevolently with the genetic makeup of human beings.

These various possibilities led many prominent scientists in 1974 to call for a moratorium on such research. They also led to the guidelines issued last summer by the National Institutes of Health on how federally-funded projects in this field must conduct their work. Now, a high-level government committee has recommended that those guidelines, with some modification, form the base of a new federal law, which would control tightly the production and use of the molecules that are the focus and product of genetic research.

The committee, on which all federal agencies concerned with this research were represented, has taken the right approach. It believes that research into genetic materials must be allowed to go on; the potential benefits to mankind are so great that it would be foolish to deny ourselves their discovery, and the research is so challenging that some scientists would continue with it illegally even

if it were barred by law. But the committee also believes that the dangers are too great to permit the research to proceed unregulated and that the federal government is the proper source of that regulation.

Drafting of the legislation has begun at the Department of Health, Education and Welfare, and will no doubt be difficult. We have had precious little experience in limiting what research scientists can and cannot do. And we have not had much more experience in requiring industrial scientists to keep the government informed of the kind of products they are attempting to develop for their employers. But the need is clear for requiring that the federal government be told what kind of genetic research is under way and that it have the power to ensure that the research is conducted in facilities that meet safety standards sufficiently high to minimize the possibility of, say, loosing new creatures in the world. Developing rules that accomplish those ends without stifling scientific inquiry may be difficult, particularly for a department noted for its ability to complicate enormously the administration of even simple programs, but it must be done, and done quickly.

Genetic research is more than an American problem, and concerns about its promise and its dangers are widely shared. Substantial work is under way, on both the research itself and ways in which it should be regulated, in other countries; these include the United Kingdom and most of Western Europe and Canada. Once Congress determines how research is to proceed in this country, the groundwork for an international agreement will have been laid. The need for such an agreement is as clear as the need for domestic regulation. A tragic mistake in this kind of research anywhere in the world could endanger all of us, just as a brilliant discovery in any country could benefit all mankind.

TWO-PARTY POLITICAL SYSTEM

Mr. MATHIAS. Mr. President, one of the things this country needs and is in danger of losing is a genuine two-party political system. Every American, including Republicans, Democrats, and Independents, has a stake in this matter. Without a vigorous and competent opposition party, American politics will grow moribund and dangerous.

I recently offered some thoughts on this subject to the students at the University of Maryland. For what they are worth, I would like to share them with my colleagues in the Senate and to request their reaction and comment.

I ask unanimous consent that these thoughts be printed in the RECORD.

There being no objection, the thoughts were ordered to be printed in the RECORD, as follows:

TWO-PARTY POLITICAL SYSTEM

Last November only 55.6 percent of Americans of voting age bothered to go to the polls. Just a cat's whisker more than half of the voters went to the polls. Unfortunately for the Republican, more of that 55.6 percent pulled the democratic lever for the presidency than for the Republican candidate, but it was touch and go for a while.

So it seems to me that the 1976 election was not so much a defeat for the Republican Party as it was a signal to both parties that danger lies ahead unless there is something done very soon to reverse the present trend. About half of all voting age Americans chose not to vote. They are turned off. It's a little bit like an aggravated case of the old fellow up near Catoctin, up in the woods near Camp David, who said that he hadn't voted in more than forty years and probably would never vote again. When he was asked why not, he said, "You know, I don't want to encourage them." There are a lot of people like that now. They feel politics is somehow sleazy and dirty and they don't want to encourage it even by voting. But, of course, if it is sleazy and dirty, voting is the only way to clean it up and straighten it out.

I don't think anybody can be particularly encouraged by the turnout for the last election. Even the 55.6 percent of the American voters who are still politically active, who cared enough to come out to vote, clearly are not identifying with either one of the two major political parties in the way that they used to.

I have a chart on voter identification which was prepared by the Survey Research Center of the University of Michigan, one of the great statistical studies centers in this country. It gives a pretty clear picture of the trends of the past 20 years and I can show it to you. This line here is the Democratic registration, this line is the Republican registration, and this is the Independent registration. You can see from the way the Independent line moves upward over a 20-year period from roughly 20 percent to 40 percent of the registered voters in the country, that more and more people have come to feel that they are Independents. The Republicans have obviously suffered most from this trend, you can see the almost straight line fall of the Republican Party in 20 years. But, the Democrats have taken their licks too. I think what's important from the point of view of the whole country, not just from a narrow partisan point of view, is the trend itself, what it means, how to adapt to it, how to profit by it.

Now we may individually be disappointed by the election results but I don't think we have to be completely dispirited. In spite of this chart, which on its face indicates that the Republicans have absolutely no chance whatever to win any kind of an election, the 1976 Presidential election was pretty close and President Ford did come from behind to prove that there is some receptivity to a Republican platform and to Republican ideas which simply is not reflected in the registration figures. I think people pretty much agree now that if the ticket had reflected the full spectrum of the Republican Party, if the ticket had somehow or other been able to convey that historically the Republican Party has been a big house where conservatives, moderates and liberals of every flavor, brand and blend have traditionally been comfortable together, then the election might have been decided in the other way.

But that's all behind us and there is no point in crying about spilt milk. I think that the thing we have to do here is to take stock not of where we were last November but of where we are right now. In a nutshell this is the sort of profile the Republican Party can claim: 12 governors which is obviously less than a quarter of the total number of governors in the union; 38 Senators which is considerably less than half of the total number of 100 Senators; 143 Representatives which is less than one-third of the House of Representatives. In Maryland, of course, the picture is a little worse. The Washington Post had an article recently which said:

"Just four years ago, (Maryland Republicans) could claim a United States Vice President, a Presidential Cabinet member, two United States Senators, the Chief Executive of three of the state's four largest counties and four Congressmen. Today (they) have one less Congressman, one less Senator, one less Chief County Executive and no Vice President."

So that's a pretty grim projection. But, the weakest showing of all is in the State legislature where the Republicans hold only 23 of the 187 seats in the two houses. That's a pretty sad figure, however, I must say it doesn't scare me as much as it might scare some people. When I went to the Maryland House of Delegates in 1958 it was somewhat smaller. There were about 123 members then and we had only seven Republican members out of 123 which is even worse than 23 out of 187. We even were weak enough once to succumb to a suggestion from the press that we have our picture taken together in the same phone booth. We were actually physically able to do it. Politicians will do almost anything for a press picture, but actually that was too much.

Having been in the House of Delegates in that kind of lopsided situation where you have so little chance to do anything really constructive, I can speak with a great deal of feeling about the importance of concentrating on getting a better balance of the State Legislature. It would even be better for the Democrats if there were more Republicans in the State Legislature because parties do their best, as individuals do their best, when they are challenged, when they are in a competitive situation, when they are watching each other, when there is some sort of effective check and balance. People do better under those conditions of competition and when they aren't available, when the condition doesn't exist, people get careless and very frankly they get into trouble.

So, I think if we're really to broaden the Republican Party and revive the Republican Party, we have to begin at the state and local levels. This is a matter in which I don't think we can expect Democrats to be helpful but in which they have a very real interest.

The question is how do we do it? Well, I have been called many kinds of a Republican—a radical Republican, a liberal Republican, a moderate Republican, and progressive Republican—but, speaking let's say as a moderate Republican, I think that you have to begin to do this job by broadening the base of the Republican Party. If you just look at this chart, you see that something has to be done numerically. I know that there are still some people in the Republican Party who want to draw the wagons in a circule around an ideological extreme, who say, "Let's keep them all out". Well, you can draw those wagons into a tight circle and keep people out, you can have the most exclusive little club that can be imagined but it won't be a political party then, and it won't be able to do the things that a political party ought to do. It won't be able to solve problems which is the basic reason for a political party's existence.

So when you hear people say that liberal Republicans have to cease being the tail that wags the elephant, I buy that, I have no problem with that. I don't think any particular part of the elephant's anatomy ought to be wagged by any other part. I think that the elephant ought to move in one well-articulated, coordinated way, and that all the parts ought to get into the act. Now, I happen to think that where there isn't some agitation from each part of the elephant you're going to get rigor mortis. I think there ought to be activity both from the more conservative and from the more liberal side, because that gives you a dynamic inner tension that keeps the whole organization vigorous. But, I don't think that we're going to get the kind of active party we want by shaking our fingers at each other or by saying that what we are proposing is wrong or un-Republican or un-American or un-patriotic. It may be that we disagree, there's nothing wrong with saying I disagree with you completely, you're taking the wrong approach, but it seems to me that it becomes self-defeating to say, "Well, if you're going to talk like that, you aren't really a member of our party and you have to get out". That kind of talk is the business of drawing the wagons in a circle, and it is causing the party to go down and down and down and down, until finally this line will

drop off the edge of this sheet of paper, and we won't have a critical mass which is capable of political action.

I think the task that we face today is remarkably similar to the task that Abraham Lincoln faced when he made the Republican Party an effective political force, which was to put together a coalition of very different people who did not have exactly the same ideas but who were willing to withhold epithets like un-American and un-patriotic and to come together because they felt it was useful to come together—useful for the country and for themselves.

As a result, they were able to gain the Presidency and to put a very important moral commitment before the American people in their time. In 1961 Lincoln told some of his followers that "If we do not make a common cause to save the good old ship of the Union on this voyage, nobody will have a chance to pilot her again". Now that may be a kind of quaint metaphor today, but I think it's about right. The time has come for us to make common cause and, if we don't do it pretty soon, there isn't going to be very much to argue about or discuss in the future. If we substitute the words "Republican Party" for Lincoln's word "Union", then I think that advice can be taken by Republicans today. If we don't make common cause to save the good old ship of the Republican Party, then I don't think it will matter whom we nominate for President or other high office in the future. So, I think that we have to make common cause. I think that in the interest of the State of Maryland, in the interest of the country, we've got to get fitted out for battle in 1978 and in the years beyond.

When Lincoln brought together this very disparate kind of coalition, he did it because he had an idea, and ideas are important in politics. Lincoln's idea was very simple. It could be expressed in one word—Union. To him the Union was the unique, the critical thing about America at that moment. It was the Union that could bring freedom to the slaves, it was the Union that guaranteed liberties to all Americans, it was the Union which provided an essential ingredient in American life which made it possible for Americans to live and prosper and make a great country as they did.

I think today the Republican Party needs an idea. We make a lot of speeches, but I'm not sure that we express an idea in the way that Lincoln expressed the concept of the Union in his day. I think we need an idea that conveys what we stand for—one that speaks of the past, and one that speaks of the future in the same terms—an idea that carries our traditions into the future. We need an idea for the Republican Party that people of every frame of mind—people who are uncommitted, people who are disenchanted—can very easily identify and can identify enthusiastically. It seems to me that the idea should be Freedom, because it is a truly consistent Republican theme.

For 100 years the ideal that moved the Republican Party was Freedom, the simple notion that Americans should be free and should be equal before the law. The Republican Party was founded on that principle, and it grew on that principle as the Party of Freedom. It was the Party of Freedom from bond slavery, under the leadership of Lincoln. It was the Party of Freedom from economic domination, under the leadership of Theodore Roosevelt. It was the Party that advocated Freedom from manipulation by the military-industrial complex, under Dwight Eisenhower. But I think thereafter we have to admit that we flagged in our devotion to Freedom. And the American people noticed the fact that we weren't living up to our ideals even before most Republicans did. Now, I think that if we are to come close to equilibrium, we have to become the Party of Freedom again. And to the Freedoms that have been established in the American system, I think we have to add Freedom from an overbearing bureaucracy. I think we have to add Freedom from a dehumanized technology.

I was in Mexico City last week and went in to see the head of Mexico's equivalent of our National Science Foundation. As I walked in the door, he had a television screen hooked into a computer and was getting my whole biographical background, and my voting record in the Congress flashed to him in Mexico City from some data bank somewhere—very useful no doubt, but with frightening implications.

We have to have freedom for the individual citizen from the pressures of bigness that are all around us. When this country was founded, it was founded with about two million citizens. We have twice that number in the State of Maryland alone today. At a time when we are congratulating ourselves that the national population has slowed in its growth, we are still adding more people every year than the original founding population of the Republic. Bigness, just the sheer size of everything, seems to subordinate individuals—to reduce them to insignificance. People feel that. We have to restore to people a concept of respect for themselves—no matter that there are four billion people in this world, each one is different, each one is unique, each one is unprecedented, each one will never again be repeated.

So we have to have freedom from bigness. We have to have the kind of freedom which goes with a healthy respect for ourselves and for our fellow human beings. I think this concept of freedom is one that we have a historical responsibility to revive and to keep alive. Today, too many people in this country feel that they are just being submerged in the big bureaucracy, the big labor unions and the big business complexes, and now even in big agriculture; so I think that we ought to place the Republican Party in the position of a bulwark of freedom between individuals and these forces that threaten to engulf them. I think that, in this effort, we will have a fair chance of joining a very proud past to a bright future.

I'd like to add just one closing note. It's easy to make speeches, not always easy at 9:00 in the morning, but still it's relatively easy compared to the hard practical things that have to be done. One of the things that needs to be done—and the State of Maryland needs it as badly as the Republican Party needs it—is for the Republican Party to put on an effective and constructive and a positive campaign in 1978. I can't think of any better contribution that the University of Maryland Young Republicans could make than to get behind this 1978 effort. Ed Mason, who is the Minority Leader in the State Senate and Bill Linton, Minority Leader of the House of Delegates, are organizing this campaign and there are a lot of practical day-to-day things to be done. 1978 is not some year in an astronomically distant future, it's next year. So I'd suggest that you get in touch with Ed Mason and Bill Linton in Annapolis and we can get on the road. Thank you all very much. Now, if you have any questions, I'll be glad to answer them.

Q. I agree with you when you talk about the balance of the parties and a lot of your ideas, you know, on specific issues but it seems like the Republican Party this year—you talk about Freedom—they almost went on record against the Equal Rights Amendment for women, in fact even in the Maryland Republican Party, you were denied by your own delegation. You, being the most popular Republican, were denied a position on one of the committees at the Convention. What does it take, to you, to say the Republican Party just isn't willing to change?

A. I think that, as I suggested earlier, if the Republican Party is to become an exclusive club which refuses to change, if it just draws the wagons in a circle, then it will not change. I was shocked, for example, that the Republican Party only attracted about six percent of the black vote in the country in the 1976 Presidential election. And I've reflected on that a great deal.

In fact, I talked to Bob Dole about it, and he said that he had not been scheduled into a single black meeting during the campaign, and that he had noted at the time that this was a serious omission. Well, I think it was. I think there was no real effort on the part of the campaign leadership to reach out and attract the black vote. That was clearly perceived by the black voters, and the result was that 94 percent of them voted Democratic. Now, number one, a political party that wants to solve problems for the American people has to be in touch with, and has to be representative of, every segment of American life. It's wrong in principle not to reach out for a substantial segment of the American population, something like 10–12 percent of our population. But, when we do reach out for new people so that we can have a balanced membership which is representative of the total population, then I think you will see the kind of change which very frankly we haven't seen. And that's the only way change is going to come and, if we don't do that, then, to repeat myself again, that line is going to drop off the edge of the page and there isn't going to be any Republican Party of more than marginal size so it won't really matter much anyway.

Q. What is the danger of a third party?

A. Well, I think that there is a very good likelihood of it. I wouldn't use the word danger because I think, if the Republican Party should cease to function or if the Democratic Party should cease to function, and neither of them is doing very well right now, then it would be absolutely necessary that some alternative party arise to fill that gap. I would not want to see a situation where we had only a single party which was not being effectively challenged at the polls or where there was not some sort of legislative tension in the Congress and in the State Legislatures so that concepts and ideas would be tested in the fire of controversy and of difference of opinion. So, I think there is every likelihood that, if the Republican Party does not reverse its downward trend and start up again, then some new political force will, in fact, come into being. Of course, the seeds are there for it because in this group of Independents, who represent somewhere between 40 and 50 percent of all registered voters today—an astoundingly high figure—there are people who are just simply disgusted with both parties yet who may want to have some sort of political participation, who do not want to be a political eunuch, and who want to do more in the political life than simply go to the general election and vote. They may want to participate in a primary. They may want to participate in block-by-block political organization. They just feel such a distaste for the way the system is running now that they say to the Democrats and Republicans: a plague on both your parties. Now those people, some of them at least, are available. There are all kinds of people at political loose ends. George Wallace says those Independents belong to him. Well, I think the results of the election show that not all of them belong to George Wallace. Some of them undoubtedly do, but there is probably as broad an ideological spectrum among the Independents as there is among the Democrats and Republicans. And out of all that conglomerate of available voters, I think you have the raw material for a new political party.

Q. Senator, do you have any plans for the future to bring the Republican Party closer together? To make it appeal to a wider electorate?

A. Well, all that I can do is to constantly try to keep the door open for bringing more people in. There's a tremendous opportunity for growth for the Republican Party now. There is a tremendous opportunity for younger people to come in and to make their mark there and to change the party. If you look at the race in Maryland for Governor next year, you have half a dozen prominent office-holding Democrats, who are jostling for that nomination. There is probably a good chance for a younger, less well-known, aggressive idealistic Republican to get the nomination, and once you've got the nomination, as Jerry Ford shows, if you can really present yourself to the public, you have a chance of getting elected because of the great mass of Independents, which equal the Democrats and are twice as numerous as the Republicans. So the opportunities to advance are very great within the Republican Party. If people who are considering how they can make a contribution in public life get in the Democratic Party, they have to push and shove and jostle and maybe wait a lifetime before they get any opportunities at all. But it's a different story in the Republican Party—there's real opportunity. Now if this could be perceived, and I don't mean you just do this because of personal ambition—I don't want to be misunderstood on that—then I think more people would consider becoming active in the Republican Party, and that is really the only way that what I am talking about can succeed. There is no way I can do it alone. I can't wave any magic wand and say the doors are going to open and the walls are going to fall down. It's just simply having enough people within the Republican Party who feel this way that will make it happen.

Q. Has there been a tendency on the part of the state party, perhaps because of its small size, to adopt new initiatives, to try to broaden its base? For example, I've heard, although I'm not sure of this, that at the last convention they voted to support the decriminalization of marijuana?

A. I was not at the convention the whole time, I can't testify on that point. But there is an effort, Ed Mason and Bill Linton, for example, in trying to work for the '78 campaign, are making a real effort to broaden their approach and instead of going back to the same old tired people to look for new people to bring into Party activity.

Q. Doesn't that also come from the members of the Republican Party—to go out and reach out to people?

A. Absolutely, it's the members that are critical. That's a very good point. Of course, you can't just rely on leadership of any organization. Your minority leader of the State Senate, for instance, has only the same 24 hours a day that everybody else has, and what he can do individually and personally is very slight. It's what he can motivate other people to do that will be the important thing. So this effort really has got to be aimed at motivating other people to go out and actually do the work.

Q. Senator, let me play devil's advocate and suggest that the Republican Party become more enclosed in circled wagons that you mentioned. Is there any possibility that in the future you may bolt the Republican Party?

A. Well, I'm not contemplating that at the moment, but I am perfectly frank to say to you that, if this constriction continues, then I see that the Republican Party will lose the critical mass that's necessary to be really important in American public life, as an institution. If you look at the demographics of the Party today, it is an older Party, although 18 percent of all registered voters are Republicans, only about 15 percent of young voters are Republicans. So we are not even replacing our losses at that rate. We are attracting fewer young voters than our proportion to the total population and so I think the future will really dictate what happens and we will see the trend very fast.

Q. Senator the latest issue of National Review magazine says that you're considering becoming a Democrat.

A. Well, as I just said, I'm not considering it at the moment. There has been a good deal of press comment on that not only in the National Review, but I think the important thing to do is to see if we can keep the two party system vigorous and vibrant and useful to the American people. If we can't do that, then a lot of us have got to think the future out again.

Q. How would you feel about doing away with the electoral college and going to a proportional system or just a majority system, and how would that affect the Republican Party?

A. I'm rather inclined to go to a direct election. At the very least, I think we ought to get rid of the human electors. You may want to keep the weighting of electoral votes as part of the election machinery because that gives a kind of regional influence to parts of the country that would otherwise have a very slight impact on Presidential elections and it gives a certain binding quality to national decision. I personally think, if I had my own options, I would not do that. I'd go to a strictly one man-one vote Presidential election. But, if that isn't possible, at least do away with the human electors who don't serve any useful purpose and who can fudge an election result other than as indicated by the primary or the general election. I don't know that it would have an effect on the Republican Party different from its effect on the Democratic Party. I think both parties would have to operate differently and instead of going for states, you would find them going for regions. Instead of appealing, say just to New York State, they would look at that big population blob that includes New Jersey, Pennsylvania, New York and Connecticut and you would find a regional kind of campaign going on. A lot of things would be done differently, fundamental things, but I think it would remove the possibility that we could have a President installed in the White House who had lost the election and, of course, that's a very real possibility under the present arrangement.

Q. Senator, I am a Democrat myself and in the Democratic Party there has been quite a comeback since 1972. Part of this is because of the work of the National Committee and Bob Strauss, and their efforts to try to bring the average voter out. Do you see the Republican National Committee getting a dynamic leadership to try to do this?

A. Bill Brock, who is the new Republican National Chairman, is a very bright fellow. He has the reputation of being conservative, but he is bright enough to understand the dynamics of a political organization. I suspect that Bob Strauss is a rather conservative fellow too, but he had no problem in seeing the necessity of bringing all the elements of the Democratic Party together. I think he should be congratulated for the job that he did. He got everybody under one tent—my colleague Jim Eastland from Mississippi and my colleague George McGovern. When you can get those two to sit down together in peace and harmony, you're a master. He did it, and the result was really spectacular. I think that is the model. You have to get people to work together. You have to make common cause and, without it, the country suffers. It isn't just that the Republican politicians don't get elected and the Republican officeholders are unemployed—that may be a personal tragedy for them—but the real tragedy is that you lose the dynamic tension, you lose the vigor, you lose the concentration and the kind of spirit and interest that people ought to be investing into politics and investing in government. The way to encourage people to muster that spirit and to muster that interest is by maintaining this tension between the parties which has always had a fascination for human beings. When we lose that fascination and we lose that interest, then we simply don't have as good and as efficient a government as we should have. With all the problems that exist today, not only in this country but around the world, we have to have the most efficient way of dealing with problems that we can have. I am afraid that, at this moment, we don't have it.

Q. Do you know if there are any plans for a mini-convention?

A. Well, I have advocated it, and I hope that we will have it, but there are no plans for it yet that I am aware of.

CHILD DEVELOPMENT: THE UNMET NEED

Mr. HUMPHREY. Mr. President, on Sunday, March 27, the Northside Child Development Center in Minneapolis dedicated a new building. A last minute conflict prevented me from being present. My son, Hubert H. Humphrey III, State senator, delivered the remarks I had prepared. I am sure he added a number of flourishes of his own, since he is more familiar with State legislation affecting the day care issue.

However, I want to take this opportunity to offer recognition to this fine community institution. At the same time, I want to express my serious concern that this center is the exception, rather than the rule.

It is a profoundly disturbing fact that the problems of day care and child development have not received the priority they deserve. Vice President MONDALE gave a great deal of thought and leadership to this issue when he served as chairman of the Subcommittee on Children and Youth. We need to carry through the important initiatives he undertook in the Senate.

An editorial by Ellen Goodman, in the Washington Post of March 25, sums up very well the lag between the changing composition and customs of the American family and the failure of our educational and child development institutions to adapt to that change.

Mr. President, I ask unanimous consent that the text of my prepared remarks and the Washington Post editorial be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR HUBERT H. HUMPHREY, DEDICATION OF NORTHSIDE CHILD DEVELOPMENT CENTER, MINNEAPOLIS, MINN.

It is very gratifying to celebrate with you this important achievement by Northside Child Development Center, a truly unusual and exceptional facility.

This cheerful, comfortable building that we dedicate today to the welfare of children is a significant success. It is an impressive demonstration of your ability to respond as an institution to community needs within a challenging climate of change, including a shift in federal funding and a mandatory move.

I am confident that the Center, which has won a great deal of merited attention and praise for its leadership in mobilizing community support and resources in an innovative, high-quality program serving children from infancy to adolescence, will

continue to provide progressive leadership in the field of child development.

It might be of interest to discuss briefly the distinction between child development and day care, and to trace some of the social and economic factors that make such programs a legitimate national concern as they critically affect the income and welfare of millions of American families.

The need for day care is an important and growing stimulus to child development programs. Although Title 20 of the Social Security Act responds to this need to some degree, it is only a limited beginning in terms of the population to be served.

In 1975, 27 million children in the United States under the age of 18 had mothers in the labor force. Of those 27 million, 12 million were in households headed by a woman. Six million were preschool children whose mothers worked.

Yet only one million spaces were available in licensed day care programs. Too many other children were in unsafe or substandard environments; too many children were unsupervised; too many were deprived of the stimulation and activities that are part of a happy and growth-oriented childhood.

Increasingly, women are entering the labor force. In 1976, 47.3 percent of all women worked. More than 54 percent of women who headed families worked.

This trend has a number of roots. It is a positive development when it reflects a changing life style in which women wish to make a productive contribution to society through the use of their professional and technical skills.

In perhaps the majority of cases, women work becaues they must. In the growing number of single parent families, mothers are the sole support of their children.

In other families, buffeted by inflation and unemployment, the contribution of the wife and mother raises the family income above the poverty level.

In a great many instances, the availability of day care determines whether or not a woman can work.

It determines whether she does so at the expense of her children's welfare and her own peace of mind.

The availability of day care determines whether she can assume career responsibilities, confident that her children will be safe and well-cared for during a full working day and even when overtime may be required. Without day care, she can be condemned to dead-end, low-pay jobs because only fragmented, unreliable and unsatisfactory care arrangements are possible. This places the family with a woman as head of household at an obvious and unjust economic disadvantage.

Day care determines whether her family will be self-sustaining or dependent on welfare.

Parents want and need to be able to work without sufering anxiety about their children, or guilt because improvised care is inadequate.

Ironically, those who most need this service can least afford it. The median yearly is $6,772, compared to a median income of $11,835 for men. Yet the female head of household has an additional burden of child care costs if and when satisfactory care is available.

Too frequently, there is no margin of income to provide preventive health care and sound nutrition.

It should be a principle of our public policy that those who wish to support themselves and their families be permitted to do so.

It should be an unequivocal principle of our public policy that all children, whatever the income, location, or marital status of their parents, have good nutrition, timely health care and the opportunity for a stimulating environment and quality education.

The relationship between nutrition, health and optimum development are well known. What is required are the commitment and the investment to act on that knowledge.

Improved nutrition helps learning and brain development. It increases resistance to disease. Among poor children, improved nutrition can increase mental achievement from 10 to 30 percent.

It has been estimated that eliminating malnutrition among 3.3 million poor children alone could produce a $6.3 to $18.8 billion increase in Gross National Product over the lifetime of these children.

I have worked a long time to expand child nutrition programs to improve the quality of food, widen participation, and educate parents and teachers in nutrition principles.

Health care is equally essential. Too many persons with limited resources cannot afford preventive health care, and society pays later for their sick care.

I repeatedly have proposed and worked for a broad program to provide access for all children and pregnant women to medical screening, diagnosis and comprehensive care.

I consider child and maternal health a priority goal of national policy.

Every year, 200,000 children are victims of handicaps that could have been prevented by early health care.

The American Academy of Pediatrics has estimated that 10 to 20 percent of all children in the U.S. suffer from chronic, handicapping conditions, and at least one-third could be corrected or prevented by appropriate care during the preschool years. Continuing, comprehensive care up to age 18 would correct or prevent up to 60 percent of these conditions.

Medical care for children costs proportionately less than for any other age group. Yet the return on the investment is enormous in its implications for the general health and productivity of our nation as well as the reduction of the social costs of developmental disabilities.

I know that your program includes health supervision and screening for speech, hearing, vision and dental problems. How wonderful if all children, especially these of low-income families who otherwise would be denied these services, could have similar access to prompt, professional identification and corrective action for any problems which impair the development of their children's learning abilities, health or their ultimate success as productive members of society.

I applaud the emphasis your Center has given to every aspect of child development, including sound nutrition, medical attention, on-going evaluation of each child's progress, and a curriculum designed for growth.

I commend the coalition of concern that links public and private funds, a skilled and dedicated staff, generous sponsors, and concerned parents in this worthwhile enterprise.

This program can be a model and forerunner for an expanded effort to provide excellent care and development enrichment to the children of working and needy parents.

Investment in our children serves a true social purpose. Each generation reflects the quality of its early childhood experience.

With day care available, parents are allowed to earn a better life for their families while they contribute their productive skills to society.

The family is strengthened, and encouraged to contribute to the decision-making, values and operation of child development centers.

I congratulate the Northside Child Development Center. I hope it will prosper and set an example for many, many more centers which draw people together in a common effort to conserve and develop this nation's priceless resource—its children.

A MINORITY BECOMES A MAJORITY

(By Ellen Goodman)

The latest report on a minority group is in, and lo, it is rapidly becoming a majority group. According to the Department of Labor, Working Mothers have nearly reached the 50 per cent mark.

It turns out that a majority of this near-majority are still women with children over six years old—children who are, therefore, recipients of the free, universally available day-care system of America. A system known as public school.

The problem is that the schools continue to operate just as if there were mothers at home, and we let them. In most parts of the country, school hours look like the old banking hours. Kids can only be deposited and withdrawn at the convenience of the institution. Never mind the customer.

This means that vast numbers of kids are wandering the streets, and large numbers of women are locked into part-time jobs, which overwork and underpay them in return for the privilege of letting them out by 3 p.m. While the banks have opened longer to accommodate working parents in the last few years, few schools have any after-school program.

What they do have, however, are No-School Days. During this winter of our discontent, too many school systems blithely cancelled their business on account of weather. They were among the only shops that closed because the employees had difficulty getting to them. In fact, the only working parents who aren't expected on the job regardless of snow, hail, etc., are those who are teachers.

The notion is that, "Well, the kids can always stay in their nice, cozy houses." The truth is that parents often end up driving them all over town during the storm to find a baby-sitter.

Added to the blight of No-School Days is the random terror of Early Dismissal Days. On these days, the school grounds are cleared for things like parent-teacher conferences. Working parents are supposed to have their children go home to "a neighbor's." Unfortunately this neighbor is also likely to be looking for "a neighbor."

As for November, December, February, and April vacations—which working parents do not get—one kid's time off is another's time spent alone in front of the TV or hanging out on the corner. Too few schools have alternative programs.

The problem is one of transition, of playing catchup. In 1930 the average American child went to school for 123 days; now he or she goes to school for 179 days. The expansion of this guilt-free system originally encouraged women to work outside the home. While 39 per cent of the mothers with pre-school children hold jobs, 53 per cent with high school children do.

Women today have fewer children who spend more time in school. They have less "mothering" to do. This encourages them to enter the work force and, in turn, work makes them dependent on the school system. Schools dislike the "day-care" role, and school boards prefer to deny its reality.

Parents, meanwhile, still think of their child-care problems as unique. This is, in part, a hangover from the days when the Working Mother was a socially ostracized member of a minority group for whom No-School Days were a penance.

Today, they are becoming a majority, and it's time they learned to act like one. Isn't that what they taught us in school?

SAFETY SALUTE TO ANDERSON TRUCKING SERVICE

Mr. ANDERSON. Mr. President, on March 18 Anderson Trucking Service, of St. Cloud, Minn., was honored as the grand prize winner in the 1976 Fleet

Safety Contest conducted by the Common Carrier Conference-Irregular Route an affiliate of the American Trucking Associations.

The award was presented to Charles T. Ashton, director of safety and personnel for Anderson, at the 29th annual meeting of the conference in San Diego, Calif. The conference represents more than 450 irregular-route motor carriers in the 48 contiguous States.

Anderson was selected a unanimous winner of this prestigious national safety contest based on its effective driver training, maintenance of equipment, participation in safety programs and organizations and safety incentive programs and overall contribution to highway safety.

Anderson trucks logged 21,162,564 miles in 1976 with an accident ratio of 3.13 per 1 million miles—an outstanding achievement.

I would like to congratulate this fine Minnesota trucking company on its outstanding accomplishment and give a special salute to Mr. Harold E. Anderson, president of Anderson Trucking Service, Inc., for his dedication to highway safety.

UNITED AUTO WORKERS URGE SENATE TO SUPPORT THE RIEGLE-GRIFFIN AUTOMOBILE EMISSION CONTROL SCHEDULE

Mr. DECONCINI. Mr. President, at the request of Senator RIEGLE, who had commitments which prevented him from being here today, I am placing in the RECORD the March 18 letter from the United Auto Workers—UAW—to Members of the Senate concerning the UAW's full support of the Riegle-Griffin automobile emissions schedule contained in S. 919, the Mobile Source Emission Control Amendments of 1977. The Riegle-Griffin proposal will be offered as an amendment to the 1977 Clean Air Act Amendments when that legislation is considered by the full Senate.

The UAW letter, signed by legislative director Howard G. Paster, clearly sets forth the reasons calling for enactment of the auto emissions schedule in S. 919 and the companion House bill, H.R. 4444, as sponsored by Congressmen DINGELL, BROYHILL and 70 additional House Members.

I ask unanimous consent that the UAW letter to Senate Members be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UAW,
March 18, 1977.

DEAR SENATOR: A few weeks ago UAW President Leonard Woodcock sent you a copy of a letter he had sent President Carter setting forth the UAW recommendations for the Clean Air Act Amendments as they relate to automobile emissions. Attached to that letter was a supporting memo, explaining in detail the basis for our position, prepared by Dean David Ragone of the University of Michigan College of Engineering

Subsequent to the time Mr Woodcock wrote to you, Senators Riegle and Griffin reintroduced their proposed legislation on the mobile source provisions of the Clean Air Act and incorporated in their bill—S. 919—the UAW recommendations on auto emissions. My purpose in writing at this time is to request respectfully that you review S. 919 and give this measure your support and cosponsorship.

The auto emission provisions of the Riegle-Griffin proposal are designed to ensure that the public health is protected and that the principles of the 1970 Clean Air Act are achieved, while taking into due consideration important, related questions of auto fuel efficiency. In this regard, I would remind you that the UAW, in recognition of the severity of the national energy problem, and to achieve the goal of energy conservation, did support the enactment of mandatory mileage standards which take effect in the 1978 model year.

Permit me to set out for you in summary fashion the basis for our recommendations, incorporated in the Riegle-Griffin proposal, on auto emissions:

(A) The emissions standards now in effect for the 1977 model year would remain in effect for the 1978 and 1979 model years because of the long lead time associated with auto production, certification to Federal standards for emissions and mileage, and conversion to meet new standards. The standards now in effect are: Hydrocarbons (HC), 1.5 grams per mile; Carbon Monoxide (CO), 15 grams per mile; and Oxides of Nitrogen (NO_x), 2 grams per mile.

(B) Regarding hydrocarbons, the Riegle-Griffin proposal, fully supported by the UAW, proposes to reduce HC emissions to .41 grams per mile in the 1980 model year. This is the original goal of the Clean Air Act and, because of the clear health danger associated with HC emissions which are strongly implicated in smog formation, we oppose any relaxation of the original goal in this regard. The welcome endorsement of this goal by Senators Riegle and Griffin and the subsequent coalescing around the UAW position has forced the automobile manufacturers to acknowledge for the first time that this goal—so crucial to the public health—is attainable.

(C) Regarding carbon monoxide, the Riegle-Griffin proposal sets a standard of 9 grams per mile in the 1980 and subsequent model years. This is totally consistent with the need for air quality, although it is slightly higher than the original goal of 3.4 grams per mile. There are four reasons why we have come to the 9 gram standard:

(1) Every city in the country will meet air quality standards for CO by 1990 with the 9 gram standard.

(2) While a 3.4 gram standard will reduce CO contaminants, based on a worse case example from the early 1970's, by 83 percent by 1990, the 9 gram standard will reduce those contaminants by 80 percent, a statistically negligible difference.

(3) The California Air Resources Board has set a 9 gram standard for CO and is unlikely to set a lower standard because of its finding that the standard is appropriate for protecting the public health.

(4) With the foregoing evidence that the 9 gram standard is consistent with the public health it then becomes highly desirable since it will facilitate the movement to smaller, more energy efficient engines which find it far more difficult to meet the 3.4 standard.

(D) Regarding oxides of nitrogen, this is in many respects the most difficult problem because there is less evidence on the health consequences of NO_x standards, yet the strongest correlation between emission standards and mileage goals. The Riegle-Griffin proposal would keep the present standard of 2 grams per mile through the 1981 model year. Under our proposal the standard would be reduced to 1 gram per mile in the 1982 model year with authority for the EPA Administrator to raise the standard to no higher than 2 grams per mile if it is found to be consistent with public health needs and if the higher standard will permit substantial improvements in auto efficiency or the application of advanced or innovative technology. For example, diesel engines hold great promise for achieving our national goals of energy conservation, yet they cannot now meet a 1 gram per mile standard for NO_x. In no event could EPA raise the standard above the 1 gram goal unless it was first shown that an increase would be consistent with public health requirements.

We believe that this emissions schedule fully protects the public health and is totally consistent with the goals of the 1970 Clean Air Act. Moreover, the Riegle-Griffin proposal is fully consistent with the important goals of energy conservation and automobile efficiency which were not as salient in 1970 as they are today. This legislation constitutes a responsible balance between interrelated and important national objectives and we urge that you give it your careful consideration, support, and cosponsorship.

Finally, it should be noted that we are dealing only with mobile source provisions of the Clean Air Act and do not propose to amend nor to strike any provision relating to stationary sources.

Thank you very much.

Sincerely,

HOWARD G. PASTER,
Legislative Director.

PROPOSED REGULATIONS OF THE FEDERAL ELECTION COMMISSION

Mr. PELL. Mr. President, Tuesday, March 29, 1977, will be the 30th legislative day that the proposed regulations of the Federal Election Commission will have been before the Congress for review. After that date, if no part of these proposed regulations is disapproved by either the Senate or the House of Representatives, the Commission may prescribe them as final regulations.

There have been strong differences of opinion with respect to some of the Commission's interpretations of the Federal Election Campaign Act in these proposed regulations. One interpretation in particular was opposed in testimony submitted to the Committee on Rules and Administration by the National Education Association with respect to section 114.5(a)(1) of the proposed regulations. The effect of this section is to prohibit the use of a reverse checkoff by NEA in soliciting funds from members for its political action committees.

While I recognize there are arguments on both sides as to the correctness of the Commission's interpretation of the law at section 114.5(a)(1), I am concerned over reports I have received, and which are reflected in the testimony of NEA before the Rules Committee, that the Commission may intend to enforce this regulatory interpretation retroactively rather than prospectively.

I have today written the Chairman of

the Federal Election Commission to express my view that since the Commission's final regulations in this area will have the effect of proscribing a practice which has been utilized in 16 States by NEA for some time that it is fair and reasonable that they be given prospective application only.

I ask unanimous consent that the testimony of the National Education Association before the Rules Committee be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF TERRY HERNDON

I am Terry Herndon, Executive Director of the National Education Association. NEA represents 1.8 million teacher-members.

We appreciate this opportunity to share our concerns with the Subcommittee. I will make a brief oral presentation, and we'll submit additional documents and materials which we would like to be included as part of the record.

NEA is engaged in conflict with the Federal Election Commission over a system used by NEA to solicit contributions of one dollar per year from each of our members to the NEA Political Action Committee.

Use of the system results from a policy recommendation of the NEA's 9000 member Representative Assembly. The system has been adopted by 16 of NEA's state affiliates under this so-called "reverse checkoff system", NEA members who pay association dues via payroll deduction also have the contribution to NEA-PAC deducted. Members are advised that this deduction will be made automatically, that it is a voluntary political contribution, that it is not required as either a condition of membership or employment, and that, if they do not wish to make the contribution, they may obtain a refund of the entire amount. In the 16 states using this system, more than 81,000 (or 16%) members requested and received a refund this year. It is also significant that they received their refund from us even before they had paid the full amount.

The dispute between NEA and FEC in this matter goes back to December of 1975, when one of our members in Connecticut complained to the FEC about the reverse collection system. NEA promptly responded to FEC's inquiry with full information about the system and its basis in the policy of our Association. We received no advice or direction from FEC.

Since that time, that great protector of individual freedom—the National Right to Work Committee—and its frenetic ally—Common Cause—have joined forces against us. They have suggested to the FEC that the collection system that NEA has democratically adopted is ill advised, involuntary and in violation of federal election law.

Also since that time there have been meetings between NEA and FEC staff, we have filed with FEC numerous documents supporting our legal right to use the collection system and explaining other reasons for it. In addition, we have presented formal testimony defending the system. To date, the FEC has not responded formally to us about these matters.

NEA's position on reverse check-off remains that it is a legal collection system. This is based on the legislative history developed in the Congress and on various rulings in case law. It is based further on our certain knowledge that contributions to NEA-PAC are not coerced and are not a condition of membership. A member who does not wish to make the contribution may have the money refunded by simply asking for it, and is subject to no pressure, reprisal or withdrawal of services because of it.

There are additional reasons, not based on law but rather on practice, why NEA wishes to retain the reverse check-off. The payroll deduction of the political contribution on NEA-PAC—which represents only $.10 per month of the normal school year—is negotiated between the school board and the local association representing the school employees. Many school boards have indicated that they will not deduct different amounts from different employees' paychecks—a reluctance which we can understand. So if the deduction is bargained, it is bargained for all employees, and the political contributions are turned over by the school board to local and state associations which keep the political funds entirely separated from dues moneys. The political contributions are forwarded to NEA-PAC and are still held separately from dues moneys.

NEA vigorously objects to FEC's effort to declare the reverse check-off illegal. Yet in section 114.5 of the FEC's proposed regulations currently before the Congress, language has been added that would clearly expand the law and rule out the future use of the NEA's collection system. It is NEA's position that the FEC addition exceeds the authority and intent of federal election law, and that the section should be disapproved.

Not content with eliminating our system in the future, recent discussions with FEC staff have exposed their position that NEA has been in violation of the law since August 25, 1976, when the FEC first submitted the proposed regulations to Congress, and possibly since last Spring, when their proposals were first published for public comment. That remarkable contention merits review by this Committee and the entire Congress. FEC is apparently trying to do indirectly what it was unable to accomplish directly. We would suggest to this Committee that FEC's declaration of intent to do something in regulations does not have the force of law until and unless it has been before Congress for 30 legislative days. The FEC ought not be permitted to usurp the powers of the Congress.

Our collection system was not challenged in 1974, when 7 states used it, or in 1975 when 12 states used it, but it has been challenged now that it is clear that unless something is done, America's teachers will become participants in national politics. My suspicious mind conjures that the motives of our attackers are more likely political and ideological than legal or procedural.

ADVANCED TRAINING FOR NURSES

Mr. HUMPHREY. Mr. President, last week, Dr. Irene G. Ramey, dean of the University of Minnesota School of Nursing, Alma Sparrow, director of Public Health, Nursing, and Edna Thayer, of Mankato State College, visited my office to direct congressional attention to the challenge facing the nursing profession.

These nursing professionals are understandably concerned at a budget proposal that would slash the $211 million authorized by Congress under the Nurse Training Act to $24 million for fiscal year 1978.

I want to commend to the attention of my colleagues, and most especially to those who serve on the Labor-HEW Appropriations Subcommittee, a paper Dr. Ramey prepared which documents the shortage of graduate-level nurses to assume important positions as clinical practitioners, educators, and administrators. Currently, licensed practical nurses and nurses' aides comprise 63 percent of all persons in the nursing field. Of the remaining 37 percent of registered nurses, only 0.2 percent have a doctorate, 3.2 percent a master's and 14.3 percent a baccalaureate degree.

Nurses who are trained to serve as more than physician extenders are an essential part of the interdisciplinary health care team.

Soaring costs have stimulated the quest for new forms of health care delivery. In that context Dr. Ramey points out that nurses with advanced training have been traditionally oriented toward health maintenance, and that professionally trained nurses may be able to assume an expanded role in the future as primary care providers.

Mr. President, I ask unanimous consent that the text of Dr. Ramey's thoughtful analysis of the need for more advanced nurses training be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NURSING IN AN INTERDISCIPLINARY HEALTH CARE TEAM

(By Irene G. Ramey, R.N., Ph. D.)

The purposes of this paper are to provide a perspective of interdisciplinary health care from a nursing point of view, to describe some of the problems which exist among the very heterogeneous group called "nurses", to describe some of the problems in the utilization of nurses within the health care system, to describe how nurses can contribute in providing interdisciplinary health care, and to point toward some on-going processes in which health professionals must engage in order to improve the delivery of health care.

Before examining the role of nursing in an interdisciplinary health care team, it is necessary to define some of the terms to be used in this paper. All too often, the terms health care and medical care are used interchangeably. To some people, however, their meanings are quite different. For purposes of clarification in this paper, the concept health care will be utilized to refer to services rendered by the many health care professionals (including physicians, nurses, social workers, physical therapists, dietitions, psychologists, etc.) whereas medical care will refer only to those services rendered by physicians. An interdisciplinary health care team is composed of members of all those professionals just named who are needed to provide needed comprehensive, educational, preventive, diagnostic, therapeutic, and rehabilitative health care services in a collaborative manner. The objectives of the members of the team in pooling their collective talents are to: (1) increase the level of wellness of the person being served, (2) reduce his morbidity, and, (3) reduce the costs of the health care services through appropriate utilization of the members of the team.

Implementation of the health team concept has been frought with many difficulties and is succeeding to varying degrees in some settings in this country. Problems in its implementation include: (1) different levels of educational preparation of the various persons providing health care, (2) game-playing between the sexes, (3) differing approaches to the provision of health care services, and (4) a lack of in-depth understanding of the

education, abilities, goals, and perspectives of the other health care professionals.

In nursing itself, there are eight major levels of educational preparation for persons who provide nursing services. These include the nurses aide (who is prepared through on-the-job training); practical or vocational nurses; graduates of hospital diploma programs, of junior college or associate degree programs, or of baccalaureate degree programs; nurses with certicates from nurse practitioner programs; and at the graduate level, nurses with master's degrees and with doctoral degrees.

In contrast to education for medicine and dentistry which has traditionally been located in institutions of higher learning at the graduate level, nursing education began in this country in hospital training programs, and initially entered universities via teachers colleges. Only in relatively recent years have doctoral programs in nursing been developed. Examination of Table I will indicate the disproportionately few nurses who have the master's and doctoral degrees [1] which are prerequisite to appointment on a university faculty, to conducting research, to providing leadership in the profession, and to representing the profession in our increasingly complex health care systems. The majority of nurses who have doctoral degrees have earned them in other fields (such as education, psychology, sociology, etc.) rather than in nursing, because doctoral programs in nursing were either not readily available to them, or not available at all.

TABLE I.—EDUCATIONAL PREPARATION OF PERSONS EMPLOYED IN NURSING IN THE UNITED STATES IN 1972 [1]

	Total number	Percent of all registered nurses	Percent of all persons employed in nursing
Doctorate	1,106	0.2	0.05
Master's	24,885	3.2	1.18
Baccalaureate	111,475	14.3	5.29
Highest degree not reported	14,147	1.8	.67
Associate degree	41,095	5.3	1.90
Diploma	580,846	74.6	27.58
Basic not reported	4,916	.6	.23
Licensed practical nurses	[2] 427,000		20.30
Nurses aides, orderlies and other assistants	[2] 900,000		42.80
Total	2,105,470	100.0	100.00

[1] "Facts About Nursing 74-75," Kansas City, Mo.; American Nurses Association, 1976, pp. 4, 5, 157, and 165.
[2] Estimated.

During the past 10–15 years, there has been an ever increasing thrust on the part of nursing leaders to change nursing from a vocation into a profession. As more nurses have obtained doctoral education, they have developed nursing curricula which are based upon a theoretical frameworks which synthesizes theories, principles, and concepts into a holistic approach to the life process in human beings. This approach is also reflected in the research that is being done by nurses. According to Gortner et al, "Nursing research has been less concerned with physical and mental diseases than with the general and specific impairments of man such as pain, anxiety, suffering, and hospitalization and attendant stress." [2]

We begin, therefore, to see a discontinuity developing higher degrees, and the anatomical systems approach utilized by medicine. This is not to say that one approach should be used exclusively by all the health disciplines, nor that all nursing educators are utilizing a holistic approach, for as might be inferred from Table I which lists the small number of doctorally and master's prepared persons, there are differences in the approaches utilized within the nursing profession itself. It is desirable, therefore, that channels of communication be developed and maintained so that the various members of the health team will understand each other's knowledge, skills, and philosophy of care, and therefore be able to complement each other in serving the client.

In these present days of spiraling inflation of the costs of health care, national health care looms on the horizon as a fiscal nightmare, particularly in view of the revelation of abuses in medicaid, medicare, and welfare programs. Tremendous changes in medical practice have occurred as a result of research leading to new technology, drugs, and diagnostic and therapeutic procedures. New types of technical specialists are needed and traditional roles are changing. Although there is a resurgence of interest in general practice in medicine, the specialists are seeking para-professionals to whom they can delegate some of their more routine functions, and as always, they have turned to the nursing profession. In reviewing the abilities of the registered nurses (mostly diploma graduates) with whom physicians have the most contact, it became obvious that additional training was necessary if these nurses were to assume an expanded role. A few venturesome physicians and nurses collaborated to develop a nurse practitioner role and demonstrated that nurses could function in an expanded role with additional training. The role has been accepted across the country and although it is less controversial now that it was five years ago, the problems are by no means resolved.

Physicians continue to view nurse practitioners as physicians' assistants and expect to maintain complete and absolute control over them. Many nurses are opposed to such complete physician dominance and have taken action to have nurse practice acts changed to permit nurses to legally practice in an expanded role. The preparation of a nurse practitioner in a certificate program is very expensive—in some programs the cost is almost as great as for a year of medical school. Many nurses and physicians are still opposed to nurse practitioners functioning as physicians' assistants because (1) they view this is second-class medicine, (2) a physician cannot assume responsibility for the actions of another (licensed or unlicensed) person—that person must assume responsibility for his/her own actions, and (3) it is not nursing and is therefore an improper use of the word nurse.

There is, however, a concept of an expanded role of nursing which has gained acceptance by the majority of the nursing profession. In this role, the nurse practitioner also obtains health histories, performs physical examinations and assesses the health status of patients/clients, but it is for the purpose of enhancing nursing practice through assisting the patient to cope with the pain, anxiety, suffering, stress and other conditions which are related to or resultant from his pathological or environmental problems. This type of nurse practitioner is being prepared at a basic beginning level in some baccalaureate programs, in some nurse practitioner certificate programs, and at an advanced level in some master's programs.

Preparation of additional numbers of nurse practitioners according to the medical model will not be the panacea that some persons may think. Since they are mostly being trained to become physician extenders, and the income they are calculated to produce for physicians indicates a continuation of assembly-line practices, medical care will not be improved, nor will nursing care. Furthermore, nurse practitioner programs do not include preparations for nursing research, teaching, nor supervision. They have been discussed here at some length only because of the considerable attention being focused on them at this time by some persons. In a recent address at the Eighth Annual Seminar of the National Health Council and the American Hospital Association, Dr. Kenneth M. Endicott, in speaking of the current state of America's health manpower, mentioned nursing only once, and that was when he referred to nurse practitioners.[3]

It must be strongly emphasized that nursing, as viewed by nurses with higher degrees, is much more than just carrying out physicians' prescriptions. Unfortunately, because of the relatively small numbers of nurses in this country who are prepared at the baccalaureate, master's and doctoral levels, and the relatively very high number with less preparation, as indicated in Table I, those nurses who are the most readily visible to physicians, hospital administrators, other profcssionals and the public are mostly those nurses whose preparation is at less than a baccalaureate level and whose primary focus is on complying with medical prescriptions.

The leaders in the nursing profession are very concerned about the small numbers of nurses who are prepared at the baccalaureate, master's and doctoral levels, when compared to the large numbers who have less preparation. Licensed practical nurses (prepared in one-year programs) and nurses aides (prepared in one-the-job training) comprise 63% of all the persons whom the general public addresses as "nurse"! Most of these L.P.N.'s and nurses aides work in hospitals and nursing homes. Through the years, these hospitals and nursing homes have filled vacant R.N. positions with L.P.N.'s and nurses aides, and continue to do so because they can be hired at lesser salaries.

As can be seen from a comparison of Tables I and II, nearly all of the nurses with earned doctoral degrees are involved in educational programs, as are more than half of the nurses with master's degrees. The remainder are employed in hospitals, service agencies of all kinds, branches of the military forces, and in governmental departments at the federal, state, county and city levels. Each nurse with a graduate degree is eagerly sought by prospective employers of all kinds—it is a buyer's market. Those nurses with graduate degrees who are engaged in clinical nursing with titles such as clinical specialist or nurse clinician (or some other variation of this title) have demonstrated the ability to handle complex, difficult nursing problems with expertise. The major problem is that there are not enough of them.

In the speech by Dr. Endicott referred to previously, he stated that, ". . . post-baccalaureate training in the health professions must primarily be a federal responsibility." [3] Some of his reasons were that many graduates practice in states other than where they received their training, and that the states are far from equal in their abilities to provide professional post-baccalaureate training. Because of the increasing costs of education, the nursing profession has labored to secure federal funding of education and has succeeded in getting Nurse Training Acts passed, even over President Ford's veto. Unfortunately, the new Nurse Training Act contains no provision for capitation monies at the graduate level (where they are most critically needed). It contains limited funding of traineeships, and little funding for research.

[1] "Facts About Nursing, 1974-75," Kansas City, Mo.: American Nurses' Association, 1976, pp. 29, 30.

The advancement of the practice of nursing to the professional level which is envisaged by nursing leaders continues to be a bootstrap operation. The present limited supply of nurses prepared at the graduate level to assume positions as clinical practitioners, educators, and administrators must be increased because it is those nurses who have the competence to (1) provide an advanced level of nursing practice, (2) research the effectiveness of that practice in terms of patient outcomes, and (3) participate as full members of interdisciplinary teams. Examination of Table III indicates that the bulk of the educational money in this country is being used to prepare practical nurses, diploma graduates and A.D.N. graduates. (Patient care revenues are used by hospitals to finance the training of nurses aides). The disproportionately small amount of support for graduate education in nursing should be greatly increased. As indicated in Table III, more than half of the doctoral students and nearly forty percent of the master's students are pursuing their degrees on a part-time basis (because they cannot afford to go on a full-time basis). This delays their completion of their degrees and hence delays their re-entry into the work situation on a full-time basis.

In the meantime, the public is demanding high quality care, and a full range of health care services. Jack D. Myers, M.D., president of the American College of Physicians, recently stated at a meeting of the American Society of Internal Medicine that more than 8% of the nation's gross national product and 10% of the average family's income go to health care. "These figures", he said, "are not explained by the general inflation rate, nor by the increase in labor costs. There is an excess in the increments of costs." He gave several reasons for the increase: (1) defensive medicine as provoked by the malpractice situation, (2) over-utilization of hospital beds, (3) over-utilization of diagnostic workups, and (4) utilization of intensive care for hopelessly ill patients.[4]

TABLE III.—ENROLLMENTS AND GRADUATIONS FROM NURSING EDUCATIONAL PROGRAMS IN THE UNITED STATES[1]

Type of program	Enrollment, fall 1973: Total	Full time	Part time	Graduations, Aug. 1, 1972 to July 31, 1973
Doctoral	375	161	214	49
Master's	6,714	4,121	2,593	2,446
Baccalaureate:				
Initial	84,738			13,055
R.N.'s	11,523	6,281	5,242	2,641
Associate degree	77,508			24,497
Diploma	68,557			21,329
Practical nursing	56,267			46,456

Footnotes at end of article.

The above statement clearly points out that we do not have a health care system in this country. Rather, we have a sick-care system which has been designed to deal with episodic illness. In the past, all the health professionals have primarily been educated and trained to handle episodic problems in hospitals. In order to prevent the continuing escalation of costs of sick-care, new approaches must be found for the maintenance of health and prevention of illness, and curbs must be placed on the costs of sick-care. Obviously this entails a major change in the attitudes, values, and beliefs of the public and of the health professionals, as well as major changes in the education of health professionals and the public. Whereas nursing education at the diploma, associate degree and practical nursing level provides preparation mostly for episodic care, nursing education at the baccalaureate, master's and doctoral level is moving more and more toward preparation for the maintenance of health and prevention of illness.

Nurses from these collegiate and university programs, could, if their numbers could be greatly increased and certain aspects of their educational programs strengthened, serve as the primary care practitioners of the future in the prevention and detection of illness, treatment of minor problems, health maintenance, counseling, teaching, and referral. The nursing profession has for a number of years advocated the involvement of patients and their families in health care decision-making and responsibility for their own care. H. Robert Cathcart, chairman of the American Hospital Association's Board of Trustees, favors involving consumers in their own health maintenance and says that this will reduce health manpower needs.[5]

In order for consumers to assume greater responsibility they will require education in order to make wise choices, and direct access to services, equipment, and medications which heretofore have been available only via physician referral or prescription. Research is needed to determine the effects of shifting to the patient/client the responsibility for maintaining his own health through an intelligent selection and utilization of health resources (health care professionals as well as treatment modalities). It is hypothesized that such shifting of responsibility would result in: (1) an increased desire by the public for health education, (2) reduction in the amount of medical care sought by the public, and (3) reduction of numbers of malpractice suits being filed.

Recent medical advances have created in the public a demand for an expertness and infallibility which is unachievable. Tentative results of medical research studies have received wide publicity before they have been replicated. The news stories carry fantastic hypotheses about the possible application of these unreplicated findings. This has led to unrealistic expectations by the public. The public must be educated certainly, but not to expect miraculous cures. Researchers have a responsibility to insist that their findings are reported correctly. These and other means such as limits on financial awards to plaintiffs and examination of the practices of the legal profession are necessary in order to reduce the malpractice liability problem. The liability problem must be dealt with soon for it is beginning to engulf all health professionals, not just physicians.

Utilization of intensive care for hopelessly ill patients has been dramatically portrayed in the case of Karen Ann Quinlan. Expenditure of billions of dollars for patients with brain death, kidney failure, and cardiac disease will continue until the people in this country decide that they prefer to put most of their health care dollars into prevention, health maintenance and rehabilitation rather than into prolongation of lives of those who are hopelessly ill. Duncan Neuhauser, Ph.D., assistant professor of health service administration at the Harvard School of Public Health states, 'We are coming closer to a situation where we are going to have to decide who to treat and who not to treat. The concept of cost-effective medicine is getting nearer . . . My cheap death may be enough to save money to prolong several other lives with the net result of more lives saved in the aggregate.'[6]

Certainly, what is needed is a new perspective on health care—one which can be provided by an interdisciplinary approach in which all the various health professionals participate and pool their talents. We need to work together in order to:

1. Identify the health services needed in each community, region and state through comprehensive data collection methods,

2. Develop minimum standards (both qualitative and quantitative) of care for the sick as well as for the healthy, for persons of all ages, and for ambulatory patients as well as for inpatients.

3. Identify manpower needs based on changing roles, health services needed, standards of care, and types of health care delivery systems,[7]

4. Develop and implement a system to provide the services to all people,

5. Develop a method for evaluating the outcomes of those services, the quality of the services rendered, and the efficiency of the system of delivery; and

6. Develop and provide interdisciplinary team clinical experiences for students in the health professions.

These tasks, should be viewed as on-going

processes which must continually undergo change and refinement in order to obtain increasing specificity. They have already been started by many diverse groups and individuals who have made considerable progress in certain delimited areas. What is needed is a synthesis of the knowledge which has been obtained so that a more comprehensive interdisciplinary approach can be developed. The nursing profession, because of its increasing utilization of a holistic approach to the life process, because of its advocacy of consumer participation in health care, because of its willingness to experiment with new roles and systems for providing health care, and because of its many decades of experience in coordination of health team efforts, can make a major contribution in the development of new interdisciplinary approaches to health care for the public.

UPGRADING THE FIGHT AGAINST TERRORISM

Mr. BIDEN. Mr. President, in the Sunday edition of the Washington Post there appeared a timely and sobering article on an issue of concern to us all—the growing frequency of terrorism around the world. Brian Jenkins' articles focuses our attention on a number of questions that require thoughtful and immediate consideration. How well are we prepared to cope with terrorism? What mechanisms do we have to respond to acts of international violence? How good is our intelligence? What is the price we are having to pay for security? Unfortunately, it seems that we are not prepared to handle these incidents. Steps should be taken to remedy this situation, and Mr. Jenkins provides some valuable suggestions.

I agree with the author's conclusion that we cannot eradicate terrorism, but there is much we can do to minimize the frequency and the impact. I quote Mr. Jenkins:

We should start by discarding talk of "eradicating" or "curing the malady" of terrorism; the medical analogy is badly misleading. The U.S. Government can, however, improve its understanding of terrorism, attempt to contain it within tolerable limits, try to deter or prevent the more heinous terrorist actions and equip itself to respond effectively to a new range of future threats and incidents.

Mr. Jenkins' article once again reminds us that we cannot allow the problem of international terrorism to be ignored until the next horrible and frightening incident occurs. We must prepare to deal with it now. Since this article offers several substantive issues that should be further debated, I ask unanimous consent, Mr. President, that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UPGRADING THE FIGHT AGAINST TERRORISM

(By Brian M. Jenkins)

It climbs in a jagged line, tracing peaks and valleys, varying from year to year, impossible to read from month to month as if it were some kind of stock exchange of violence, but the overall trend is unmistakably upward. International terrorism is increasing.

It has increased fitfully during the last decade. It is likely to persist into the next. It may compel us to alter some of our fundamental concepts of national security.

At present we are inadequately prepared. Putting aside the short-lived verbal outbursts that follow every major terrorist incident, we have not yet made a national commitment to mobilize and organize our resources to deal effectively with terrorism.

We have not created a permanent organization charged to surmount bureaucratic boundaries and provided it with the budget, staff and necessary instruments to operate effectively.

We have not assembled the military capabilities to rescue Americans held hostage abroad, or to recover facilities that terrorists may have taken over, or carry out other foreseeable missions in this new area of conflict.

We have not brought the weight of our considerable intelligence-gathering machinery to bear on the terrorist threat.

A BUREAUCRATIC VACUUM

There is no single department, agency or office in the government charged with overall responsibility for combating terrorism that also has the authority and means for doing so.

What do we have? At the Cabinet level of government we have a committee. In September, 1972, after the Munich Olympic massacre, President Nixon created the Cabinet Committee to Combat Terrorism. It was chaired by the Secretary of State and its members included the Secretaries of Defense, Transportation (which has jurisdiction over hijacked American airliners), Treasury (which has the Secret Service and the Executive Protective Service), the Attorney General, the heads of the FBI, CIA, National Security Council and U.S. Mission to the United Nations, and the President's domestic counselor (an odd inclusion except that the position at that time was held by John Ehrlichman). Since its creation, the Cabinet committee has met once.

At the same time, the President established the working group of the Cabinet committee, which now represents 26 departments, agencies and bureaus. It meets every other week. The working group is primarily a bureaucratic coordinating body, not a command organization. The State Department's Office for Combating Terrorism, which has a mandate for dealing with the problem, consists of five officials and three secretaries. This simply is not enough.

The FBI has the mission of combating domestic political violence, although it cannot merely assume jurisdiction in all local cases. At the international level, a task force is assembled in the State Department to deal with incidents involving U.S. citizens abroad. But a serious incident, one in which Americans are directly and imminently in peril, or a domestic incident with potential international consequences, may quickly become the responsibility of the White House. A complicated incident that crosses national borders and domestic jurisdictions, such as the hijacking of the TWA airliner by Croatian extremists last September, may bounce around the government like a floating crap game.

If the plane is on the ground, it is within the FBI's jurisdiction. If its doors are shut, if it has the power to take off, it is the charge of the Federal Aviation Administration. If it lands in another country, the State Department is involved, although not necessarily in charge. If it should happen to land at a U.S. military base abroad, the cast of characters becomes crowded: The government of that country has jurisdiction and the State Department will be in close touch; the FAA, however, may still dictate U.S. actions regarding the hijacked aircraft; meanwhile, the U.S. base commander has the instruments at hand for taking action, but someone must give him authority to do so.

A RISING TREND

Some observers have found encouragement in a seeming decline of international terrorism over the last year.

"Seen on a global scale," wrote Walter Laqueur in Harper's last November, "the downward trend is quite unmistakable." In fact, however, 1976 set a new record for the number of incidents of international terrorism, and 1976 was no less bloody than 1975. There were more bombings. Terrorist hijackings, after declining in 1975, went up again. There were more assassinations. There were fewer hostage incidents, however, which may account for the illusion of a decline.

Terrorists appear to be getting more sophisticated in their tactics, their weapons and their exploitation of the media. Some of the new weapons being developed for military arsenals, such as shoulder-fired, surface-to-air missiles, may find their way into their hands.

Terrorist groups appear to be strengthening their links with each other. One result is the emergence of multinational free-lance terrorist groups that are willing to carry out attacks on behalf of causes they are sympathetic with, or to undertake specific client groups or governments. The seizure of the OPEC headquarters in Vienna is a splendid example. In December, 1975, a band of pro-Palestinian terrorists took 60 hostages, including the oil ministers of Saudi Arabia and Iran. The gang included two West German terrorists and three Palestinians and was led by Carlos, a notorious Venezuelan reportedly in the pay of Libya's Muammar Qaddafi.

Nations or groups unable or unwilling to mount a serious challenge on the battlefield may employ such groups or adopt terrorist tactics as a means of surrogate warfare against their opponents. We are entering a new domain of conflict.

BILLIONS FOR SECURITY

Combating terrorism poses unique problems for governments. Terrorists do not play by the rules. Terrorism is violence against the "system" waged from outside the system. The accepted rules and procedures of international diplomacy and war do not apply. Nor do terrorists operate according to the norms of regular criminals. They define success diffculty. They may not consider their capture to be a defeat. The Croatian hijackers successfully diverted an airliner, gained worldwide attention, had their manifesto published, surrendered and will be tried. Did they win or lose?

Other forms of conflict, at least in theory, recognize categories of civilians who are not directly engaged and are not targets in the struggle—women and children, for example. Terrorists have far fewer compunctions. They may regard any person as an enemy, and therefore a target, solely on the basis of nationality, ethnicity or religion. Or people can become targets by merely happening to

be on board an airliner when it is hijacked. In terrorism, there are no innocent bystanders.

Terrorists have worldwide mobility. They may strike any target at any time, making defense extremely difficult. If airliners are protected, they may attack airports or hijack trains. If diplomats have bodyguards, they may kidnap businessmen or their children. Arab terrorists took over a schoolhouse at Maalot, Israel, in 1974. In 1976, terrorists in the French colony of the Afars and Issas seized a school bus filled with 30 children to demand independence for the colony.

Thus, unlike the situation with other modes of conflict, the defense against terrorist attacks will be determined not by the size or strength of the terrorist adversaries but by the size and number of targets to be protected. But it is impossible to protect everything. As one Israeli official says, "It is not a question of what to protect; it is a cruel decision of what *not* to protect." For that is what will be attacked.

Security can become enormously costly. Multiply, for example, the costs of the luggage X-ray machines and metal detector portals at airports—plus the handlers, plus the armed guards—by the number of terminals and again by the number of airports. The entire downtown area of Belfast has been secured like a huge airport: Shoppers must pass through portals on the way in and out; their packages are examined and they may be frisked.

We have a defense budget that reflects the costs of national security in a single figure. We have not attempted in this country to determine the total national costs of security against terrorist attacks: the protecеign diplomats, nuclear facilities, additional private police, the money that American corporations with investments abroad spent on security and pass on to the consumer. The figure would be substantial, easily in the hundreds of millions, possibly in the billions, and it is rising fast.

Since international terrorism is an international problem, some believe the proper answer lies in formulating international conventions skillfully framed to win widespread support and ratification. But to gain widespread approval, conventions against terrorism must be so broadly worded as to be meaningless.

At most, there will be limited cooperation between like-minded governments. Few governments are willing to take vigorous action against foreign terrorists or hold them prisoner if this will subject its own citizens to the threat of terrorist retaliation or obstruct the government's foreign policy goals. Despite being warned by U.S. and West German officials that Carlos was in Yugoslavia last September, Yugoslavia made no attempt to arrest him. And fearing that holding Abu Daoud, the mastermind of the Munich massacre, would strain its relations with oil-producing Arab nations and its arms deal with Egypt, France released him four days after his arrest despite Israeli and West German demands for his extradition. West German officials admitted privately they were relieved that Daoud had not been handed over to them.

A NEW AGENCY

What can be done about it? We should start by discarding talk of "eradicating" or "curing the malady" of terrorism; the medical analogy is badly misleading. The U.S. government can, however, improve is understanding of terrorism, attempt to contain it within tolerable limits, try to deter or prevent the more heinous terrorist actions and equip itself to respond effectively to a new range of future threats and incidents.

Much has been accomplished already. The cool handling of the recent episode in Washington, except by some of the media, shows how far we have come in learning how to defuse dangerous hostage situations.

More such incidents will occur and we may not always be so fortunate in saving every hostage's life without making serious concessions. Any terrorist incident is tragic, but we must put it into perspective. The United States, a large and powerful nation with a deep commitment to democracy, can tolerate a fairly high level of terrorist violence; we already sustain a high level of criminal violence. Currently, no terrorist group in the world poses a serious threat to the stability of the U.S. government, national security or public safety on a large scale. We should prepare to deal with the more serious potentialities of terrorism, the kinds of things that have not happened yet, but could.

We need to consider creating a government entity to deal with the more serious incidents of terrorism. Whatever form it takes, this entity should be situated high enough to override department and agency boundaries in the executive branch—possibly as a special component of the National Security Council staff. The State Department's office for combating terrorism, currently headed by Ambassador Douglas Heck, could be the embryo of such an entity, but it would have to be upgraded and augmented.

Recognizing that decisions in this area are ultimately political, but that visible intervention by the President could balloon the perceived importance of the matter and give terrorists precisely the high-level confrontation they want, it should offer the President ready but invisible access. It should have a permanent staff that includes civilian officials and members of all the services—the latter not being mere representatives. It would not supplant the working group of the Cabinet Committee to Combat Terrorism. It would, however, take over the mission of the task forces that are set up at State to deal with international terrorist incidents.

It would become operational in domestic incidents only when the requirements of the situation clearly exceeded local law-enforcements capabilities and the consequences could be national or international in scope (a threat of mass destruction, for example). Abroad, it would intervene in terrorist incidents when Americans were in peril, when military force could become necessary, when there was a clear danger to the national security (for example, the theft of a nuclear weapon), or when a foreign group operating internationally was carrying on a concerted terrorist campaign against the United States.

The staff would examine these and other contingencies that could require a national response, identify the possible means to deal with them and marshall the necessary resources. It would inventory U.S. intelligence, civilian law enforcement and military assets, identify any shortcomings, and formulate contingency plans. In an actual incident, the group would become the staff for the President or any special action group established by the President to deal with a serious terrorist threat.

THE MILITARY OPTION

We must not peremptorily dismiss military action as a possible option in dealing with terrorism. At any time, an incident may occur in which a band of political extremists will seize a large number of American hostages on foreign territory, negotiations have failed, the captors appear on the point of killing the hostages and the local government is unwilling or unable to protect persons within its borders.

Public pressure would not permit say political leaders to stand by while Americans are being shot. The government would either have to yield to the terrorists's demands or risk the use of military force. At stake will be the lives of the hostages as well as the image of the U.S. government.

Right now, the option of a rescue operation with some reasonable expectation of success hardly exists. There is great danger—massacre of hostages, starting a minor war—in deploying the wrong military instruments out of desperation. The rescue of hostages is one of several foreseeable missions that might arise in this new area of conflict. Such missions, if they are ever undertaken, should not be "black bag" operations, even if they must necessarily remain covert during the execution phase. They may be considered legitimate applications of force in extreme circumstances, and an appropriate function of the legitimate armed forces of the nation.

We already posses some components for a counterterrorist force: the Army's Special Forces, Ranger battalions and airborne units, the Navy's Seals, the Fleet Marine forces, and the Air Force's Special Operations squadrons. But they could not be assembled rapidly to deal with a fast-breaking crisis. Again, the problem is the lack of an organization for bringing selected capabilities together. We are not likely ever to use such a force merely because we have it. Although a regular target of terrorism, Israel has attempted only one such rescue attempt beyond its borders.

If a foreign government did not agree at least tacitly to such a mission being carried out on its soil, it would constitute a violation of sovereignty, though not necessarily an act of war. Clearly, military force is a last resort, either abroad or at home. But in an age of terrorism, it is an unpardonable vulnerability not to have a military option at all, however reluctant we may be to use it.

THE NEED FOR INTELLIGENCE

Far more attention needs to be focused on intelligence activities directed against terrorist groups that could threaten the security of the United States or the safety of U.S. citizens.

Intelligence information about terrorist groups is hard to obtain. They are seldom sophisticated enough to be vulnerable to sophisticated intelligence-gathering techniques, such as electronic surveillance. We have no radar to warn us of incoming terrorists. Watching where the money goes, a common intelligence technique used in gathering information about organized crime or smuggling, does not work well in the domain of terrorism. Terrorist operations are low-budget affairs; there is no cash flow.

Knowing what is going on inside a terrorist group is mainly a matter of human intelligence work—plants and paid informants—but most terrorist groups are small and difficult to penetrate. Such efforts require years of patient work. In some cases the chances for preventive action may be so low that the costs and risks are not worth the effort; or, if we are talking about the domestic scene, invasions of privacy may result.

Intelligence and local law enforcement officials complain, with some justification, that directives are often poorly written and that overcautious higher officials tend to interpret the directives too conservatively, for fear of getting into trouble. This conservatism is perhaps an understandable reaction to revelations of prior abuses and the widespread distrust of government in the post-Vietnam, post-Watergate era; but the result is an atmosphere in which it is extremely difficult to collect and maintain information about terrorist groups. The perceived conflict between civil liberties in a democratic society, on the one hand, and the intelligence activities necessary for the legitimate suppression or at least containment of terrorist violence, on the other hand, is somewhat artificial.

There remain, however, some tough questions which, like it or not, we must confront in this environment of new dangers:

Federal regulations which are intended to preserve the integrity and confidentiality of information files maintained by various gov-

ernment agencies may in some cases also limit the sharing of intelligence data; one consequence is a wasteful duplication of effort and, more important, the possible lack of vitally important information in a crisis. Should exemptions be created?

We divide threats, and responsibilities for dealing with them, into foreign and domestic categories. But what happens if an American citizen is suspected of having joined a terrorist group abroad or of being a confederate of a foreign terrorist group in this country?

We may all agree that nuclear proliferation is a problem, especially the alarming potentiality that terrorists might acquire a nuclear capability, and that we would want our intelligence services to be able to identify in advance any potential threats of mass destruction. Many foreign students are today studying advanced nuclear physics in American universities. Some of the technical training they receive here will theoretically enable them to design nuclear bombs. Should we attempt to keep track of such graduates once they depart the country? Should universities make available to the FBI information on these students? On what grounds?

We have greater freedom of action abroad, but we have no assurance of finding out what goes on inside the heads of perhaps 50 or 60 groups around the world, some of whose members number in the hundreds, while others consist of perhaps a dozen "bombers and shooters." But the task is not impossible. We might consider a simple surveillance approach. As a guess—and it is no more than that—there are probably fewer than a thousand hard-core terrorists in groups that have operated internationally and would be of concern to the United States. We may know the names and locations of several hundred of them, and would want to watch closely a smaller number. If the movements of our prime suspects begin to intersect, we would increase the surveillance and alert potential targets in the area. In those terms, the problem at least seems more manageable.

More can also be done with the intelligence we already have both in terms of analysis and in terms of devising better systems for its prompt assembly and dissemination. When a terrorist incident occurs, there is little time to comb through files or read several hundred pages or reports.

The greatest threat posed by terrorists now lies in the atmosphere of alarm they create, which corrodes democracy and breeds repression. There is also the danger that the United States will be made to look like a blundering giant in dealing with some future terrorist incident; if it does, the world will perceive a degradation in our ability to handle all crises. If the government appears incompetent, public alarm will increase and so will the clamor for draconian measures.

To forestall the temptation to overreact, and to preserve the image of American strength abroad, we must be able to deal effectively with terrorism. The measures described here would prepare us to do so.

ANYTHING BUT A DOMINO THEORY

Mr. HARRY F. BYRD, JR. Mr. President, the Senator from Iowa (Mr. CLARK) after talks with President Carter and Secretary of State Vance, has urged "extreme caution" over any deeper U.S. military involvement in the conflict in Zaire.

The senior Senator from Virginia is in full agreement with the senior Senator from Iowa in urging "extreme caution." Our country already has airlifted some $2 million worth of military and medical supplies to Zaire, to repel what Zaire calls "an invasion" from across its borders with Angola.

The Petersburg Progress-Index of March 18 had an excellent editorial on this matter captioned "Anything But a Domino Theory."

The publisher of the Progress-Index is Rufus M. Josey, and its contributing editor is Edward A. Wyatt IV.

I ask unanimous consent that the Progress-Index editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ANYTHING BUT A DOMINO THEORY

There are few subjects or lands which most of us know less about than Zaire, but it is brought to awareness by the news the United States has approved and already acted upon an urgent request for spare parts and other military equipment to help repel invading troops from Angola. President Carter personally approved the proposal to go to the aid of Zaire.

It may well deserve the consideration. As African nations go, Zaire has been more friendly than most to the United States. Apparently it does not make the honor roll for respect of civil rights, supposedly a cardinal concern of the Carter administration, but neither does it have one of the worst records.

Unconfirmed reports have it that Cubans based in Angola are leading the attacking forces. Regardless of any notions about improving relations with Cuba, it may be desirable for the United States to try to offset the advantage which Cuban assistance gives the enemies of Zaire.

With Vietnam fresh in mind, Americans may be forgiven for wondering whether intervention in wars between the African states is a good idea. We assume the State Department has done enough homework to be convinced that it is in order. But how good could information be about the overall scene and its political currents?

We may not be justified in invoking George Washington's Farewell Address with its advice against foreign entanglements. By wise sources we are assured that all foreign entanglements are not necessarily in the category with the long undeclared war in Southeast Asia. It does seem that Zaire's problems is better suited for the attention of the United Nations, even with its capriciousness or impotence conceded, or of the Organization of Africa Unity.

The articles which are being sent posthaste to Zaire include spare parts, parachutes, medical supplies, combat backpacks, communications material, combat rations, and portable fuel containers.

If and when the United States starts flying "military advisors" into Zaire, that would be time to start worrying in earnest. And perish the thought that anyone in authority should discover the ingredients of a "domino" theory among the multitudinous nations of Africa or start explaining the justification of no-win wars.

MODERN WAR TECHNOLOGY NECESSITATES A GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, for the past several years I have urged ratification of the Genocide Convention. The purpose of the treaty is to make the "intent to destroy, in whole or in part, a national, ethnical, racial or religious group" an international crime.

Today the threat of genocide is greater than ever before. The numbers of people and conflicting beliefs continue to grow. The biggest and most frightening development, however, has been in the weapons of war. Modern technology has given us a wide array of techniques which make it easier than ever to selectively eliminate particular groups.

Biological warfare, particularly germ warfare, can be selectively targeted. In the French and Indian War, masses of Indians were purposely killed by giving them blankets infected with smallpox. The tragedy of this genocidal use of biological warfare is increased when we consider the many other tactics available to make genocide an easy feat. Chemical warfare and nuclear warfare are grave tools of war. We cannot forget the instant destruction of Hiroshima and Nagasaki. Add to these methods of warfare conventional weaponry, which Hitler proved unquestionably effective in wiping out millions of innocent people.

It is obvious that the world's rapidly advancing war technology compels us to act. We have no hesitancy about working from the strategic end—the SALT talks. Why then are we so hesitant to condemn the actions which would make use of weaponry? The Genocide Convention is a treaty which gets at the core of the issue; it condemns genocide and genocidal attempts and morally obligates those who sign it to do all they can to prevent these heinous murders. The United States has not done this. What must the rest of the world think of us?

Mr. President, 82 other countries have ratified the Genocide Convention because they know it is a valuable foundation for international harmony, an expression of international morality we all can, and must, share in order to survive.

MILITARY RETIREMENT

Mr. THURMOND. Mr. President, it has been distressing to note, from time to time, the misleading and slanted stories carried in the American press concerning the military and military retirees.

Recent articles and news reports on military retirement by the news media are poorly researched and apparently even deliberately misleading and slanted by originating sources. It has resulted in many followup stories and editorials containing the same kind of antimilitary bias. In my judgment, the media has the responsibility to present balanced reports and to set the record straight when reports are distorted.

Mr. President, to allow misstatements about military compensation and retirement to go unanswered is a mistake. The Congress established the provisions under which our servicemen and women serve our country, and we should be first to reaffirm our faith in those who serve. We should be in the forefront in setting and keeping the record straight.

The editor of the Retired Officer magazine, Col. Minter L. Wilson, Jr., U.S. Army—retired—has addressed this issue in his fine editorial entitled, "Intellectual Dishonesty," in the March 1977, magazine.

Mr. President, for the benefit of my distinguished colleagues who are concerned with our Nation's defense and our national security, I ask unanimous con-

sent that Colonel Wilson's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INTELLECTUAL DISHONESTY

TROA PROTESTS

TROA's telegram (not yet answered) to the Washington Bureau Chief and the AP President in New York read:

"We protest AP's intelectually dishonest story 'Military Pensions' by Brooks Jackson which moved on the wire at 10:10 EST today.

"The story is unworthy of the good name of the Associated Press. Not only does the author compare retired pay costs (not pensions) of military retirees from all the armed services to active pay costs for the Army alone, but also he fails to recognize in any way that those military retirees earned their retired pay. That pay was part of the total compensation package earned over their productive years which for most covered three wars—WW II, Korea and Vietnam.

"At this late date, to imply, as the writer does, that each retiree is drawing an unjustifiably huge amount is ridiculous. Your readers should know that the average retired pay of all military retirees is $6,648 annually—not much above the official poverty level. And the military retiree pays taxes, too.

"The obvious bias of your story is too much. We request you set the record straight."

SETTING THE RECORD STRAIGHT

Since AP officials have not yet seen fit to set the record straight, what are the facts?

First, those stories appear to have been based on a U.S. Civil Service news release of November 2, 1976. The AP moved them over their wires on January 24 and 25, 1977—twelve weeks after the basic news release. That is not precipitate action and should have given adequate time for research. It seemed strange to us that AP's Pentagon correspondent hadn't written the stories. Perhaps he would have brought too much expertise to the job—even managed to bring some balance to the picture presented.

PARADE'S STRANGE REASONING

The PARADE material seems to be based largely on a HARPERs magazine (Des. '76) article by Rep. Les Aspin (D–Wis). As is usual in Aspin's "destroy by press release" style, the "facts" are selected to give the desired effect. In this case, PARADE editors did nothing to give balance to his prejudiced views. They merely compounded the problem by providing poor perspective for the figures used.

Consider this example. As of June 30, 1976 (latest available data) there were 1,096,184 military personnel receiving retired or retainer pay. Parade mentioned that, but forgot to tell you 751,244 were enlisted persons. That is 69 percent enlisted, 31 percent officer. Yet, Parade chose to focus on an officer (a recently retired colonel whose retired pay is obviously considerably higher than the $6,648 average) and suggest to its readers that once the officer retires he should somehow be restricted in the freedom all Americans enjoy (out of the military service) to work where and for whom they please. The Parade editors obviously don't believe a military retiree should be allowed to work for the federal, state, or municipal governments, regardless of the expertise they bring to the job.

In their view, we deduce, Congress should pass laws which prevent government retirees from working for any other level of government because they might qualify before they die for a second retirement income. They forgot to mention—or possibly they do not know—military retired pay is not only deferred compensation earned over 20, 30 or more years arduous service, but is also retainer pay which keeps the retiree subject to the Uniform Code of Military Justice and recall to active duty at any time.

There is no logical reason why the military retiree should be deprived of retired pay or restricted in his quest for a job to better support his family and community.

Parade repeats the ludicrous Aspinism that the "current armed forces pension plan will cost the American taxpayer $34 billion a year by the year 2000." To be factual, they could have added that Aspin's annual salary of $57,500, based on the same five percent inflation factor, will be almost $200,000 annually. Or, your $5,000 automobile will cost about $17,000. And, an Army private would be making $25,356.

Absurd? You bet! Given certain assumptions, the figures don't lie, but the politician surely does manipulate them to his own ends. And the journalist who should put them in perspective for you fails. Worse yet, he doesn't even try.

THE AP STORIES

Returning to the Associated Press stories, let's consider why they were so objectionable.

It would be proper to recognize at the start that the logic in paying the military person a fair salary is at least as compelling as for politicians or anyone else. From time to time, that compensation needs to be reviewed to insure that it continues to be based on conditions today and is designed to attract quality men and women to make the sacrifices necessary in the defense of the United States in the future.

These AP stories failed to recognize that simple truth. As with so many press accounts, the negative aspects were emphasized. Service people readily recognize the errors, omissions and distortions, but what is the effect on the public? Too many, not knowing any better, become resentful of the "military."

PARTIAL TRUTHS AND OUTRIGHT ERRORS

AP reports military "retirees—about half in their late 30's and early 40's—can legally receive full pension checks and full pay for their civilian jobs." The Dual Compensation Act of 1964 provides that *regular* officers who are civilian employees of the U.S. government currently forfeit 50 percent of all retired pay above the first $4,045. Enlisted men and *reserve* officers are exempt from those provisions. In addition, the unfortunate wording of the AP statement projects the untrue inference that half the retirees holding federal jobs are in their late 30's and 40's. The fact is only 28 percent are under 45 years of age.

By selective omission of pertinent facts, AP manages to imply that most military personnel voluntarily retire after 20 years service, regardless of age. To be objective, AP should have mentioned that only one of every ten individuals who enter the military service ever reach retirement eligibility. Not only is the military career more hazardous than the civilian occupation, but it also demands a unique degree of dedication to duty even above self and family. Few are able and willing to stay in service, despite the possibility of early retirement. Consider, too, that many who have served honorably are forced out early—some prior to retirement eligibility—victims of the "up or out" policy which is designed to keep only the best leaders. Others, having served 20 or more years, are retired involuntarily to keep the ranks filled with young, vigorous personnel.

Serious factual inaccuracies were repeated by AP in stating that the military retiree "gets from 50 to 70 percent of salary as pension." Military retired pay is computed on *base* pay, not on salary. The military equivalent of salary for purposes of compensation comparison is Regular Military Compensation (RMC). RMC is defined in law as the sum of basic pay plus quarters allowance plus subsistence allowance plus federal tax differential. For retirement at 20 years service, military retired pay is between 33 and 40 percent (depending on grade) of RMC. The maximum possible retired pay for 30 or more years service is between 49 and 61 percent of RMC. Therefore, the range of retired pay as a percentage of "salary" is 33 to 61 percent—not AP's 50 to 70 percent.

In contrast, to AP's statement that "many private pensions provide less than half final salary as a pension," we must point out that the *typical* private pension plan provides the retiring employee with more than half his salary. The further statement that "most private pensions (are) generally smaller than the military stipend" is a generalization which is unsupported by available data.

AP points out that "the annual cost of all military pensions has grown almost 10-fold since 1962, to $8.2 billion, while the entire defense budget has not quite doubled." Since there is no explanation, many people incorrectly assume some sinister reason. It wouldn't have taxed AP's staff unduly to have pointed out four things: (1) In recent years, funds authorized for repair or modernization of existing weapon systems, for procurement of new weapons, and for research and development, have been limited, thus automatically making personnel costs, including that for retired pay, a proportionately larger percentage of the overall budget; (2) Use of 1962 data provides a distorted base because the 1962 retired population (313,436) largely reflects the abnormally small standing forces maintained prior to World War II; (3) Since 1962, the Consumer Price Index has more than doubled; (4) The present number of retirees, while increasing, will be essentially stable into the forseeable future.

MORE AP DISTORTIONS

"Military retirement includes free medical care when space is available in military facilities, or free health insurance when it isn't" says AP, forgetting that money and doctors for military facilities have been chronically short in recent years and that the "free" health insurance is not free. The retiree pays the first $100 in charges for family per fiscal year and 25 percent of allowable inpatient and outpatient costs thereafter. In most cases, doctor and hospital fees are higher than allowable charges under the Civilian Health and Medical Program of the Uniformed Services. In addition, no reimbursement is granted for an increasing number of treatments. So the typical retiree pays substantially more than AP alleges.

"Free travel when space is available on military transport" sounds great! It is on occasion. But how many have waited days for that elusive "space," only to have to return home disappointed? Or, waited weeks overseas only to return via commercial means? Some have the time, patience, and money to wait, many don't.

"They (military members) make no cash contribution to their pensions." Since the trend in the private sector is towards *non-contributory* retirement systems, AP could have easily added that this is in line with the 1975 Bankers Trust Study of Corporate Pension Plans which reveals that *75 percent of private plans do not require employee contributions.*

AP asserts "the costs of military pensions have grown rapidly because they are pegged to active-duty pay, which has been increased to attract an all-volunteer force." What are the facts? The increases in pay to prepare for the all-volunteer force were primarily for lower grade officer and enlisted personnel—i.e., the pay grades from which members do *not* retire. Until Congress set aside the system in June 1958, retired pay was "pegged to active-duty pay" and recomputed each time there was a pay raise for the active forces. Since October 1963, retired pay has been adjusted as the CPI rose. The result is a system of 15 different retired pay scales in which persons of the same

grade and service receive as much as 50 percent less than later retirees. Understandably, those on the short end are bitter.

There are other "facts" which could be cited to illustrate the intellectual dishonesty of the PARADE and AP stories—to reinforce that a new low in incompetent and unfactual reporting has been reached. Additional light on these matters is shed in the "Washington Scene" column on pages 14–17 ("An Observation on Proposed Military Retirement Changes) and "Benefit Erosion," pages 48–50.

GRAVY TRAIN?

For the life of us, we can't find the gravy train. If there really is one, why aren't all those unemployed flocking to the recruiting stations. We do not argue that military retirement is a "bum rap." It isn't. But it is earned through long, hard hours and years of demanding, dirty and dangerous work. Nothing the serviceman or woman gets is "free."

The individual who elects a military career accepts its unique conditions—both good and bad. These include frequent separations from family, sometimes for extended periods; inconvenient moves resulting in financial loss as well as moves at inopportune times; substandard housing; and a host of other items too numerous to mention. But one more item must be listed. That is the willingness to make any sacrifice to include laying down one's life if called upon.

Military retirees fulfilled the provisions of their contract stipulated by the American people through the United States Congress. Military retirees have nothing to apologize for.

At the very time President Carter has granted amnesty to those who refused to serve their country in time of war, it is a gross paradox that some short-sighted persons would suggest the American people renege on the benefits promised those who served their nation faithfully.

Now is the propitious time for our civilian leadership to reaffirm their faith in the men and women who have chosen the military career. It is they who should be in the forefront in setting and keeping the record straight.

IOWA 2000: THE TIME OF OUR LIVES

Mr. CULVER. Mr. President, in 1974, over 50,000 concerned Iowans participated in a series of local and regional meetings to look ahead to what our State would be like in the year 2000. Their discussions ranged across a variety of important issues, including energy availability, economic growth, and the use of our natural and human resources.

The positive response of so many citizens and the energy and dedication which they brought to their task was particularly gratifying to me because I had initially suggested "Iowa 2000" to the people of our State in 1972. Underlying the program was the recognition that actively looking ahead could not merely help to forecast, but, at least in part, shape the future. In fact, there is not a single, inevitable future, but a range of alternatives and the decisions which we make today will influence the kind of lives we will lead in the years ahead.

The next stage of "Iowa 2000" is now taking place. In eight regional meetings across the State, Iowans are examining the nature of work, leisure, and volunteerism in the 21st century and, more importantly, what we want them to be like. Few topics are as important.

I believe the theme which highlights these meetings—"The Time of Our Lives"—expresses well both the personal significance and the optimism which Iowans will bring to this endeavor. I am looking forward with pleasure to ad dressing the State-wide conference which will culminate this stage of "Iowa 2000" at Iowa City on June 2.

Mr. President, a recent editorial in the Des Moines Register, "Thinking Ahead Again," looks at some of the issues Iowans will be asking about work, leisure, and volunteerism. And an article in the February 1977 issue of the Futurist cites some telling current trends, and ventures some predictions about "Work in the Year 2001." I ask unanimous consent that they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THINKING AHEAD AGAIN

A modified version of the same grassroots-first then statewide-conference process which produced the first Iowa:2000 report in 1974 begins again this week at Simpson College, Indianola, and Kirkwood Community College, Cedar Rapids. These will be the first of eight regional sessions leading to a statewide conference June 2 in Iowa City.

Unlike the broad overview of state problems and possibilities covered by participants in the 1974 sessions, the theme for 1977 participants is "The Time of Our Lives"—how Iowans may be spending their time in the Twenty-first Century in terms of work, volunteerism and leisure.

And how they should be spending their time.

What may seem at first a minor concern has major ramifications. For example, more and more women are joining the work force. Should government encourage this—with child-care facilities and tax policies—or discourage it? Or let whatever will be, be?

Another trend is toward more leisure time. Should the state plan on more parks and expanded continuing-education programs? Should it encourage more participation in volunteer community and social services (through tax policies, for example)?

Jobs are changing, too. Agriculture outranked both manufacturing and government in number of employes 30 years ago. If present trends continue, the order will be reversed in the year 2000: government, manufacturing, agriculture.

Conferences such as the first Iowa:2000 or this new round do not produce magic solutions or discover sure-fire paths to Utopia. They help create an awareness of trends, the consequences of those trends, and the steps that might be taken to halt or reverse a trend that has unfavorable consequences.

In devoting their energies to this process, the University of Iowa (a co-sponsor), President Willard Boyd (who chairs the 1977 planning committee as he did that of 1974), committee members and conference participants are making an important contribution to the Iowa of tomorrow.

WORK IN THE YEAR 2001

(By William Abbott)

Technological breakthroughs will continue to change the world of work in the years ahead. But the workplace may be affected even more by the continuing revolutions in values, consciousness, knowledge, and equality. These changes are already transforming labor unions and universities, and have brought about an unusual alliance of Big Business, Big Labor, and Big Government.

Although the work environment will expand in the next few decades to include outer space and the depths of the oceans, the most important changes in the workplace will be considerably more down to earth. Those changes will involve how the worker prepares for his job, how he updates his training, and how he interacts with management as part of the decisionmaking

Skilled workers will have to attend school at least four times in their lives to be totally retrained. Frequent retraining is already necessary in a number of trades. For example, members of the Graphic Arts International Union must now be retrained three or four times during their working lives, according to Union President Kenneth Brown. The International Brotherhood of Electrical Workers now has 57 of its members rewriting textbooks because about 10% of the technical knowledge in the industry becomes obsolete each year.

Industrial workers will be employed in autonomous work teams, making their own production decisions. Factory work will be organized horizontally with employers and employees making joint production decisions. This "unimanagement" is already occurring in a few factories as a result of agreements between the United Auto Workers (UAW) and the Harman, Rockwell, and Dana Corporations. At Harmon Industries in Bolivar, Tennessee, worker-supervisor core committees plan production within each department subject to review by a plantwide union-management work committee. At a Dana Corporation plant at Edgerton, Wisconsin, production committees of workers and foremen elect a union-management screening committee, which sifts the production committee's suggestions as to how best to organize the factory's production. In Europe, co-determination has made rapid strides. A 1973 Swedish law put union representatives on corporate boards. A 1976 West German law gives workers the right to elect half of the directors of firms employing over 2,000 people. Worker participation in management is increasing dramatically in a number of Western and Eastern European countries. The reason behind this movement, according to Andre Thiria, International Secretary of the Swedish Confederation of Trade Unions, is that demands are being raised for a better work environment and more satisfaction on the job, while at the same time mechanization and streamlining of production makes it more difficult to meet these demands." Joint labor-management decision-making is an attempt to solve this dilemma.

Workers will schedule their own hours under flexitime. Many will work at home. Most workers will probably hold two jobs or go to college on a part-time basis. (The need for lifelong learning will be a generally accepted principle.)

Economist Eli Ginzberg points out that 45 percent of employed Americans now work less than full-time for the whole year and that 30 percent of all work is performed by less than full-time workers. This trend is likely to continue.

Collective bargaining will continue, but fist-banging will give way to joint problem-solving task forces and arguments over the interpretation of data in books and budgets that are open to labor as well as management. Labor relations will increasingly become a battle among intellects. Union leaders are going to college, and are beginning to run for office by pointing to community college degrees in labor as a qualification for elected office. Some go on for a four-year education. In at least one instance, company executives and union leaders sit in the same class as they pursue a labor studies two-year degree at Black Hawk College in Moline, Illinois. In 1976, faculty, staff, and administration at Federal City College (now the University of the District of Columbia) ran a joint program where labor played the role of management and vice versa.

In order to keep their identity and the loyalty of the members, unions will become more a way of life than a simple bread-and-butter organization. UAW sends entire fami-

lies to its extensive Walter and May Reuther Family Education Center at Black Lake, Michigan. Husband, wife, and children are all taught union leadership. Retirees now play an integral role in the union's program. Increasingly, the kind of leadership UAW is talking about is that of meeting the needs of the whole personality. Next in the union's bargaining program, according to President Leonard Woodcock, is a sabbatical leave just like that of university professors.

MULTIPLE REVOLUTIONS TRANSFORM THE WORKPLACE

On top of a continuing technological revolution in the 1970s, the decade has been marked by several concurrent revolutions: the Equality Revolution, the Knowledge Revolution, the Value Revolution, and the Consciousness Revolution.

The Equality Revolution, while far from complete, nevertheless has brought some giant employment strides. Blacks and other ethnic minorities have made gains largely through the impetus of the civil rights struggles of the 1960s, often consummated in affirmative action legislation. In the 1970s, women have also demanded equal treatment. In employment, while the number of employed males has increased 26 percent since 1950, the number of female workers has soared 93 percent during the same period.

By the year 2001, there will probably be new battles launched by those struggling against established orthodoxies. Social utopia will remain elusive as solutions to old problems create difficulties anew. People with an ideological, emotional, or material investment in what is established will be confronted by an imaginative avant-garde pressing for ever greater rapidity of change.

If one accepts Arnold Toynbee's definition of the proletariat as that group which feels itself disinherited, the "lower class" may be that which gets pushed aside in the Knowledge Revolution, which is beginning to mix practical work values and a liberal education together into a new recipe for success, leaving behind those who cannot put the two together inside their personalities. To a greater degree than ever before in history, tomorrow's worker will have to become something of a scholar, and today's scholar will have to learn communications, administration, and other practical skills to stay on top. Consequently, the 1980s will see more organized groups clamoring for a piece of the educational action, insisting that institutions gear themselves to meet their special needs.

In 1976, apprentices in the skilled trades began to ask for two-year college degrees which included English, humanities, and social sciences as part of their training. The Operating Engineers Union responded by initiating a dual enrollment program—a worker could study either for a college degree or for the traditional certificate. Under this program and others, job training has tended to take on the character of a general education.

A related development has been the rapid proliferation of community colleges in recent years. In a period during which many of the more traditional universities have been going through doldrum agonies, the community colleges have been thriving. In 1974, community college enrollment was up 12.1 percent; in 1975, it increased an additional 15.4 percent.

The rise of the community colleges has been accompanied by the birth of a new kind of educator who goes into the neighborhoods, plans courses with adult students, and learns to communicate with them in their language. He or she is part teacher, part recruiter, part administrator, part counselor, part planner, part innovator, and, on the whole, quite successful in these roles. This new educator does his job on campuses, in neighborhood drop-in centers, in churches, union halls, factories, and storefronts, and in homes. In the future, he may reach many people in their homes through various electronic media, as well as through personal visits.

The flaw in the new form of higher education is that research and materials development have not kept up with the innovations. The challenge to universities is to provide scholarship synthesized with nonesoteric communication styles to uphold this redefinition of education. The community colleges need the universities if they are to accomplish their mission.

WORKERS DEMAND EDUCATION

In the 1970s, the Equality Revolution has taken a social-class turn, with workers beginning to demand the same educational opportunities enjoyed by other classes. They are being attracted by colleges that count their work experience as credit toward degrees and that are best equipped to help them as adults to update or change their skills and broaden their life as well as work options.

Business also has turned to higher education for help. Industry spent at least $10 billion on its own training program in 1975. But even this staggering amount was not enough to do the job. To meet its more pressing training needs, business has looked to the higher education institutions with the most flexibility; more often than not, they have been the community colleges. Earlier this year, for example, the National Automobile Dealers Association announced a unique two-year degree program at community colleges for aspiring auto mechanics. The dealers are convinced that simply learning how to repair a car is no longer enough. An auto mechanic must also have a greater knowledge of society and be able to communicate effectively.

The UAW, in recent years, has negotiated tuition assistance ranging from $450–$700 a year. In 1976, the union bargained an increase to $900 per member per year from the Ford Motor Company. This year, the UAW expects to extend this $900 benefit to over a million workers.

Nationwide, a total of two million members of various unions are covered by such tuition aids; an additional four million unionists benefit from apprenticeship training funds, a substantial amount of which finds its way into community colleges.

In 1976, Bernard DeLury, then U.S. Assistant Secretary for Labor-Management Relations, expressed hope that the number of workers receiving such aid would soon be much higher. DeLury called for "a negotiated careers program" which would use "collective bargaining as a means of opening the door to clerical, technical, professional and management jobs for workers in the bargaining unit." Counselors would be available to advise the worker on "the need for good reading ability and language skills" and to recommend colleges and universities that could best satisfy his needs. The counselor would also "talk with management about providing opportunities to learn about the overall production in the plant and the various departments related to it. . . . The counselor would work with training and higher education institutions to develop a tailor-made, work-integrated program for this worker which leads to a credential, and perhaps even a degree in Business Administration." The International Union of Electrical Workers has already run a successful experiment for its membership in this type of counseling.

The flow of workers into college is taking place in Europe, too. A 1971 French law gives educational leaves to most of the nation's work force. The faculties of France's overcrowded universities have not been wildly enthusiastic about the idea of catering to swarms of workers. The British government has also attempted to open up higher education to the common people, and met similar faculty resistance. As the Organization of Economic Cooperation and Development's Centre for Educational Research and Innovation dourly noted, "There is no evidence that any impetus for educational leaves of absence came from the education sector itself." British historian Harold Perkin observes that while left-wing majorities now dominate many German universities, working class students are discouraged from attending them. "Left-wingers," says Perkin, "are as academically conservative and elitist as the rest."

Thus a new class struggle has shaped up, with government, business, and more pragmatic-minded unions attempting to get the lowly commoner into college, while academic ideologues, both left and right, team up to pour cold water over such a move.

COLLEGES BEGIN TO EMPHASIZE COMMUNITY SERVICE

The burgeoning community colleges and the faltering universities in the United States and Canada have engaged in some struggles over turf; however, as early as the late 1960s, survival-minded four-year institutions quietly began a shift in emphasis from the traditional academic pattern to that of community service.

A good method of measuring this change is to compare "faculty" to a new breed of professionals providing services to the academic as well as the larger community. At the University of Hawaii, the regular faculty members are called "nine-month employees," while professionals engaged in year-round service-type duties (which could mean anything from teaching to program planning to administration—or a combination of those skills) have been labeled "11-month employees." In 1973, the 11-month personnel numerically edged out the nine-month faculty as the university sought to provide more services to more people of varying ages and walks of life. This is the mark of a "communiversity," for in 1973 one out of every 16 men, women, and children who lived in Hawaii participated in some program of the University system.

Education has taken a totally new direction. People of all ages and social classes will continually have to seek an updating of their education simply to cope with the fast-paced changes swirling within the world of work. If they are to avoid drowning in the whirlpool of change, they will have to return to school recurrently to update their skills. Many of the best ideas for the future may come from senior citizens, who will have the advantage of continual educational renewal as well as the richness of their experience.

In 1976, the American Board of Family Practice made 1,400 family doctors take tests to see if they had kept abreast of advances in the field. If they failed, the Board would not renew their certification. No line of work is safe now from the demands of lifelong learning.

It should be clear that the separation between work and education is disappearing. By the year 2001, most Americans will not be able to separate one from the other very easily, and perhaps there will also be no clear demarcation between education and ordinary living.

To cope with living in today's society, 17 million people have enrolled in adult education classes. This figure may appear impressive, but it fails to match the need. A University of Texas study concluded that twice that number of people are functionally incompetent to cope with their personal consumer economics. The study warned "If the requirements change and the individual does not adapt by either acquiring more or different knowledge and skills, then that person becomes less competent."

Simply remaining proficient at living requires lifelong education, according to Edmund J. Gleazer, President of the American Association of Community and Junior Colleges.

The Knowledge Revolution is described best by Robert Hillard, educational broadcasting specialist for the Federal Communications Commission:

"At the rate at which knowledge is growing, by the time the child born today graduates from college, the amount of knowledge in the world will be four times as great. By the time that same child is 50 years old, it will be 32 times as great, and 97 percent of everything known in the world will have been learned since the time the child was born."

Many jobs will become obsolete so quickly that no one will think in terms of career education but rather of a lifetime of multiple careers.

KNOWLEDGE WORKERS WILL PROLIFERATE

One of the largest vocations will be knowledge workers, many of them condensing torrents of new information into frequent newsletters and tapes for all manner of national organizations, local affiliates, and individuals. "Capsi-Knol" (capsuled knowledge) will employ several hundred thousand readers, researchers, interpreters, writers and technicians.

Typists and file clerks will dwindle as speakwriters (typewriters that take dictation) and robotized filing machines take over routine office work. Hierarchy will vanish in offices, to be replaced by autonomous self-directors who will probably waste too much time at meetings coordinating themselves. There will be bursts of creativity before the iron law of oligarchy stultifies workers in an organization, at which point Albert Camus's idea of permanent rebellion against what exists will pick up a large following.

The alliance of Big Government, Big Business, and Big Labor in bringing about some of these changes in the workplace has created suspicions among some people who feel that the "little person" is increasingly at the mercy of giant forces. Due to their fears, the resisters have not recognized the need for rapid educational change, and thus have programmed themselves into the vortex.

People who feel powerless will form new organizations and coalitions in the years ahead in order to cope with the tidal wave against tradition and to protect the interests of the average individual in the emerging new society. They will demand decentralized, grass-roots economic and social planning where their voices can be heard and their input counted. Popular Participatory Planning (PPP) for more orderly social change (Alvin Toffler calls it "anticipatory democracy") may be as universally revered in 2001 as the Fourth of July is today in the United States.

NEW VALUES AFFECT THE MARKETPLACE

Concurrently, we are in the midst of a Value Revolution. For many people, the acquisition of material symbols no longer is the primary goal in life. A President of the United States wears blue jeans; the rich move out of the suburbs into the city's inner core; compact cars are favored by those who have long ago arrived and want to go someplace else; Ph.D.'s sneer at advanced degrees.

In gaining the world, many discovered they had misplaced their souls. While much of the population is still laboring mightily for orthodox middle-class goals, the children of the well-to-do stick an irreverent finger into the air at such strivings. This value gap caused much hostility between "hippies" and "the establishment" in the 1960s. But in recent years, in a less ostentatious manner, more people have accepted non-material values, albeit rather clumsily, because of a general uncertainty about what values should replace those being discarded.

In the future, the search for ways to fill one's leisure time with fun will intensify greatly. Alvin Toffler writes of future "experiential industries," including simulated environments that would be enclaves of the past and would allow people to experience the kind of life their ancestors lived. "Thus," Toffler says, "computer experts, roboteers, designers, historians, and museum specialists will join to create experiential enclaves that reproduce, as skillfully as sophisticated technology will permit, the splendor of ancient Rome, the pomp of Queen Elizabeth's court, the 'sexoticism' of an 18th-century Japanese geisha house, and the like."

Tourism, already big, will become bigger in the years ahead. Two decades from now, many tours may begin with an audio-visual panorama that will brief tourists on the sights they will see and get them in the right mood to visit the sites. There will also be "consult-a-historian" services where tourists can enter private counseling rooms for an in-depth talk with an expert. Regional craft people will not just show tourists how they weave rugs or fashion pottery, but will teach tourists the skills. A mark of status in the year 2001 will be to have a home furnished with the objects that you yourself have constructed.

The search for roots in a turbulent world will make history more popular than ever before, and indeed, parallels will be found between the cult of self-improvement of the 1830s and 1840s and that of the 1970s and 1980s. Perhaps history moves in cycles: The new cooperation between labor and management in the latter 1970s, coupled with way-of-life unionism, bears some striking resemblance to the old-time guilds.

CONSCIOUSNESS REVOLUTION WILL CONTINUE

And the quest for inner peace has led to another revolution—the Consciousness Revolution. "Psychenauts" (a term coined by behavioral scientist Jean Houston) are currently probing inner space to help people find levels of consciousness to better communicate with themselves and with others. Already, there are 8,000 methods advocated as the right road to happiness. Werner Erhard has already sold his "est" to 83,000 individuals at $250 each for a 60-hour "experience" in discovering alternative realms of consciousness within oneself. Awareness, a big business now, will get bigger.

People will invest heavily in psychic process classes, in meditation and other methods of inner development, finding and using senses they may have never been aware of before.

Already the consciousness movement is being co-opted to a significant degree by churches, colleges, and other established institutions who see survival or institutional progress in their ability to keep up with change. The U.S. military is researching telepathy since the Russians are also doing it.

Spiritual development and organized religion may not be quite the same in the year 2001, by humans are social in nature and they need the reinforcement of others to identify themselves. All social beliefs which attract sizeable followings, including communism, have religious overtones; hence, nothing in the future is likely to wipe human religiosity out.

The prognosis for the future can look bright with one important proviso. If the heavily industrialized nations ignore the multiplying problems of developing regions, a titanic struggle could take place between the haves and have-nots. The powerful countries of the world could make a better future guarantee if they would pool their resources to wage the only war worth fighting—the war on human misery and degradation.

A REMARKABLE PERFORMANCE IN THE MINNESOTA STATE HIGH SCHOOL HOCKEY TOURNAMENT

Mr. ANDERSON. Mr. President, we have just witnessed in Minnesota one of those remarkable upsets in competition that mark American sports.

I wish to pay special tribute today to the high school hockey team from John Marshall High School in Rochester, which became the Minnesota State High School league champion in one of the hardest-fought games I have seen in competition where hard-fought games are ordinary.

Mr. Chairman, I was privileged to be present for the championship game on Saturday, March 19, along with more than 17,000 other fans. Rochester John Marshall faced formidable odds—a magnificent team from East High School in Edina, one of our Twin Cities' suburban communities.

They were two excellent teams, but based on its season record, Edina East was the clear favorite. The John Marshall Rockets would not accept that, and they used breakaway offense and a tremendous performance by Rochester goalie Paul Butters, who had 37 saves in goal against Edina East, for a 4 to 2 upset victory.

Mr. President, I call the attention of my fellow Senators to this game because it shows what can be done by a team that refuses to lose. Coach Gene Sack and his players deserve the recognition of all for showing once again the value of healthy competition, the fine teamwork and sportsmanship it produces, and the great entertainment that games like this provide for all of us.

Mr. President, I ask unanimous consent to have printed in the RECORD the excellent reports of Minneapolis Tribune sportswriter John Gilbert on this remarkable performance by the John Marshall High School Rockets of Rochester, Minn.

I would also ask unanimous consent to have printed in the RECORD an additional excellent report on the fine team defeated in the championship game, Edina East High School, as written by Tribune writer Bruce Brothers.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Minneapolis Tribune, Mar. 20, 1977]

JM BEATS EDINA-EAST 4–2 FOR TITLE

(By John Gilbert)

Rochester John Marshall, playing with incredible poise when the whole state of Minnesota would have expected and excused panic, stunned Edina-East 4–2 Saturday night to win its first state high school hockey tournament championship.

Scott Lecy, who had scored once earlier, scored his 61st goal of the season and 131st of his prep career with 1:01 gone in the third period to send a record championship game crowd of 17,083 into bedlam.

The Hornets kept up their attack, intensifying it as the minutes passed, but sophomore Todd Lecy fought off a desperate check and scored into an open net with only 58 seconds remaining and the JM Rockets put their fans into orbit.

Paul Butters made 15 of his 37 saves in the final period, many of them sensational, and JM survived being outshot 39–14. Scott Lecy, with two assists to go with his two goals, ended up with his game winner after linemates Bruce Aikens and his younger brother, Todd, had worked a play that narrowly missed. The cool Aikens circled for the missed shot and fed Scott in the slot.

The tournament attendance of 94,772 was an all-time high, breaking the old record by 2,439 at the St. Paul Civic Center.

Those fans who anticipated an Edina-East runaway—undoubtedly a clear majority—were the most surprised when the Rockets opened the game with a little of their patented breakaway magic.

Scott Lecy put a bull's-eye pass through the surprised Hornets defense. Junior Bruce Aikens gathered the pass at full speed and, without bothering to fake, hit a shot past goalie Steve Carroll a mere 36 seconds into the game.

Scott Lecy broke in 2-on-1 on the next shift and Carroll went down to make the save. His own defenseman, John Anderson, fell into Caroll, however, and he slid almost fully into the goal. Referee Gordy Lee watched closely as they untangled, and ruled that the puck hadn't crossed the goal line. So it stayed 1-0.

But not for long. With Tom Taylor of JM off for elbowing at 6:04, the Rockets disregarded Edina-East's power play and defenseman Paul Brandrup zipped a pass straight up the middle. Scott Lecy took the pass to score short-handed at 7:24.

Edina-East outshot the Rockets 11–7 in the first period, but sophomore goalie Paul Butters, fresh from shutting out South St. Paul 1–0 in the semifinals, made some superb saves—10 in all, although the JM fans moaned that it should have been 11.

The one in question came after Butters dived for a save on Tom Kelly with 1:14 to go in the opening period. In the scramble for the rebound, a JM defenseman pushed the puck in for Butters to cover. Referee Gary Alm, watching the play, did not blow the whistle that would have indicated he had lost sight of the puck. Dave Terwilliger poked and Alm signaled goal long before the red light acknowledged it.

Edina-East, on a power play early in the second period, nearly tied when John Anderson's shot hit the cross bar and caromed down under Butters.

Gordy Hampson knocked one in after a save by Butters, but also after Alm's whistle. Alm clearly signaled no goal this time.

The Hornets' pressure was continuous as they outshot JM 13–3 in the middle period, and Kelly tied it 2–2 on a power play at 12:01 with a screened, 40-foot shot from the left side.

The only real chance JM had in the second period came in the closing minutes, when Scott Lecy cut in for a backhand from the slot on a power-play dash. It was a good backhand, but Carroll blocked it. When it trickled behind him into the crease, defenseman Steve Pepper was in position to grab the puck and flee from danger.

Rochester John Marshall	2	0	2—4
Edina-East	1	1	0—2

First period: 1. JM—Aikens (S. Lecy) 0:36.2. JM—S. Lecy (Brandrup) 7:24, Short Handed. 1. EE—Terwilliger (Kelly, Pearson) 13:46.

Second period: 2. EE—Kelly (Pepper, Donnelly) 12:01, Power play.

Third period: 3. JM—S. Lecy (Aikens, T. Lecy) 1:01, 4. JM—T. Lecy (S. Lecy, Brandrup) 14:02.

Saves: Butters, JM, 10–12–15–37; Carroll, E-E, 5–3–2—10. Penalties: JM 6, Edina-East 4.

NOBODY BELIEVED ROCHESTER COULD HUMBLE EDINA-EAST

(By John Gilbert)

"I don't think Edina believed we could beat 'em," said Scott Lecy as he sat on a bench in the jubilant Rochester John Marshall dressing room following Saturday night's state hockey championship. "I don't think they believe it still."

Then he laughed, and rested his head against the wall, overwhelmed with enjoyment.

Coach Gene Sack, always hopeful, still had not dared to be really confident that his Rockets could go all the way in their first tournament in his coaching term.

"I can't believe the way they acted this morning," said Sack, sucking on a victory cigar. They were playing poker in the rooms, and I'd try to get 'em to converse a little about the game. I'd say, 'Gee, you guys, we came this far, it'd be nice to win the title.' And they'd say, 'Yeah, yeah, coach, we'll get 'em . . . gimme a card.'

"I knew Edina had a great team, they fly. But I thought, when we get out there next to 'em, they're high school kids just like we are. They're 17- and 18-year-old kids, they make mistakes, too. The kids had more confidence than I did, but all I kept thinking is that they couldn't shut out Lecy and Aikens two nights in a row—nobody can."

When both were blanked Friday night, Todd Lecy, Scott's sophomore brother, got the goal that beat South St. Paul 1–0 in the semifinals.

Paul Butters, the sophomore goalie made 37 saves in both games.

"We weren't going to change our style for this game," said Bruce Aikens, the junior left wing on the Lecy-Lecy-Aikens breakaway unit. "When we came here I was just hoping we wouldn't wind up in the consolation."

The dressing room scene was a time for one-liners, the youthful Rockets' time of their lives, although with only four seniors on the club they plan to be back next year as something other than the Cinderella underdog.

Todd Lecy sat down in the corner and opened a flip-top can, spraying black cherry soda around the area. How would Todd spend the night, which was certain to contain a giant celebration?

"I'll sleep," he said firmly. Todd only 16, was suspended for nine weeks for partying after the fifth game of the season.

"Don't worry, he'll sleep," laughed brother Scott. "He's learned his lesson."

While Edina-East had convinced the whole state that it deserved to be rated No. 1 by beating powerwul Roseau 2–0 and two-time champ Grand Rapids 6–5, the JM players had hoped they'd play Edina.

"I thought we might be awed by Grand Rapids," Scott Lecy said, "being northern team, defending champ and all. I was hoping we'd play Edina, we all wanted to."

Then it was time for Scott Lecy to throw a dart at the people who belittled JM's record—now 25–2—because it came against weak competition.

"Everybody talks about the Lake Conference being so strong," said Scott. "I don't know, we played three of their teams and handled 'em pretty easily. Maybe their schedule wasn't so tough after all."

Rochester John Marshall whipped Burnsville 6–4 in the Section 1 semifinals—Burnsville being the only team to beat Edina-East before last night—and then roared from a 2–0 deficit to thrash Jefferson 7–3 in the Section 1 final.

Of course, JM didn't exactly handle the Hornets last night. Lecy was surprised that Butters made 37 saves to only 10 for Edina-East goalie Steve Carroll. The Hornet pressure was for longer duration, if not any more dangerous.

With the score 2–2 in the third period, the Rockets' big line blasted off. "Todd put me in," Said Aikens, "but I was coming fast and in too close and the puck was on my backhand. I just batted it, and went after it into the corner. When I turned, I saw Scott coming down the slot. He put 'er away."

Aikens makes it sound like the slick, deadly accurate passes the line makes are second-nature. "They are," he said. "We've played together so long, we know where to look for each other. It'll be hard playing without Scott next year."

Sack, still grinning and enjoying himself immensely, said, "Maybe they'll expect us to make it next year, and the pressure will be on to win it, now. A guy might be smarter to come up here and lose the first game the first time, just to work up from the bottom. But I'm 52; I don't have that much time."

Sack and Scott Lacy were at a special dinner just before the game. "But Scott couldn't eat," said Sack. "As it turned out, Mark Gherity from Southwest ate Scott's dinner."

But that was the last thing anybody took from the Rockets all night. Jeff Nelson, perhaps the most heroic of JM's corps of unsung defensemen, was diving and blocking shots and taking out Hornet forwards in the slot most of the night, "That's all right," he said, "the scorers deserve all the credit."

But the whole JM team deserved the credit. The celebration will be today in Rochester. The official time is 1 p.m., but it doesnt really matter. It will probably be an all-day thing.

EDINA PLAYERS MISS TITLE, BUT STILL HOLD HEADS HIGH

(By Bruce Brothers)

Heavily favored Edina-East had lost the state hockey championship 25 minutes earlier, but players and fans alike were holding their heads high.

"They're a super team," East defenseman Steve Pepper said of Rochester John Marshall, which defeated the Hornets 4–2 in the St. Paul Civic Center. "They deserved to win. We played as hard as we could. The shots just didn't go in for us."

Pepper, a senior who is being highly recruited by several major colleges, was stuffing his equipment into an old tan duffel bag for one last time as an Edina hockey player. He has a future, but for the moment all he could think of was the past.

"Our hard first two games wore us down, I think," he said. "They were a little better than we expected, a little quicker. That Lecy, the senior Lecy (Scott, who scored two goals), is really good. He went around me one time with no trouble."

Willard Ikola, the coach who has taken Edina to the state tournament 11 times in 19 seasons, took the defeat philosophically "They had some quickness," the coach said. "They caught us a couple of times and that was it.

"When you outshoot a team . . . well, I thought we carried play a bit, but we couldn't put the puck in the net. That's the name of the game."

Edina-East had 39 shots on goal to 14 for John Marshall, but three of John Marshall's shots came on breakaways. Two were against goalie Steve Carroll, putting the Rockets ahead 2–0; the third was against an empty net for the final tally.

"We knew they could play that breakaway style of hockey," Carroll said. "They got a couple of breaks and that was it." He said his team needed the first goal of the third period after it battled back to tie 2–2, "but they got it instead."

Facing a 3–2 deficit in the final period, the Hornets threw everything but Ikola's Alpine Fedora hat at Rochester goalie Paul Butters, who stood firm. "And he's a sophomore, too," said Dave Terwilliger, who had poked in East's first goal.

"It just wasn't our day, I guess," Terwilliger went on. "We played pretty much as well as we could. They had a good goalie, and we didn't have all the luck we could have."

He smiled. There were no tears in the dressing room. "Only three teams in the state," one player said, "win their final game."

By now the players had fininshed packing their gear. They headed, slightly disconsolate, for the exit. Outside, however, the Edina-

East band swung into one more version of the school song. Down the hall Edina fans had formed two lines for their heroes to walk through. The players seemed to pick up an extra bounce in the their steps as they marched out.

SEABED POLITICS

Mr. PELL. Mr. President, today I had the great honor of introducing, at a luncheon given by the Woman's National Democratic Club, Dr. Bernardo Zuleta, the United Secretary General of the United Nations. Dr. Zuleta, who is Secretary General Waldheim's Special Representative to the Law of the Sea Conference, spoke on seabed politics and the very difficult negotiations underway to establish a legal regime governing the exploitation of deep seabed resources.

I have known Dr. Zuleta for some years. Dr. Zuleta and I have both been deeply interested and involved in the Law of the Sea negotiations even before they formally began under United Nations auspices in 1973. Ten years ago, I introduced a Senate resolution on ocean space calling for negotiations on the kinds of issues now being addressed at the Law of the Sea Conference. At about the same time, Malta's Ambassador to the United Nations, Arvid Pardo, was calling for negotiations on the seabed to secure it as the "common heritage of mankind." While I was working to generate support on a broad range of ocean space issues, Dr. Zuleta was working, a member of Colombia's U.N. delegation, to promote the development of a legal regime for the seabed.

Dr. Zuleta's remarks today on the status of the negotiations on the seabed were most timely, as a special meeting was held earlier this month in Geneva in an effort to begin a process of hard bargaining to find a way to accommodate the various national interests in the deep seabed.

I fund Dr. Zuleta's analysis and observations to be highly thoughtful, perceptive and—most of all—encouraging about the prospects for successfully concluding a comprehensive treaty. In this latter connnection. Dr. Zuleta said that—

We are very close, much closer than is generally understood, to achieving one of the most important international treaties in history. . . .

I would like to share with my Senate colleagues the full text of Dr. Zuleta's remarks today on these very complex, difficult, and important negotiations.

Mr. President, I ask unanimous consent that the full text of Dr. Zuleta's remarks be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY MR. BERNARDO ZULETA

It is a pleasure to be in Washington at this most beautiful time of the year, and a privilege to address the Woman's National Democratic Club. I would like to thank your organization for this opportunity and all of you present for your interest, or willingness to be interested, in the rather complex problems that we face in the Third United Nations Conference on the Law of the Sea.

I am also particularly pleased, may I say, to be introduced to you by my good friend Senator Pell. One cannot overstate how much we owe to him and the few others like him in positions of leadership here and around the world who were years ahead of their time in recognizing the importance of a new world law of the sea, and who have done so much to develop understanding of the issues involved.

Concern over sea law has in fact been growing since the end of the second world war as changes in technology, for better or worse, have forced awareness that the old concept of three-mile territorial waters and complete freedom of the seas beyond that limit were becoming obsolete, and that freedom in many ways was turning into a license for abuse.

In the case of the United States, it was the new technology for off-shore oil and gas drilling that led President Truman to extend your national jurisdiction over large areas of continental shelf, although curiously Mr. Truman at the time was more concerned with federal vs. state rights rather than the international consequences of his action. In Geneva, at the First U.N. Conference on the Law of the Sea in 1958, worldwide recognition was given to coastal state rights over the continental shelf up to a water depth of 200 meters or even deeper if technologically exploitable.

More recently, it has been advances in fishing technology, threatening to deplete entire species in your traditional fishing grounds, that led to the U.S. 200-mile reserved area which went into effect on the first of this month. And, in one form or another, a similar 200-mile extension of coastal state rights is rapidly becoming customary law throughout the world within the framework of a new legal concept, developed in the Conference on the Law of the Sea, that is described as the "Exclusive Economic Zone".

Conversely, it was the unwanted counterpart of technology, in the form of pollution, that led to the International Convention for the Prevention of Marine Pollution by Dumping at Sea, which was ratified by the Senate last year. And it is this same concern, especially with oil spillage, that is the basis for the recent introduction by Senator Muskie of even stronger legislation for the control of pollution within the 200-mile zone.

Finally, it was a new mining technology, developed for the most part by U.S. companies, that has caused the need for new rules to govern the coming mineral exploitation of the deep sea-bed, a fact that was foreseen clearly by another American President, Lyndon Johnson. As far back as 1966 President Johnson had publicly warned, and I quote his words:

"Under no circumstances must we ever allow the prospect of rich harvest and mineral wealth to create a new form of colonial competition among the maritime nations. We must be careful to avoid a race to grab and to hold the lands under the high seas. We must ensure that the deep sea and the ocean bottom are, and remain, the legacy of all human beings."

Other examples can be cited, involving not only economic but other kinds of technology, but the central point is that you have recognized, both internally and as a member of the international community, how closely the oceans are linked to other aspects of national interest and to the ecological well-being of the Earth as a whole. Other nations, with similar imperatives, have done the same. In my view, if there is one single point that has held the Third United Nations Conference on the Law of the Sea together, it is the global recognition that a new and universally accepted set of rules for the oceans is urgently needed.

As many of you are aware, however, the effort to achieve a new Law of the Sea Convention has been a long and difficult one. I believe that in the end we shall succeed, that a convention of great and lasting value will be written and then given the authority of international law through ratification by a majority of the world's governments, including your own. However, many difficult and complex problems remain and I would be less than candid if I did not admit that the next round of negotiations, which is to begin in May in New York, may prove to be decisive.

Very briefly today I would like to touch on some of those problems, and how they might be resolved, and therefore I ask you to accept that these are my own views and not an official position of the United Nations.

To begin with, it is necessary to see that this conference is unlike others that have been held under United Nations auspices in the recent past. In most cases, a conference is the culmination of a long period of preparatory effort at which ministers gather for the rather *pro forma* proceedings of amending and adopting a generally finished body of work. This was never the case with the law of the sea. Because of the tremendous variety of issues, old and new, political as well as technical, it was necessary for the process leading to consensus to be undertaken at the highest level. Therefore, the Conference became the negotiating process. I have never accepted the often used press characterization of the Conference as "deadlocked". A closer analysis will reveal quite the opposite: that there has been steady although sometimes slow progress toward our common goal through this multilateral negotiating process.

When the General Assembly established an *Ad Hoc Sea-Bed Committee* in 1967 its main objective was to examine the question of a new world régime for the floor of the oceans and the mining of their mineral resources. Before that goal could be realistically addressed, however, there were a number of related and interrelated questions that needed to be clarified, first among them being the question of national jurisdiction. To put this in another way, before we could write a code for the international area of the sea-bed, we had first to agree on where this area began.

If one were to take a broad overview of the Conference sessions that have been held since the meeting in Caracas in 1974, one might reach the conclusion that their main result was to build the basis for a consensus on these related issues, such as the limit of territorial sea, the extent of coastal state rights over the resources of broader areas under the new concept of Exclusive Economic Zone, the rights and needs of landlocked and geographically disadvantaged states, freedom of navigiation through straits and sea-lanes, the conduct of scientific research, control of marine pollution, et cetera. Without some agreement on these questions which were taken up in the second and third committees of the Conference, there could never be a consensus in the international area.

There are still issues outstanding in each of these areas, and the work of these two committees of the Conference is far from completed, but an analysis of the debate in the plenary—and the attitudes and actions of states both in and outside the Conference—would seem to indicate that a sufficient degree of consensus exists on these aspects of the negotiations to envision a final accord.

In this sense, it can be seen that the Conference has come full circle, and the stage is at last set for a concerted approach to the problems of the deep sea-bed, which go to the heart of the original mandate and are the special responsibility of the First Committee. It also seems to me that a time factor is coming into play. Were it not for the First Committee, dealing with the problems of deep-sea mineral exploitation, the Conference could go on indefinitely absorbing and reacting to the progressive development of international law, and finally emerging as an exercise in codification. The First Committee can never make this transformation, because the issues call for innovation. The

delegates in this committee are not really negotiators in the traditional sense, because there is no customary law or precedent in the field. They are inventors and architects of new concepts of law and a new kind of international organization.

Although great progress has been made on the sea-bed issue in the past three years, the slow pace of negotiations in the last two sessions of the Conference is a serious cause of concern. A situation was reached at the close of the last session which was described by the committee chairman as an impasse, which he doubted could be broken without one side or the other making a substantial change in its position. Worse still, the impasse seemed, on the surface at least, to be based on grounds of principle.

It would be foolish to minimize the gravity of such a situation. In 1970, and fully conscious of the historic initiative embodied in President Johnson's statement four years before, the General Assembly of the United Nations declared the sea-bed to be the common heritage of mankind. Although this common heritage principle may be characterized by some as *lex specialis*, most governments share the view of the illustrious Louis Sohn of Harvard who noted recently, and I quote from Professor Sohn's text, that "there is a wide consensus that these declarations actually establish new rules of international law which are binding on all states."

Therefore, it must be clear that this principle is not negotiable. There can be no convention, and no legal exploitation of the sea-bed resources, unless we can agree on a formula which is fully consonant with the concept and obligation of the common heritage.

In my personal view, however, the problem has been due less to a conflict of positions or principles, than to a reluctance of Governments to begin the hard process of bargaining until other issues were substantially resolved and until the various options open to them had been fully explored. I now believe the Governments are ready to grasp the nettle, and this is why the coming Conference session is so critically important.

In Geneva earlier this month I attended a two-week inter-sessional meeting for consultations held under the leadership of Minister Jens Evensen of Norway. Although it is my nature to speak with a lawyer's caution, I can say that this meeting was notably marked by a sense of pragmatism and an atmosphere of compromise and goodwill. While an inter-sessional meeting is informal and not in any way binding on the Conference, it is pertinent to point out that more than 80 countries were represented, including all regions and points of view, and that the talks showed clearly that avenues to compromise are open. I was delighted at this meeting, may I add, to note the very active and positive contribution of Ambassador Elliot Richardson, the new Head of the U.S. delegation.

Of course it is true that very difficult and complex negotiations lie ahead. If they are to succeed, in my view, two ingredients will be essential. First, delegations will need to avoid the reopening of positions which have been superseded by events or which detract attention from the main task. They will have to work hard and purposefully to get through the number of points still at issue. Second, they will have to avoid the oversimplification which poses a choice between an all-embracing international machinery for sea-bed exploitation and a so-called parallel system dividing the ocean riches into two halves—one for those possessing the technology and the other for the international community as a whole.

What must be found is not an either-or solution, which would be self-defeating for all, but one which meets the legitimate needs of all groups and which at the same time gives the international community certain basic assurances:

(1) that the exploitation will be conducted for the good of all mankind and not for the exclusive gain of those who now have the technical advantage;

(2) that the exploitation of the sea-bed will be efficient and effective and will maximize the mineral yield insofar as is consonant with orderly world markets and the protection of land-based suppliers of these resources;

(3) that the resources taken from the sea-bed will be made available to all nations and their nationals without any discrimination, and therefore that the international sea-bed machinery will not produce the effect of depriving any nation of its right to explore and exploit or otherwise avail itself of these resources;

(4) that all nations, large and small, will benefit from any system of exploitation chosen, and that special consideration will be given to the less developed countries in the sharing of benefits; and

(5) that the exploitation system will have the necessary legal safeguards to ensure that the law of the convention will prevail and will be protected by fair and viable instruments for the settlement of disputes.

In no way, it seems to me, do these assurances infringe on the basic rights or needs of any nation or group of nations. And within these parameters it may be possible—and should be possible—to accommodate the different views that have been expressed in the past.

I do not suggest that the way ahead will be easy. There are difficult problems to be resolved in an area for which there is little precedent and very incomplete knowledge. But in the session now before us the Governments of the world must come to grips with the question of whether they really want the kind of convention originally envisaged: that is, whether they are prepared to agree on the institutional arrangements necessary to give life and meaning to the now accepted principle of international law encompassing the common heritage of mankind.

What I hope you will understand is that we are very close, much closer than is generally understood, to achieving one of the most important international treaties in history, and our success I believe without question will give new life and heart to the entire global effort toward international co-operation which I associate with the United Nations.

And since I have mentioned two great Presidents of the United States, perhaps in closing it behooves me to recognize a third. At the United Nations a few days ago, President Carter said this:

"Today our oceans are being plundered and defiled. With a renewed spirit of cooperation and hope we join in the Conference on the Law of the Sea in order to correct the mistakes of past generations and to insure that all nations can share the bounties of the eternal ocean in the future."

There is little that I could add to that statement except that I believe that his concerns and his hopes are shared by all peoples of the world.

THE NAVY PULLOUT: FOUR YEARS LATER

Mr. PELL. Mr. President, 4 years ago next month, Rhode Island suffered an incredibly devastating blow to its economy when the Navy announced the closing of the Quonset Naval Air Station and the departure of the Atlantic Destroyer Fleet from Newport. Rhode Island, the State where the Navy was founded, has been struggling to recover from that loss ever since.

Yesterday's Washington Post carried an article by William Claiborne describing the bitter frustrations Rhode Island has faced over the past 4 years. This article, entitled "Rhode Island 4 Years Later: Pullout Still Hurts," vividly describes the economic hardship Rhode Island has endured at the hands of the Federal Government, and how the State is fighting to overcome such an enormous setback.

I doubt that most of my colleagues can understand the enormity of this impact on one small State. We lost, in 1 year, 6 percent of our total personal income earned by all residents of the State. Unployment tripled. Small businesses, the backbone of the Rhode Island economy, were reduced in large numbers.

What really hurt, though, as the article points out, is that Rhode Island had done so much to accommodate the Navy: Bonds to build schools and roads for Navy personnel and their dependents, the expensive restructuring of the Newport Bridge. Now those schools are empty, but the State keeps on paying the debt, the roads are repaved, but are scarcely traveled, and the aircraft carriers, for whose benefit the Newport Bridge was raised, no longer pass beneath its graceful archway.

Although the Navy is now missed, Rhode Islanders are looking ahead to the productive use of the Navy lands. But even 4 years after the Navy announced its imminent departure, the Federal Government is still causing Rhode Islanders to wonder about the treatment they are receiving from Uncle Sam. So far, we cannot even buy back the lands the Navy left behind.

William Claiborne has capsulized well the frustrations Rhode Island has experienced over these years, and I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RHODE ISLAND 4 YEARS LATER: PULLOUT STILL HURTS

(By William Claiborne)

QUONSET POINT, R.I.—When the U.S. Navy abruptly announced in 1973 that it was pulling its Atlantic destroyer fleet out of Rhode Island and closing its sprawling air base and Seabee center here, state officials were hard-pressed to grasp the logic of the decision.

Gov. Joseph Garrahy, who was then lieutenant governor, first heard about it on a radio newscast and, by his own account, was dumbfounded. What Garrahy heard was that Rhode Island, the smallest state in the nation, was going to absorb 50 per cent of the defense cuts ordered by President Nixon.

"I thought, 'This can't be right. That announcer has got to be wrong'," recalls Garrahy.

Raymond G. Neal, a Navy captain who recently had retired as chief of staff of the Quonset Point Air Base and who is now vice president of the Hospital Trust National Bank, Rhode Island's biggest bank, had just mailed a recommendation to bank officials that they open a new branch at the base because of "burgeoning" growth.

Then-Gov. Philip W. Noel and other top state officials had come to think of the destroyer fleet in Newport and the air base

here, which was built in 1941, as permanent Rhode Island institutions.

After all, the Navy had just built scores of new duplex housing units at $40,000 apiece, and just completed a new commissary scheduled to open days after the shutdown announcement, and had let local officials float millions of dollars in bond issues to build several new schools to accommodate dependents of the military.

Earlier, the Navy forced the state to spend an additional $8 million to change its plans for the proposed Newport Bridge so that it would be high enough to allow the passage of aircraft carriers of designs projected to the year 2000. The bridge, with a conspicuous bulge in the center, was completed in 1969.

If officials of the tiny State of Rhode Island (pop. 950,000) were hard-pressed to understand the officials of the big state of U.S. government bureaucracy (pop. 2.8 million) in 1973, they are even more bewildered now.

For after devising an ambitious industrial plan for economic recovery that would offset the loss of 17,000 military personnel and their families and 6,000 civilian workers, the state still has not been allowed to acquire the surplus Navy land it needs to build new factories.

It took the Defense Department nearly four years to release $1 million needed to fund an environmental impact study of the industrial plan, and state economists estimate that the federal government has pumped $30 million a year into Rhode Island for unemployment insurance during that time.

The General Services Administration still has not made an official fair market appraisal of the 4,600 acres of land covering 10 sites, nor the 1,311 structures the Navy is giving up.

And environmental groups have gone to court to bottle-neck the industrial development further, and in a decision bitterly received in most quarters of the statehouse, a New York federal judge last month set back plans for creating a large offshore oil-staging facility here by voiding leases for exploration of oil fields in the so-called Baltimore Canyon off the New Jersey and Delaware coasts, which could have provided thousands of jobs here.

"There's no way of describing how frustrating the last four years have been," Garrahy said in an interview in his state-house office.

"We've got the best industrial site in the whole Northeast. It's got a deepwater port, rail lines, an airfield and hundreds of good buildings for sale at surplus prices. It's a natural, but we can't do anything with it."

Meanwhile, according to Garrahy and a dozen economists, bankers and state officials interviewed, Rhode Island continues to suffer from the debilitating effects of the base closures.

After the base closings, the statewide unemployment rate soared from about 6 per cent to 18.2 per cent, rising to more than 30 per cent in some towns.

Coupled with the economic impact of the Middle East oil embargo and the national recession, the loss of the Navy's $344 million annual payroll caused an immediate 6 per cent loss in the gross state product. Rhode Island, which trailed the average national per capita income by only $9 in 1972, fell $138 behind two years later. In one year, small-business income dropped by 25 per cent in the Newport area and by 15 per cent in the Quonset Point area.

Restaurants and bars on Sailor's Row in Newport folded almost immediately and, as the Navy withdrew its forces rapidly over the first year, hundreds of rental houses and apartments became vacant.

National chain retailers which had announced plans for new outlets suddenly withdrew, leaving shopping center developers with big parking lots and little else.

Teacher employment plummeted, and several towns found themselves with empty schools and bond issues they will be paying off for years.

"There has been nobody as little as us who has ever been so devastated," said James O. Roberson, director of the State Department of Economic Development.

"Other states could absorb this. What does the Brooklyn Navy Yard mean to New York, or the Boston Navy Yard to Boston? But to us, my God, it's (the base closings) a big part of our economy," Roberson said.

With the movement of most of Rhode Island's textile industry to the South in the 1940s and 1950s, the state was left with a labor force of 430,000, nearly a quarter of them employed in the jewelry industry and a third in mostly light manufacturing. Gorham Silver and several large gold and silverworking firms are located here.

It was against this backdrop that the state launched an aggressive economic development program, committing more funds per capita on such promotion than any other state in the nation.

Among the projects designed to recoup the loss of the Navy were an $80 million mortgage guarantee program for new factories and equipment, tax-exempt industrial revenue bonds, tax credits and write-offs for research and development, elimination of property and sales taxes for factory equipment, a state-funded-job training school and other incentives.

The state also feverishly solicited new industry, building an elaborate, $200,000 "briefing room" at the Providence airport, with sliding screens and multimedia visual presentations designed to seduce visiting industrialists into moving to Rhode Island.

But the linchpin of the recovery scheme was the plan to convert the old Navy installations into nearly instant factory centers, which were envisioned as providing 10,000 new jobs at Quonset and 2,500 more in the Newport area.

Rhode Island has had some success, despite the tieup of its planned industrial land. General Dynamics Corp.'s Electric Boat Division opened a plant at Quonset that fabricates hull plates for the atomic-powered Trident submarine. The component parts are shipped to Groton, Conn., by barge.

Electric Boat, which invested $17 million at Quonset in the face of a restrictive, one-year lease, employs 5,000 workers—all hired from the unemployed work force. The division's capital investment was considered extraordinary because the state—restricted to the terms of its tenuous and temporary control over Navy land—could offer nothing more than a one-year lease, cancelable in 30 days.

John B. Dana, Rhode Island Port Authority director in charge of the Quonset Point land, also has granted one-year factory leases—permissible under the surplus land terms with the Navy—to 13 small factory owners. The businesses—regarded as the vanguard of the industrial development plans—include a sailmaker and a pipe fabricating plant.

Dana, however said that the Navy property—which includes 82 miles of paved roads, 94 miles of water lines, 40 miles of sanitary sewers and 25 miles of underground steam pipes—is overdeveloped for the use that the site is now getting.

Moreover, few industrialists are willing to make a capital investment in Rhode Island on the basis of a one-year lease. But until the state takes title to the surplus Navy, it is not permitted by law to offer more than a short-term lease.

Rhode Island officials recently took a bold step and tried to talk a consortium of two dozen oil companies into establishing an oil rig services center on the surplus piers at Quonset Point.

Encouraged by the potential for oil discoveries in the Georges Bank Field in the Atlantic and in the Baltimore Canyon, the oil companies tentatively set up a staging center here. They brought in tons of equipment, including drilling pipe and facilities for making the chemical compound called "mud" that is used as a drilling lubricant.

Richard McCone, general manager of Superior Oilfield Service, Inc., one of the lessees who located at Quonset in anticipation of a major oil find at Georges Bank, said 3,500 to 5,000 oil workers could be employed at Quonset in two years if federal government site restrictions are lifted.

"All the supplies for the rigs offshore will have to come from this staging base. Drill pipes will be overhauled, mud will have to be supplied, and the entire nuts-and-bolts backup operation will have to be made out of here," McCone said.

The environmentalists, led by the Rhode Island Conservation Law Foundation, say they are not trying to stand in the way of progress, but that they are committed to preserving the bay from industrial ruin.

Harold R. Ward, chairman of the foundation, said the $1 million promised by the Defense Department for an environmental impact study may not be enough to chart the ecological impact on undeveloped lands surrounding the naval facilities.

But in the view of bankers such as Neal and Hospital Trust president Henry Woodbridge, the surplus Navy lands are essential to Rhode Island's economic recovery. They argue that the state is "losing face" with industrialists across the country because of the bureaucractic tieups, and that chances of exploiting the potential of the Navy land may never be realized.

"How long can you hold people's hands and say, 'Here's this great industrial site, but we can't give you anything more than a one-year lease, because we don't own it yet'?" asked Roberson.

"If General Motors wanted to move their whole Detroit operation here right now, we couldn't do a thing about it. That's the frustration of it," he added.

SUPPORT FOR NOMINATION OF ROBERT S. STRAUSS TO BE U.S. TRADE NEGOTIATOR

Mr. DECONCINI. Mr. President, I rise today to speak in support of the nomination of Mr. Robert S. Strauss as U.S. Trade Negotiator. His is certainly one of the best appointments made by the President, if not the very best. Mr. Strauss is one of the most talented men in the United States and his acquiescence to serve as U.S. Trade Negotiator presents an opportunity for the U.S. Senate to quickly and enthusiastically accept and support his nomination.

I have known Mr. Strauss for a number of years and have found him at all times to be gracious, able, enthusiastic, hard-driving, polite, honest, fair, all combined with a unique ability to get things done quickly and competently. I have found him to be a wonderful family man and, through my close association with his eldest son, Robert A. Strauss, and his daughter-in-law, Olga, I have learned that he has instilled in them a close family allegiance that can, and often does, mean more than any of his other great achievements. He succeeded as treasurer of the Democratic Party when it was $9 million in debt and, most recently, he succeeded as the chairman of the Democratic Party, and he will succeed in his role of U.S. Trade Negotiator.

I am proud to support his appointment now and, after he has achieved expected great success, I will be even prouder to have supported him.

S. 1099—GRAIN AND SOYBEAN RESERVE ACT OF 1977

Mr. DURKIN. Mr. President, on March 23, 1977, I introduced S. 1099, a bill to provide for the establishment and maintenance of a reserve inventory of wheat, feed grains, and soybeans. I urge colleagues to join me in cosponsoring this important measure.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1099

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Grain and Soybean Reserve Act of 1977".

SEC. 2. (a) The Secretary of Agriculture (hereinafter referred to as the "Secretary") shall establish and maintain a separate reserve inventory of wheat, feed grains, and soybeans as provided in this Act.

(b) Such reserve inventory shall not exceed (1) 500 million bushels in the case of wheat, (2) 40 million tons in the case of feed grains, and (3) 200 million bushels in the case of soybeans.

(c) As used in this Act, the term "feed grains" means corn, grain sorghum, oats, and barley.

SEC. 3. (a) The inventory reserve provided for in this Act shall be provided for by offering to producers who have eligible commodities under a Commodity Credit Corporation loan or purchase program, an opportunity to enter into a storage agreement with the Secretary for a period of not less than three or more than five years providing for the storage of grain at the producer's option either in approved producer-owned facilities or in commercial warehouse facilities. The Secretary may, at his option, reconcentrate all grains stored in commercial warehouses at such points as he deems to be in the public interest, taking into account factors including transportation problems and normal marketing patterns.

(b) Rotation of stocks shall be permitted to facilitate maintenance of quality; however, the storing producer or warehousemen shall, at all times, have available in the designated place of storage, both the quantity and quality of grain covered by the producer's commitment.

(c) Any producer entering into a storage agreement under subsection (a) may not redeem the commodity under loan or dispose of the commodity under purchase agreement at a price lower than the minimum price at which the Secretary may offer reserves under the provisions of this section. Such contracts shall contain a provision permitting cancellation by the Secretary under the same price requirements set forth in this section for offering reserves for sale.

(d) In the event that the quantity of wheat, feed grains, or soybeans acquired under the provisions of subsection (a) is inadequate to meet the inventory reserve for such commodity prescribed in section 2(b), the Secretary may purchase quantities of such commodity on the open market, but the maximum price the Secretary may pay for any such commodity not acquired under a nonrecourse loan shall be the average price farmers received for such commodity during the preceding three marketing years adjusted to reflect the customary location and grade price differentials.

(e) The net additional quantity of any commodity procured under this section in any marketing year shall be the lesser of the following:

(1) 80 per centum of the net additional estimated total carryover in excess of normal for the marketing year; or

(2) the amount the maximum reserve inventory specified in section 2(b) exceeds the total stocks of such commodity owned by the Commodity Credit Corporation at the beginning of the marketing year.

SEC. 4. (a) Except as otherwise provided in this Act and except when a state of emergency has been proclaimed by the President or by concurrent resolution of the Congress declaring that such reserve inventories should not be sold, the Secretary may offer any commodity in the reserve for sale at the current parity price for such commodity, adjusted to reflect the customary location and grade differential, or at such greater price as may be obtained through normal market channels. Notwithstanding the foregoing, sales during any marketing year shall be limited to the net quantities by which estimated domestic consumption and exports exceed estimated domestic production and imports.

The Secretary is also authorized to dispose of commodities in such reserve as follows:

(1) Such commodities may be used to relieve distress (A) in any State, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, or the Pacific Trust Territory, declared by the President to be an acute distress area because of unemployment or other economic cause if the President finds that such use will not displace or interfere with normal marketing of agricultural commodities and (B) in connection with any major disaster determined by the President to warrant assistance by the Federal Government under the Disaster Relief Act of 1974 (Public Law 93-288).

(2) Such commodities may be used in connection with a state of civil defense emergency as proclaimed by the President or by concurrent resolution of the Congress in accordance with the provisions of the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251-2297).

(3) Such commodities may be sold for the purpose of assisting in the preservation and maintenance of foundation herds of cattle (including producing dairy cattle), sheep, and goats and their offspring, under section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), and providing feed for livestock in any emergency area under the Act of September 21, 1959, as amended (7 U.S.C. 1427, note).

(c) The Secretary may buy and sell at an equivalent price, allowing for the customary location and grade differentials, substantially equivalent quantities in different locations or warehouses to the extent needed to properly handle, rotate, distribute, and locate such reserve. Such purchases to offset sales shall be made within two market days.

(d) The Secretary may accept warehouse receipts in lieu of taking physical possession of the grain, but in such cases the obligor under the warehouse receipt shall be required at all times to have the grade stated on the warehouse receipt or a better grade available for delivery.

(e) The Secretary shall make a daily list available showing the price, location, and quantity of the transactions entered into hereunder.

SEC. 5. The Secretary shall use the Commodity Credit Corporation to the maximum extent practicable in carrying out the purposes of this Act.

SEC. 6. The Secretary shall promulgate such rules and regulations as may be necessary to provide for the effective administration of this Act.

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

SEC. 8. Nothing in this Act shall be construed as superseding or otherwise modifying the authority of the President under section 412 of the Agricultural Trade Development and Assistance Act of 1954 to seek an international agreement for a system of food reserves to meet food shortage emergencies and to provide insurance against unexpected shortfalls in food production.

(This concludes additional statements of Senators submitted today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TIME-LIMITATION AGREEMENT—S. 1070

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as S. 1070, Calendar Order No. 52, a bill to authorize additional funds for housing assistance, is called up and made the pending business before the Senate, there be a 2-hour time limitation on the bill, to be equally divided between Mr. PROXMIRE and Mr. BROOKE; that there be a time limitation on one amendment by Mr. JAVITS of 2 hours; a time limitation on any other amendment of 1 hour; a time limitation of one-half hour on amendments in the second degree, debatable motions and appeals, and points of order, if such are submitted to the Senate for discussion; and that the agreement be in the usual form as to the division and control of time and as to the germaneness; with the understanding that the amendment by Mr. JAVITS, on which there is a 2-hour limitation, will be in order.

Mr. BAKER. Mr. President, reserving the right to object, I shall not object. The amendment is cleared on our side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

Ordered, That during the consideration of S. 1070 (Order No. 52), a bill to amend to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes, debate on any amendment in the first degree (except an amendment by the Senator from New York (Mr. Javits), on which there shall be 2 hours debate) shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any amendment in the second degree, debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided,* That in the event the manager of the bill is in favor of any such amendment, debatable motion, appeal, or point of order, the time in opposition thereto shall be controlled by the Minority Leader or his designee: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill, debate shall

be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Wisconsin (Mr. Proxmire) and the Senator from Massachusetts (Mr. Brooke): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL MIDNIGHT TONIGHT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may have until midnight tonight to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR ROBERT C. BYRD TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, prior to the resumption of consideration of the code of conduct measure on tomorrow and after the two leaders have been recognized under the standing order, I be recognized to call up a matter or matters which the minority leader and I may have cleared by that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 4 p.m. tomorrow. I believe the order has already been entered, has it not?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. The purpose of coming in late tomorrow is to give committees a full day to meet without interruptions from the floor. I believe this order has already been entered: that, immediately upon the conclusion of the recognition of the two leaders under the standing order, Mr. HELMS will be recognized to call up his amendment No. 112, on which there is a 20-minute time limitation.

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Then, on the disposition of that amendment, the following amendments by Mr. HELMS will be voted on, the time having already expired on the amendments: amendment No. 114, on which Mr. NELSON has agreed to have an up or down vote; amendment No. 113, on which Mr. NELSON has indicated that he will move to table; amendment No. 158, on which Mr. NELSON has indicated that he will move to table; amendment No. 111, on which Mr. NELSON has indicated he will move to table.

Then, following the disposition of that amendment, amendment No. 133, by Mr. PERCY, is to be resumed, as I understand it.

The PRESIDING OFFICER. The distinguished majority leader is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. BAKER. Mr. President, I understood the majority leader to say that, following the recognition of the two leaders under the standing order, Mr. HELMS will be recognized.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. If other matters are taken care of, such as the call of the unanimous-consent calendar or executive calendar, I understand that this recognition will be done under the majority leader's agreement.

Mr. ROBERT C. BYRD. Mr. President, the distinguished minority leader has reminded me of something. Inasmuch as he and I have 10 minutes each to begin with, I think this would probably be sufficient to take care of any other matters. If it is not, we shall get unanimous consent to do otherwise if need be.

Mr. BAKER. That is agreeable with me.

Mr. ROBERT C. BYRD. Mr. President. I believe that about sums it up for today.

RECESS UNTIL 4 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 4 p.m. tomorrow.

The motion was agreed to; and at 6:21 p.m., the Senate recessed until Tuesday, March 29, 1977, at 4 p.m.

HOUSE OF REPRESENTATIVES—*Monday, March 28, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Humble yourselves in the sight of the Lord and He will lift you up.—James 4: 10.

Almighty God, our help in ages past, our hope for years to come, and the companion of our way through life, grant unto us a fresh sense of Thy presence that we may use this new day wisely, for the well-being of our Nation and the welfare of all mankind.

We pray for peace in our world, for understanding between nations, for good will among our people, and for a faith in Thee and in our country which makes us strong, keep us steadfast and show us the upward way to a greater life together.

"Lord of the upward way our guide divine,
Where Thou hast set Thy feet may I place mine;
And move and march wherever Thou hast trod,
Keeping face forward up the hill of God."

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1025. An act to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977.

The message also announced that the Vice President, pursuant to Public Law 91-452, appointed Mr. MATHIAS to be a member, on the part of the Senate, of the National Commission on Individual Rights.

And that the Vice President, pursuant to Public Law 86-420, appointed Mr. GOLDWATER and Mr. BELLMON to attend, on the part of the Senate, the Mexico-United States Interparliamentary Conference, to be held in Guaymas, Mexico, May 27-31, 1977.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON HOUSE JOINT RESOLUTION 351, MAKING FURTHER CONTINUING APPOPRIATIONS FOR FISCAL YEAR 1977

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on House Joint Resolution 351 making further continuing appropriations for fiscal year 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PROPOSAL BY OSHA REGARDING COTTON GINS

(Mr. HIGHTOWER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HIGHTOWER. Mr. Speaker, I speak today in protest of one more intrusion by a Federal agency into private enterprise. The intrusion of which I speak is the latest proposal by the Occupational Safety and Health Administration to place cotton gins under a cotton dust exposure standard. I would like to know if the OSHA personnel understand the occupational hazards that will result when one-half of the small country gins in the cotton belt go out of business and people in those small towns are out of work.

If OSHA could understand the progress in working conditions made during the past few years, I think they would be a little more tolerant and allow changes to be made as technology develops. If you have any knowledge of cotton, you understand the folly of "doing away with dust" while the ginning of cotton is going full speed.

Try and tell some of these ginners that have been trying to recruit doctors

to their rural towns that they must have a doctor and nurse to administer pulmonary function tests to all new employees and then duplicate tests after each employee has been on the job at least 4 but not more than 10 hours.

I am not trying to put a price on people's health, I am saying you take away their means of making a living and you break a people's spirit—and that is the greatest tragedy of all.

ZAIRE NATIVES SUPPORT INVASION

(Mr. JOHNSON of Colorado asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON of Colorado. Mr. Speaker, the latest news reports indicate that the natives of the area of Zaire which has been invaded support the invaders. They reportedly scatter and hide from government soldiers and refuse to provide food for the army. This is to be expected since tribal allegiance is more powerful and demanding than new national boundaries in that part of Africa. Notwithstanding these difficulties, Mr. Speaker, we have kept open the possibility of sending even more military aid to the Mobutu Government. This despite our own State Department's recognition of human rights violations by Zaire.

Mr. Speaker, the administration is making a colossal blunder by sending aid to Zaire. I call upon my colleagues to help stop this now.

CALL OF THE HOUSE

Mr. ADDABBO. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present. Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 103]

Alexander	Fary	Pike
Anderson, Calif.	Findley	Poage
Andrews, N.C.	Fiorio	Pressler
Armstrong	Flowers	Pursell
Ashbrook	Ford, Mich.	Rangel
Badillo	Ford, Tenn.	Rhodes
Bafalis	Frey	Richmond
Biaggi	Gammage	Rodino
Bingham	Gilman	Roe
Blouin	Gonzalez	Rogers
Boggs	Harrington	Santini
Breaux	Harsha	Sawyer
Brinkley	Holland	Scheuer
Brodhead	Huckaby	St Germain
Brown, Ohio	Jeffords	Staggers
Broyhill	Koch	Steiger
Burke, Fla.	Krueger	Stump
Cederberg	Le Fante	Symms
Chisholm	Long, La.	Teague
Clay	McHugh	Thone
Collins, Ill.	McKay	Udall
Conyers	Mann	Vander Jagt
Cornwell	Mathis	Walsh
de la Garza	Mikulski	Wampler
Derwinski	Milford	Watkins
Diggs	Montgomery	Wiggins
Dodd	Mottl	Wilson, Tex.
Dornan	Myers, Ind.	Wolff
Drinan	Patten	Wydler
Eckhardt	Pepper	Young, Alaska
Edwards, Ala.	Pettis	Zeferetti
English	Pickle	

The SPEAKER. On this rollcall 338 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. REUSS. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs be granted permission to sit during the 5-minute rule tomorrow, Tuesday, March 29, 1977.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

CONTINUING THE WORK OF THE JOINT COMMITTEE ON CONGRESSIONAL OPERATIONS BY ESTABLISHING A SELECT COMMITTEE OF THE HOUSE TO PERFORM THE FUNCTIONS OF SUCH JOINT COMMITTEE FOR THE HOUSE

Mr. YOUNG of Texas. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 420 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 420

Resolved, That it is the purpose of this resolution to continue the work of the Joint Committee on Congressional Operations by establishing a select committee of the House to perform the functions of such joint committee for the House.

ESTABLISHMENT OF SELECT COMMITTEE; MEMBERSHIP

SEC. 2. (a) There is established a select committee of the House of Representatives to be known as the Select Committee on Congressional Operations (hereinafter in this resolution referred to as the "committee").

(b) The committee shall be composed of seven Members of the House of Representatives who shall be appointed by the Speaker. One member of the committee shall be designated by the Speaker to serve as chairman. Any vacancy occurring in the membership of the committee shall be filled in the same manner in which the original appointment was made.

FUNCTIONS OF COMMITTEE

SEC. 3. (a) The committee shall continue the functions of the Joint Committee on Congressional Operations for the House, as follows:

(1) Making a continuing study of the organization and operation of the Congress of the United States and recommending improvements in such organization and operation with a view toward strengthening the Congress, simplifying its operations, developing cooperation between the Houses of Congress, improving its relationship with other branches of the United States Government, and enabling it to meet its responsibilities under the Constitution of the United States.

(2) Identifying any court proceeding or action which, in the opinion of the committee, is of vital interest to the Congress, or to the House of Representatives as a constitutionally established institution of the Federal Government, and calling such proceeding or action to the attention of the House.

(3) Conducting a continuing study of the jurisdiction of the various standing committees of the House of Representatives and their relative workloads, and of ways of rationalizing committee jurisdictions between the two Houses of Congress, and reporting to the Committee on Rules any recommendations on the more equitable distribution of workload or the more rational combination of jurisdictional responsibilities.

(4) Exercising the functions vested in it by section 6 of this resolution.

(b) In carrying out the functions referred to in subsection (a) of this section, the committee shall at all times avoid conflict or duplication with the activities of other committees, commissions, or other entities established by the House.

(c) The committee shall not have legislative jurisdiction. Nothing in this resolution, except as specifically provided in subsection (a)(3) of this section, shall be construed to authorize the committee to make any recommendations with respect to the rules, parliamentary procedure, practices, or precedents of the House, or the consideration of any matter on the floor of the House.

POWERS OF COMMITTEE

SEC. 4. The committee shall have for the purposes of carrying out its functions under this resolution the powers with respect to sitting and acting and with respect to subpenas that a committee has under clause 2(m) of rule XI of the Rules of the House of Representatives with respect to that committee's functions and duties under rules X and XI of such rules.

STAFF OF COMMITTEE

SEC. 5. In carrying out its functions under this resolution, the committee is authorized—

(1) to appoint, either on a permanent basis or as experts or consultants, without regard to political affiliation and solely on the basis of fitness to perform their duties, such staff as the committee considers necessary;

(2) to prescribe the duties and responsibilities of such staff;

(3) to fix the pay of not more than two members of such staff at rates not to exceed the higher rate of pay specified in clause 6(c) of rule XI of the Rules of the House of Representatives, and to fix the pay of other staff at rates not to exceed the lower rate of pay specified in clause 6(c) of such rule XI;

(4) to terminate the employment of any such staff as the committee considers appropriate; and

(5) to reimburse members of the committee and of its staff for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties and responsibilities for the committee, other than expenses in connection with any meeting of the committee, or a subcommittee thereof held in the District of Columbia.

OFFICE OF PLACEMENT AND OFFICE MANAGEMENT

SEC. 6. (a) The committee shall supervise and control the functions, as they relate to the House, of the Office of Placement and Office Management established by section 406 of the Legislative Reorganization Act of 1970.

(b) The Office is authorized to fix the pay of not more than one member of its staff at a rate not to exceed the higher rate of pay specified in clause 6(c) of rule XI of the Rules of the House of Representatives, and to fix the pay of other staff at rates not to exceed the lower rate of pay specified in clause 6(c) of such rule XI.

COMMITTEE AMENDMENTS

The SPEAKER. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Strike the word "committee" wherever it appears and insert in lieu thereof the words "select committee".

The committee amendment was agreed to.

Mr. YOUNG of Texas. Mr. Speaker, there are no objections that I know of to the committee amendments. The Committee on Rules adopted these five committee amendments, all of which were offered by the minority.

Therefore, Mr. Speaker, I ask unanimous consent that the remaining committee amendments be considered as read, printed in the RECORD, and considered en bloc.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The remaining committee amendments are as follows:

Committee amendments: On page 3, line 20, strike the period, insert in lieu thereof a comma, and add the following words: "nor shall anything in this resolution be construed to authorize the select committee to operate or supervise a permanent system for the broadcast coverage of the proceedings of the House without the express and prior approval of the House.".

On page 3, line 21, strike all of section 4, and insert in lieu thereof the following:

POWERS AND DUTIES OF SELECT COMMITTEE

SEC. 4. Insofar as applicable, the provisions of rule XI, clauses 1, 2, and 3, shall apply to the select committee, and the select committee shall adopt written rules which shall not be inconsistent with "the rules of the House."

On page 5, line 2, strike the period, insert in lieu thereof a comma, and add the following: "except that nothing in this resolution shall be deemed to authorize the members of staff of the select committee to travel outside the continental United States."

On page 5, after line 13, add the following new section:

EXPENSES

SEC. 7. Subject to the adoption of expense resolutions as required by clause 5 of rule XI of the Rules of the House, the select committee may incur expenses in connection with its duties under this resolution.

The committee amendments were agreed to.

The SPEAKER. The gentleman from Texas (Mr. YOUNG) is recognized for 1 hour.

Mr. YOUNG of Texas. Mr. Speaker, I yield 30 minutes for the purpose of debate only to the distinguished gentleman from Illinois (Mr. ANDERSON), and I would like to add at this time that any yielding that I do on either side will be for purposes of debate only.

Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 420 provides for the creation of a Select Committee on Congressional Operations to be composed of seven Members of the House appointed by the Speaker, one of whom the Speaker shall designate as the chairman. The select committee would continue the work and functions of the Joint Committee on Congressional Operations.

The other body has, with one exception, done away with all joint committees. That is a matter of the judgment of the other body, and that is something with which they will have to live.

Mr. Speaker, in the instant case involving the Select Committee on Congressional Operations, I would remind the House that the commission—and if the House adopts this resolution, it will be the select committee—will continue the extremely important function of the House Placement Office. On the average in 1 year's time, this new select committee will handle more than 10,000 processings of applicants for placement in the House of Representatives. That amounts to an average of 200 applicants from each congressional district in the United States.

There is not one of us, Mr. Speaker, who has not called upon this very distinguished and able commission to work out many of our problems relative to applications for employment. When we consider the enormous amount of time involved and the inconvenience that each Member of the House and his or her own private staff would be confronted with in handling these matters without this service, indeed this resolution affords us an opportunity to improve as best we can on our methods of selecting employees.

Mr. Speaker, I would not like to go on with the rest of this statement without emphasizing another very, very important function of this commission, which will now be, hopefully, the select committee. That function is performed by a small legal staff, a staff that busies itself with looking out particularly and especially with regard to matters of law that have unique and important application to the Members of the House of Representatives. This function would, if for no other reason, justify the creation today of this select committee.

Mr. Speaker, the resolution directs the select committee to continue the functions of the joint committee on the part of the House as follows:

Making a continuing study of the organization and operation of the Congress of the United States and recommending improvements in such organization and operation with a view toward strengthening the Congress, simplifying its operations, developing cooperation between the Houses of Congress, improving its relationship with other branches of the U.S. Government, and enabling it to meet its responsibilities under the Constitution.

Identifying any court proceeding or action which, in the opinion of the select committee, is of vital interest to the Congress or to the House of Representatives as a constitutionally established institution of the Federal Government, and calling such proceeding or action to the attention of the House.

Conducting a continuing study of the jurisdiction of the various standing committees of the House and their relative workloads, and of ways of rationalizing committee jurisdictions between the two Houses of Congress, and reporting to the Committee on Rules any recommendations on the more equitable distribution of workload or the more rational combination of jurisdictional responsibilities.

Section 6 of House Resolution 420 transfers the Office of Placement and Management to the supervision and control of the select committee. Its organization and duties will be similar to those presently in existence for this Office within the Joint Committee on Congressional Operations.

Mr. Speaker, in carrying out these functions, the select committee shall at all times avoid conflict or duplication with the activities of other committees, commissions, or other entities established by the House of Representatives. The select committee would have no legislative authority.

Mr. Speaker, an amendment adopted by the Committee on Rules provides that nothing in this resolution may be construed to authorize the select committee to operate or supervise a permanent broadcasting system without the express prior approval of the House.

As provided in another committee amendment to House Resolution 420, the provisions of clauses 1, 2, and 3 of rule XI of the Rules of the House of Representatives shall apply to the select committee insofar as applicable.

Mr. Speaker, the select committee is authorized to appoint such staff as it considers necessary and to pay not more than three members of the staff at rates not to exceed the higher rate of pay specified under the rules in clause 6(c) of rule XI of the Rules of the House of Representatives, and to fix the pay of other staff members at rates not to exceed the lower rate of pay specified in this rule.

Mr. Speaker, testimony before the Committee on Rules indicated that no new staff is expected to be hired and that the language is intended to cover the existing staff.

May I add at that point, Mr. Speaker, that all the staff people are in place and there will be no additional staff members. Most of these people, some 28 staff members, are actively engaged in the handling of this tremendous load of placement applications that each Member is confronted with every year.

Members and staff of the select committee could be reimbursed for travel and other necessary expenses incurred in performance of their official duties, other than with respect to committee or subcommittee meetings in the District of Columbia.

Mr. Speaker, a committee amendment provides that nothing in this resolution shall be deemed to authorize the Members or staff of the select committee to travel outside the continental United States. Funds for the select committee will be provided in the usual manner by a resolution reported by the Committee on House Administration and approved by the House.

Mr. Speaker, I urge the adoption of the resolution, and at this time I yield to the distinguished gentleman from Illinois (Mr. ANDERSON) for the purpose of debate only.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself 13 minutes.

Mr. Speaker, it is with some reluctance and even sadness that I rise to oppose House Resolution 420 which would create a House Select Committee on Congressional Operations. I say this because I was originally one of the enthusiastic supporters of this as a joint committee when it was offered as an amendment to the Legislative Reorganization Act back in 1970. I also supported giving the Joint Committee on Congressional Op-

erations the additional responsibility of reviewing and making recommendations on our committee jurisdictions and workloads when that proposal was offered in the committee reform amendments, House Resolution 988, in the 93d Congress. Moreover, I have admired and appreciated much of the work the joint committee has done over the years, particularly the technological innovations it has introduced to modernize and streamline our operations. I have the highest regard for Chairman BROOKS and the ranking Republican (Mr. CLEVELAND), and all the other House Members who have served on the joint committee since its inception in 1971. They have given selfless and tireless service in the best interests of the Congress as an institution. We are particularly indebted to the joint committee for the pioneering work it did on the concept of broadcasting congressional floor proceedings. The joint committee's hearings and study on broadcasting proved to be an invaluable resource in our Rules Committee broadcast efforts in the last Congress, and also laid the groundwork for the present in-House broadcast test.

Nevertheless, Mr. Speaker, I must oppose the creation of this select committee for the same reason the Senate voted this year to abolish the joint committee it is designed to replace and absorb its functions under the Senate Committee on Rules and Administration. To quote from the Stevenson Committee's report issued last September on the matter of abolishing the Joint Committee on Congressional Operations and assigning its functions to Rules and Administration:

The report makes this consolidation to establish a workload closer to those of the other standing committees, makes membership more attractive to Senators, consolidates and rationalizes in one place jurisdiction over the operation of the Senate and other components of the legislative branch, *and meets the Select Committee's goal that all minor committees be consolidated in major standing committees and the overall number of the committees and subcommittees be reduced.*

Does it make an sense for us, when the other body has just moved to abolish several committees and joint committees and better consolidate and rationalize jurisdictions under fewer standing committees—does it make any sense for us at the same time to move in the exact opposite direction by contributing to the further fragmentation of jurisdictions and proliferation of select committees as we are being asked to do in this resolution today?

I would have been prepared to support this resolution if I thought this select committee was prepared to undertake the type of work attempted by our Select Committee on Committees in the 93d Congress and the Senate counterpart committee in the 94th Congress—that is, if I thought it would take seriously the responsibility assigned to it under section 3(a)(3) of this resolution, and I quote:

Conducting a continuing study of the jurisdiction of the various standing committees of the House of Representatives and their relative workloads, and of ways of rationalizing committee jurisdictions between the two Houses of Congress, and reporting to the Committee on Rules any recommendations on the more equitable distribution of workload or the more rational combination of jurisdictional responsibilities.

In other words, I would be willing to support the creation of this select committee if I thought it would and could lay the groundwork for an overhaul of our fragmented committee system so that the Rules Committee could act on these recommendations next session.

This language I just quoted is nearly identical to the language in the original Bolling-Martin resolution in the 93d Congress, House Resolution 988, which was modified only slightly by the Hansen substitute which was adopted. To quote from pages 76 and 77 of the Bolling-Martin report (H. Rept. 93–916, part II):

A key aspect of any viable reorganization is provision for continuing evaluation of its effectiveness, and for periodic adjustments in the institution as new situations arise. By implementing a mechanism explicitly designed to accomplish these tasks, the House will provide "preventive maintenance" of its committee structure.

The report then quotes the resolution's language which assigns this committee jurisdictional study to the House Members of the Joint Committee on Congressional Operations. The Bolling-Martin report then goes on to read, and again I quote:

The present recommendation, therefore, provides a concrete expression of the joint committee's overall responsibilities. The joint committee's reports, including recommendations for changes in Rule X, will be submitted to the Committee on Rules for consideration and possible submission to the full House.

To quote further from the report:

The select committee is convinced that this represents one of the most important recommendations it makes to the House.

In other words, the House Members on the Joint Committee on Congressional Operations were expected to carry on the work of the Bolling-Martin Committee through a continuing study of our committee jurisdictions and workloads and make periodic recommendations to the Rules Committee for action.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Texas.

Mr. BROOKS. I thank the gentleman for yielding.

Did I understand the distinguished gentleman to say that he would support the legislation if he thought that the members of the committee would take seriously that provision on the continuing study of the problem of jurisdiction?

Mr. ANDERSON of Illinois. I did, sir.

Mr. BROOKS. Does the gentleman not understand that we will take seriously any part of our authority if it is the feeling of the Committee on Rules that it would be under the authority of the select committee?

Mr. ANDERSON of Illinois. I appreciate the question that the distinguished chairman has asked. Let me answer it in this way.

The sad fact is, the joint committee's House members have done nothing in this area over the last 2 years since the adoption of that provision of the Bolling-Martin resolution. Moreover, it was made quite clear in the Rules Committee hearings on this resolution that they were not expected to fulfill this responsibility and that they would not. This became evident when I offered an amendment to require the select committee to make recommendations to the Rules Committee a year from now on committee jurisdictional and workload changes. The gentleman from Missouri (Mr. BOLLING) opposed my amendment because he did not think the chairman of the proposed select committee would be sympathetic to genuine committee reforms based on his past performance.

When I asked the gentleman from Missouri, "Isn't it implicit in this resolution that that is one of the things this committee is going into?" he replied, "I do not know if it is implicit. It is not an argument that I have ever made." I responded, "Take that away and I don't know what we have got the select committee for." Mr. BOLLING replied: "Two reasons: One is to watch what the courts do to affect the House and the other is employment."

In other words, we are being asked to create this select committee, at a cost of $730,000 a year, simply to supervise the Placement Office and track court proceedings which affect the Congress. And even the future of those two dubious missions is in doubt. To quote again from Mr. BOLLING:

I think there is a very real possibility that the two principal functions, operational functions, of this committee . . . which deal with the employment office and a review of judicial decisions that affect the Congress might be recommended to end up in another place.

To quote further from Mr. BOLLING's remarks relating to possible future recommendations of the Obey Commission:

One of the reasons that I find it easy to support this particular version of the resolution of that, frankly, I don't see any point in moving around those two functions. They can go to other places than this select committee, when there is in prospect an extensive, proposed reorganization of the administrative structure of the institution.

Mr. BOLLING went on to say, and again I quote:

I don't see any conflict between this select committee continuing to operate the employment office, or continuing to perform the function of examining judicial decisions that affect the House. *There might be a conflict later on, but there isn't now.*

So, even the two flimsy reasons for creating this select committee, supervision of the placement office and compiling court proceedings of interest to the Congress, may very well be shifted elsewhere in the very near future as a result of "an extensive, proposed reorganization of the administrative structure of the institution." One might then ask, what is wrong with creating the select committee as the temporary caretaker for these functions until they are shifted elsewhere? The answer is, this select committee is not being presented as a one-Congress committee. When I

questioned Chairman BROOKS in the Rules Committee as to whether he had in mind a permanent select committee, he responded, and I quote:

> You set up a permanent committee, but it is called a select committee and it must be confirmed every session of Congress or it is not permanent anymore.

So what we are talking about here today, is creating a permanent select committee to oversee two operational functions which it will soon lose. At that point, this will be a select committee in search of a mission. It is already clear from the resolution, in section 3(b), and I quote:

> In carrying out the functions referred to in subsection (a) of this section, the committee shall at all times avoid conflict or duplication with the activities of other committees, commissions, or other entities established by the House.

That was inserted to make clear that the select committee would not trespass on the work of the Obey Commission. That effectively knocks out its responsibilities under section 3(a). We have already established that the select committee will not be working on committee jurisdictions and workloads since that trespasses on Rules Committee jurisdiction. So that eliminates its responsibilities under section 3(a)(3). The only two remaining responsibilities are court proceedings and the personnel office, and it will soon lose that. In short, all the enumerated functions of the select committee have practically been eliminated before it has even been created. That only leaves it with a name, some members, and a staff. This whole exercise should be entitled, "Mission Improbable," since "improbable" means "not likely to happen or be true," and it is clear from the record that the responsibilities assigned to the select committee by this resolution are not likely to happen or be true.

Mr. Speaker, in the brief time remaining, I would like to offer several more reasons why this resolution should be defeated, though its improbable mission alone should suffice:

First, we are once again considering an important resolution under a closed, no-amendment procedure, even though four of our last nine select committee resolutions have been brought to this floor under an open rule. This no-amendment procedure thus makes it impossible for us to dream up a new responsibility for the select committee in the form of an amendment to justify its creation.

Second, the nonpartisan composition of this committee has been destroyed by not designating a majority/minority party ratio of nearly equal numbers. Instead, it is implied in this resolution that the Democratic Caucus rule will apply, that is, a 2-to-1-plus-1 ratio, of five Democrats and two Republicans, instead of the 3-to-2 makeup which existed under the Legislative Reorganization Act of 1970.

Third, while it is obvious that this will now become a partisan, majority dominated committee, instead of the nonpartisan, institutional committee it once was, the resolution nevertheless retains the requirement in section 5 that the staff be completely nonpartisan. In other words, the minority will not have the same right it does on standing House committees to appoint its own staff.

Fourth, while other committees of the House are prohibited by our rules from hiring more than a specified number of professional and clerical staff, and while the Joint Committee on Congressional Operations was limited under the 1970 Legislative Reorganization Act to not more than six professional and six clerical staff, this resolution provides for unlimited numbers of staff at level V salaries, and moreover three staffers at level IV salaries, which is $50,000 per year, one more level IV staff person than our standing committees are permitted.

Mr. Speaker, while we were successful in the Rules Committee in offering four amendments to improve this resolution by barring foreign travel, prohibiting operation of a permanent House broadcast system, bringing it under the first three clauses of House rule XI, and providing for regular funding through the House Administration Committee, these amendments do nothing to alter the remaining glaring deficiency in this resolution which is that this is a select committee without a mission. Perhaps it is appropriate that this is called a Select Committee on Congressional Operations since the biggest operation has already been performed on it: All of its vital functions have been removed before it has even begun to operate on its own. Perhaps the kindest thing we could do would be to render it completely inoperative before it discovers that it cannot operate.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, there is a saying among students of government that you never terminate a temporary tax or abolish a government commission. What we are witnessing today is a classic example of that maxim.

House Resolution 420 proposes to establish a select committee to "continue" the work of a joint committee that was abolished last month in the interest of improving congressional operations. The assignment of the new committee: To study ways of improving congressional operations.

This is not as much of a paradox as it seems, however, because a close reading of the resolution reveals that the committee will not actually do the job that is being assigned to it. Amendments added by the Rules Committee provide that the select committee shall not have legislative jurisdiction and is prohibited from making any recommendations with respect to the "rules, parliamentary procedure, practices or precedents of the House, or the consideration of any matter on the floor of the House."

Furthermore, the select committee is instructed to "at all times avoid conflict or duplication" with the activities of any other House committee, commission or other entity.

One might respectfully inquire, Mr. Speaker, what then is to be the mission of such a body And why will it require three staff slots at $50,000 per annum and an unlimited number of staff positions at not more than $47,000 each to do the job?

Another close reading of the bill—on the last page—shows that it will have the duty of running the House Placement Office. Oh, yes, and that it will keep track of court decisions affecting Congress and call them to the attention of the House when needed.

The annual cost of this service? An estimated $730,000 a year.

Mr. Speaker, I suggest that what we have here is a committee in search of a job. Appropriately enough, it will be in charge of the House Placement Office, and little else. Who is kidding whom?

I urge a "no" vote. Failing that, I urge this new committee to truly contribute to congressional efficiency, by making its first recommendation its own abolition. That would truly be a first in the political science books.

Mr. YOUNG of Texas. Mr. Speaker, I yield 10 minutes to the gentleman from Texas (Mr. BROOKS), the distinguished chairman of the Joint Committee on Government Operations.

Mr. BROOKS. Mr. Speaker, some misconceptions appear to exist about the purposes and effect of House Resolution 420. It will be useful to clear them up immediately.

House Resolution 420 continues the work of an existing committee—with the same functions, the same staff, the same location. It does not create a new committee.

The Joint Committee on Congressional Operations does not duplicate the activities of any other committee or commission. This will also be true of the Select Committee on Congressional Operations. No other committee or commission performs the functions or provides the services which we do.

Operation of the Placement Office and the tracking of court cases of concern to the Congress are important functions of our committee, but they are in no way our only functions—far from it as I shall demonstrate.

The joint committee has cooperated extensively with the Commission on Administrative Review. We have not duplicated their activities, nor have they duplicated ours. There is no indication that the Commission—which is an ad hoc body and will cease to function at the end of this session—will recommend the transfer of any of the joint committees or the proposed select committee's functions.

As a select committee, the functions of the joint committee will continue unchanged and undiminished.

Those functions have proved their worth as the continuing demand of Members for our services and publications and assistance will indicate. Our staff is experienced. Staff salaries are based on the same provisions that govern salaries in every other committee.

The joint committee, and the select committee we propose to take its place, does indeed have a mission—a mission that is important to every Member and committee of the House.

The need for the resolution—which would simply reconstitute, in effect, the Joint Committee on Congressional Op-

erations as the House Select Committee on Congressional Operations—arises directly from the action of the Senate. That body, in approving Senate Resolution 4 to restructure its committee system, voted to eliminate a number of standing, select and joint committees, including the Joint Committee on Congressional Operations, so as to reduce the number of Senators' committee assignments.

Senate Members have informed us they will begin phasing out the joint committee immediately.

In light of this situation, we believe that adoption of House Resolution 420 represents the wisest and most appropriate action for the House to take. We have reached this decision after consultations with the Speaker of the House, the chairman and ranking minority member of the Legislative Appropriations Subcommittee, the chairmen of the Committee on House Administration and the Committee on Rules, and many individual Members of the House on both sides of the aisle who believe the work of our committee should be continued without interruption.

That is precisely what House Resolution 420 is designed to accomplish: Continue the work of the joint committee without interruption—nothing more, nothing less. We believe a House select committee is the appropriate vehicle for this purpose for several reasons:

First, more than 80 percent of the clients of the joint committee—the Members and committees of the House and Senate—are in the House of Representatives.

Second, the offices of the joint committee are physically located within the House, so no disruption or delay would be involved.

Third, substantially more than 80 percent of the Members and committees who regularly call on the joint committee and its staff for assistance are also in the House.

Fourth, the same high proportion of users of the joint committee's products, services, and publications is accounted for by the Members, committees, and staffs of the House.

As a practical matter, therefore, the joint committee has always been primarily a House-oriented committee, and House Resolution 420 would provide formal recognition of that fact.

Let me emphasize, Mr. Speaker, that under House Resolution 420, the proposed Select Committee on Congressional Operations would function, within the House, exactly as the joint committee has functioned within the Congress.

We are asking for no new authority.

We are seeking no new jurisdiction.

We are requesting no additional staff.

Let me describe, briefly, what it is that we do. The joint committee derives its authority and jurisdiction from two sources: The Legislative Reorganization Act of 1970 and the Committee Reform Amendments of 1974.

In drafting the provisions of House Resolution 420 regarding the purposes and functions of the select committee, we followed very explicitly the language of these statutes. Except for slight stylistic changes—to account for the change from a joint committee to a select committee—the wording is the same.

Under the Legislative Reorganization Act of 1970—and under House Resolution 420—we are required to, and I summarize:

First, study and recommend improvements in the organization and operation of the Congress so as to strengthen the institution internally and improve its relationships with other branches of the Government;

Second, identify, and call to the attention of the House, court proceedings and actions of interest to the Congress;

Third, supervise and control the Office of Placement and Office Management.

Under the Committee Reform Amendments of 1974—and under House Resolution 420—we are required to, and again I summarize:

Fourth, study and make recommendations dealing with the workloads and jurisdictions of House committees.

You will note, Mr. Speaker, that except for the operating authority we have in connection with the Office of Placement and Office Management, we do not have now—nor are we seeking in House Resolution 372—any legislative jurisdiction. Our authority is, and would continue to be, limited solely to conducting studies and making recommendations.

But this authority is important, to the House and to the Congress as a whole. As a result of the extensive studies during the mid-1960's of the Joint Committee on the Organization of the Congress, the Congress concluded that rapid technological and social change affected this institution as well as every other institution in the land. It recognized that Congress needed an institutional committee, one that would devote its full attention to the job of helping Congress work effectively. Our joint committee is, and the proposed select committee would continue to be, the permanent successor to that farsighted body and the only committee in either House specifically assigned this essential responsibility.

In exercising this responsibility, we have maintained a low profile. Our objectives have been practical ones: To improve the operations of the Congress by providing useful services and by meeting identifiable needs. We have not intruded on other committees' jurisdictions. We have deliberately avoided unnecessary and unproductive controversy. We have purposely resisted pie-in-the-sky proposals. On the contrary, we have dedicated all our activities to help Members, committees, and their staffs do a better job.

Many of you are personally familiar with some of our achievements. For example:

Members have made good use of the breakthroughs we have brought about in the application of computer technology to the information needs of the House, including the Member Information Network of terminals we established last year—a project we later transferred to the House Information Systems.

You and your staffs regularly use our Congressional Handbook, which we revise and update four times a year, the only source of its kind—first in our 200 year history.

Our Placement Office has assisted many of your job-seeking constituents from among the nearly 10,000 applicants we interview and test each year—an average of approximately 20 constituents from each of your districts.

The Placement Office helps you find qualified employees—and has placed an average of three employees in every Member's office.

Our information inventories have brought together in one place, for the first time, thousands of sources and services available to the House from the legislative branch, the executive branch and private organizations on virtually every subject of concern to the Congress, all carefully organized and extensively indexed.

Our publication, STAFF, provides the first marketplace, in effect, of professionally useful information and ideas for the staffs of Congress.

More and more Members' and committee offices are working more efficiently because of the management assistance we provide.

We developed and installed the summary of proceedings and debate system, designed to keep Members' offices in touch, on a continuing basis, with what transpires on the House floor—a project which we have turned over to the Doorkeeper of the House.

Improvements in the services you request from the Legislative Counsel, the Congressional Research Service, the Congressional Budget Office, and the Office of Technology Assessment have resulted in part from the studies and recommendations we have made—and a similar in-depth study is now being made of the General Accounting Office—each of which was conducted at the request of the Committee on Appropriations in an effort to eliminate duplication and keep costs under control as well as to improve service.

Our Travel Service Office has experienced increasing demand from Members and committees in making arrangements for official travel.

Our legal staff tracks all court cases—and there are an increasing number—of concern to the Congress, and we publish detailed reports on such cases three times each year and provide individual assistance in understanding the consequences and significance of such legal proceedings.

There are more such projects to report, more such services to describe, more such publications to which to refer—but I do not want to take too much time. Our activities reports for the past three Congresses, since the joint committee was established in 1971, have been printed in the RECORD.

Some of the projects I have mentioned are still in their infancy. Others are well established and functioning effectively. A great deal more needs to be done. Our Members are interested and active participants in the work of the committee. Our staff is capable and broadly experienced in every aspect of congressional operations.

We believe, as I have emphasized, in the importance of cooperation and coor-

dination in pursuing the work of the House and in relating to Members and committees which share our interests. We do not now and we shall not in the future intrude in the jurisdictions of other committees or commissions, or duplicate their activities.

The joint committee represents a valuable asset to the House. To the best of our ability, that asset will increase in value to every Member and employee in its reconstituted form as the Select Committee on Congressional Operations—with your understanding and support.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield 10 minutes to the distinguished gentleman from New Hampshire (Mr. CLEVELAND).

Mr. CLEVELAND. Mr. Speaker, I thank the gentleman from Illinois for yielding.

I also want to thank the gentleman for the gentleman's very gracious remarks, or at least a part of his very gracious remarks. I am referring to those remarks in which the gentleman spoke quite glowingly of the high hopes the gentlemen had for this joint committee and also for the gentleman's regard for its members and some of our accomplishments to date.

If I understand the gentleman from Illinois' criticism of the committee, it seems to me that, first of all, the gentleman has concluded that because the Senate has opted to withdraw that this means the committee has not performed its role; but I would suggest it is perhaps that the committee has performed an important role a bit too well.

Much of what we have done, Mr. Speaker, in that committee—and I have now served on it from its beginning—has been to strengthen the procedures and operations of the House. I think that one of the reasons why the Senate has withdrawn is simply because they did not perceive it to be as valuable to them as it has become to Members of the House. The fact that many Members can now follow this debate from their offices while they are performing other duties is one of the types of things we have been able to accomplish in the House—the trial television coverage of these proceedings.

If I understand my friend and colleague, a gentleman for whom I have great esteem, the gentleman from Illinois (Mr. ANDERSON), if I understand his major objection correctly, it is that the joint committee has not addressed the problem of committee jurisdictions. I might say, if I understood him correctly further, that the gentleman said that if he was assured that we would perform that function, he would then support us. Of course, to me this is very good news, because I have talked about this matter of jurisdiction with the chairman, Mr. BROOKS. I share the concern of the gentleman from Illinois about overlapping jurisdictions among House committees here on the Hill. I have talked to the distinguished chairman of this committee, the gentleman from Texas (Mr. BROOKS); I have communicated with him, and I have done this on a number of occasions, and the last time quite recently.

It is my understanding—and if I could have the attention now of the gentleman from Illinois (Mr. ANDERSON), because I do want to be sure I have his attention as I understand his chief objection—he had several objections, of course—was that we have not gone into this matter of jurisdiction. I quite agree with the gentleman, but I have been in touch with the chairman of the committee, the gentleman from Texas (Mr. BROOKS).

Now, I think we have been justified in not going into committee jurisdiction more vigorously than we have for the following reason: As the gentleman knows, back in 1973 or so, we set up the so-called Bolling-Martin committee. They wrestled with this tortured problem, and then there was a Hansen committee on reorganization which sprang full-blown from the Democratic Caucus. The gentleman and I have our own opinions as to the role the caucus plays, we will not go into that sorry story now. But, as a result, changes in the jurisdictions of committees, which were fairly major in nature, were made, and they were made, as the gentleman knows, in 1974. I think with that history, with those special committees having been appointed to take over our jurisdiction, and then having acted in 1974, I think that during the next 2-year period it was not unreasonable for us not to have gone into this tortured matter of committee jurisdiction. However, I can assure the gentleman from Illinois that we are going to go into it in the next 2 years. The gentleman from Texas is sitting here on the floor, and if he and I have not been communicating properly, he can say so.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman from New Hampshire yield? Any time which I consume out of his 10 minutes, I will be happy to yield him further time.

Mr. CLEVELAND. I am delighted to yield to the gentleman.

Mr. ANDERSON of Illinois. The gentleman from New Hampshire indicated that I, perhaps, was not following his remarks this afternoon with that degree of close attention and care that I should. I regret that he has had that impression, because I have listened very carefully. I think that perhaps he did not hear some of the things that I said when I spoke from the gentleman's position in the well just a few minutes earlier.

But, to refresh his recollection, when there was a discussion of this very matter in the Committee on Rules last week when this resolution was before us, I specifically sought to insert in the resolution a reporting date. I wanted to give the select committee, if it was reestablished, a fixed date, March 31, 1978, by which time they should come back to the Committee on Rules with specific recommendations with respect to committee workloads and committee jurisdictions.

Let me read to the gentleman very briefly from the transcript, a portion of the colloquy which took place on March 22, 1977, of the committee. I quote now from the gentleman on the committee, the gentleman from Missouri (Mr. BOLLING):

> On committee organization, I think there is a possibility—I don't know, but there is a possibility that the Leadership might be interested at some point in pursuing this. I don't think it makes any sense to impose on the committee—

That is, your select committee—

> that has shown no interest in getting involved in this particular reporting date. And that is my reason for opposing it. I don't think they should have a particular reporting date.

In other words, what he was saying is that there was not any point in my seeking to impose the responsibility on the gentleman's select committee of coming back to us by the end of March 1978, with recommendations in this very important area that the gentleman is not interested in, which could not be expected to assume that responsibility, and the major justification was the Employment Office and the reporting of court decisions. I think that is the state of the record as it was made before the Committee on Rules.

Mr. CLEVELAND. I appreciate the gentleman's remarks.

First of all, let me say that if I had been on the Committee on Rules or at that committee, I would have applauded the gentleman in his efforts to put a deadline in there, because I think the gentleman knows—and I know, and anybody who knows much about the workings of this august body knows—that without a deadline, not very much is going to happen. I would have been glad to have a deadline. But that was an argument, it sounds to me, between the two powerhouses on the Committee on Rules. I do not think it is fair to taint this joint committee, which has the jurisdiction and is going to pursue it. I have already told the gentleman that he has my assurances, to the extent that a ranking minority member can assure anybody about anything on this floor; but I have these assurances that we are going to take a look at committee jurisdictions, and we should. But in fairness, I want to suggest to the gentleman from Illinois that there is another excuse coming up, and it is a reasonable excuse for some added delay.

Our excuse for not going into jurisdiction for the last 2 years was it was too soon after the Bolling-Martin-Hansen changes had been made, and that they ought to be given at least 2 years to jell.

But another major matter is going to come up. As the gentleman knows, the President of the United States is going to be sending some suggestions up here on the reorganization of the Federal Government. But as the Federal Government is reorganized, there should be some attention given as to how the congressional organization should be made to mesh with some of those changes. But so far as I am concerned, the gentleman has given assurance, and I would like to yield a little of my fast disappearing time to the gentleman from Texas (Mr. BROOKS). I have stated we have been in communication on this matter. I have stated that we have assurances from the gentleman from Texas that we are going to take a look at it. If that is not a true statement, we should hear from the gentleman.

Mr. BROOKS. If the gentleman will yield, I say to my distinguished friend

that we are going to take a look at it. I would say, by way of caution, however, the reorganization bill which is scheduled for tomorrow and which will give the President the opportunity to submit reorganization plans under certain qualifying provisions, may alter the committee jurisdiction to such an extent that we may really want to make a serious change in some of the committee's jurisdiction. I would commend this thought to the gentleman from Illinois (Mr. ANDERSON), who might be concerned about it. But I will say to my distinguished friend, the gentleman from New Hampshire (Mr. CLEVELAND), that if the reorganization bill passes tomorrow, as I trust it will, if those plans alter the Executive Department sufficiently, it may mandate and encourage some change in the House committee jurisdictional structure. That would be the time to seriously consider the matter.

Mr. CLEVELAND. I thank the gentleman.

The SPEAKER pro tempore. The time of the gentleman from New Hampshire (Mr. CLEVELAND) has expired.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield 4 additional minutes to the gentleman from New Hampshire (Mr. CLEVELAND).

Mr. Speaker, I am glad we have had this discussion on jurisdiction. I think it is a key issue here on the Hill, but of course everybody has his own idea of what is needed. For example, I remember 4 or 5 years ago when I joined approximately 150 other Members in voting for a committee on energy. That vote looks pretty good as we look back on it, but we did not get very far.

I think everybody on the Hill will also have to admit that when we get into jurisdiction, we get into a fairly complicated and controversial subject. Although we did not consider jurisdictions in the last 2 years following the Bolling-Hanson-Martin changes, we now have assurances that we will. I think it is fair to add the caveat, although I am promised and I have the assurance of the chairman of the committee that we will look at jurisdictions. I think it is fair to say that this is going to be a moving situation, particularly with major executive changes in the offing.

Mr. Speaker, I have asked for permission to revise and extend my remarks and for permission to include certain documents following my remarks. By that device I will be able to save a little time. However, I do want to point out that in at least part of my prepared remarks there are included some things that have not been covered in this debate. Time does not permit going through all of these matters, but let me point out a few things.

If we do abolish this committee, we are going to have to get somebody to do the things we are doing. We all agree on that. Let me just give the Members an idea of some of the things we are doing now that I think are important and that have not been touched upon.

If we ask a sample of the Members what we really need here in Congress, I am sure we will find that these are some of the items on their list:

We need better, faster, more reliable information, tailored to specific congressional requirements for legislation, for oversight, and for constituent service. Our committee is working on that now as an ongoing project.

We need a better handle on the budget and an up-to-date, current way to see where we are financially in understandable terms. Our committee is working on that.

We need to make better use of space, to get more room without the expense and controversy of a huge new office building, and our committee is working on that matter right now.

We need improved communications within the House; we need ways of getting timely information to Members and staffs while it is still worthwhile and while it is still meaningful. Our committee is working on that problem.

So, Mr. Speaker, in concluding my remarks, I will say that I would hope the gentleman from Illinois (Mr. ANDERSON) will consider the assurances he has had on jurisdiction sufficient to bring this resolution within the scope of his approval. I thank the gentleman from Illinois again for his consideration of this matter and for yielding this time to me.

Mr. Speaker, three things have always characterized the Joint Committee on Congressional Operations—and I have been a member since its establishment.

The joint committee has always been nonpartisan, or bipartisan if you prefer. Our concern has been the efficiency and effectiveness of the Congress—not of a particular political party—and as a somewhat partisan politician myself I cannot recall an occasion when the minority's rights and interests have not been fully respected. I am confident that will continue.

The joint committee has always been a pragmatic committee. We have concentrated on needs that were real, that others were not working on, and that could be accomplished. That, too, will continue.

The joint committee has also been—if I may use the word—a modest committee. We have not been big issuers of press releases. We recognize that the media is not as interested as it ought to be in the internal and constructive operations of the Congress. Consequently, you may learn today about activities you had not previously associated with the joint committee.

These qualities, I suggest, are those of a truly institutional committee—a committee with permanent jurisdiction, not an occasional interest, a committee with no other concern than the well-being of the Congress.

It is this quality of continuity that distinguishes the joint committee—and our proposed select committee—from such temporary groups as the present Commission on Administrative Review, and in the 94th Congress the Commission on Information and Facilities. As ad hoc bodies, both Commissions have done important work, made constructive recommendations, and generated interest in correcting deficiencies in House operations. As temporary commissions, however, neither has nor will be able to follow through with the implementation necessary to assure lasting improvements.

Many of the recommendations of the Commission on Information and Facilities called on the joint committee to continue Commission initiatives. And based on our close coordination with the Commission on Administrative Review, that body will undoubtedly urge that the select committee accept responsibility for implementing a number of its recommendations.

The same thing, ironically, is true of the Senate. In the recent final report of the Commission on the Operation of the Senate, several recommendations were either directed specifically to the joint committee or could be carried out, as a partical matter, only by our committee. I am personally convinced that the Senate will very shortly come to realize that, in their preoccupation with reducing the numbers of committees, they have acted hastily and counterproductively.

In the absence of such a committee as ours, all of us would feel the loss in a variety of ways—and this may be the ultimate test.

Ask a sample of our colleagues what we really need here in Congress and I am sure you will find these items on their lists:

We need better, faster, more reliable information, tailored to specific congressional requirements for legislation, for oversight, for constituent service; our committee is working on it.

We need a better handle on the budget, an up-to-date current way to see where we are financially in understandable terms; our committee is working on it.

We need to make better use of space, to get more room without the expense and controversy of a huge new office building; our committee is working on it.

We need improved communications within the House, ways of getting timely information to Members and staffs while it is still worthwhile; our committee is working on it.

Not only is our committee working now on each of these major congressional needs, but with respect to each one of them we have produced results—not just reports and recommendations—results in the form of usable products and services. Here, in outline, are some examples:

INFORMATION

First, studies of CRS, OTA, CBO last year emphasized quality and timeliness of information for Congress; we recommended specific improvements; we plan to oversee their implementation of these recommendations this year;

Second, we developed the Member information network utilizing computers to bring into Members' offices a wider range of data bases and information sources—from Library of Congress, HIS, Justice Department, Agriculture Department, and others—than ever before; and

Third, we prepared and published the most extensive annotated inventories of the information resources and services available to the Congress ever put to-

gether—specifically designed for congressional use, carefully indexed, and covering all areas of concern to Members and committees.

BUDGET

First, we put together a working group last year representing the Appropriations Committee, the Budget Committee, the House Information Systems, the Congressional Budget Office, and ourselves and developed a new budget information system, accessible by computer terminals, including the kinds of budget data Members need on a daily basis. That system is now being improved and is ready for use.

SPACE

First, we have inventoried all existing space in the House, identified its uses, and recommended a number of relocations to assure that preferred space would be used for priority purposes;

Second, we have explored the possibility of constructing an automated storage warehouse on the House side which would expedite retrieval of Members' files and other materials, provide computerized recordkeeping, and free substantial amounts of space in the office buildings for other, more important purposes;

Third, we tested a multiple letter denter to show how space could be saved in Members' offices, noise levels reduced, and crowded conditions relieved;

Fourth, we surveyed all available sites on the House side of the Capitol for possible new construction, in the event it became necessary, and identified the engineering and architectural advantages and disadvantages of each; and

Fifth, we have worked closely on these and related space problems with the House Office Building Commission and the Architect of the Capitol.

COMMUNICATIONS

First, we developed the summary of proceedings and debate system which, by way of computer terminals keeps Members' offices informed on a running basis of what is occurring on the House floor; this is a system which can be expanded to include communication of notices, announcements, and other information; and

Second, we are publishing a staff-oriented publication called STAFF as a means of providing professionally useful information about Congress and their jobs to congressional staff members.

Ask the question another way:

Who, for instance, would be in a position to maintain the "Congressional Handbook" with its comprehensive and up-to-date information on every facet of House operations? How much time would your own staffs have to waste, in the absence of the Handbook, in making a dozen calls to find an answer which the Handbook now places directly at their fingertips? This is a big, complex, and sometimes frustrating institution with which to deal.

Again, to whom would you refer constituents who are looking for a job on Capitol Hill if the Placement Office was abolished? As Chairman BROOKS has noted, approximately 10,000 applicants—every one a constituent of some Member—are now interviewed, tested, counseled, and referred each year by this joint committee activity. Congress has grown enormously over the past few years and someone has got to provide the services it needs.

The same kind of question could be asked of almost every joint committee activity—activities which no other committee in the Congress either could or did undertake. For example, in the absence of joint committee initiative:

Would we be as far along as we are now in finding better ways to use our computer technology to save time and improve our access to needed information?

Would the House now be testing the feasibility of broadcasting its proceedings—whether or not that test succeeds—with all the promise such as development holds for improving public understanding of our work and for enabling Members to stay in closer touch with the House floor?

Could we, as individual Members, stay on top of developments in the Federal courts when more and more cases are being decided which directly affect the prerogatives of the Congress and its Members?

Would GAO, CRS and the other legislative branch agencies be receiving the kind of critical attention required to keep them both productive and cost-conscious?

To ask these questions, I believe, is to answer them. If the joint committee—as the saying goes—did not exist, it would have to be invented.

What we are asking today, in appealing for your support of House Resolution 420 is not to invent a new organization but to sustain an existing and useful one—with no new powers, no additional functions, no bigger staff, no added funds.

We ask only for the opportunity to continue our work, work we believe has substantial value to the House and its Members, and work that could not readily be accomplished elsewhere.

Mr. Speaker, House Resolution 420 and the continuation of the joint committee as a House select committee is not—and should not be viewed as—a partisan issue. I am confident our colleagues will vote on the merits of this resolution—and those merits are considerable.

Under leave to extend my remarks, I include a "Dear Colleague" letter authored by our distinguished chairman and me, and a factsheet summarizing certain aspects of the resolution:

WASHINGTON, D.C.,
March 24, 1977.

DEAR COLLEAGUE: House Resolution 420, to continue the work of the Joint Committee on Congressional Operations, for the Members and committees of the House, as a Select Committee on Congressional Operations will be the first, and possibly the only, order of business on Monday, March 28.

We believe this resolution is important—to you, personally, and to every Member and committee of the House—and we would appreciate your support.

A Select Committee will *continue* the service currently provided by the Joint Committee—

a Placement Office to help you find qualified employees and to assist you in finding employment on the Hill for your constituents;

Congressional Handbooks to keep you and your staff informed on a current basis of House allowances, regulations, services, and the whole range of operating and housekeeping details which affect you;

assistance in the House for the dozens of Members and committees requesting it to help improve the effectiveness of their office organization and operation;

a legal staff to continue informing the House regularly about court cases which affect the rights and powers and independence of the House, its committees, and Members, or to provide individual counsel on the significance and effects of these cases;

continuing studies of ways to improve the services you expect from the Congressional Research Service, the General Accounting Office, the Congressional Budget Office, or the Office of Technology Assessment, the publication (STAFF) to keep your staff informed of ways of improving their service to you; an office to help you and your committees with official travel arrangements; continuing studies of better ways to get you the informaton you need, to improve committees' ability to do essential oversight work, or to keep you abreast of changes in law, technology, or procedure which affect your work. These and a host of other services would be lost to the House without H. Res. 420.

H. Res. 420 does *not* create a new committee; it continues the work of an existing committee—with no additional functions, no added costs, no extra staff, no new space.

The Joint Committee has always been bipartisan. It has not been controversial. It has never intruded on the jurisdictions of other committees or commissions. The proposed Select Committee will function in precisely the same way.

We hope you will continue to use these services, and we solicit your ideas and suggestions of ways to improve them. On this basis, we ask for your support of H. Res. 420 on Monday.

Sincerely yours,

JACK BROOKS,
Chairman.

JAMES C. CLEVELAND,
Ranking Minority Member.

MAJOR FUNCTIONS AND SERVICES OF THE JOINT COMMITTEE ON CONGRESSIONAL OPERATIONS TO BE CONTINUED BY THE SELECT COMMITTEE ON CONGRESSIONAL OPERATIONS UNDER HOUSE RESOLUTION 420

1. Operates the Placement Office which (a) interviews, tests, and counsels approximately 10,000 applicants a year, most of them referred to the Office by Members, and (b) assists Members in finding approximately 600 new and qualified employees each year.

2. Publishes the Congressional Handbook, an invaluable compendium of information about office allowances, furnishings, regulations, staffing, and most other operational and administrative matters of concern to Members and staffs, an indispensable time-saver which is kept up-to-date four times a year.

3. Compiles and publishes in every Congress the rules of all House committees.

4. Provides, upon request, expert management assistance to Members' and committee offices on all aspects of office organization, operation and procedure, from furniture layouts, equipment selection, filing systems, correspondence handling, casework, staffing, etc.—12 individual studies are now being made.

5. Operates the Travel Office which makes official travel arrangements for committees and Members including reservations, ticketing, accommodations, local transportation, meeting rooms, etc.

6. Tracks, analyses, and reports to the House at least three times a year (with special reports on exceptional cases) court

decisions and cases which affect the Congress, its Members and committees—and these cases are increasing in numbers, significance, and effects on the rights and powers of Congress.

7. Publishes STAFF, a first-of-its-kind publication addressed to the professional needs and interests of Congressional staff members, providing new ideas and information of direct use in the performance of their official duties.

8. Publishes and maintains annotated inventories of information resources and services available to the Congress from within the institution, the Legislative Branch agencies (CRS, L.C., GAO, OTA, CBO, and GPO), the Executive Branch, and private organizations (foundations, universities, research institutes, professional, trade and labor organizations, for-profit corporations and others)—a comprehensive, easy-to-use compilation which will locate sources and services on every policy-related subject of interest to the Congress.

9. Conducts intensive management studies of the Congressional Research Service, Office of Technology Assessment, Congressional Budget Office and, currently, the General Accounting Office, many of the recommendations of which have already been implemented, resulting in improved service to the Congress.

10. Conducts continuing studies of Congress and Mass Communications, including the present test of the feasibility of broadcast coverage of House proceedings.

11. Provides training seminars for staff members of newly elected Members of Congress.

12. Developed the computerized Member Information Network and currently works with the House Information System in improving and expanding the system.

13. Compiled and published a handbook on Congressional Investigatory Powers and Procedures which is widely used by the professional staffs or committees.

14. Provides administrative and staff support to the summer intern program.

15. Provides staff assistance, information etc. to other committees and commissions most recently to the Senate Commission on the Operation of the Senate and the House Commission on Administrative Review (Obey Commission).

16. Compiling for the use of Members a complete collection of the statutes and regulations affecting Members of Congress.

17. Conducting research in preparation for hearings on "The Effects of Litigation and the Judicial Process on Congress" in view of the increasing number of court cases which threaten to impede the rights and prerogatives of committees and Members.

ADDITIONAL FACTS ABOUT THE JOINT COMMITTEE AND PROPOSED SELECT COMMITTEE

1. Under H. Res. 420, the Select Committee would continue—for the House—the functions and activities of the Joint Committee.

2. No new functions or activities, no new staff, no new space, no added costs, would be authorized.

3. The Joint Committee has not duplicated the activities of any House or Senate committee or commission, nor will the Select Committee duplicate the activities of House committees or commissions.

4. No other committee, commission or other body in the House has carried on activities identical to those of the Joint Committee, nor have they indicated any interest in doing so.

5. Staff salaries of the Joint Committee do not now, nor have they ever exceeded the maximum authorized for Administrative Assistants to Members, and only one staff member has been compensated at that level; salaries authorized under H. Res. 420 are identical to those authorized for all House committees.

6. If the Select Committee is not approved, the Senate Members of the Joint Committee have stated explicitly that the activities of the Joint Committee will be phased out beginning immediately.

7. If the Select Committee does not continue the activities of the Joint Committee, many of the functions will have to be assumed by other bodies with consequent disruption in service and added costs to the House.

8. No committee or commission, including the Obey Commission, has given any indication of an intent or interest in recommending that Joint Committee functions be discontinued or transferred to any other body, except for the proposed Select Committee.

Mr. YOUNG of Texas. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Speaker, what an organization has done in the past is usually the most reliable guide to what it is likely to do in the future.

On the strength of that principle, I urge the approval of House Resolution 420.

The resolution is designed to accomplish just one objective: To continue the work of the Joint Committee on Congressional Operations as a House Select Committee on Congressional Operations—no more, no less.

Judging from its past and its present, I have every confidence that the joint committee—reconstituted as a House select committee—will continue to justify its existence many times over. Its record inspires that confidence.

The joint committee has been a practical committee, undertaking activities and projects and studies aimed at providing usable services and products to the Congress, services and products which meet an immediate and definable need. It has not been merely theoretical or academic or ideological.

Simply to mention a few of its activities should serve to remind us all of how greatly Members and staffs have relied on the joint committee—often, perhaps, without fully realizing the source of the assistance we have received.

Who among us, for instance, has not used the Placement Office either to obtain qualified employees or to refer constituents who are seeking employment on Capitol Hill?

What Member has not had frequent occasions to refer to the Congressional Handbook—that exhaustive and reliable compendium of everything a Member needs to know about Congress?

Who in the Congress is not concerned about the growing tendency on the part of Federal courts to clip away at the practices and prerogatives of elected legislators?

What Member has not been frustrated at the difficulty in obtaining the right kind of information at the right time?

Is there anyone in this body who does not appreciate both the possibilities and the problems inherent in live television coverage of the House?

Do not all of us feel—from time to time—that our staffs and we are functioning in a vacuum 'divorced from the congressional life around us?

These are not rhetorical questions. They refer to services the joint committee has been providing effectively and to problems the joint committee has been working on constructively. That committee has been equipping us with guides and information, advice, and assistance which—to the extent we use them—have become indispensable. I sometimes think, however, that our staffs may be more aware than we are of the practical daily value of the joint committee's many services, in which case we should listen to them.

The activities to which I have referred are probably the better known of the many which the joint committee has undertaken. There are many others. The committee, for instance, developed the computerized Member Information Network, the most advanced automated information system in the Congress. The committee has transferred control of the network to the House Information Systems but continues to work with HIS in efforts to improve and expand the system.

This committee has also been the driving force in developing the Budget Information System, in cooperation with the Budget and Appropriations Committees, HIS, and the Congressional Budget Office—a system which will bring to each Member a wealth of budget and program data at the touch of a few keys.

Individual Members of this body—from first-termers to committee chairmen—have found the joint committee's management assistance invaluable in getting their offices organized and reorganized and functioning effectively. This service—expert, unobstrusive, and thus not widely appreciated—can make a significant difference in how well we serve our constituents and how long we remain on Capitol Hill. And it is ours for the asking.

In referring to these activities of the joint committee, I am not holding out promises for the future. I am reciting actual performance.

Performance depends on the quality of what is done and the quantity of what is produced. On both grounds, I believe the joint committee has performed creditably and in ways that can be measured by the positive effects it produces.

The joint committee's handbook has saved thousands of hours of staff time, given Members themselves a degree of control over their own official lives previously unavailable, and has sustained a high level of reliability.

The Placement Office has relieved Members of consistently onerous problems.

The Travel Service Office is saving time and trouble for committees.

The committee's information inventories, the most comprehensive available sourcebook the Congress has, is attracting growing use.

The committee's intensive management studies of the Congressional Research Service and Office of Technology Assessment, for example, have produced recommendations that are now being implemented.

Its publication, STAFF, has equipped thousands of congressional staff with insights and experience unobtainable elsewhere.

The committee's studies of automated information systems, centralized production of form letters, and space utilization, for example, have produced valuable data now being employed by other groups on the Hill, including the Architect of the Capitol.

This pattern has been characteristic of the joint committee's entire operation. The committee has willingly transferred control of projects it has developed and tested to organizations better able to maintain them. The committee has cooperated fully with others having an interest in its work. And the committee has accepted suggestions about work that ought to be performed.

On the basis of this record of useful service, quality product, and valuable assistance—and I have only sketched an outline of what the joint committee has been doing—I believe that commonsense and our own best interests argue for support of House Resolution 420.

We are not creating, Mr. Speaker, a new committee or a duplicating function. We are simply maintaining, under a different name and under the auspices of this House, an ongoing organization whose work deserves to be continued. Its past is the best guarantee we could ask that its future will be equally productive.

Mr. YOUNG of Texas. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I think we have become too preoccupied with where we are going to put these functions and when we are going to do it. It seems to me that the committee is performing an important function. It is performing it well, and until we find somebody else who is prepared to perform these functions, we ought to permit the select committee to go ahead with the important work that it has been doing.

The select committee performs a placement service which is, I think, highly important to the Members in the functioning of this institution.

I have had a particular experience with a management-efficiency study service which is being performed for Members, and that, I think, is of particular importance. If we use that service, it saves us money and permits us to be more effective Representatives for our constituents.

The management consultant team came through our office and went through the various functions that we and other Members perform. They were able to take our data and compare it with functions performed by the offices of other Members. They compared salary scales and duties performed in other Members' offices, giving us information we would otherwise have been unable to determine.

They were able to go through the equipment we use and make us aware of more efficient ways to use our equipment and make us aware of other equipment that might be available to us. They were able to go up to our district office and see how we perform our functions there and how that ties in with the work being done in other district offices by other Congressmen. That is an invaluable service to us, and it helps to make our work more efficient and more effective.

Mr. Speaker, I think that work ought to be performed, that it should be continued. Some Members may say that it should be performed someplace else, but it is not being performed someplace else; it is being performed by this committee, and I think we should give it our endorsement by approving this resolution.

Mr. YOUNG of Texas. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from North Carolina (Mr. ROSE).

Mr. ROSE. Mr. Speaker, I rise in support of House Resolution 420; and I encourage my colleagues in the House to support this important resolution with me.

I would like to talk for a few minutes about two activities that have come out of the Joint Committee on Congressional Operations, which I have had some personal contact with, and use that as part of my reason for supporting the establishment of this select committee.

The Joint Committee on Congressional Operations devised an idea whereby a summary of floor debates would be put together and placed in a computer available to Members of Congress in their offices. The Commission on Information and Facilities actually carried out the experiment with the help of the computer operations of the Committee on House Administration, but the basic idea and the basic thrust of this summary of floor proceedings system came from the joint committee.

In the Committee on House Administration on which I serve we have a computer subcommittee now called the Computer Policy Group, and for many, many years there have been discussions around this place about establishing a computer network of information for Members of Congress. That talk had gone on and on and on, but it was the Joint Committee on Congressional Operations, under the leadership of the gentleman from Texas (Mr. BROOKS), that did it. They did not talk about it, they did it. They established a pilot information network system, and today there are reporters on this floor who make summaries of floor debates, who feed the summary into a centralized computer system, and that summary of floor debates is now available in Members' offices.

We have a backlog of Members wishing to receive that summary of the debate, and we are actually able only to add about 20 or 30 a month as we slowly upgrade our computer capability. However, the Joint Committee on Congressional Operations is responsible for the basic thrust of the information network that we hope in years ahead will give new and expanded information services to Members of the House of Representatives.

Mr. Speaker, the second area is television. We have all heard and agonized with our colleagues in other committees of this House as they have gone through the various pros and cons and the fine points of how to bring television into the Congress. The debates have been well recorded, and I sympathize with the members of the committees because of the complexities of the problems that they have faced; but it was the Joint Committee on Congressional Operations which took the bull by the horns and brought television into the House of Representatives on a pilot-test basis.

Mr. Speaker, whatever else we can say about the quality of the television or the coverage that we are receiving in this pilot test today, it has been a beginning. It will provide the House of Representatives with an opportunity to decide how it wishes to proceed with making public this most important public forum, the U.S. Congress.

While others have talked, the Joint Committee on Congressional Operations has acted.

Mr. Speaker, I can only say to the Members that I look forward in years ahead to other areas of cooperation from the Select Committee on Congressional Operations.

Their track record in the past has been good. They have brought forth innovations that will make this a more effective legislative body. I have nothing but the utmost confidence that to keep this mechanism in place for the future will have an ultimately good effect in the Congress of the United States.

Mr. Speaker, I urge the support of all of the Members on House Resolution 420.

Mr. YOUNG of Texas. Mr. Speaker, the last word on this subject from this side of the aisle will be heard from the gentleman from Minnesota (Mr. OBERSTAR) and I yield him 2 minutes for that purpose.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman from Texas for yielding to me.

Mr. Speaker, years ago my predecessor in the Congress, John Blatnik, and my former boss, told me the story of how he arrived in this body. He came as a newly elected Member in 1947. He was directed to his office and found absolutely nothing. There was not a notebook, a directory, nor a list of other Members of the Congress.

He said to his assistant: "Well, at least there is a phone. Let's make a call."

They did not even know who to call. They had no idea of how to set up the office and get it running.

John Blatnik calls those years "the dark ages of Congress."

What has happened in the years since then is that a whole body of information has been developed and a whole program of training Members of Congress to move into their jobs immediately, without delay and be able to function effectively from the outset. This has been the product largely of the Joint Committee on Congressional Operations.

I recall my own days as a member of the staff and as the administrator of the House Public Works Committee staff when I called the Joint Committee on Congressional Operations to come in and lay out workflows for us and to help us modernize procedures both for the congressional office and for the committee staff. Their program provided in-house expertise as well as experts from outside

the Congress to help guide us to respond to the needs and fast pace of a highly technological society.

That is what the work of this committee is really all about. That is what we are trying to do, to keep the Congress in tune with mid-20th century America and hopefully to keep the Congress at least a step ahead.

Mr. YOUNG of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. THORNTON). The question is on the resolution.

The question was taken and the Speaker pro tempore announced that the ayes appear to have it.

Mr. ANDERSON of Illinois. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 211, nays 147, not voting 74, as follows:

Brinkley	Krueger	Stump
Brodhead	Leggett	Symms
Brown, Calif.	Long, La.	Teague
Brown, Ohio	McKay	Vander Jagt
Burke, Fla.	Mann	Walsh
Clay	Meyner	Wampler
Collins, Ill.	Mikulski	Wiggins
de la Garza	Mikva	Wilson, Tex.
Diggs	Milford	Wolff
Dornan	Mitchell, Md.	Wydler
Eckhardt	Montgomery	Young, Alaska
Edwards, Ala.	Mottl	Zeferetti

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. Ashbrook against.

Mr. Florio for, with Mr. Young of Alaska against.

Mr. Koch for, with Mr. John T. Myers against.

Mr. Bingham for, with Mr. Jeffords against.

Mr. Biaggi for, with Mr. Frey against.

Mr. Wolff for, with Mr. Gilman against.

Mr. Zeferetti for, with Mr. Brown of Ohio against.

Mr. Santini for, with Mr. Burke of Florida against.

Mr. Milford for, with Mr. Edwards of Alabama against.

Mr. Rodino for, with Mr. Wydler against.

Mr. Rogers for, with Mr. Vander Jagt against.

Mr. Harrington for, with Mr. Symms against.

Mrs. Meyner for, with Mr. Rhodes against.

Mr. Staggers for, with Mr. Wampler against.

Mr. Mitchell of Maryland for, with Mr. Wiggins against.

Mr. Clay for, with Mr. Motti against.

Mr. Patten for, with Mr. Teague against.

Mr. Badillo for, with Mr. Dornan against.

Until further notice:

Mr. Alexander with Mr. Ford of Michigan.

Mr. Anderson of California with Mr. Andrews of North Carolina.

Mr. Flowers with Mrs. Boggs.

Mr. Holland with Mr. de la Garza.

Ms. Mikulski with Mr. Brown of California.

Mr. Krueger with Mr. Stump.

Mr. Roe with Mr. McKay.

Mr. Breaux with Mr. Leggett.

Mr. Blouin with Mr. Mikva.

Mr. Scheuer with Mr. Charles Wilson of Texas.

Mr. Richmond with Mr. Long of Louisiana.

Mr. Pepper with Mr. Mann.

Mr. Diggs with Mr. English.

Mr. Brinkley with Mr. Eckhardt.

Mrs. Collins of Illinois with Mr. Brodhead.

Mr. Akaka with Mr. Gammage.

Mr. Huckaby with Mr. Montgomery.

Ms. KEYS changed her vote from "yea" to "nay."

Mr. STARK changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

UNITED STATES-CUBAN DIPLOMATIC RELATIONS

(Mr. YOUNG of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YOUNG of Florida. Mr. Speaker, I continue to be confused, concerned, and agitated about the status of United States relations with Cuba. Press reports are numerous, conflicting, and very alarming about Cuba's involvement with many of the African nations; and at least to me, they are equally alarming about the positive outlook of the administration and the State Department for a relaxation of our diplomatic relations with that country.

One of our colleagues, after a 5-day visit to Cuba and a meeting with Fidel Castro, is quoted as saying that—

> There is now a good opportunity for normalizing relations between the United States and Cuba.

He cited areas of cooperation on which Fidel Castro told him the United States and Cuba could move ahead immediately, such as fisheries talks, sports and cultural exchanges, and joint efforts to curb the spread of sugar cane blight. These areas could be discussed without any preconditions, according to the Con-

gressman. He also reported that Cuban officials told him that the number of troops in Angola had been reduced by one-half since last spring. At the high point of the involvement, the number of troops was estimated to be about 20,000. The Cubans apparently indicated to the Congressman that the troops would remain in Angola for some time, and would leave only when asked to do so by the Neto government. The Congressman also said that in order for full scale negotiations to begin with Cuba, the United States would have to lift the trade embargo. He saw the lifting of the ban on food and medicines as a possible start. He was also quoted as saying that the continuation of the antihijacking agreement, which is due to expire 18 days from now, was contingent upon the lifting of the trade embargo, and other things.

The administration has indicated in an "on again, off again" manner, that some commitment that Cuba will pull its troops out of Africa would be necessary before normalization of relations can begin. Castro has indicated in a fairly straightforward manner, that he will not pull his troops out of Africa until he is ready, and a relaxation of the trade embargo is essential before normalization of relations can begin.

I submit, that in spite of all of the public conditions announced by both sides, normalization of relations has begun. On March 4, Secretary of State Cyrus Vance said that—

The United States has sent word to Cuba that we would like to discuss the fishing issue "promptly."

On March 5, the State Department gave permission for a group of college basketball players from South Dakota to travel to Cuba. On March 7, the State Department said that there would be no objection to a major league baseball team playing an exhibition game in Cuba, and that the New York Yankees are considering the possibility. On March 18, the travel ban to Cuba was lifted.

These small concessions are already having quite an impact. According to E. Wallace Lawrence III, of New York's Orbitair International, a tour operator specializing in trips to socialists countries, "Business is going like a ball of fire." Orbitair says it has already booked 18 tours of Americans and expects to write $1 million in Cuban travel business this year. The State Department said last week that it was getting 100 phone calls a day from would-be tourists seeking information on travel to Cuba. The travel ban, I may remind you, has now been lifted for exactly 10 days.

These preliminary gestures also look very attractive to enterprising businessmen, who are already "chomping at the bit" for a relaxation of the trade embargo. An executive newsletter called the Gallagher Presidents' Report, which is mailed to my office and presumably to yours, carries the following newstip to chief executives on its front page this week:

Cuba Trade Picture Brightens—Look for initiation of full-scale commercial relations with Cuba within the next 12 months. Upcoming negotiations to resolve potential conflicts resulting from U.S. institution of 200-mile fishing zone to set stage for trade program. Opportunities seen in U.S. sale of canned goods, fabrics, medical equipment, pharmaceuticals. Washington based Kirby Jones sets up Alamar Associates to advise companies on procedures for trade contacts with Cuba. Jones prepares presentations for proper government officials in Havana. Handles follow-up correspondence plus arrangements for visit by U.S. Executives. Interested company presidents may contact Jones at Washington headquarters: 1156 15th Street, NW., Suite 919, Washington, D.C., 20005.

What exactly does the publisher of this newsletter, or Mr. Kirby Jones, know that we do not know? Why has Congress, and the general American public, had no official statement from the State Department or the administration, about the progress of plans for negotiations with Cuba? Why have we no statements about the intricate Afro-Cuban involvement? Why do we hear so little lately about the extent of Cuba's dependence on the Soviet Union?

Cuba lies less than 100 miles from my State of Florida, so perhaps my concern for this issue is more intense. However, my colleagues have equal cause for alarm. The Soviets have conducted numerous air deployments to Cuba, which provides them with the capability of observing all U.S. forces in the Atlantic.

It has been estimated that there are several thousand Soviet military personnel in Cuba, and that the Soviet Union has given Cuba $1.5 billion in military assistance. Russia is also spendng approximately $1.5 million a day in economic assistance in Cuba. A few other matters that we should not forget before we extend the long arm of friendship, are the $1.8 billion in claims against the Cuban Government for nationalization of business and property owned by U.S. citizens; the fact that the United States still needs the Guantanamo Naval Base for strategic purposes; and the fact that if the trade embargo is lifted, the return to the U.S. sugar market to Cuba would mean reduced imports of sugar from friendly sugar-producing nations as well as U.S. sugar growers. In adition, the Cuban Government is reportedly holding anywhere from 20,000 to 50,000 political prisoners in its jails. We are cutting off relations with friendly Rhodesia because of the human rights issue in that country, but the administration seems less concerned with human rights violations in Cuba. The Cubans have not shown signs that they are willing to permit free emigration, and they have not indicated what their policy will be toward the freedom of travel for Cuban exiles who wish to return and visit their families.

Personally, I cannot yet see what the benefits to the United States will be in a one-sided normalization of relations with Cuba, and I am alarmed at the overtures that have been made toward that end. I ask my colleagues to share in my concern, and my desire that the Congress of the United States be made aware, officially, of what has happened, what is happening right now, and what is planned for the future in all areas of United States-Cuban diplomatic relations

JOINT STATEMENT OF RAY ROBERTS, JOHN PAUL HAMMERSCHMIDT AND HAMILTON FISH, JR., ON H.R. 5045

(Mr. ROBERTS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROBERTS. Mr. Speaker, I would like to call to the attention of my colleagues and the American people, by publishing the following joint statement made in reference to the bill, H.R. 5045, to be considered in the House tomorrow as it concerns the Veterans' Administration and veterans. Mr. HAMMERSCHMIDT, the ranking minority member of the Veterans' Affairs Committee and Mr. FISH of New York, join me in this statement.

JOINT STATEMENT OF RAY ROBERTS, JOHN PAUL HAMMERSCHMIDT, AND HAMILTON FISH, JR., ON H.R. 5045

H.R. 5045, a bill granting the President authority to transmit to the Congress plans for the reorganization of the agencies of the executive branch of the government, will be debated by the House on Tuesday, March 29.

The bill, as reported, places certain limitations on the President in his submission of any reorganization plan. Among other things, a reorganization plan may not have the effect of creating a new executive department, abolishing or transferring an executive department or independent regulatory agency, or all the functions thereof, or consolidating two or more executive departments or two or more independent regulatory agencies, or all the functions thereof.

The reported bill would, however, allow the President, to abolish the Veterans' Administration, or consolidate it with another agency of the Government, or transfer some of its functions to another department or agency of the Government. This disturbs the veterans of our country and many Members of the Congress.

We feel the Veterans' Administration must continue to be maintained as a separate entity. This independent agency of the Government administers benefits programs totaling approximately $20 billion to millions of veterans and eligible dependents.

Over the years veterans organizations' spokesmen have continuously warned this body that the goal of many social welfare planners, in both Democratic and Republican Administrations, will always be to take over the Veterans' Administration programs, consolidating them with other Federal programs.

Recently, the Secretary of Health, Education and Welfare, Mr. Joseph Califano, announced plans to hold hearings throughout the country in order to receive public comment on his welfare reform plan. He announced that his reform plan would include veterans' compensation for service-connected disabled veterans and pension benefits for totally and permanently disabled nonservice-connected veterans. Secretary Califano suggested that veterans' compensation was a "social insurance benefit" and was contingent on prior employment. Of course, those familiar with the eligibility criteria for veterans' compensation know that the benefit has no bearing whatsoever on one's prior employment nor is the benefit contingent on how much is paid into an employment program as the Secretary suggests. Te veteran in receipt of compensation is being paid for loss of earning capacity as a result of a service-connected disability.

Due to Secretary Califano's recent announcement and attempts by previous ad-

ministrations to transfer various functions of veterans' benefits and services to other departments and agencies, we had planned to offer an amendment to H.R. 5045 on Tuesday during consideration of the bill by the House, wherein the Veterans' Administration would have been exempt from being included in any reorganization plan submitted by the President. All major veterans organizations have personally requested that we offer such amendments on behalf of their memberships totaling many millions of veterans throughout the Nation.

Because of assurances by the administration that the Veterans' Administration will continue to be maintained as a separate entity and that no effort will be made to dismantle it, we have decided not to seek to amend the bill on the floor. On Thursday, March 24, Mr. Bert Lance, Director of the Office of Management and Budget, during a conversation with the chairman of the Committee on Veterans' Affairs, assured the chairman that the Veterans' Administration would not be dismantled and would not be adversely affected by any Presidential reorganization plan.

We feel it was absolutely essential that the administration make a commitment on this issue, especially in view of Secretary Califano's recently-announced plan to include veterans' compensation and pension benefits as part of his welfare reform package.

Mr. Bert Lance has the confidence and trust of the President, and as one of the President's closest advisors, we feel he speaks for the President. Having received assurances from Mr. Lance that the Veterans' Administration shall continue as a separate entity with exclusive jurisdiction over all veterans' benefits and services programs, in our desire to cooperate and work with the administration, we have decided not to offer amendments to the bill, H.R. 5045, as we had previously intended.

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker and fellow Members, on February 17, 1977, I left Washington in order to see if I could overcome a seizure of the flu with accompanying very high fever, and the interim period following prevented me from being present at the time that my letter of resignation, addressed to the leadership of the House, was presented to the House. In reading the RECORD, I find that there are a couple of very disturbing and troubling things.

No. 1, the leadership failed to make full, complete, honest, and direct recital of the facts as they led to that point at which I felt there was no alternative but to submit my resignation.

The course of action, chronologically speaking, that followed the House's action on September 17, 1976, in establishing the Select Committee on Assassinations clearly indicated, from the very beginning, that there were some things awry, not quite right. Nevertheless, I had to make a decision at that time, and that was whether under the circumstances under which the committee was formed at that time under intense pressure from the then Speaker Carl Albert and, in turn, communicated by the then chairman of the Committee on Rules, the Honorable Ray Madden, a hastily prepared resolution should be introduced built upon one that I had originally introduced on February 19, 1975, but very importantly changed around to where there was no recital, for example, of legislative predicate or intent. There was a very serious deficiency. As an accommodation, on the specific request of the chairman of the Committee on Rules and the communicated request through him by the Speaker, I then introduced that resolution the day before the Committee on Rules considered it and approved it. Though it has never happened in the annals and precedents of the House since March 4, 1789, where a lame duck is appointed chairman, though I was the prime author of the resolution—and I might, parenthetically speaking, say that I was the first Member of the House to introduce a resolution seeking to recognize congressional responsibility for reviewing and evaluating the impact of political assassination on the national level on our governmental and our democratic processess, more than from the standpoint of who done it, and that, surely, being the first, and being willing, after great thought, consideration, and study for a period of about a year and one-half, finally introduced that resolution, that no one should have any doubt about what my thinking, my feeling, my convictions have been.

It was about 2 months after I introduced the resolution in 1975, that that Representative Downing here on this floor asked to speak with me during the deliberations of the House. He told me that when I introduced my resolution, he thought that I was wrong; he thought it was some kind of a gimmick. However, since then, mostly because of a son of his who had been attending the University of Virginia and who had had occasion to view the so-called Zapruder film or a copy of it, he became convinced that the House had to do something about it. He had a copy of my resolution word for word that he intended to present to the House that day, but he was trying to see if I would join with him in deleting the assassinations of Martin Luther King and Robert Kennedy and the attempt on the life of Gov. George Wallace, all of which I had included in my original resolution. The reason for my including them I have expressed on repeated occasions in the past, and I will not burden the Members with that explanation now.

I told Mr. Downing that I had thought that resolution out for a year and a half, and that I could not in good conscience accept an abbreviation under these circumstances without some definite reason for doing so.

Mr. Downing said:

Well, all I can tell you is I cannot go along with anything like Martin Luther King, and especially the others. Besides, we would be lucky if we could just start with one.

He ended up introducing his resolution, and I maintained my position. The rest is history.

Finally, as I said, in the waning period of the 94th Congress the House in precipitous fashion decided to adopt by a very substantial vote the resolution known as House Resolution 1540.

Although it has never happened before, I repeat, the Speaker named Tom Downing as chairman, although by that time he had announced his retirement from Congress and would by any definition be considered a "lameduck," and the Speaker went to the pain and trouble of naming me specifically as vice chairman.

The thing about which I had to make up my mind was whether or not, with a sandbagging of that nature, it would be fitting for me to go on since it was obvious that very limited action could be taken between September 19 and January 2 of this year, since by the very nature of the circumstances the House would not be a continuing body and by the very consequent fact following from that action that all committees would expire, and particularly a select committee of the House, and whoever might be chairman in 1977, if at all, would be handcuffed by personnel hired by the "lameduck."

However, from the action surrounding the debate on the day the House debated that resolution, it was obvious that I was being jockeyed into the position of erupting and saying:

"I will not serve,"

And as one Member put it:

"Well, you know, you hotheaded Mexican, if you can't pitch, you won't play ball."

So I went ahead and accepted the naming as vice chairman and attended every single meeting of the committee that was called.

At the first informal meeting Chairman Downing asked immediately for unanimous consent that he be authorized to unilaterally hire necessary personnel because mail was coming in, there was no such thing as even a place for the committee to house its activities, and there were no secretaries to take letters and take care of the usual work. This authority was given to him under one condition, and that was that consultation would follow at the next subsequent meeting of the committee.

The Members will recall that by then the Presidential and national elections were on us, and almost every Member returned to his district immediately after October 3. However, on that date I had been called by Mr. Downing asking me if I would be good enough to meet with a man to whom he had given a commitment to act as chief counsel. In his words, this man was the fellow who was famous in the Yablonski case, and his name was Richard A. Sprague.

He then made an appointment to meet with Mr. Sprague for breakfast the next morning in the Longworth cafeteria, and my administrative assistant and I met with him. Mr. Sprague stated that he had been offered and he was accepting the job. I think he said it was a week before that that Mr. Downing had offered him the job as chief counsel, but then

his only condition was that he would do so on a nonpolitical basis, that he would have complete control of staff, including hiring and firing, and that he would not accept unless he were considered to be not only chief counsel but chief of staff as well.

I said that I had presented Mr. Downing at the first organizational meeting that I referred to before with a written memorandum in which I specifically made some suggestions as to what I thought would be the way to proceed, given the conditions under which the committee was formed. I had specifically stated that, in my opinion, the most important and most urgently needed thing was to have two persons, one, the chief counsel, and the other, the chief of staff, who would be conversant with the House, with its mores, with its customs, with its laws, with its rules, because I felt that the most important thing was to be certain that in the staffing of that committee we would not use undue haste which would result sooner or later in embarrassment to the House.

There was no cognizance of my recommendations taken by the chairman or by any member of the committee. I gave copies to every single one of the other members.

In my conversation with Mr. Sprague I said to him point blank: "Then you consider yourself hired out?"

He said, "Yes. The chairman has made a commitment. I have accepted it, and these conditions have been acceptable to the chairman."

However, he thought it would be an act of courtesy for me to be consulted as vice chairman.

I then asked him, "What, if anything, is the insistence, since you admit you have had no previous experience on the Hill, to not selecting somebody to take charge of whatever staff you pick up in order that that person will guide you because congressional procedures are a world unto themselves?"

His reply was, "My dealings have been with the chairman and the subcommittee, and given this initial period of time, we have to get started immediately, and there will not be any problem of that nature."

I then asked him, "Are you aware of the fact that if you hire, you must be extremely careful because if you take somebody away from a permanent job and you do not know what is going to happen in the next Congress, we might find ourselves making a commitment that we cannot honor?"

He seemed puzzled by that, and he asked me specifically, "What do you mean by that?"

I said, "You know that the House is not a continuing body. Unlike the other body, we have to come back; we have to get a resolution; we have to get reapproval, so I think that our main task right now, in just about 2½ months, is to try to justify what the House has already done and justify it in the sense that we want at least to be able to give a blueprint of what we hope the House will resume come next January."

He said, "I did not understand that too well. How can I make a commitment if I want to get a lawyer? I am working on two very prominent lawyers in New York. I do not know what I can do."

I said, "That is the reason I am bringing it up."

Mr. Speaker, that was more or less the essence of that meeting. The commitment had been made. I had no part in the formulation of criteria as to what kind of person it should have been, nor did the committee, as far as I know.

We did not have our first meeting until after the election, and that was on November 15, on a Monday. It was called for 1 day for the purpose of approving formally the employment of the chief counsel and to have a report from him with respect to what staffing he had done. It turned out that we met for 2 full days instead of one. We discussed everything but that.

By that time many people had been hired, but no one else was ever presented to the members of the committee. I made a request. It was never honored. I did not get any list of who had been hired or why or where they came from until about the time that the committee voted on February 2 to reconstitute the committee.

Anyway, Mr. Speaker, I am saying this only because in the meanwhile the year ended. We came back in January. In the meanwhile, there were no further communications.

When we had our final meeting on December 17, 1976, the main question was one that every Member read about.

That was the budget.

In the executive session I raised the question of a report because there was only one duty that was imposed upon us under House Resolution 1540, and that was that as soon as practicable to render a report to the 94th Congress.

When they gave us on that Friday meeting of December 17 a copy of what purported to be a report I protested because it was not only sophomoric, it was only junior high schoolery. It was the poorest excuse I have ever seen of a report to any legislative body that I know of and I have served on the city council, the State legislature, and now the Congress. But the big issue was the budgetary figure. The council said it would not be necessary to go back to the committee and ask unless it was done properly, $6.2 million. I said was this biennial? He said it was not biennial, this was an annual figure.

The only question asked was that I asked him. I said, "You mean bitennial?" He said, No, absolutely not, this is annual." I said, "In other words, you are talking about 13 million for the duration of this Congress?" He said, "Yes."

I said, "Well, Christmas is around the corner." That was the only comment I made.

We were about to pack up and leave when the chief counsel, in a manner that became a habit, as I discovered—and everybody was anxious to get away because it was about 5 p.m., or later and two of the members had left. The chairman was about to adjourn and the chief counsel said:

Oh, by the way, there is just one thing further. I have established a contact with a journalist or a man who works for the U.S. News & World Report, who is very close and a confidential friend of the Cuban Ambassador to the U.N. He has conveyed the word that the Cuban government has some documents or material that have to do with Lee Harvey Oswald. I just thought I would tell you, because I am about to pursue this, and a meeting is being arranged.

I could not believe my ears. I said by what authority is this? Who on this committee knows about this? Who has authorized this? Who is this mysterious figure at the U.S. News & World Report who has such intimate personal contact with the Cuban Ambassador? How will this impinger on the executive department or the State Department, or whatever it is? Does the executive branch of the Government know this? This is on a high policy level?

Congressman FAUNTROY tried to interject, very impatiently and he said—

Let's get going. Let's let him do what he has got to do.

I said—

Mr. Chairman, I think this is very important. I would at least want to know what all of the parameters are on this matter under which the chief counsel is going to act in our behalf at a time our government is trying to exercise some kind of reproachment with old bearded Fidel Castro.

Mr. Sprague became indignant and he dropped the subject at that time.

The chairman rapped the meeting to a close. I started to leave out the side way when Mr. Sprague followed me, which was the first time this had been done because before that meeting at any time we met we would meet and immediately thereafter he would come up and say to the chairman—

The press is outside, we had better go meet them.

This time as I say he came up to me and he said—

I want to have supper with you. I think you are rather upset about this.

I said—

No, I do not have time to eat supper with you. I want to take off for Texas in the morning. The only thing that is upsetting to me is what I said a while ago that we might be getting into trouble. I do not think the committee should be exposed needlessly and, in turn, the House of Representatives.

He said—

Well, why don't you come to—

And he mentioned someplace. I do not know where this restaurant is. I heard it was at Watergate. I do not know. I have never been in the Watergate. And I said—

No, I couldn't have supper.

That was the last that was said.

However, I have very secure information that this was followed through. That there have even been meetings at the U.N. And that we do not know the extent or just what these transactions will lead up to. And I know that no member of the committee did at that time.

This happened the same way on two or three other areas of investigatory activity.

I became exercised and sent written word through one of the aides that I

would not be able to sign the report, and I had refused during the meeting to go along with the suggested draft that the chief counsel and his staff had prepared of the resolution to be introduced in January.

When I returned to Texas, I had a long distance call from the chief counsel requesting that I, please, not file dissenting views, that I would be the only one of the committee who would, that this would create problems when the attempt would be made to reestablish the committee, and, above all, that even the budgetary discussion was something that he considered essential but that he recognized as sensitive. My reply was—

I cannot sign this report, and I will not.

Whether I called it a dissenting view or something else, I do not know; I am trying to be as good as I can on my memory. He said—

Look, why don't you wait until we send you the corrected draft? You will have this by Tuesday, the 22nd.

I never received anything until December 29, even though it was supposed to have been sent.

I had four subsequent long distance calls from the counsel expressing dismay that I had not received the report. The report was to be filed on December 31 by Chairman Downing. So I hastily drafted additional views, because he called me again and said, "Please, whatever you do, do not call in dissenting views."

Whether I did right or wrong, I went along and called in additional views.

In the meanwhile a reporter for the New York Times by the name of Burnham called me the very next day on the 30th of December and said:

I just returned from a trip to Virginia where I spent all morning long with Chairman Downing, and I have just finished a brief visit with Counsel Sprague. I know it is difficult to talk this way, but I have got to run this volume. I have this information that I dug up in Philadelphia on just a four-hour trip to Philadelphia.

Then he proceeded to tell me about some scandal and some adverse reports by the Crime Commission in Philadelphia, by the State attorney general, by the legal committees of the State bar in Philadelphia. I said—

Well, Mr. Burnham, you don't expect me to pass judgment on this?

He said—

No. All I wanted to know was did you at any time check Mr. Sprague's background?

I said—

Well, I personally did not, but in December after that meeting I did make a request of the Library of Congress to, please, give me a printout, or copies—whatever they could obtain from the Philadelphia newspaper files and records in order that I could understand this issue.

I said—

I think, however, it would be unreasonable for you to expect in this quick telephonic conversation me to give you a judgment.

He said—

"No; you are right. I do not expect that, but," he said, "you know, why don't you run a check?"

I said—

I did not hire him, and all I know is that since you don't have anything relative to him since the Yablonski proceedings—he seems to have gotten all kinds of notoriety on that—I do not know. You have started digging back 15 years, 13 years, 12 years.

I said—

Mr. Burnham, I cannot resist the temptation to say you are trying to do a hatchet job.

He said—

Well, I will see you about this later.

Fine. He finally printed his story the first week in January. Mr. Sprague got hold of it. He said—

This is a hatchet job. Let me give you the facts.

This is telephonic, not a personal visit. On the strength of what he said, plus one thing he closed with—

Remember that I would never have been appointed Special Assistant to the Attorney General of the United States if I had not had some clearance from the Justice Department and the FBI.

It seemed to me to be a telling point, plus the other things he explained, about the incidents concerning this woman's husband he was running around with, that he had two office investigators when he was assistant district attorney in Philadelphia, to shadow and finally prosecute him.

The newspapers in Philadelphia apparently had been full of that but none of us had any idea that it existed until Burnham's articles. I found out, when the Library of Congress finally gave me fragmentary information on or about January 25, everything Mr. Sprague had told me in explanation was either deliberately distorted or essentials left out. I discovered that there had been no FBI clearance, that in that type of designation there hardly ever is.

For the first time—and this, remember, was on the eve and I am sure it was by the time the Rules Committee had been deliberating on this stuff and it was a surprise when we appeared before the Rules Committee. It was Representative DEL CLAWSON who was kind enough to inform me by way of a question that the Chief Counsel had hired 23 people on January 1. I did not know it and no other member of the committee did because no other member of the committee even had the list of the staff.

Well, we went on ahead and on Monday preceding the Tuesday meeting of the Rules Committee I received a note from the Speaker at 1 p.m. asking me to attend a meeting at 5 p.m. I went. I had no idea what the meeting was all about. I had the impression it was a call for me, nobody else. No explanations were given.

When I got there I discovered that the great Rajah of the Rules Committee, the Honorable DICK BOLLING, the gentleman from Missouri was there, with the Delegate from the District of Columbia, WALTER FAUNTROY, the Wazir of Washington, and the gentleman from Washington, TOM FOLEY, the chairman of the Democratic Caucus, and the majority whip, the gentleman from Indiana (Mr. BRADEMAS), and some of his aides and an array of Speaker's aides in the room.

After a delay, the Speaker was busy, and we waited about 15 minutes, we went in. The minute we sat down the Speaker turned to me and said: "HENRY, what about it?" At that point the gentleman from North Carolina, RICHARDSON PREYER, said:

Mr. Speaker, we thought we would have a meeting to find out how the leadership is going to back us on this resolution.

He said:

HENRY GONZALEZ and Walter and I had a meeting.

I said:

Hey, wait. What meeting? I never had a meeting with you.

The gentleman from Missouri (Mr. BOLLING) interjected and said:

Wait. If you want to blame anybody, it is my fault. I guess I am the cause for this meeting.

He said, speaking and addressing himself to the Speaker:

You know that I always resisted this kind of resolution but last year when the Black Caucus and the others came in and said they had some evidence on the Martin Luther King, and which I consider they have had, I decided I would do what I could. And since then the longest time and best friend I had since I came to Washington 25 years ago, Joe Rauh, the attorney has called me and has asked that I do everything I can to defend and protect and keep Richard A. Sprague, the best prosecutor in the country. Now, I am not a lawyer but that is what he tells me and if Joe Rauh says it, that is it.

Now I will tell you something. The only way you are going to get anything out of this House is if you get a resolution and you have a clause in here saying it will not be extended beyond March 31 and you limit it to the funding in House Resolution 11, which is $84,333 per month.

Now, meanwhile great utterances were being made to the press by the leadership. The Speaker said:

We are naming HENRY GONZALEZ. He is going to set the policy, not Sprague.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield to me?

Mr. GONZALEZ. Not at this time. I do not have that much time. The gentleman has had over a month and a half or 2 months.

Mr. THOMPSON. I will seek my own time.

Mr. GONZALEZ. Mr. Speaker, on January 25 in the New York Times the right honorable majority leader, the gentleman from Texas (Mr. WRIGHT), stated:

Representative HENRY B. GONZALEZ, the Texas Democrat, in line to be the committee chairman, would have to get the reins in his hands, curb what he called "the voracious appetites" of some of the staff and guarantee that the investigating tactics and techniques of the committee would not impinge on basic human rights.

This is the kind of stuff that was coming out all over referring to me, referring to what was expected.

The Committee on Rules, two members of the select committee being on the Committee on Rules, went to great pains.

They did not cross-examine the other members. I was left alone and unaided. There was not one speech made in the RECORD from January 4 until February 2 by any member of the select committee supporting the reestablishment of the committee. When we appeared before the Committee on Rules, one would have thought I was the only one. I was cross-examined. I was grilled. The Congresswoman, the gentlewoman from New York (Mrs. CHISHOLM), had a list: "Are you going to do this? Are you going to do that? Are you going to keep this to the limits? Are you going to curb this chief counsel?"

I had the Congressman, the gentleman from Connecticut (Mr. DODD), a member of the select committee, with a three-page demand sheet. Yet when I tried to do it as soon as I did have the authority, which was February 2, there was complete, thunderous silence from the right honorable gentleman from Connecticut, Mr. CHRISTOPHER DODD; not a word, not a word.

When I pointed out that the committee was over-spending, as it has by now, in the range of exceeding $100,000 over what the House mandated was the limit, not a word.

The Speaker, the gentleman from Texas (Mr. WRIGHT), the gentleman from Connecticut (Mr. DODD), the gentlewoman from New York (Mrs. CHISHOLM), nobody. The gentleman from Illinois (Mr. ANDERSON), that great apostle of frugality in Government from that side, of course, not a word, never.

Well, I go along. I take it seriously. I made pledges. I put it on the line. It was not until February 2 that I had any kind of a grant of authority, even though one would have thought for a month that I had been chairman all along.

The first thing I am presented with is the salary vouchers, good old salary vouchers; yes, sir. They just wanted me to sign them in blank.

I said, "No; bring me a list."

I said—

By the way, on February 2 at about 7 p.m. the House voted the resolution. At about 7:10 the Speaker named the list and the chairman. At 7:15 I was trying to get hold of the chief counsel: nowhere to be obtained.

The next day I tried to have a meeting of the committee informally to tell them—

Look, it's worse than I thought. What are we going to do about it?

I could not even get two members, including the Delegate from the District of Columbia.

I tried to meet on Friday—worse.

In the meanwhile, where is the chief counsel?

Finally, on Saturday morning one of his aides said—

He is in Acapulco. He has gone away while you guys are sweating your tails off all week. He is down in Mexico taking the Mexican sun. He is not worried about it. He knows the committee has got you.

I left word that I would like to hear from him the moment he returned.

In the meantime, I arranged to meet the members informally for a very pre-organizational discussion on Monday at 3 p.m. At about 10 a.m. Monday morning, I had a phone call from the chief counsel. He said—

I understand you want to see me.

I said—

Well, I did.

Well, I understand you are having a meeting with the committee at 3 o'clock. I guess you wanted me there.

I said—

No. We are not going to discuss situations that have anything to do with an input from you.

We are going to discuss strictly policy matters that only the members of the committee should and can properly and responsibly decide.

He said—

Well, I heard from the other members that you are having this meeting. I think I ought to be there.

I said—

No, I think the members should have gone to the trouble of explaining to you why this meeting is being called. It is not a formal meeting; members don't have to come. I can't, under the rules, call a formal meeting. I am sending you notice of a formal meeting for Wednesday, the 16th, but that will be in writing and in compliance with the rules.

Meanwhile, we have a real problem. In the interim, here comes $9,900 plus worth of expense vouchers for the month of December. The biggest item on that was long distance telephone calls from the chief counsel. In looking over the numbers, I picked one number and called Philadelphia. It was his law office. Another number—well, it should be on the record.

Now, who is paying for that? I demanded to know where the funds were coming from to pay $9,900 plus of expenses—not salaries—expenses for December, the 94th Congress. Nobody gave a tinker's damn, but I refused to put my signature on that because, under the rules of precedence and the law, both stare decisis law as well as legislative law, I could be personally responsible for that kind of action. Whether anybody agrees with that or not, I know the law, and I refused.

I demanded that Mr. Sprague give me a breakdown of each one of those expense vouchers, reciting the purposes for which they had been expended and where he thought the money was going to come from. I never got it. So, at that meeting on Monday, the first one, informal, we met in the Rayburn Building, in room 2222. All but two members showed up.

For the first time, I gave them the list which I had obtained when the vouchers for the salaries had been presented, and had been done so reluctantly by an assistant who said—

Mr. GONZALEZ, I don't know if I should do this. Mr. Sprague has given us strict orders never to give a Member of Congress any information as to staff.

I said—

Well, it is too late; I got it.

So, I made copies, and then I tried to find out who owned the 73 people on the staff. I found that Mr. Downing had unloaded a total of about nine of his congressional district office staffers on the committee, most of them hired December 31 and on January 1. One had been a temporary employee at $16,000 per year. He is on the payroll at $30,000 right now. He hired one staffer as a public relations assistant at $36,000, surnamed Chardak.

I do not know, maybe I just did not have enough exposure in 1 month as being the chairman, but I never knew that staffers had $36,000 per year public relations assistants. He is still on the payroll, incidentally.

That Monday afternoon, I gave the committee this, and I said—

Look, gentlemen, if we come under the terms of $84,333, we are already exceeding our budget, just on expenses alone, of near $10,000, not counting salaries.

Mr. PREYER said—

Well, we don't want to get into this right now. We don't have time. What do you want to do? Do you want to fire people?

I said—

No, not now, but if you have to cut it is not human, since we have to have everything in the House Administration Committee offices by the 18th—and this was the 8th—it is not fair to give a person that had no fault in being hired as an excess secretary less than 1 week's notice. What I am saying is, we have got to meet right now. We have got to see what the facts are, and then call the chief counsel and ask the questions we should.

They said, "No," and immediately adjourned. They would not discuss it. They refused. They took off.

I went back to my office. No sooner did I get to my office when I had a call from Richard A. Sprague saying—

Henry, listen, let's get together. Why don't you and I meet? We can work this out.

I said—

Mr. Sprague——

He said—

It is Dick.

I said—

No, it is Mr. Sprague. I will meet you at 10 o'clock here in my office.

He said—

Fine.

On Tuesday, at 10 o'clock, he came to my office with one assistant. I asked my administrative assistant to come in.

He sat down, and he said—

I understand you have been trying to get hold of me, and I don't know why my staff could not have told you where I was.

I said—

I do not, either. That is neither here nor there.

He said—

This meeting this afternoon at 4 o'clock p.m.

The committee, when it broke up on Monday, said—

Let's meet tomorrow at 4 o'clock and ask Mr. PREYER to be there.

Mr. PREYER said there was no point in meeting unless the chief counsel was there. I said, "Fine."

At that point, he said—

I wonder if I could talk to you alone.

I said, "Fine."

The two staffers left.

He said—

Since you are from Texas and you are accustomed to blunt talk, I think we ought to be blunt.

I said—

Yes, I have been crying for it.

He said—

Well, you know, there is no reason why we can't get together. I don't know what the committee wants this afternoon. You already have that list of employees, and that needs explanation because we can't afford to cut anything.

I said—

Look, Mr. Sprague, that is something else. I think you ought to know that since about January 25 I don't have any trust, any confidence, any respect for you. If I had known in September one-tenth of what I know now, I would have vociferously objected to your employment and would have been a daily critic every day you lasted on that payroll.

He said—

Well, at what time is that meeting?

I said—

Four o'clock p.m.

And he stormed out of the room. They immediately proceeded to have what was supposed to have been a secret meeting in Delegate FAUNTROY's office, at which attendance was Representative PREYER, Representative SAM DEVINE, Mr. FAUNTROY, and the chief counsel.

When we met at 4 o'clock p.m., the first action requested by Representative DEVINE was to offer a motion that the committee decide then and there to keep the chief counsel until definitive action was taken before or by March 31. He was prevailed upon to withdraw that motion until we could at least go into the reason for the meeting.

I then brought up the question of discussing proposed rules to govern the committee and the proposed staff, because none had been adopted.

Mr. PREYER said that was not what he wanted to know, that he understood that the chief counsel had a presentation to make and he wanted to hear it right then and there.

The chief counsel then spoke. He came in with his usual assemblage of about six different people, a couple of his lawyers and three or four staffers, and he said—

I want this committee to know that under no circumstances will I ever accept one single reduction in the staff of this committee. I will not recommend it. I will not accept it. It will be a mistake. I have a plan that I can present right now for a substitute budget that we can work up in a week's time, and by March 15 this committee can present it to the Committee on Rules and come back and have the funding that we think we will need to do a serious job.

I interjected and said—

This is a policy matter. You are not here to discuss policy matters. This meeting was called specifically as an informal meeting. I called it. The members were good enough to come to it. Now you have got to listen to the reason. The reason is that we have got to do first things first, and the first things are that we are not complying with the mnadate of House Resolution 222 and we are not complying with the Rules of the House that say that professional staffers cannot have any other type of employment other than their jobs as professional staffers. These are things we cannot escape as Members of the House. These are policy matters.

Congressman FAUNTROY interjected and said—

Well, if that is the case, I don't see any reason for pursuing it at this meeting. We are here to discuss the chief counsel's proposal which I agree we ought to go through with.

That more or less broke up the meeting.

I came back to the office, and within 5 minutes I received another telephone call from the chief counsel, Mr. Sprague, again saying—

Look, we can patch up things. We can still work together.

I said—

It is a lot more fundamental than that. I think I explained myself as clearly and as bluntly as I know how to talk this morning at 10 a.m., and there is no use going over it.

The next morning at 9 a.m. he convened a rally of all the staffers in which he vituperated against me. One of the staffers had been working off and on as a part-time typist on work that had to be produced out of my office. I did not have any particular personal acquaintance with her; my administrative assistant did. She was a very capable woman. Obviously Sprague thought so because he made her office manager. I did not even know that she had been hired until late November. As a matter of fact, she was one of those employees that Chairman Downing's office made a commitment to simultaneously at the time he was making his commitment to the chief counsel, but she was not hired until the latter part of November.

Mr. Sprague took all morning, from 9 until about 11:30, conducting the meeting, and most of the time he spent in denouncing me.

He had had the habit of calling these meetings and having the stenographers take down the proceedings. In the course of this meeting he made utterances that this woman, interpreted as having some implication of an implied threat toward me personally. I did not know that she called my administrative assistant. She talked to her that afternoon and the next day, which would have made it Wednesday and Thursday morning.

On Thursday morning I directed certain requests to Mr. Sprague: First, additional listing of the staff, including their previous experience; second, justification for and definition of their job chores; and, third, what was the plan of operation, if any, in the investigative work.

Believe it or not, no fundamental plan of any consequence has ever been broached, other than something quite ephemeral. For instance, they were talking about the testimony of an ex-FBI agent who lives over the Canadian border, and he was going to be a big secret witness. That witness, of course, had already appeared before the Church committee and the committee of the House, and so his testimony was actually repetitious. So at that time that was their big plan of operation. It always seemed to shift, and that had disturbed me.

Mr. Sprague sent word that he not only would not comply but he did not have to. He called another meeting of the staff. This time he gave specific mandates that under no circumstances would any member of that staff communicate with any Member of the Congress unless it was cleared by him. He indulged in more vituperations, and he was joined in that by one of his deputy counsel, Mr. Tannenbaum, who got up and made a speech ridiculing my position.

In view of that, I decided that under those circumstances and conditions and considering the absolute refusal of any of the members of the committee in any number to even be willing to consider a discussion of that issue, I had only one clear choice: Fire Sprague.

In my hometown paper the day before yesterday there was a big story attributed to the majority leader, the gentleman from Texas (Mr. WRIGHT), based upon a speech he made to the managing editors of the Associated Press in Dallas, in which he said:

All of this was a comedy of errors. He did not have authority to fire the chief counsel. He thought he did.

However, Mr. Speaker, he leaves out a very important element. He is the one I talked to. He is the only one I could reach on February 11.

On the day that I sent the letter to Sprague, Thursday, the 10th of February, I tried in every way I knew to communicate with the Speaker and with the majority leader. The leader's office said he was on his way to Atlanta to make a speech.

The Speaker's office for congressional matters said they thought he was on his way to the Speaker's office. The Speaker's office said they thought he was at the congressional office.

I had to go to the airport and return to Texas. From the airport I again attempted to reach him by telephone. A letter had been sent to Sprague, and not only to the leadership, but to every member of the committee.

When I got to Texas, the press was there in great numbers and pointed to a letter which, that very same day, had obviously been drafted by the D.C. Delegate, apparently signed by the other members of the committee, though, by their own admission, many of them were not even in town, which letter had been dictated by Sprague and which the delegate dutifully took down, communicating to him the fact that I had no authority, that they had the authority; and we can go into that if we want to some time later. Perhaps ultimately we might have to do it from a really juridical sense, but nobody in his right mind thinks I am going to make it any kind of issue here, unless we could have a change of venue. We have the "yes" drawer and the "no" drawer; and Mr. Speaker, the Members know that in a contest of this kind I am not going to get the precedents that would back up the chairman under the circumstances.

Mr. Speaker, nobody at any time has denied, rebutted, or documented that the allegations I have raised specifically are not so, in deed and in fact. I made spe-

cific allegations in the letters I communicated to the leadership and in the letter I communicated to Mr. Sprague respecting violation of the rules of the House and exceeding the lawful mandate of the House Resolution known as House Resolution 222.

Mr. Speaker, nobody denies that. Nobody is saying, "You are wrong." They are all saying, "Why did you dare take that action?"

Mr. Speaker, there is one other element. As of the day before yesterday, nobody had said anything like this. On the contrary, on February 11, the day after, in Texas, from 9 a.m. until 9 p.m. I sat at the phone. I did everything I could to get hold of the Speaker. I called him here. I tried to get his aides at home. I finally got his aide in the office in Boston. He said:

He is attending the swearing in of his son at the Bar Association. He is supposed to contact me. Let me have the number, and he will get to you.

I tried to track the majority leader. Finally I got his A.A. in Fort Worth. He said:

We are expecting him at the airport. I will see to it that he will call you.

At 1:33 p.m. Texas time, which was 2:33 p.m. Washington time, he did indeed call.

I said—

I know you are on your way to Atlanta.

He said—

Yes, Henry; I spoke there last night. I am late. What has happened?

I said—

Did you get my letter in your office?

I said—

I know about it.

I said—

I wanted to do this yesterday, at least before I sent that letter to Sprague.

I said—

Well, fellow, we are with you. You are right.

I do not know how anybody would interpret that. I felt that was support.

I said—

What about the Speaker, Jim? I cannot get him.

I said—

Don't worry. I am supposed to talk to him. I will convey the message?

Well, like a boob. I sat there until 9 p.m. Nobody ever called. I came back the next week for the first organizational meeting on February 17, on Wednesday—no. I beg your pardon, February 16, Wednesday, we had the meeting. It ended up with the gentleman from North Carolina (Mr. PREYER) interjecting and offering a motion to adjourn before we could discuss any fact having to do with the prime issue of: What are we going to do about exceeding our authority?

It disrupted.

I then stayed there and went into the specifics, so I had no specific place in the record for that date, and you can find it if you look up the February 16 record.

On February 17 the Mexican President was to be here. I was asked to be part of the escort committee. At that point I began to develop a high temperature and fever.

At no time was I given an opportunity to discuss anything.

I tried to get hold of the leadership but I realized also it was not the proper time.

At about 3:30 I knew I had to return to Texas for the plain and simple reason that my own physician is my own brother and I wanted him to do what he could. At no time did I think that I would not take care of the flu by Sunday. I had not had the flu in 23 years. I had not even had a cold in 10. But it turned out to be a virulent type with 104-degree temperatures for about 3 or 4 days and 101-degree temperature for about a day and a half. So it was impossible for me to return on Monday.

Even as I was leaving from the airport the majority leader said:

Can you come over for a meeting with the Speaker?

I said—

No, I am going to Texas.

He said—

Well, maybe we can set it up for Monday.

When I got up on Monday I knew I could not do it. So I had to call back through my assistants and advise through my assistants that I would not be back on Monday.

Now the leadership keeps repeating about how they tried to get hold of me.

I was not able to get hold of the Speaker and I did get hold of JIM WRIGHT, who certainly never gave me to understand I did not have authority and that they were with me, fellow.

All right, I waited. And I decided that nothing was being said publicly like what was being told me privately.

In the middle of the following week my administrative assistant called me and said the majority leader had asked for a meeting and would she be present. She went to the meeting and she reported to me. I hope that the majority leader someday will tell the House exactly what happened at that meeting, and the course of action that the chief counsel took with respect to him. And I will offer at a subsequent time the written documentation that followed, the specific instructions which the majority leader gave to Mr. Sprague. But there are also other items, and his defense of that and his openly defying the majority leader. He said you do not have any authority. I do not even have to do it if I do not want to.

He did not show up until after an hour.

But, in the meantime, my AA said well, you know, the majority leader is trying to work out a deal, a compromise because the Speaker had asked him to please intervene in this matter.

The compromise would be that Mr. Sprague would be retained as the chief counsel and that somebody else would be appointed as chief of staff that would be acceptable to you.

I said to her there is only one thing, I said, for how long have you worked with me? And she said, you know how long, ever since the Senate vote in 1959. I said—

That is how many years?

She said—

Well, you know it is 18 years.

I said—

Okay, then I do not have to tell you anything. You know how I am built. You know my reactions. You know by the time I would reach the point of writing such a letter of that kind that it is irrevocable.

There was only the clear view of the fact that it was obvious that in the intervening 2-week period from February 19 to February 28, I did not even get a get-well card. Instead there were compromises of this, that, and the other. However, within 5 minutes of my letter of resignation having been presented to the Speaker and the majority leader, the Speaker was on the telephone to my wife at my residence saying:

Tell Henry not to resign.

The majority leader was in contact with my administrative assistant saying:

Tell Henry to hold up. Don't release anything.

I said to tell them that I am not going to stay quiet while they finish the coffin around me. They could not get hold of me for 2 weeks, but within 5 minutes of my letter of resignation they had my house phone and they had my wife on the other end of the line.

My time is about up. I will continue at some future time. I feel the House has the issue. I am not here to try to continue any further association with this endeavor. At this time the Committee on Rules is being presented with a request to reconstitute the committee with a budgetary figure of $2,760,000. Mr. Sprague told his staff continuously since January—

None of you quit. We will take a 35-percent reduction now, but you are going to get all of that back and more.

I think I have been treated shabbily. I conclude dolefully and sadly that had my last name been Jones or O'Brien, Rosenthal, George Washington Carver, or Martin Luther King, I would not have been treated this shabbily.

Mr. Speaker, I yield back the remainder of my time.

I am attaching some articles which appeared in the San Antonio newspapers recently in further reference to this subject:

[From the San Antonio (Tex.) Express-News, Mar. 6, 1977]

GONZALEZ TELLS ALL: "PLOT DOOMED JFK PROBE"

(By Paul Thompson)

U.S. Rep. Henry B. Gonzalez says the assassination of President John F. Kennedy will never be investigated in a meaningful way "because vast and powerful forces including the country's most sophisticated criminal element won't stand for it."

After two weeks of silence at his home here, Gonzalez came out swinging Saturday.

"This criminal element," he told the Express-News, "is all-pervasive, loaded with nothing but money and in many ways more potent than the government itself."

He named other anti-probe forces as "the Kennedy family and heavy business interests

in Dallas-Ft. Worth who don't want all the old JFK muck raked up."

The fiery, 60-year-old congressman called the House Select Committee on Assassinations, which he quit last Wednesday, "a put-up job and a hideous farce that was never intended to work."

"RATTLESNAKE"

He reiterated that the committee's chief counsel Richard Sprague was "a rattlesnake and unconscionable scoundrel," and to that he added: "Sprague tried to spend committee money on LD phone calls to his Philadelphia law firm and to the home of his girlfriend there. And get this. He actually took a little Acapulco vacation for himself while on the committee payroll."

As committee chairman, Gonzalez said he was expected to allow Sprague to "hire people, run up huge expenditures, spend money on himself or whoever, get out of town when it suited him—all with no accountability to me or any other congressman."

He predicted the committee will forget about JFK now and go into "a weak one-legged investigation of the Martin Luther King assassination as a sop to blacks."

Holed up in his North Side home with the flu, totally inaccesible to the news media for two weeks, Gonzalez, Saturday decided to tell his side of the story which he said "never has been honestly sought after, much less revealed."

Essentially the congressman pictured himself as a man selected to preside over a panel that was never intended to accomplish much of anything and was "conniving with an unbalanced egomaniac like Sprague while headed nowhere."

"CLOWN"

He indicated continuance in that role would have turned him into "some kind of cheap clown just as unprincipled as Sprague."

He said the whole mishmash in the end grew so weird it was almost impossible to believe.

"There's something very strange going on in this country—strange and frightening," said Gonzalez.

In an attack on the national news media, he said: "From the major TV networks to the Washington Post and Washington Star, they're out to do a hatchet job on me. Apparently it's because I refuse to be a patsy, a fall guy to save face for The System and The Club off which they feed."

As an example, he pointed to a Washington Star article of last Thursday by female columnist Lynn Rosellini.

DEMENT

"This woman not only vilified me and held me up to scorn, but in assesing my repute in San Antonio she quoted, of all people, mysterious Jim Dement, the well-known errand boy for Oscar Wyatt, Morris Jaffe and all those developers who want to build over the aquifer," Gonzalez said.

"That's how the media system works. Someone put columnist Rosellini in touch with Dement who then was quoted in her column: 'Henry Gonzalez can scream louder and get in more controversy than anyone you've ever seen.'

"See how it goes? Dement was a known enemy of mine. He never wanted to sue robber baron Oscar Wyatt. When the city did sue, Dement was among those ready to take the first Coastal States offer at ruinous expense to taxpayers.

"The same Dement detested me for my comments against Oscar Wyatt and the San Antonio gas ripoff. He was even more incensed at my congressional amendment protecting the city's pure water aquifer from greedy developers.

"So who is the ONLY San Antonio businessman quoted in the Washington Star article as representative of local opinion about me? Jim Dement, that's who. Is it any wonder I'm leery of the national media?"

"MERE LACKEY"

Gonzalez assessed Dement, now running for the City Council in District 9, as "a mere lackey and windup walking doll for the Fat Cats who's trying to tell home and business owners he's out to help them."

On the TV networks, the congressman said:

"I've been avoiding their local reporters because the biggies in Washington seem to want only bad material on me. Take Doug Ramsey of Channel 12 here. He's their news director not even supposed to do legwork. But when I got off the plane at International Airport after firing Sprague, here comes Ramsey, mike in hand, very hostile, asking questions like, 'Did you have the right to fire Sprague?' 'When are you going to quit yourself?' And so on. I thought I might have to punch this man to get away from him."

Congressman Gonzalez enjoys huge popularity in South Texas as a lawmaker who works seven days a week, takes good care of his district, fights openly and aggressively for its interests.

He's not money or luxury oriented, lives in Spartan fashion and has a record of spotless personal integrity that not even his worst enemies dispute.

PUNCHING

It was vintage Gonzalez to come out punching when he saw the House Select Committee on Assassinations as a sham and his own position in the chairman's seat as a booby trap.

"When the committee was first set up last year, lame duck Congressman Tom Downing was named chairman, with me as vice chairman, even though I had introduced the enabling bill," says Gonzalez.

"Never before in congressional history had a lame duck been put in charge of a key committee like that. Then-House Speaker Carl Albert did it, and I should have quit right then.

"I stayed on, however, because I didn't want to give them the chance to say, 'That damn Mexican won't play ball if he can't pitch.' "

It was Chairman Downing who hired former Philadelphia prosecutor Sprague as the committee's chief counsel and staff director.

"Sprague straightway put 73 people on the payroll at a cost of $123,000 a month. He himself moved into the opulent Watergate Apartment while talking of a $13.2 million committee budget for two years," Gonzalez went on.

ALIENATED

"The whole House leadership was instantly alienated by this arrogant self-serving power broker. I can recall some of them making like a stuck steam whistle yelling against him."

The assassinations committee funding was suspended at the end of 1976, but House Resolution 222 revived it on Feb. 2 of this year, with a total authorized budget of $84,333 a month.

Meantime Congressman Downing went back into private life and Henry B. Gonzalez took over as committee chairman.

"Right away my trouble began. I couldn't get the committee together on Thursday, Feb. 3. Two days later, when I tried to talk with Sprague, his chief aide said, 'He's in Acapulco taking a rest,' " says Gonzalez.

"I exploded, 'We're working our butts off and this S.O.B. goes on vacation without a by-your-leave from anybody.'

"And that's about the way it went from there on in!"

When the committee finally did meet on Feb. 7, a bloc of four black congressmen, led by Rep. Walter Fauntroy of Washington, D.C., quickly made it clear that they were totally under the influence of Chief Counsel Sprague, according to Gonzalez.

BOLSTERED

He said this bloc was bolstered by Rep. Richardson Preyer of North Carolina and by Republican Rep. Sam Devine of Ohio.

"To show you how the committee was programmed to self-destruct, Devine was put on it even though he had voted twice in Congress against creation of the committee," Gonzalez said.

"So what I had at the outset was an effective bloc of six against me, with the remaining five members a bunch of wafflers or 'showboats' as such pusillinamous nothing balls are called in the House."

Chief counsel Sprague finally got back from Acapulco Feb. 8 and met with Gonzalez in the congressman's office for the first time.

From Gonzalez' account, here is what happened then:

He told Sprague that as a congressional employee at $39,000 a year he (Sprague) must quit practicing law on the side, quit teaching for pay, quit other lucrative sidelines and quit taking unauthorized vacations.

REJECTED

Sprague rejected all four directives.

Next Gonzalez told the chief counsel that there was a January committee budget overrun of $10,000 which was against policy and against the law.

He also told Sprague that (quote) "your unilateral rupturing of what you know to be right action causes me to regard you as a complete phony, and frankly, I wouldn't trust you as far as I can throw an elephant."

Sprague replied by stomping out of the congressman's office.

That afternoon Sprague appeared before the assassinations committee and told the assembled congressmen that he and his 73 employes had already agreed to accept salary cuts of 35 per cent—from $123,000 to $84,333 a month—and that he "would try" to reduce the budget overrun from $10,000 to $4,500 a month.

Since the law's the law, Chairman Gonzalez wouldn't go along on that one.

But on motion of Rep. Devine, the committee voted to keep Sprague as chief counsel and staff director with free rein, financially and otherwise, until March 31 when its funding expires.

PEP RALLIES

On Wednesday and Thursday, Feb. 9 and 10, Sprague convened his full staff for what Gonzalez terms "pep rallies" at which he informed them:

Despite Committee Chairman Gonzalez, all 73 staff members would keep their jobs.

He (Sprague) had connections on both sides of the House and in its upper echelons that gave him absolute control over committee doings.

Gonzalez was a "mean, vicious highhanded bully" who overrated himself, who needed to be brought down to size, and (quote) "I've seen bigger men than him go down and out."

Edith Baish, former fill-in typist for Congressman Gonzalez now on the Assassinations Committee staff, reported all of this to HBG after the second staff session, with the warning, "Sprague sounds bloodthirsty, maybe a little off his tree, and if I were you, congressman, I'd watch myself!"

Gonzalez immediately sent a note to Sprague demanding a list of the 73 committee employes, where they came from and what their present functions were.

FIRED HIM

When Sprague demurred saying, "I don't have to give you any of that," and instead presented for Gonzalez' signature pay vouchers for $9,900, the congressman hauled off and fired him.

"Biggest item in the $9,900 pay vouchers

were telephone calls by Sprague to his law office in Philly and the girl he kicks around with there," Gonzalez sizzled.

"I'd heard about deadbeats like Sprague before but this guy is the all-time champ.

"To give you one small sample, he has on the committee payroll, at $30,000 a year, someone by the name of Gaeton Fonzi who's never so much as been in Washington. He is supposed to have underworld connections, this Fonzi, and he's in Miami. What he does down there, nobody knows and Sprague won't tell. He's probably hanging around some slop chute.

"Now how could I live with a sham like that, among all the other outrages Sprague was pulling?"

Thirty minutes before firing the counsel Feb. 10, Gonzalez notified House Speaker Tip O'Neill and Majority Leader Jim Wright of what was going down. He also messaged the other 11 committee members.

HISTORY

What happened after that is history: the assassinations committee voted unanimously to keep Sprague on.

"Before quitting myself, I applied to my old friends Tip O'Neill and Jim Wright for support," said Gonzalez.

His voice toned of deep sadness as he added: "It was an exercise in futility. The fix was in."

He said he returned to San Antonio that weekend and burned up his home telephone attempting to reach O'Neill and Wright.

"I tried O'Neill first, and it was really comic the runaround I got. His aides simply didn't know where Tip was. One of them suggested calling his Boston office, which I did. Another aide, Leo Diehl, pledged to move heaven and earth to find Tip and have him call me.

"Time bled away. Nothing. It was two whole days of nothing, in fact," Gonzalez said.

"Meanwhile I had a call in for Jim Wright, and after a long delay he did respond, assuring me he was '100 per cent behind you, Henry, you know that,' and also lending assurance that he'd locate Tip O'Neill somehow and have him contact me.

UPSHOT

"Well, the upshot of the whole crazy folderol was that O'Neill never did call me, and as for Wright, he didn't bother to call back—not even to explain how come he didn't locate Tip O'Neill."

Suffering from the flu that weekend and since, Gonzalez said he stayed home in bed "aware at last that the House leadership never had intended for the JFK investigation to fly, and indeed had prefabricated the whole thing for the skids."

The congressman said what totally mystifies him is this:

"Why all the mock indignation in Congress and the news media now? What was I expected to do? Did anyone seriously think I would sit there heading that committee while a rattlesnake like Sprague ran amuck, breaking the rules and the law and treating me like dirt?"

He said a far shrewder guess would be that "powerful forces including criminal elements" had deliberately put Sprague and himself into the committee picture and on automatic collision course.

"They never did want the Kennedy assassination conspiracy unmasked. They knew I was an honest, direct man who wouldn't hold still for a transparent phony like Sprague. K-E-R wham! They were so right! The JFK investigation is over!"

OUT OF IT

As for Congressman Gonzalez, he considers himself well out of a bad mess and says he'll go back to Washington soon, represent his constituents diligently as ever and look everyone straight in the eye same as ever.

"And you can quote me on one thing more, if you don't mind. Just say the prognosis for Henry B. is superb!"

[From the San Antonio (Tex.) Light, Mar. 9, 1977]

"DOUBLE AGENT" ENTERS PICTURE

(By Tom McGowan)

Richard Sprague, chief counsel for the House Select Committee on Assassinations, has met with a shadowy double-agent with high connections with the Cuban government, Rep. Henry B. Gonzalez charged Tuesday.

Gonzalez, in a bitter attack against Sprague, said the committee chief counsel made contact with the Cuban delegate to the United Nations, without the knowledge or consent of the committee leadership.

"Sprague has, through his ego-maniacal naivete, exposed the committee, the Congress and the country to the most insidious of forces not friendly to our nation and its destiny."

Gonzalez, in an exclusive interview with The Light, identified the double-agent as a Washington journalist connected with a national magazine.

By making unauthorized contact with the Cuban U.N. ambassador, Sprague has, Gonzalez charged, exposed the Congress, the investigating committee, Congress and the country to the possibility of control by Cuban agents and probably other foreign representatives.

"It is no secret that the Cuban intelligence apparatus, the D.C.I. (Directorio Central Intelligencia,) was designed and built by the Russian KGB," Gonzalez said.

"That's the powerful cabal that I have been fighting single-handedly against, and that's the powerful alliance that has brought the committee to its knees and forced my resignation as chairman," he said.

"It is no secret—or it shouldn't be—that this country is now flooded with enough foreign agents to populate the 51st state of the United States.

"These agents and agents provocateurs range all the way from the Cubans, to the Arab nations, the Israelis, the Red Chinese.

"With this kind of uncontrolled, unguarded espionage infiltration, anything is now possible in this country."

The congressman again repeated his description of Sprague as "a legal mountebank."

Gonzalez said Sprague had parlayed his notoriety in prosecuting the Yablonski case into a vehicle for making himself look good.

(Joseph Yablonski, head of the United Mine Workers was murdered, along with other members of his family. Sprague was the prosecutor.)

"I feared Sprague's mountebankism from the beginning," he added.

Sprague contacted the "Cuban connection" without knowledge of the committee, Gonzalez emphasized.

"He didn't tell anybody about anything until the Dec. 17 meeting of the committee, and then said he wanted carte blanche to go into the details with these contacts.

"He had already met in New York with these contacts by that time, and when I learned this, I became agitated and attempted to question him.

"I asked him what kind of consultation and coordination he had made with the executive branch of the government, and he became irritated and clammed up. He refused to discuss the matter further."

Gonzalez said a Republican member of the committee urged Sprague be allowed to do whatever he wanted to do.

"This was during a time when everyone was anxious to break for the Christmas holidays. Several members had already left Washington, including four Republicans. A couple of Democrats had not even showed up for the meeting.

"Sprague promised to give me a complete written report on his activities by Dec. 22.

"Sprague pledged he personally would give me a report by Dec. 22, sending it to my home. I didn't get it until Dec. 29, and it was the most inefficient, shoddy report I have ever seen issued by a committee of the Congress.

"I was dismayed by it and I expressed my dismay. I could not accept the report and I told Sprague I would write a dissenting report.

"He pleaded with me not to term it a 'dissenting report' and I agreed to call my version 'additional views.' He then tried to tell me how to write my report, and I became angry."

Gonzalez said these events occurred before he took over as chairman of the committee Feb. 2.

Sprague throughout his dealings, Gonzalez charged, revealed contempt for elected officials, including Richardson Preyer, specifically, whom he considered as "easily-manipulated boobs."

"He considered us members of the Genus Boobus Americanus."

Preyer, Gonzalez said, feared Sprague, and continually expressed fear of "what Sprague might do."

Gonzalez also lashed out at Rep. Jim Wright, of Texas, and House Speaker T.P. O'Neill.

He said O'Neill's concept of the speakership is one of an "extension of Boston ward politics."

Gonzalez blamed the wrecking of the committee on the "pusillanimity of the House leadership, dominated by Wright, who have been scared stiff of Sprague and have allowed him to run amok."

He also charged Sprague is contemptuous of the blacks on the committee, including Walter Fauntroy, the District of Columbia delegate to the House.

"Sprague considers the blacks on the committee as patsies, vulnerable to cheap publicity stunts."

He characterized Fauntroy as a "politician with an inferiority complex who needs the Martin Luther King case to establish his superiority."

"The blacks have been kicked around so long, they need someone to kick around—and that's this poor Mexican, Henry B. Gonzalez."

"The Boston Brahmins kicked the Irish immigrants around; then the Irish kicked the Italians; then the Italians kicked the Czechs and Poles, who in turn kicked the blacks. Now the blacks are kicking the chicanos.

"The most poignantly disappointing thing to me is that the four blacks on the committee, headed by Fauntroy, conspired against me.

"I am the man who 20 years ago put his career on the line to fight for American rights in the state senate. I filibustered for civil rights four times, all alone, but now their memories are short."

He concluded:

"From the beginning, it seemed that Sprague's entire mission was to foil any serious, honest investigation of the John Kennedy assassination. He behaved in such a way to arouse opposition both in and out of the Congress and to raise obstructions that need not have been raised."

He also blasted, in his parting shot, what he termed "corruption in Washington that makes Sodom and Gomorrah look like a Boy Scout troop Court of Honor."

This corruption, he said, also infests the national press corps.

"I call them the wolfpack or jackel quid nuncs (gossips)."

[From the San Antonio (Tex.) Express News, Mar. 13, 1977]

HENRY B.'S FREE OF THAT MEATGRINDER

(By Kemper Diehl)

It's really not all that hard to understand the explosion of scorn with which U.S. Rep. Henry Gonzalez parted company with the House Select Committee on Assassinations.

If Speaker Tip O'Neill and Majority Leader Jim Wright wound up with red faces—and assuredly they did—they had it coming.

Take a look at the kind of abuse Gonzalez was asked to take because he went to work with typical honesty to carry out policies which had been voiced clearly by the leadership.

There is no question but that the leaders, particularly Wright, made it clear that if the House were to revive the committee, Henry B. was expected, as the new chairman, to take firm command, insure a probe in which no one's rights were infringed and, above all, bring the committee's scandalously over-extended finances back to par.

UNDERSTANDING

The obvious corollary to all this was: Bring the chief counsel, Richard Sprague, under control.

In fact, when the committee's life was extended for a trial two months, the word from reporters on the scene was: "This means Gonzalez has two months to get rid of Sprague."

So Henry B. moved to bring finances into line and insure control of operations by elected officials. Sprague, of course, rebelled, and the chairman's attempt to fire him was overturned by committee members who, in effect, supported the counsel's unbridled style of probing.

There followed a campaign of anti-Gonzalez reports by what the congressman was to call the media "wolf pack."

The barrage may have been topped out by a piece in the Washington Star by Lynn Rosellini which was mind-boggling in its resort to half-truths and loaded questions.

Reporter Rosellini displayed her depth of knowledge by announcing that the late President Lyndon Johnson was a resident in Henry B's district.

HATCHET JOB

Her evidence against Gonzalez came from people like Ed Foreman, the right-wing Republican who holds some sort of record by having been a one-term congressman from two states.

Foreman did a McCarthy-type attack on Henry B. in the early 1960s because the San Antonian had committed sins like voting against the Un-American Affairs Committee—and was stunned when Gonzalez called him to account.

Reporter Rosellini saw something wild and strange in the speeches and Congressional Record inserts Gonzalez made regarding the Sharpstown bank failure—not noting that this was the greatest political scandal of recent Texas history, or that the Gonzalez speeches had led directly to the resignation of a ranking Nixon Administration official, Asst. Atty. Gen. Will Wilson.

Then came her clincher: two vocal local witnesses against Gonzalez.

Of all people, they were Doug Harlan, described only as a "political science professor," and Jim Dement, depicted as a businessman in touch with the political scene.

GOP DUO

There was not a hint for Star readers that Harlan was really a Republican politician, twice defeated as a candidate for Congress and most recently a high-level briefcase-toter for the GOP administration.

Nor did reporter Rosellini tell readers that Dement has been an active enemy of Gonzalez or that much of his contact with politics has been through the Republican Party where he was a major backer of Harlan's most recent campaign.

The national GOP data bank couldn't have provided a more biased group of anti-Henry B. spokesmen.

With this sort of partisan abuse splattering over Gonzalez, where were the leaders who pushed him to take strong action to control the investigation?

Wherever they were, they offered him no sincere support.

In fact, Wright allowed himself to quip glibly about forcing a "shotgun marriage" of Gonzalez and Sprague—thus equating a committee chairman with a Congressional employe.

The wreckage of the committee has also been attributed by some insiders to "malign neglect" by O'Neill.

Certainly the message to put things in order never got through to anyone other than Gonzalez. And the reaction of other committee members to the attempted firing of Sprague was strictly political.

"They never stopped to see if there was a good reason for Henry's action," noted one Washington veteran. "Then they found themselves out on a limb and couldn't admit it."

Never one to mince words, Henry B. proceeded to express his feelings for all to hear.

What now?

"Henry is a free man now in a way few members have ever been," concludes one Washington friend. "It's the kind of freedom that comes from not being afraid. Most guys up here are governed by fear."

THE STATUS OF AMERICA'S NAVAL SHIPBUILDING PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. TRIBLE) is recognized for 60 minutes.

Mr. TRIBLE. Mr. Speaker, as a member of the House Armed Services Committee and as the Representative of a district which boasts a long and proud record of building ships to serve our Nation's defense needs, I am deeply concerned about the status of America's naval shipbuilding program. Our supremacy on the seas once was unchallenged. Now we are approaching the intolerable position of being second-best.

The size of our fleet has shrunk to its lowest point since 1939. Vitally needed major ships are not being delivered on schedule, and their costs far exceed original estimates.

Despite our critical need for ships, we face serious problems between the Navy and its few remaining suppliers of major ships. These problems threaten to further weaken the Nation's industrial base for naval shipbuilding. Claims arising from naval shipbuilding contracts now exceed $2 billion. Long standing and previously productive relationships have been strained to the point where last year at least one shipbuilder refused to bid on new naval programs and even offered to cooperate with the Navy in removing inprocess work from its yard.

That company was Newport News Shipbuilding, which directly employs some 25,000 men and women—most of whom live in the First District of Virginia—and which fuels the economic boilers of the Tidewater region and the entire Commonwealth.

As the Congressman from the first district, I am obviously concerned about the welfare of my constituents. But, I believe that we all recognize that a break in the 80-year relationship between the Navy and Newport News Shipbuilding would be a tragedy for the entire Nation as well.

I remind you that Newport News is the largest shipyard in the world and the only one capable of designing, building, and servicing the full-range of our Nation's nuclear-powered Navy ships. Newport News has delivered seven of the last nine nuclear ships that have entered the Navy's fleet, including the lead ship of the 688 class submarines—which Newport News also designed—that the Navy describes as "the most effective and reliable nuclear weapons platform ever to put to sea." At present Newport News has under contract or construction 14 nuclear-powered Navy ships—3 cruisers, 2 aircraft carriers, and 9 attack submarines. During 1977 Newport News plans to deliver to the Navy four more nuclear-powered ships—the aircraft carrier *Dwight D. Eisenhower*, the guided missile cruiser *Texas* and two 688 class submarines, the *Baton Rouge* and *Memphis*. In addition, Newport News will complete the overhaul and refueling of the ballistic missile submarine *James Monroe* and the attack submarine *Lapon*.

The primary issue that has threatened to remove this vital national asset from our shipbuilding program is a contracting procedure that is basically inequitable.

It fosters a breakdown of contract administration which forces a shipbuilder to file claims in order to be fully paid for additional costs which are the Navy's responsibility. The inability to deal with these claims on a timely and equitable basis has, in turn, seriously impaired the economic viability of our Navy's ship suppliers.

I do not intend to cover all the facets of the claims controversy. But I do call your attention to some very interesting comments about Department of Defense procurement procedures made by the Honorable Lewis Spector, a highly respected trial judge of the U.S. Court of Claims.

According to Judge Spector, in remarks to the National Contract Management Association on October 20, 1976, large claims arose "because thousands of routine change orders have been too long delayed, have now agglomerated into multi-million-dollar claims, have become politicized and, as a result, that which used to be routine business within the Department has become everybody's second-guess."

Judge Spector describes the system of handling claims, large as well as small, as "abominable." He further states that—

> Our system is the result of a long-term rudderless drift, and the main wind that has blown has been the constant ingenuity of government lawyers to win their cases.

But, he also observes:

> Uncle Sam is not an ordinary client. Uncle Sam always wins when justice is done. This

means Uncle Sam may lose when judgment is entered for him, and he may win when judgment is entered against him.

It was in this spirit—this enlightened view of Government responsibility—that led Congress to conduct hearings into the problem of Navy-shipbuilder relations. 'Last week the Subcommittee on Defense of the House Appropriations Committee chaired by Representative MAHON heard from both the Navy and its shipbuilders.

I was honored to participate in some of the hearings, and I have reviewed the record of the other sessions. I frankly was very encouraged:

Both sides were intent not only on resolving the immediate problem of outstanding claims but also—and more important—on eliminating the conditions which give rise to claims in the first place.

Both sides were willing to forget past differences and look to future cooperation.

Both sides recognized their responsibilities to each other, to our Nation's defense needs and to the citizens who, through their tax dollars, support the Navy's shipbuilding program.

Both sides, I believe, conceded that there is more than enough blame to go around.

And I was very encouraged that the subcommitee members recognized the seriousness of the claims dispute and the pressing need for a timely and equitable resolution of the problem.

The mood appeared to be a positive one—of reconciliation, of moving ahead. Newport News Shipbuilding, for example, explained that it had reversed a stand taken last fall and this week will submit a bid on three new *Los Angeles* class submarines. The company's chairman, John P. Diesel, told the subcommittee that one of his primary objectives in bidding was "to maintain a continuing dialog with the Navy on means of improving contract terms and conditions." Later in his testimony, he added:

We have come a long way—relations have improved. The basic problems are still there, but so are the solutions to them.

As I mentioned, I was encouraged—until the Thursday testimony of Mr. Hyman Rickover. His testimony ran entirely contrary to the spirit displayed by other Navy representatives.

It was a familiar litany—a recitation of all the charges, countercharges, allegations, and innuendoes that characterized—and, in fact, helped lead to—the divisiveness that has separated the Navy and its shipbuilders.

Instead of contributing to the developing spirit of good faith and cooperation, Mr. Rickover's testimony appeared calculated to reinforce an atmosphere of highly charged emotions, where calm and rational decisionmaking is all but impossible.

The testimony contained wholly unfair characterizations, particularly with regard to Newport News Shipbuilding, which are unbecoming and inappropriate for a man in Mr. Rickover's high Government position.

The testimony was notable only for its general lack of any positive approach to solving the problems at hand, much less to avoiding similar ones in the future.

The testimony unfairly sought to perpetuate inaccurate and misleading information.

The claims controversy between the Navy and its shipbuilders involves some very complex questions, and many are open to various interpretations. I certainly am no expert in the matter and have not personally reviewed the claims—although, I should add, I am not unique in this respect. There are, however, certain basic facts, and any distortion of these facts can only be counterproductive.

For example, most naval shipbuilding contracts are based on the principle of cost-sharing. Costs above a certain point are shared by the Navy and the shipbuilder. Likewise, the amount by which a contract price must be increased to cover a claim does not go entirely to the shipbuilder—it is shared by the shipbuilder and the Navy.

The implications of cost-sharing on claims and their settlements are rather basic. That is why I am so disturbed by the conclusions that Mr. Rickover would have us draw from the fact that a shipbuilder would settle a claim for what Mr. Rickover says is 29 cents on the dollar.

The case in point is the recent settlement of $155 million in claims arising from construction by Newport News Shipbuilding of the nuclear-powered cruisers *California* and *South Carolina* (CGN's 36 and 37).

During the previous day's hearing, I listened to Mr. Diesel of Newport News explain that because of the cost-sharing features of the contract for these two ships, the maximum amount that his company would have received from the Government was $73 million—even if the claims had been resolved 100 percent in the shipbuilder's favor. The actual settlement of $44 million, therefore, was about 60 percent of the maximum—not the 29-percent settlement as was repeatedly stated by Mr. Rickover in his testimony. And the Navy certainly did not conclude that $100 million worth of the claims were invalid, as also has been repeatedly alleged by Mr. Rickover.

Mr. Diesel then went on to explain why a 60 percent settlement was a prudent business decision. The answer is told in the time value of money, lost interest expense, and the costs and risks of litigation, which was the only alternative to settlement.

I will include Mr. Diesel's testimony in the RECORD following my remarks and recommend for your review his discussion of the economics of claim settlements.

Mr. Rickover continues to use what he tells us is a 29-cent-on-the-dollar settlement as evidence that shipbuilding claims are grossly inflated. It is this deliberate, callous and continuing distortion of the truth—at a time when a balanced, objective attitude is essential—that disturbs me the most.

Now, Mr. Rickover is not ignorant of some of these important cost-sharing elements of naval shipbuilding contracts. Yet he chooses to ignore them when his purposes require it. He obviously wishes to picture Newport News shipbuilding in the worst possible light by continuing to describe this settlement as a 29-cent-on-the-dollar one. These are adversarial tactics, being employed by one who utterly condemns the use of such tactics by others. They are tactics calculated to inflame and mislead the Congress, the press and the people.

In his Thursday testimony, Mr. Rickover also engaged in a lengthy criticism of the U.S. district court's decision in a lawsuit between the Navy and Newport News shipbuilding concerning the nuclear-powered cruiser, CGN-41, in that case, the court concluded that the Navy had not negotiated in good faith with Newport News, as the court had ordered. Mr. Rickover's testimony betrays a particular sensitivity to this decision, because it would appear that it was largely Mr. Rickover's unwarranted and unfair interference in the negotiations ordered by the court that led to the court's conclusion.

His testimony Thursday represents a continuation of this unfairness, and it is no more productive now than it was then.

Mr. Rickover's contributions to this Nation's defense efforts are unique. He is a man of great power. But with that great power must go a corresponding measure of responsibility. In the words of Judge Spector:

Any restraints on the great power with which public servants are often vested must be self-restraint, motivated by national concerns, not selfish concerns.

There is a saying—"If you're not part of the solution, you're part of the problem." If Mr. Rickover will not be part of the solution, he should exercise the self-restraint of removing himself from this problem. He is making no positive contribution.

I believe there is a mood in Congress, in the Pentagon, and among the shipbuilders—that the immediate problems must be resolved, their causes eliminated and our Navy's shipbuilding program revitalized. I hope that we in the House can help nurture this new spirit of cooperation and productivity—not for the sake of the Navy or the shipbuilders, but for the good of the American people.

The remarks referred to follow:

TESTIMONY OF JOHN P. DIESEL

(Before the Subcommittee on Defense Committee on Appropriations, Mar. 23, 1977)

Mr. Chairman and members of the Committee, I am John P. Diesel, Executive Vice President and a member of the Board of Directors of Tenneco Inc., of Houston, Texas. I am also Chairman of the Board and Chief Executive Officer of Newport News Shipbuilding and Dry Dock Company, a subsidiary of Tenneco.

I am grateful for the opportunity to report to this Committee on the status of the Navy's shipbuilding program at Newport News Shipbuilding.

I will cover three subjects:

The general improvement in relations between our company and the Navy that has occurred during the past six months.

The serious problems and inequities associated with current government contracts that, despite these improved relations, continue to plague our company and our industry and that threaten to further erode the industrial base so vitally needed to support our nation's defense efforts.

The fact that claims are not a gratuitous ballout and that the amount of the government's maximum legal liability to Newport News Shipbuilding was $460 million, not $884 million.

NEWSPORT NEWS SHIPBUILDING'S OUTSTANDING PERFORMANCE

To help you put my observations in proper context—and to call to your attention the grave implications of what unfortunately has often been an adversarial relationship between the Navy and Newport News Shipbuilding in recent years—let me remind you of the outstanding performance of Newport News shipbuilders—a long and proud record of service that the recent controversy over shipbuilding claims has all but obscured:

We have delivered seven of the last nine nuclear ships that have entered the Navy's fleet, including the lead ship of the 688 Class submarines—which we also designed—that the Navy describes as "the most effective and reliable nuclear weapons platform ever to put to sea."

At present we have under contract or construction 14 nuclear-powered Navy ships—three cruisers, two aircraft carriers and nine attack submarines.

During 1977 we plan to deliver to the Navy four more nuclear-powered ships—the aircraft carrier *Dwight D. Eisenhower*, the guided missile cruiser *Texas* and two 688 Class submarines, the *Baton Rouge* and the *Memphis*. In addition, we will complete the overhaul and refueling of the ballistic missile submarine *James Monroe* and the attack submarine *Lapon*.

This performance—despite the serious constraints imposed on us by the government's way of doing business—is a remarkable tribute to the skill, pride and determination of our 25,000 men and women.

But it also has been made possible by the infusion of cold, hard cash from Tenneco and the money-at-a-price from banks.

What we have built at Newport News is a unique ship manufacturing complex—the only one in the United States that has the facilities, equipment and human resources to build, repair, overhaul and refuel the full range of Navy vessels and the only one now building nuclear-powered surface ships. Newport News Shipbuilding truly is a national asset.

But to maintain our viability, we are intensively pursuing other lines of business in which we have proven skills. We are attempting to expand our commercial shipbuilding and ship repair operations and to broaden our range of products and services for the commercial nuclear power generating industry.

The contributions our men and women have made to this nation are all-too-frequently overlooked. Or, to paraphrase the great British admiral, Lord Nelson:

"God and the *shipbuilder* we adore
In times of danger, not before.
With danger passed
And all things righted,
God is forgotten
And the shipbuilder slighted."

PAST ADVERSARIAL RELATIONSHIP

Last fall the more than 80-year relationship between the Navy and its most important supplier of ships had sunk to an all-time low. In fact, last year I notified the then Secretary of the Navy that, under the circumstances then existing, we would not take on any new ship construction and—since the government apparently was so unhappy with us as a contractor—that we would assist the Navy in removing in-process work from our shipyard.

I do not intend to recite a litany of reasons or to place blame for that sorry state of affairs. To do so, however, would be a relatively easy task. I could merely update the testimony I gave more than two and a half years ago before the Seapower Subcommittee, which then was investigating the same basic problems that confront us now. Change a few dates, add the names of some additional ships and raise the dollar value of claims submitted—the issues remain basically unchanged and unresolved.

During the 1974 hearings, the nation's private shipbuilders presented 39 recommendations for improving Navy-supplier relations. To date, only two of these have been implemented. Ten others have been adopted in part. No action has resulted from the other 27 recommendations.

If anything, the situation has gotten worse. The size of our fleet has shrunk from 520 ships to 489. At the same time, total shipbuilding claims against the Navy have grown from $700 million to more than $2 billion.

CLAIMS: A LEGAL REMEDY UNDER THE CONTRACT

It is important to keep in mind that a claim is really an individual shipbuilder's last resort in seeking, through the contract, a fair financial settlement of problems over which his control is either non-existent or minimal.

If a shipbuilder fails to meet his contractual obligation, the Navy can withhold payment for the work in question, which is only proper. However, when the Navy fails to make payment as part of its contractual obligation, the shipbuilder's last resort is to file a claim. The claim then is either eventually settled or the matter litigated, which is an even more lengthy process. In the meantime, the shipbuilder has no option but to continue work at his own expense—even with no pricing agreement—or risk default under the contract.

Claims are a legal procedure provided for in the basic contract. They are not, as some would have us believe, a bail-out by which the contractor can recover losses that he was responsible for.

IMPROVED RELATIONS BETWEEN NEWPORT AND THE NAVY

The record of resolving disputes on a timely and equitable basis in the past is not a very good one, but I want to start with a clean page. And I certainly hope that we can disprove the adage that "the past is but a prologue to the future."

I believe there is some basis for that hope. We have seen some recent progress.

First, the issue of design responsibility. The Navy had threatened last year to break prior agreements and hold us financially responsible for the design of its ships—something the Navy had never attempted to do before to its design contractors. That issue was dropped—and the then Under Secretary of the Navy told me he was sorry the Navy had ever raised it.

Second, we have been able to settle one of six major shipbuilding claims through good faith negotiations with the Claims Settlement Board chaired by Admiral Manganaro. We have been paid for the *California* and *South Carolina* (CGNs 36 and 37). Both of these nuclear-powered cruisers have been at sea in the service of our nation since 1974.

Third, at the request of the former Under Secretary, we are developing for the Navy's consideration new and more satisfactory contracting arrangements for future work.

Because of these considerations, in February we reversed a stand taken last fall and decided to submit a proposal for construction of three more submarines of the SSN688 Class.

Our primary objectives are to maintain our current production schedule of delivering two submarines a year and—even more important—to maintain a continuing dialogue with the Navy on means of improving contract terms and conditions.

BASIC CAUSES MUST BE ELIMINATED

Despite these positive signs, the basic problems remain with us. And the lack of decisive action to destroy their roots only serves to perpetuate and exacerbate divisiveness between the Navy and its key suppliers.

I mentioned earlier that one claim had been settled—a positive sign, but hardly a breakthrough. We still have five other claims—involving 12 vessels—to resolve.

But the problem doesn't stop there. Even if we settled all these claims tomorrow, we'd then have to deal with the ones that have been accumulating while we've been attempting to resolve claims rather than eliminating their cause. Bandages and salve help. They provide some needed relief on a temporary basis. But the time has come for the physician to recognize the cancer and cut it out. We must deal directly and realistically with the cause of the disease before it destroys more of our nation's strength and its resolve. You gentlemen and your colleagues must insist upon a cure and help bring it about.

TRUE VALUE OF SHIPBUILDING CLAIMS

The claims we submitted to the Navy last year represented the status of six contracts on specific dates ranging from December 31, 1974, to June 30, 1975. We asked the government to raise the ceilings of the 14 ships involved by a total of $884 million.

The $884 million total was quite misleading, although it was necessary to compute new ceiling prices to comply with the incentive formulas in our contracts. It certainly does not, as many people unfortunately have been led to believe, represent the amount of money the government owes us. The government's legal liability to Newport News Shipbuilding—even if all the claims were settled at 100%—would have been $460 million.

As an illustration, consider the claims we recently settled on the *California* and *South Carolina*. The increase in ceiling price we requested was for $155 million. The settlement we finally reached was for $44 million.

That contract, like all our Navy ship construction contracts, contains formulas whereby the Navy and the shipbuilder share costs which fall between the target cost and ceiling price.

Because of the cost-sharing provision of the contract, a settlement at the full ceiling value of $155 million would have given Newport News $73 million. And—I must add—based on previous experience, a 100% settlement is a highly improbable event.

So, the settlement we finally did reach of $44 million was 60% of the maximum possible amount of $73 million. We did not settle for 29 cents on the dollar, as some individuals have alleged. And the Claims Board did not find, as also has been alleged, that $111 million of our claims was invalid.

But, we are open to the logical question, "If your claims on the *California* and *South Carolina* were valid, why accept a settlement based on only 60% of their maximum value?"

The answer is told in terms of hard cash and the time value of money.

The alternative to settlement was litigation, but that would have taken at least three years. And even if we had achieved total victory in the court, we would stand to gain only an additional $29 million before interest and taxes.

Against the possibility of an extra $29 million, consider these factors:

After credit for prior payments, we actually received $30 million as a result of the settlement. This was about $23 million more than we probably would have received had the matter been decided unilaterally by a contracting officer. Without a settlement, we would have lost the value of that $23 million during the probable three-year lawsuit. So it would cost us $8-to-$9 million in interest charges because we'd have to borrow that amount of money.

We'd lose another $5-to-$6 million in the present value of the money as opposed to its inflation-eroded value three years from now.

In addition, we would have incurred untold legal costs and devoted considerable management time to the lawsuit.

In short, the possibility of an additional $29 million—even if we were able to receive a full settlement three or four years from now—simply was not worth the cost. Settlement at 60% of full value, therefore, was a prudent business decision.

That settlement of $44 million boils down to a profit before taxes of $6 million on work totaling $234 million, for a pre-tax return on total cost of only 2.6%. I consider this as no more than a "liquidation" type of settlement, but we had no real alternative.

If our entire claims of $884 million were to be settled on the basis of the conservative estimates we use for financial reporting purposes, the result would be a profit before interest and taxes of about $50 million, or a 2.3% pre-tax pre-interest return on $2.3 billion of Naval sales. If interest costs were deducted from the projected profits, the entire program involving 14 vessels over a 12-year period would be a break-even venture at best for Newport News Shipbuilding.

Hardly a ripoff, and hardly justification for staying in the shipbuilding business. But certainly justification for decisive action to improve this bleak situation.

CONTINUING PROBLEMS WITH CONTRACTING PRACTICES

And yet, even as we sit here discussing the problem, new claims continue to mount. We may have settled $155 million in claims, but in the meantime we've submitted $37 million in still additional claims and have accumulated $80 million more that will still have to be submitted if we can't resolve the matters equitably through other contract administration procedures. All we've really accomplished is to stand still.

In addition, we continue to be forced to support Naval shipbuilding with our own money. At year-end 1976 we had $180 million invested in the program. We also continue to fall behind by an additional $4 million each month in the difference between what our actual costs are and what the Navy pays us. We, therefore, have to borrow to support this investment.

I certainly do not intend to detract from the pressing need to resolve quickly and equitably the claims submitted by Newport News and other shipbuilders. But neither do I want to mislead you into thinking that when these particular claims are settled, our nation's Naval shipbuilding program will automatically return to an even keel. Not so. We're still treating the symptoms, while the disease itself continues to run rampant.

At times I feel like Cassandra, the ancient Greek who accurately prophesied misfortune but whose fate was never to be believed. I hope that our credibility has been enhanced somewhat by the Federal Court's decision last month in the dispute over construction of the CGN-41.

The court clearly ruled in our favor and found that, until the appointment of Mr. Gordon Rule, the Navy failed to negotiate with us in good faith. We are gratified that not only the legality but also the sincerity of our position were at long last officially recognized. I would like to insert the court's decision into the record of these proceedings.

But, as pleased as we are with that decision, I'm reminded of the words of your esteemed colleague Senator John C. Stennis: "With all proper respect for lawyers and with due respect for the courts, they have their place. But they cannot build ships. They cannot build ships." But we and the Navy must be able to devote our attention and talents to building ships, not writing legal briefs.

As I mentioned earlier, we have seen concrete evidence of a willingness on the Navy's part to improve relations with its key suppliers. And we have seen some improvement in contract provisions and administration procedures. But much more needs to be done if we shipbuilders are to improve our efficiency, if claims are to be minimized and if the Navy is to get the ships it so desperately needs at a price that we taxpayers can afford.

The last contract we signed—for five submarines in August, 1975—contained more realistic and equitable provisions for certain types of escalation. Escalation includes many cost increases that are beyond the control of the shipbuilder. The dramatic increase in energy costs we've recently experienced is one example. Others include higher Social Security withholding obligations, new occupational safety and health provisions, expanded Workers' Compensation coverage and additional environmental protection regulations.

The question is not whether these government-legislated changes are desirable. The question is who should pay the cost for these new items—a substantial cost over which we shipbuilders have no control.

Unfortunately, the progress that we thought had been achieved in the contract for SSNs 711–715 was lost somewhere along the way to the next contract proposed by the Navy, on which we currenly are preparing a response.

NO INCENTIVE FOR PRODUCTIVITY IMPROVEMENTS

Another and ultimately more serious problem is the lack of incentive for the shipbuilder to make capital improvements that increase his productivity. Under the present system, any cost savings resulting from capital investment or productivity increases by the shipbuilder are shared by the Navy and the shipbuilder.

The ratio varies, but averages out to about 80% of any savings going to the Navy and only 20% to the shipbuilder. At that rate, for example, the likely savings of any improvement would have to be at least five times its cost before the shipbuilder could begin to recover his investment.

To make matters worse, the savings may be taken only on contracts then in effect, even though the capital improvement may result in greater productivity and cost savings on all succeeding contracts. And the shipbuilders's best cost experience on one contract—on which he may have achieved significant savings—become the basis for pricing on the next contract.

This system of sharing savings achieved by capital improvements is not unique to shipbuilding. Similar arrangements are applicable to defense contractors in the aerospace industry. What makes the impact so onerous on shipbuilders is that—in contrast to the aerospace industry—the vast majority of assets are owned by the contractor, not furnished by the government.

The shipbuilder has no real incentive to invest in new facilities and equipment that could increase his efficiency and perhaps reduce the cost of Navy ships. In fact, the low level of profitability on Navy work makes it virtually impossible from an economic standpoint for the shipbuilder to replace his productive assets, much less improve them. These factors can only contribute to the obsolescence of our nation's shipbuilding capability—at a time and at a price we cannot tolerate.

UNREASONABLE BURDENS SHIFTED TO SHIPBUILDERS

Some current contracting procedures are unreasonable, others border on the unconscionable. In this latter category is a special provision entitled "Minimization of Delay Due to Government Furnished Property" in the latest request for proposals for SSN688 Class submarines.

We recognize that, given the complexity and state-of-the-art nature of a nuclear ship, certain equipment to be furnished by the government occasionally may be late or prove defective. The Navy must recognize, however, that in shipbuilding proper sequencing of work and timely receipt of equipment is critical.

Late or defective government-furnished equipment has been a serious problem and a major cause for claims. The Navy's solution should have been to accept responsibility for its own errors and to pay the costs of its own mistakes—to relieve the shipbuilder of burdens beyond his control.

However, the Navy instead is attempting to solve the problem by decreeing that if government-furnished components are late or defective, the shipbuilder will—without additional compensation—do whatever is necessary to avoid delay, including use of overtime or altering the ship so that the equipment can be installed later.

If no amount of shipbuilder effort and money can overcome the effect of late or defective government-furnished equipment, the clause does permit an extension of delivery date. But the Navy has protected itself even in this eventuality. The first 180 days of delay are the shipbuilder's responsibility—without additional compensation. For the Navy to accept any responsibility, it must be the sole and exclusive cause of any delay beyond that "free" half-year.

The Navy is attempting to shift the consequences of its own failures—on matters within only its control and knowledge—to the shipbuilder. This clause is labeled "J–22," although a more apt description would be "Catch-22."

MORE EQUITABLE CONTRACT TERMS AND CONDITIONS REQUIRED

When we submit our proposal next week for the three 688 Class submarines, it will not be on terms and conditions such as these. We plan to introduce certain new provisions and modify others to eliminate some of these and other inequities.

I hope our proposals are greeted with an open mind and a willingness to candidly discuss and objectively evaluate our suggestions and alternatives. This is all we ask.

CONCLUSION

I have been involved in shipbuilding for less than five years, but it seems as if the controversy between the Navy and the industry has been going on forever—taking the time and talents of managers and officers alike, sapping our nation's strength, raising doubts about our capability and our resolve.

Franklin Delano Roosevelt apparently was facing similar difficulties years ago when he grumbled:

"To change anything in the Navy is like punching a feather bed. You punch it with your right and you punch it with your left until you are finally exhausted. And then you find the damn bed just as it was before you started punching."

I can't permit myself the luxury of quite that pessimistic an outlook. We have come a long way—relations have improved. The basic problems are still there, but so are the solutions to them.

There are men of good will in the government who are seeking solutions to these problems, many of which were not caused by those now charged with solving them. I have been impressed that Congress—and your Committee in particular—has taken the lead in approaching these issues positively. You have appropriated the funds the Navy has requested to cope with these problems. Your invitation to representatives of the shipbuilding industry to appear before this subcommittee is but another example of this type of initiative.

I urge Congress to support the military and civilian leaders who recognize the tough decisions that are required and who are pre-

pared to make them—who recognize that lawyers and courts cannot build the ships our nation so desperately needs. These leaders certainly have my full support.

In the past, decision-making in this city has been made more difficult by an atmosphere of second-guessing. In such an atmosphere, the temptation has been to resolve all questions against the contractor and to let judges make the really tough decisions.

This approach—the attitude of "Don't let it happen on my watch"—is basically a shirking of responsibility. In the final analysis, these problems—which fundamentally are management issues—must be resolved within the executive branch of the government. I hope that this subcommittee—and your colleagues in Congress—will insist upon the responsibilities being faced and the problems resolved.

Thank you for asking me to be here today. I will be glad to answer your questions.

FINANCING THE SOCIAL SECURITY PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 5 minutes.

Mr. CONABLE. Mr. Speaker, one of the most critically important problems facing our society is the financing of the social security program. As I have said in recent weeks, the President and the majority party leaders in the Congress have apparently decided to let an emergency develop before recommending action.

It is interesting that President Carter has committed himself to specific deadlines for recommendations on the matters he considers important. April 20 is the date for his energy package, May 1 for welfare reform and October 1 for his comprehensive tax reform proposals. Why not a deadline on sending Congress his recommendations for dealing with social security financing?

Does not the President consider this a critical problem? He would better understand that 33 million Americans who are receiving social security benefits and the more than 100 million paying into the system want some action which will deal with this growing problem. The President and the Democratic majority in Congress should let these Americans know whether they contemplate any action on social security and, if not, why not. I urge the President to make known his views on this subject.

FINANCIAL REGULATORY AGENCIES RESPOND TO CONSUMER AFFAIRS STAFF STUDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, last summer the House Banking Committee's Consumer Affairs Subcommittee which I chair released a study of Federal financial regulatory agencies' apathy toward consumer complaints. The study revealed that almost 70 percent of those consumers who complain to either the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Reserve System, the National Credit Union Administration, or the Federal Home Loan Bank Board were left "frustrated and unhappy."

The report found that—

First. None of the agency consumer affairs offices become involved in the actual investigations of the consumer complaints they receive. The complaints are routinely shuttled to regional or legal offices for investigation.

Second. Consumers are rarely contacted for additional information, nor are investigators usually sent out to study the complaint situation first hand. Instead the agencies usually request information from the institution about which the consumer complained.

Third. No agency routinely checks records of financial institutions to determine the accuracy of the information provided to the agency by that financial institution.

Fourth. No efforts have been made by the agencies to publicize the consumer affairs offices' ability to handle consumer complaints.

Fifth. None of the agencies publish educational materials for consumers with the exception of the Federal Reserve Board which has issued a limited number of consumer-oriented materials.

Among the recommendations made by the subcommittee staff were that consumer affairs specialists should be designated at the regional offices of those agencies. They could aid the consumer in becoming more aware of the consumer affairs offices within the agency and would make the Washington office more aware of the problems of the consumer. It was recommended also that the consumer affairs offices of the agencies should publish information leaflets to be distributed among institutions and to consumer groups.

Last week both the Federal Deposit Insurance Corporation and the Comptroller of the Currency announced actions which show that they have taken the recommendations of the subcommittee seriously. The FDIC selected 14 regional consumer specialists who will serve as focal points for consumer matters. Atlanta; Boston; Chicago; Dallas; Columbus, Ohio; Madison, Wis.; Memphis; Minneapolis; New York; Omaha; Philadelphia; Richmond, Va.; St. Louis; and San Francisco will be able to now deal more directly with consumer problems by using the expertise of these specialists.

A leaflet describing consumer rights under fair credit billing and the truth in lending statutes has been sent out to the presidents of all national banks by the Comptroller of the Currency. The effective date of distribution of the leaflets by the banks was March 23 this past Wednesday. The leaflet was prepared by the Consumer Affairs Office of the Comptroller "in light of the general concern for consumer awareness and the reliance of the customer on the bank for information." The information will include an address and a telephone number of the Comptroller's Consumer Affairs Office. Thus the consumer will be more aware of his rights and obligations under consumer credit laws as well as who to contact for more immediate handling of problems. The information will also enable the consumer to phrase more clearly and completely the problem he has encountered.

Hopefully these actions represent only the beginning of agency response to the findings of our report and to the needs of the consumers who rely on them.

Typical of the consumer responses to a subcommittee questionnaire is one which states—

In my opinion, the agency just skimmed over the top and was brainwashed by the officers of the bank.

Firm action like that of the FDIC and the Comptroller is necessary if the American consumer is ever to reestablish trust in Federal agencies.

Cost should not be a problem in the implementation of the subcommittee's recommendations since most of the agencies involved already have consumer offices which have been in operation for over a year. The Federal Deposit Insurance Corporation and the Comptroller have proven by their actions that regulatory agencies can meet their responsibilities to the American consumer without delay.

CIVIL RIGHTS COMMISSION AUTHORIZATION ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. EDWARDS) is recognized for 20 minutes.

Mr. EDWARDS of California. Mr. Speaker, I am pleased to join today with Congressman PETER RODINO and 10 of my colleagues to introduce legislation to raise the limitation on appropriations for the U.S. Commission on Civil Rights. The Commission is a temporary, independent, bipartisan agency established by Congress in 1957 to study issues of significant civil rights impact and to submit reports and recommendations to the President and Congress on its findings.

As chairman of the House Judiciary's Subcommittee on Civil and Constitutional Rights, I have not only a great understanding but a sincere interest in the work of this small but vital agency. After 20 years, the Commission's work and contribution to civil and voting rights legislation and debate is a matter of public record. I need not chronicle the Commission's long list of recommendations at the Federal level which have been adopted by the Congress or the President.

Some of the recent and proposed activities of the Commission deserve mention. During fiscal year 1978, the agency will be continuing work on 10 projects including an examination of affirmative action policies and procedures adopted by private and public sector employees to evaluate their implementation and effectiveness in increasing the number and improving the status of minority and female employees. Other studies currently in progress include:

UNEMPLOYMENT AND UNDEREMPLOYMENT AMONG MINORITIES AND WOMEN

This study will seek to identify the variables associated with higher unemployment and underemployment among minorities and women. It will identify those characteristics of labor market demand that relegate minorities and women to less desirable jobs and/or result in higher unemployment rates, and

will also attempt to determine the labor market and individual characteristics that affect the choices of minorities and women.

A second phase of the project will seek to estimate the cost to society of high unemployment and underemployment among women and minorities by exploring the loss in gross national product as well as expenditures that would not otherwise be incurred for income maintenance programs, law enforcement, fire protection, public health, and other community services.

TITLE IX OF THE EDUCATIONAL AMENDMENTS OF 1972: SEX DISCRIMINATION IN PHYSICAL EDUCATION AND ATHLETICS

The Commission will begin its study of title IX by examining sex discrimination in two types of programs—physical education classes and competitive athletic teams—in the three educational levels—elementary, secondary, and higher education. Inequities in funding, staffing, provision of facilities, and number and types of programs provided for females will be studied in order to determine the nature and extent of sex discrimination in athletic programs. The manner in which the athletic system itself contributes to the socialization of girls and boys, the imposition of limiting sex-role stereotypes, and the impact of limited physical abilities on the employment futures of women will be examined.

LABOR UNIONS AND EQUAL EMPLOYMENT OPPORTUNITY—PART II

This second report dealing with labor unions will focus on the advancement of minorities and women on the job, as distinct from hiring practices. Among the practices the study will examine are those relating to initial job assignment, the use of certain seniority rules, lines of occupational progression, allocation of training opportunities, and examination and education requirements. The study will also attempt to identify any existing promotion practices which violate title VII of the Civil Rights Act of 1964 or other antidiscrimination statutes.

THE INTERACTIVE RELATIONSHIP OF SEGREGATION AND DISCRIMINATION IN HOUSING, EMPLOYMENT, AND PUBLIC EDUCATION

Since its inception the Commission has been concerned with the separate causes and effects of discrimination in housing, employment, and public education. This study will examine the effect of the interaction of the three on discrimination.

The study will seek to determine how practices in the private housing market; Federal, State, and local housing programs; and zoning land use policies and regulations have affected both residential patterns and the racial/ethnic/income class composition of schools. It will also determine the relationship between residential and school segregation and changes in local labor markets that may affect equality of economic opportunity.

FORCIBLE RAPE OF WOMEN STUDY

This study will provide a critical review and evaluation of victim-centered empirical and theoretical rape literature and development of model guidelines for rape law reform. The development of model guidelines for rape law reform will examine both proposed and existing State and Federal rape laws/model codes and secondary literature to provide substantive guidelines, recommendations, and criteria for drafting nonbiased rape law, and will provide a critical catalog of existing and proposed rape law revisions and model codes by jurisdiction, subject area, and utility.

FEDERAL CIVIL RIGHTS ENFORCEMENT EFFORT FOLLOWUP REPORT

The Commission will complete and publish the final volume dealing with policymaking, of the "Federal Civil Rights Enforcement Effort" 1974 study. The study to date has documented the fact that Federal civil rights enforcement has not appreciably improved since the comprehensive study series originated in 1970. The Commission will therefore conduct reviews of all Federal agencies cited in the study to determine the extent to which they have adopted and implemented the recommendations contained therein. We will also review and evaluate any other remedial actions taken by these agencies.

STATE AND LOCAL CIVIL RIGHTS (HUMAN RIGHTS) AGENCIES STUDY

Over 90 percent of the States and more than 500 localities have civil rights or human rights commissions or departments. They vary enormously from State to State in terms of enabling legislation, types of discrimination covered, classes protected, extent of enforcement capability, constituencies, administrative structures, budgetary support, and quality of work product. This study will examine these agencies and their relationship with Federal civil rights agencies.

IMPACT OF FOREIGN GOVERNMENT POLICIES ON CIVIL RIGHTS

Actions by foreign governments may result in discrimination against U.S. citizens and residents because of their race, religion, sex, or national origin. This discrimination may occur either by the direct application of the policies of foreign governments to Americans, or through indirect methods, including the economic and/or diplomatic coercion of the U.S. and multinational private employers and U.S. Government agencies in regard to whom they hire, send overseas, or use as contractors, for example, the recent Arab economic boycott of American companies doing business with Israel or employing American Jews. The study will examine the adequacy of Federal agency policies to prevent such discrimination, and the extent to which those policies have in fact been enforced.

RACE AND GENDER ATTITUDES AND BEHAVIOR IN THE UNITED STATES

The focus of the project is on the individual and institutional determinants of race, ethnic, and gender attitudes and behavior. Employing several interlocking approaches, this project will examine the causes of occupational and job segregation and the development and consequences of ethnic and gender identity.

This study will provide an enhanced understanding of the basic dynamics of prejudice and discrimination, thereby contributing to the development of new approaches to the solution of civil rights issues.

In fiscal year 1978, the Commission will also initiate over nine projects dealing with numerous issues of significant civil rights impact including enforcement of Federal nondiscrimination statutes, discrimination in the military services, the impact of foreign government policies on civil rights, and domestic violence.

Specifically, the Commission will begin work in the following areas:

COERCED STERILIZATION

Coerced sterilization includes both overt coercion and acceptance of uninformed consent. This study will ascertain the incidence of forced sterilization by race, sex, age, and economic status of those sterilized, and will investigate the impact of sterilization on the health and legal rights of the victims. The study will also determine the extent of Federal involvement in forced sterilizations, as well as investigate the implementation of State eugenics laws, including a focus on the differential impact of such implementation on low-income and/or minority women.

RACIAL/ETHNIC/SEXUAL HETEROGENEITY AND CONFLICT

This study will examine the cultural aspects of intergroup relations—the role played by power, identity, assimilation, and other such factors among all groups, including ethnics and whites. The study also will evaluate the extent to which the design and implementation of public and selected private programs and policies generate or exacerbate conflict, and will evaluate the manner in which the common and separate interests of groups can be met without encouraging increased group competition for resources.

EVALUATION OF FEDERAL ENFORCEMENT OF TITLE IX

This study will focus on both employment and programmatic provisions of title IX and will address Federal enforcement of the law as well as the nature and extent of voluntary compliance by school districts and institutions of higher education.

DISCRIMINATION IN THE MILITARY SERVICE

This study will probe the extent of racial, national origin, religious, and sex discrimination in the military service. We will examine representation of minority groups and women in each branch of the service, paying particular attention to rankings, promotion, recruitment, assignment, training opportunities, and the service academies. We will look at the degree to which the military effectively implements its equal opportunity enforcement responsibilities in housing, both in the U.S.A. and overseas, and the nature and adequacy of civil rights complaint and appeals procedures within the military.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

This study, a sequel to an earlier Commission report which documented the serious shortcomings of title VI enforcement, will review the current extent of discrimination in federally assisted programs and recommend a Government-wide strategy for combating this discrimination.

ABILITY OF SCHOOLS TO EDUCATE MINORITY STUDENTS

This study will examine the existing research evidence to ascertain what impact differences among schools have on minority students and to assess the potential of schools for providing effective education for all students. It will critically review the major research evidence which has been interpreted as showing that variations among schools do not have much differential impact on minority students, and recommend the types of research that will correct the past deficiencies in research strategies.

CONSULTATION ON ROLE OF THE CITIES

The Commission will plan, organize and manage a consultation bringing together a variety of urban specialists to discuss such problems as unemployment and underemployment, poor and inadequate housing, deficient schools, soaring crime rates, substandard social services, ineffectual public transportation, and lack of leadership.

CONSULTATION ON ALTERNATIVES TO TRADITIONAL CIVIL RIGHTS PROGRAMS

During the past 20 years, civil rights efforts have been based on the assumption that equality of opportunity and, more recently, equality of results are best achieved by ever-greater governmental intervention in the social processes of the country. This approach has recently been attacked by some traditional supporters of civil rights and equal opportunity who now question the efficacy of massive and complex Government porgrams and their accompanying regulations and bureauracy. The purpose of this consultation will be to provide a forum for the exchange and exploration of rational and scholarly viewpoints of this increasingly critical issue.

CONSULTATION ON DOMESTIC VIOLENCE

Although only limited data are available regarding the extent of violence within a family or quasi-family context, it is apparent that the victims of such violence are overwhelmingly female and the perpetrators are male. It has been alleged that police inaction and discriminatory treatment of female victims of such violence prevents most such cases from ever reaching the courtroom.

The Commission will hold a consultation to bring together people who are actively involved in combating domestic/marital violence on several fronts. This would include researchers, attorneys, and initiators of innovative programs to assist battered women. The participants will look at the effectiveness of already proposed and/or implemented remedies, including the specially trained police units established to deal with domestic violence calls, the halfway houses established by women's groups in several cities as shelters/refuges for abused women, and the attempts to provide legal assistance to battered women seeking divorce and support orders.

This list of Commission projects does not, by any means, reflect the full extent of agency activity projected for fiscal year 1978. In addition to these projects, the Commission will carry out its normal program of civil rights monitoring and information dissemination. In fiscal year 1978, the Commission will: Continue to provide congressional testimony on civil rights matters and analysis of proposed legislation; review and refer to civil rights enforcement agencies individual complaints of discrimination—approximately 2,000 complaints projected—publish the quarterly Civil Rights Digest, and disseminate the Digest and other Commission publications to Government agencies, private organizations, and individual citizens; conduct public hearings on major civil rights issues, and publish transcripts and reports of those hearings—four multiday hearings projected for fiscal year 1978; and support the work of its 51 State advisory committees—which are expected to hold approximately 340 public meetings and issues 25 published reports based on their independent investigations of local civil rights problems in fiscal year 1978.

The legislative life of the Commission has been extended five times, the latest action for 5 years until 1978. At that time, a limitation was placed on the agency's appropriation at $7,000,000. It has been necessary, therefore, for Congress to raise periodically the authorization ceiling for the Commission. The bill we propose would authorize funding for fiscal year 1978 of $10,540,000, an increase of $1,000,000 over the fiscal year 1977 level. The fiscal year 1978 moneys have been approved by the Office of Management and Budget as consistent with the President's program.

I urge my colleagues to join with Representatives RODINO, BUTLER, BEILENSON, BURKE, CONYERS, DRINAN, FENWICK, MINETA, MITCHELL, SEIBERLING, and VOLKMER and support the Civil Rights Commission Authorization Act of 1977.

Mr. BUTLER. Mr. Speaker, today I am joining my colleague on the House Judiciary Subcommittee on Civil and Constitutional Rights, the gentleman from California (Mr. EDWARDS), in introducing the Civil Rights Commission Reauthorization Act of 1977. During my tenure as the ranking minority member on the subcommittee, the Civil Rights Commission has appeared and presented testimony on several issues which fall within the subcommittee's broad jurisdiction. I certainly have not always agreed with the positions advocated or the conclusions reached by the Commission; however, I can attest to the generally thorough work and valuable contribution the Commission makes when it testifies on programs or reports on a particular issue.

I join with the gentleman from California (Mr. EDWARDS) in sponsoring the reauthorization because I believe that the Commission merits bipartisan support. However, I wish to announce that I am reserving judgment, and consequently my vote on this legislation, until the Commission has testified before our subcommittee on this bill. During the subcommittee's hearing, I plan to ask several questions concerning the Commission budget and their plans for studies and reports during fiscal year 1978.

The U.S. Commission on Civil Rights was created by the Civil Rights Act of 1957. Originally authorized as a temporary agency for a 2-year period, the Commission has been extended a total of six times. The most recent extension, which keeps the Commission operating through fiscal year 1978, was passed by the Congress in 1972 (Public Law 92–496). Last year, the Commission sought authorizations for both fiscal year 1977 and fiscal year 1978, but the Judiciary Committee wisely authorized appropriations for only 1 year. Thus, the Commission must come before Congress again this year seeking a 1-year authorization. They are requesting the sum of $10,540,000, which represents a $1 million increase over last year's authorized level.

Since its creation in 1957, no one could say that the Commission has not been active and outspoken on several important social issues which have arisen over the last 20 years. Specifically, the Commission was established to perform five primary functions: First, to investigate allegations that citizens are being deprived of their right to vote as a result of their race, religion, sex, or national origin; second, to collect and subsequently study information concerning legal developments which could constitute a denial of equal protection of laws under the Constitution; third, to appraise Federal laws and policies with respect to the equal protection under the Constitution; fourth, to serve as a national clearinghouse for information in respect to denials of equal protection of the laws; and fifth, to submit reports, findings, and recommendations to the President and the Congress. (See 42 U.S.C. 1975c.)

In order to carry out their statutory functions, the Commission conducts fact-finding hearings. Although the Commission has not been vested with enforcement authority, it does have subpena power. Using this power, the Commission elicits facts from a wide range of public officials, minority group representatives, and other citizens who represent diverse interests and points of view. Coupled with its hearing powers, the Commission sponsors conferences on regional and national levels in order to aid its fact gathering function. Finally, the staff researches and investigates issues which relate to its statutory functions. Using these tools, the Commission compiles and disseminates its product along with recommendations to the President and the Congress. These conclusions and recommendations are submitted for review and possible enactment by the executive and legislative branches of the Federal Government.

As a result of the controversial nature surrounding many of the issues which arise within the Commission's far-reaching jurisdiction, some of the Commission's studies and reports have been criticized by Members of Congress and the public. In the past, I have taken issue with some of the conclusions reached and recommendations proposed in Commission reports. What we must all remember is that a report of the Commission is not the final authority on any given issue. These reports merely represent a factual, professional analysis, which we hope have been prepared as a result of diligent and nonpartisan research. This is certainly the approach I use as a member of the Civil and Con-

stitutional Rights Subcommittee which has jurisdiction over several of the issues on which the Commission reports.

Therefore, Mr. Speaker, I am prepared to study the Commission's agenda for the upcoming year, and I look forward to the hearings on the legislation which will be conducted by the Subcommittee on Civil and Constitutional Rights.

FOREIGN INTELLIGENCE SURVEILLANCE AMENDMENTS OF 1977

Mr. KASTENMEIER. Mr. Speaker, privacy is an essential element in the American ideal of liberty, a basic right recognized by the fourth amendment to the Constitution. As Justice Brandeis wrote, each individual's right to privacy is "the most comprehensive of rights, and the right most valued by civilized men."

Within the last several years many citizens have begun to fear that this basic right is being steadily eroded by the use of modern electronic technology to eavesdrop on conversations. Unfortunately, increasing numbers of Americans have begun to fear that Government is more interested in intruding into their private lives than in acting to protect their privacy.

Until passage of the Omnibus Crime Control and Safe Streets Act of 1968, the only Federal statute on wiretapping was section 605 of the Federal Communications Act of 1934, which prohibited interception and divulgence of conversations transmitted by wire. The Department of Justice interpreted section 605 to mean that the law was violated only if an intercepted conversation was divulged to outsiders, and the question was never decided by the Supreme Court. It was not until the 1968 act that Congress enacted a comprehensive statute on wiretapping and electronic surveillance.

That statute, title III of the Omnibus Crime Control and Safe Streets Act, actually extended official eavesdropping by authorizing frequent and prolonged electronic surveillance by Federal and State investigators in criminal cases. It also authorized, for the first time, the use of wiretap evidence in criminal trials. Most importantly, that 1968 act specifically disclaimed, in section 2511(3), any attempt to deal with one of the most senitive contemporary issues—the power of the Executive to engage in wiretapping and electronic surveillance solely for the purpose of gathering foreign intelligence.

Presidents since Franklin Roosevelt have asserted that their responsibilities as Commander in Chief under article II of the Constitution give them the power to conduct electronic eavesdropping without regard to the restraints of the fourth amendment.

On May 21, 1940, President Roosevelt issued a memorandum to the Attorney General asserting that electronic surveillance would be proper under the Constitution in cases of "grave matters involving the defense of the Nation." The exact nature of "grave matters" involving the defense of the Nation was never fully explained. However, it is now known that national security was used as a reason or a pretext to eavesdrop on the communications not only of foreign spies but also of law-abiding American citizens who had no connection with a foreign power but whose views were considered subversive by the Director of the Federal Bureau of Investigation or by some other person high in Government.

Federal agents continually wiretapped American citizens where domestic and foreign security concerns were involved until 1972 when the Supreme Court, in the famous Keith decision, declared that warrantless wiretaps were forbidden by the fourth amendment where there was no connection with the activities of a foreign power. The Court failed to consider, however, the question of whether such warrantless eavesdropping was permitted where the subject was directly involved with a foreign power, although several lower courts have so held.

Warrantless electronic surveillance conducted by agents of the Federal Government under the guise of national security is particularly insidious, even when involving contacts between an American and representatives of a foreign power, because it often is conducted with regard to the subject's political activities. This asserted exception to the protections of the Bill of Rights, with all the variations made possible through the use of modern electronic technology, could form the cornerstone of a future police state.

The dangers inherent in authorizing the President broad powers in the name of "national defense" or "national security" were clearly recognized by the late Chief Justice, Earl Warren, when he stated, in striking down a part of the Subversive Activities Control Act of 1950, that:

> This concept of "national defense" cannot be deemed an end in itself, justifying an exercise of * * * power designed to promote such a goal. Implicit in the term "national defense" is the notion of defending those values and ideals which set this Nation apart * * *. It would indeed be ironic, if, in the name of national defense, we would sanction the subversion of one of those liberties * * * which make the defense of the Nation worthwhile.—So said the Chief Justice in *United States* v. *Robel*, 389 U.S. 258, 264 (1967).

The Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, which I chair, began studying the issue of national security wiretapping 3 years ago, in April 1974, when we held hearings on several bills, including a proposal to require a court order prior to any interception of oral or wire communications in national security cases.

At that time Assistant Attorney General Henry Petersen, speaking for the administration, stated to the subcommittee, "let me be very brief. We oppose these bills. That is it." During the subsequent 2-year period, Mr. Petersen and his successors, as well as intervening Attorneys General, consistently opposed the concept of legislation imposing judicial restraints on national security wiretapping.

However, last year, President Ford announced a change in policy. He indicated a willingness to work with Congress to develop a system of court supervision of national security wiretapping. In response to his invitation for congressional input, Congressman RAILSBACK and myself wrote to the President offering our cooperation and included draft language we had developed as a substitute for H.R. 141, an earlier bill that I had sponsored on national security.

Although the President acknowledged our letter, neither he nor the Attorney General responded substantively to our draft language. Indeed, the Attorney General did not consult with us—although he surely did with the Senate—prior to preparation of a final draft bill which was introduced by Chairman RODINO as H.R. 12750, the Foreign Intelligence Surveillance Act of 1976.

An identical bill, S. 3197, was introduced in the Senate. While H.R. 12750 and S. 3197 represented a distinct departure from the former Administration's long held opposition to any statutory controls on foreign intelligence wiretapping, they were considerably more limited in scope than bills which earlier had been considered by our subcommittee. A broad coalition of civil liberties groups, in fact, argued that the bill simply constituted a disguised method of legitimizing the questionable practices which had in the past been represented by warrantless wiretapping. These groups, led by the American Civil Liberties Union, pointed out that the bill did not require a showing of criminal probable cause, did not permit judicial evaluation of the facts supporting a wiretap application, and failed to eliminate all exceptions to the warrant requirement.

Although I shared many of the reservations of the organized civil liberties community, I agreed to cosponsor H.R. 12750 after personal requests by the President and Attorney General to do so.

While our subcommittee held 3 days of hearings on H.R. 12750 in the 94th Congress, we failed to move to markup on the measure for the reason that the Senate, with which the Administration had collaborated originally in developing the legislation, failed to act.

With the convening of the 95th Congress, those of us who in the past have been involved with the issue, have had an opportunity to reexamine the whole question of national security wiretapping with a fresh perspective, unimpeded by the limitations imposed on the debate by the previous administration.

As a result of this reexamination I have developed a new bill, which I believe will meet the legitimate intelligence needs of the Nation and, at the same time, bring national security surveillance within the protective boundaries of the statutory law.

My bill, which I am introducing today, is entitled the Foreign Intelligence Surveillance Amendments of 1977.

It repeals that provision of current law, title 18, United States Code, section 2511(3), which disclaims legislative intent to limit the surveillance powers of the President in national security cases and permits electronic surveillance only when a Federal judge finds that there is probable cause to believe that the surveillance would produce evidence that one of a list of specific crimes has been or is about to be committed. This brings national security wiretapping and elec-

tronic surveillance, for the first time, within the procedures traditionally required for a search pursuant to the fourth amendment; procedures already required for wiretaps in criminal investigations.

In order that electronic surveillance may continue when required for foreign intelligence purposes, the bill writes into the law four provisions not currently available in normal criminal cases.

First, it expands the list of crimes the investigation of which may serve as a basis for an electronic surveillance. The new crimes are, violations of the Export Administration Act and the Foreign Agents Registration Act, crimes likely to involve foreign intelligence situations. Of course, wiretaps already may be sought in cases of violations of espionage, sabotage and treason statutes.

Second, the bill permits the permanent waiver of notice of the surveillance to a subject who is overheard as long as the evidence obtained is used only for intelligence purposes and not for criminal prosecutive purposes.

Third, it permits the Court to authorize a surveillance for up to 90 days where the subject of the investigation is an agent of a foreign power. In purely criminal investigations under current law, authorization of an electronic surveillance may not exceed 30 days.

Fourth, the bill permits the government to maintain strict security by confining wiretap applications to the U.S. Court of Appeals for the District of Columbia Circuit when foreign intelligence information is sought.

I believe that my bill will permit wiretapping and other electronic surveillance where necessary for obtaining foreign intelligence information, but, at the same time, respond to the objections raised by the civil liberties community to the administration's 1976 bill. That bill permitted electronic eavesdropping simply upon the finding by the Attorney General that the subject of the surveillance was an agent of a foreign power. It did not require the traditional fourth amendment showing of probable cause to believe that evidence of criminal activity would be found. In addition, the 1976 bill did not permit the judge, to whom the application for a warrant is made, to demand evidence supporting the facts certified in the application. My bill would permit the judge full power to test the assertions supporting the application.

Finally, my bill clearly avoids any congressional recognition of an inherent Presidential power to conduct surveillances outside the procedures established by law.

I believe that the Foreign Intelligence Surveillance Amendments of 1977 offer an excellent opportunity to bring the decades of long debate over national security wiretapping to a close with a responsible measure which will meet the intelligence needs of the Executive within the limitations imposed by the fourth amendment.

Mr. Speaker, I invite the support of the President, the Attorney General, and my colleagues for this measure.

For the RECORD, I would like to submit an explanation and analysis of the bill and the actual text:

THE FOREIGN INTELLIGENCE SURVEILLANCE AMENDMENTS OF 1977

EXPLANATION AND ANALYSIS

Explanation

The bill is styled as the Foreign Intelligence Surveillance Amendments of 1977 rather than as the Foreign Intelligence Surveillance Act, as was the 1976 Administration bill.

The language difference illustrates a fundamental policy difference between the two proposals. The Foreign Intelligence Surveillance Act of 1976 would have created a special national security electronic surveillance statute for which the threshold of implementation would be probable cause that the subject of the surveillance is a "foreign agent." In addition, the factual assertions supporting the application would not be subject to examination by the judge. The proposed Foreign Intelligence Surveillance Amendments of 1977 do not create a new statute. They merely amend the existing electronic surveillance statute, Chapter 119 of Title 18, United States Code, to permit surveillance for intelligence purposes where the traditional criminal probable cause showing has been made. Specifically, the Amendments would: (1) remove the existing Congressional disclaimer with respect to national security surveillance contained in 18, United States Code, Section 2511(3); (2) permit surveillances for a period of 90 rather than 30 days; (3) permit waiver of notice to the subject of the surveillance, and (4) permit the government to present applications for national security electronic surveillance to a small group of judges so that security easily could be maintained and specialized judicial knowledge of national security matters could be developed.

Section-by-section analysis

Section 1. Title.

Section 2. This section amends the definition provisions of Chapter 119, United States Code, to provide a definition of "foreign intelligence information." It is almost identical to the definitions proposed for the Foreign Intelligence Surveillance Act of 1976 as reported by the Senate Judiciary and Intelligence committees.

Section 3. This section deletes the disclaimer in 18, United States Code, Section 2511(3), in which Congress recognizes a Presidential surveillance power beyond that authorized in the statutory law.

Section 4. This section amends 18 United States Code, Section 2516 to permit applications for electronic surveillance orders involving foreign intelligence information to be made to the Court of Appeals for the District of Columbia Circuit. Its purpose is to permit such applications to be made to a small number of judges so that security can be maintained and so that the judges to whom such applications will be made may develop sufficient expertise in national security matters.

Section 5. This section amends Title 18 United States Code, Section 2516(1)(a) to add to the list of offenses for which electronic surveillance may be used, two additional misdemeanor offenses which are particularly important in foreign intelligence situations. These are violations of the Foreign Agents Registration Act and the Export Administration Act.

Section 6. This section amends 18 United States Code, Section 2517(3) to make it inoperative in cases where foreign intelligence surveillance information is sought. Section 2517(3) provides that evidence received from an electronic surveillance under Chapter 119 may be disclosed in judicial proceedings.

Section 7. This section amends Title 18 United States Code, Section 2518(5) to permit electronic surveillance for a period exceeding 30 days where foreign intelligence information is sought.

Section 8. This Section amends Title 18 United States Code, Section 2518(8) to provide for waiver of notice to the subject of an electronic surveillance in cases involving foreign intelligence information.

Section 9. This section creates a new Section 2521 in Chapter 119, United States Code, which permits application to the United States Court of Appeals for the District of Columbia Circuit for and approval of waivers of the notice and time provisions of Chapter 119 in cases involving foreign intelligence information.

GENERAL LEAVE

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include extraneous material on the subject of the special order today by the gentleman from California (Mr. EDWARDS).

PROTECTNG REDWOOD NATIONAL PARK

The SPEAKER pro tempore (Mr. THORNTON). Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. RYAN) is recognized for 5 minutes.

Mr. RYAN. Mr. Speaker, last week the House Government Operations Committee released its first report of the 95th Congress, entitled "Protecting Redwood National Park." Almost since the establishment of Redwood National Park in 1968, it has been a known fact that logging upslope and upstream from the park and the famous "worm"—which is where the tallest known trees in the world are located—is damaging park resources. A series of Interior Department studies and independent reviews document the fact that clearcutting and associated logging operations have caused extensive damage to the timber, water, and soil resources in the park.

The report, which was approved by voice vote by the full committee and by a bipartisan 6 to 1 vote of the Environment, Energy and Natural Resources Subcommittee, recommends a comprehensive program for protecting the park and its magnificent virgin redwoods. Perhaps the most important recommendation is that the park be enlarged by a minimum of 21,500 acres up to the 74,000 acres proposed in legislation (H.R. 3813) introduced by Representative PHIL BURTON, chairman of the House Interior Subcommittee on Parks and Territories. I want to commend and add my support to Representative PHILLIP BURTON for his efforts over the last several years to protect and enlarge Redwood National Park; I note that his subcommittee began hearings on H.R. 3813 last week.

The report recommends that the Interior Department and the National Park Service should be given the authority to enforce restrictions on timber cutting in the Redwood Creek basin which are considered necessary to protect park resources. The committee also finds that the Interior Department and the Justice Department should require

the three timber companies to carry out proper land rehabilitation and reforestation in order to minimize future erosion damage to the park.

In addition, the report recommends—and I want to stress this point—that the Congress and the administration should work closely with the State of California in order to offset the expected initial and interim loss of jobs and revenue to Humboldt County resulting from increasing the size of the park. I also want to emphasize that it is my belief the expansion of Redwood National Park and the resulting increase in tourism will in the long run prove to be an asset to the local economy.

Full-scale logging in the Redwood Creek basin for this season is slated to begin in April. This Friday the Arcata Redwood Co.'s voluntary deferral of cutting expires on two tracts of land they own near the Tall Trees Grove. In light of this fact—and I cannot overemphasize the urgency of the present situation—the report recommends that Congress and the administration seek a moratorium on logging in the Redwood Creek basin for a period of time sufficient for Congress to act on legislation designed to protect the park. Congressmen UDALL and PHILLIP BURTON of the House Interior Committee and Senators JACKSON and ABOUREZK of the Senate Energy and Natural Resources Committee have recently requested the timber companies to impose such a moratorium.

Last month I wrote President Carter asking his assistance in seeking a moratorium on logging by the timber companies for a reasonable period of time in order to give Congress an opportunity to act. The President is supposed to have an announcement on this subject at the end of this week. If the Congress and the administration are not successful in stopping timber cutting in the Redwood Creek basin in the next several weeks on a voluntary basis, I believe we should be prepared to take whatever steps are necessary to enforce such a logging moratorium. Those trees and this park are too valuable for us to do otherwise.

One final point: For those concerned with the expense of acquiring additional land for Redwood National Park—and I admit it will be expensive—let me point out that money spent for that purpose would come from funds appropriated under the Land and Water Conservation Act. Congress has authorized and both Presidents Ford and Carter have requested significant increases in appropriations for the land and water conservation fund. These increases are expected to continue at least until the end of this decade. Any money spent for land acquisition for Redwood National Park will come from this account, and will be budgeted for over a several-year period.

The giant coastal redwoods are a national treasure created by nature over thousands of years. Unlike other outstanding examples of America's natural heritage, such as the Grand Canyon, Yellowstone, and Mt. Rushmore, the great virgin coastal redwood forests are an endangered resource rapidly on their way to becoming extinct. Action is needed now to preserve these trees and protect this park for the future.

A PRAGMATIC APPROACH TO STRENGTHENING THE UNITED NATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

Mr. BINGHAM. Mr. Speaker, during the past 2 years, I have been privileged to be a member of a working group on the United Nations, organized by the Atlantic Council of the United States. The Director General of the Atlantic Council is the distinguished Dean Francis Wilcox, well and favorably known to many Members of the Congress.

This working group, which recently completed and released its report, was composed of the following members:

THE ATLANTIC COUNCIL WORKING GROUP ON THE UNITED NATIONS

CHAIRMAN

Charles W. Yost: consultant; former US ambassador to the UN, to Syria, and to Morocco.

RAPPORTEUR

Lincoln P. Bloomfield: professor of political science, Massachusetts Institute of Technology; consultant to the Department of State and the Arms Control and Disarmament Agency; former director, UN Policy Planning, Department of State.

MEMBERS

Jonathan Bingham: US representative from New York; former US representative to the UN Economic and Social Council.

Landrum R. Bolling: president, Lilly Endowment; former president, Earlham College.

Harlan Cleveland: director, Aspen Program in International Affairs, Aspen Institute for Humanistic Studies; former assistant secretary of state and ambassador to NATO.

Edward J. Derwinski: US representative from Illinois.

C. Clyde Ferguson, Jr.: professor of law, Harvard University; former ambassador to Uganda and US representative to the UN Economic and Social Council.

George S. Franklin, Jr.: secretary, The Trilateral Commission; former executive director, Council on Foreign Relations.

Richard N. Gardner: Henry L. Moses Professor of Law and International Organizations, Columbia University; former deputy assistant secretary of state.

James F. Green: executive director, Commission to Study the Organization of Peace; former executive director, President's Commission for the Observance of Human Rights Year.

Rita Hauser: attorney; former US representative to the UN Commission on Human Rights.

J. Allan Hovey, Jr.: president, Allan Hovey Associates, Inc.; former vice-president, Radio Free Europe.

Elmore Jackson: consultant to The Rockefeller Foundation; former special assistant to the assistant secretary of state for international affairs.

David Kay: director of International Organizations Research Project, American Society of International Law; former professor of political science, University of Wisconsin.

James F. Leonard: president, UN Association of the United States; former assistant director, Arms Control and Disarmament Agency.

Mary P. Lord: former US delegate to the UN; former US representative to the UN Human Rights Commission.

James S. McDonnell: chairman, McDonnell-Douglas Corporation.

Gerard Mangone: professor of international law, Center for Study of Marine Policy, University of Delaware; consultant to the Department of State.

David Morse: lawyer; former assistant secretary of labor; former US director general, International Labor Organization.

Samuel De Palma: director, International Analysis Unit, ITT; former assistant secretary of state and assistant director, Arms Control and Disarmament Agency.

Richard F. Pederson: senior vice-president, United States Trust Co. of New York; former counselor of the Department of State and ambassador to Hungary.

Nathan Pelcovits: research associate, School of Advanced International Studies, Johns Hopkins University; former US foreign service officer.

Christopher H. Phillips: president, National Council for US/China Trade; former ambassador and US representative to the UN Security Council.

Jean S. Picker: vice-president, United Nations Association of the United States; former US delegate to the UN General Assembly.

James M. Read: vice-president, Charles F. Kettering Foundation; former president, Wilmington College, and UN deputy high commissioner for refugees.

Joseph Segel: chairman, Presidential Airways; former chairman, UN Association of the United States, and US delegate to the UN General Assembly.

Ralph I. Straus: government consultant.

Franklin H. Williams: president, Phelps Stokes Fund; former ambassador to Ghana.

EX OFFICIO MEMBERS

Theodore C. Achilles: vice-chairman, Atlantic Council; former counselor of the Department of State and ambassador to Peru.

Joseph W. Harned: deputy director general of the Atlantic Council; US representative of the Atlantic Institute for International Affairs, Paris.

John D. Hickerson: director, Atlantic Council; former assistant secretary of state and ambassador to Finland and the Philippines.

Francis O. Wilcox: director general, Atlantic Council; former assistant secretary of state; former chief of staff of the Senate Foreign Relations Committee; former dean of Johns Hopkins School of Advanced International Studies.

This distinguished group concluded that the U.N. "with all its weaknesses, is presently irreplaceable" and recommended a "pragmatic and pluralistic" approach to strengthening that organization avoiding dogmatic or extreme or simplistic solutions.

I strongly commend the group's entire report to the attention of my colleagues and others who believe in the concept of international organization rather than international anarchy. Copies can be obtained from the Atlantic Council at 1616 H Street NW., Washington, D.C. 20006 or through my office.

The summary and conclusions of the report read as follows:

SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS

The UN system—particularly the General Assembly, Security Council, and certain of the specialized agencies—has been increasingly dominated by the Third World's drive for greater economic, social and technological equality. In the same historic period the great powers have downgraded the United Nations as an instrument for negotiating important disputes, choosing more and more

to act unilaterally, often in disregard of UN Charter obligations. Compounding the negative picture is the spread of the Middle East conflict across the UN system, poisoning the atmosphere for constructive action in the major political organs and politicizing several professionally oriented specialized agencies, seriously hampering their important work.

As a result, public support in the United States for the work of the United Nations has declined sharply, raising questions about the certainty of sustained financial contributions in the event of new confidence-eroding crises such as that triggered by the 1975 General Assembly resolution equating Zionism with racism. Failing a lasting Middle East peace settlement, additional crises of confidence can be anticipated. Even with a Middle East settlement, the grievances of the large majority of less developed countries, combined with their continued focus on racism in southern Africa, ensure that the UN system of agencies will keep high on its agenda the contentious economic, social, and technical issues raised by the majority within the rubric of "a new international economic order."

The multiple political disputes already in existence, plus new ones likely to arise out of problems of food and energy availabilities, ocean resource allocation, and other dynamic interdependent sectors of the changing world environment require adequate machinery for settling disputes and managing change without war.

We believe that U.S. interests, and indeed those of many other nations, clearly require that a global system of reasonably effective international organizations be in place to deal with the important issues arising from these three areas: "have" versus "have-not" nations; undiminished international disputes threatening world peace; and management of the complex network of economic interdependencies.

In our view, U.S. interests call today for a twofold strategy. First, we should work with other like-minded nations toward the implementation of badly needed international action programs essential to American welfare and the welfare of others. The approach we recommend is pragmatic and pluralistic, with the main emphasis on getting the job done, rather than dogmatically working within any particular institutional framework. Second, in order to restore the essential confidence of the United States, which must undergird the UN system if it is to have any real effectiveness, the United States should adopt as a working goal certain procedural improvements aimed at minimizing formal voting arrangements and irritating, wasteful propaganda and posturing at the expense of problem solving.

We are convinced of the urgent necessity, today as never before, of multilateral instruments of discussion, bargaining, and action across an unprecedentedly wide spectrum of issue areas. The United Nations, with all its weaknesses, is presently irreplaceable. U.S. national interests require that we continue to play a full and constructive part, not hesitating, however, to urge far-reaching reforms when that seems indicated—or to improve our own imperfect record of fidelity to the institutional arrangements and ground rules we had such a large part in establishing.

In part because others have competently examined the economic and social agencies and functions of the UN system, and in part because the crisis of confidence of the United States in recent times arose from actions—or failures to act—in the political and security organs, we have concentrated our attention primarily on the latter area.

One of our chief recommendations is that, in its global diplomacy, the United States should henceforth draw together much more closely with other like-minded states, first of all its main allies, friends, and trading partners in North America, Europe, and Asia. In this spirit, we plan to discuss the specific recommendations that follow in an open-minded way with others who share the same concern. Only then should these proposals be considered final, and appropriate for official action.

We recommend following a pluralistic strategy toward the UN system, in a spirit we call "the new pragmatism," with primary consideration given to effective action.

We see a continuing need for a wide range of types and levels of international agencies to meet present and future requirements growing out of global interdependence. The UN system, as a central organization with almost universal membership, can and should perform the bulk of the inescapably global functions along the lines of its past useful initiatives regarding food, population, drugs, disaster relief, outer space, peacekeeping and dispute settlement, arms control, and law of the sea.

Where the primary aim is to air grievances and exchange views, or to design and launch needful initiatives and programs at the global level, the General Assembly is the appropriate forum (as are the Economic and Social Council and Security Council for relevant matters).

But where concrete action on economic, financial, or technical policy is required, smaller bodies can often be more effective. Such smaller groupings can exist inside or outside the United Nations. In many cases, peripheral organizations with partial membership based on regional location or on functional necessity should take on more substantial portions of the international agenda.

The goal is to have in place a range of greater-than-national "regimes" which institutionalize agreed ground rules for a wide spectrum of human affairs that cannot be effectively dealt with by any nation or pair of nations—or perhaps even by presently constituted international machinery and procedures. Fixed doctrine about "working within the UN system" (or "avoiding the UN") should not stand in the way of practical movement toward solutions for difficult problems. But neither should ad hoc activity furnish additional excuses to make an empty shell of the UN.

We recommend a continuing consideration of the division of labor between existing global and regional organizations. Efforts should be made to strengthen regional agencies where that is feasible.

We believe there should be a new presumption in U.S. policy that the outcomes of most local conflicts will, in the long run, be more consistent with basic U.S. interests if recourse is made to the Security Council rather than if attempts are made to act unilaterally.

We recommend adding some middle powers to the Security Council as "associate permanent members" without a veto, e.g., West Germany, Japan, and India, and possibly Brazil and Nigeria. If this idea is rejected, such states should be, at a minimum, frequently reelected to the council.

The United States and its allies should sustain to the full the authority and capacity of the United Nations to interpose neutral peacekeeping forces between fighting parties whose actions menace international peace and security.

We strongly urge new commitment by the U.S. government, in concert with a coalition of like-minded states of all persuasions and levels of development, to reactivate the machinery for peaceful settlement of disputes, which today languishes essentially unused. This machinery includes negotiation, inquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of the parties' own choice.

In its own acts, before considering unilateral intervention for whatever reason, the United States should without exception consult with its friends and allies. We believe that the multilateral route often proves in retrospect to have been less costly than the unilateral route, and deserves more serious consideration than it has had.

In our view the most effective U.S. posture would be that of international champion of the principle of nonintervention; except as intervention is used by the United Nations for legitimate peacekeeping or humanitarian reasons.

U.S. interests are well served by a strong, independent-minded secretary general. We recommend that the secreary general be encouraged to use to the full his agreed authority in international diplomacy—a capability which time has proven to be highly valuable to the maintenance of peace and security. To enhance his independence, he should be limited, in the future, to a single five-year term of office.

High priority should now be given to planning and developing necessary international structures and frameworks for international steering and management of common problems in the realms of trade, commodity pricing and stocks, fair sharing and pricing of nonrenewable resources, monetary management, development and population control, energy sources, food, pollution, conventional arms trade, conflict prevention, peacekeeping, the seas and seabed, and outer space.

While painfully aware of the General Assembly's many defects, in the final analysis we believe that the United States should continue to value the existence of a world forum in which the views of all nations can be freely expressed. The United States should use the assembly more actively—and sometimes more vigorously—to explain its positions, refute unfair allegations, and seek support on important programs.

In the face of proposals by the assembly that are patently illegal, outrageous, or destructive of compromise solutions, the United States should consider a range of forms of selective participation in the work of the organization. Normally the United States should be present to argue vigorously for its positions and, where voting takes place, to muster support. But when assembly procedures are flagrantly abused, the United States should seriously consider the possibility of refraining from voting and asking to be recorded as "refusing to participate."

In the face of extremely tendentious or calumnious resolutions, when it has good reason to believe that its voice will be totally disregarded, the United States should feel free to absent itself from the debate entirely. In such cases a clear public statement should be made of the reasons for the action. Of course, the action in such exceptional circumstances will have far greater impact if the United States can persuade its friends and allies to join it.

We recommend much greater use of the consensus process in such debating bodies, instead of formal votes for recording the sentiment of countries. In this connection, the United States should work with other members to try to deemphasize the voting process as an invariable way of making international decisions. In the process of setting up new organizations and agencies where concrete and binding action, as well as debate, is to occur, the governing principle, if possible, should be one of representational and voting arrangements that take into account the relative power and capacity of the states without whose cooperation decisions are meaningless.

Where decision making is realistically

weighted the United States and others who share its aspirations for a more effective multilateral system should announce their readiness to give substantial weight to certain resolutions passed by multilateral assemblies—including the UN General Assembly.

If a given body or agency of the United Nations becomes paralyzed or ineffective, we recommend an alternate temporary path within the agency to make a fresh start toward action. This could take the form of "coalitions of the willing," temporary and shifting groupings of states, first of all within the United Nations, who would agree among themselves to act in relation to one another at a higher standard of international behavior than the commonly accepted level.

We recommend major diplomatic efforts to try to make all the specialized agencies of the United Nations work effectively; we also recommend strengthened U.S. participation, including a substantial improvement in the contributory record of the world's richest nation.

The United States should vigorously promote the objective of depoliticization of the UN specialized agencies, first through intensified collaboration with other states who share this concern. Within certain agencies that cannot be so insulated—so they can carry out more effectively the important technical and other tasks assigned to them in their respective charters—the constructively inclined states might constitute a temporary action "coalition" of the like-minded within the organization, to carry out some of the agencies' frustrated purposes by agreeing to take common action which the majority may temporarily not be willing to pursue or adopt.

We also recommend—

A major effort to better coordinate the existing planning centers of such agencies as the World Bank and the UN Conference on Trade and Development (UNCTAD), as an interim step toward improving global planning.

The development of more effective arrangements in the United Nations to capitalize on the potential of the relationship between the United Nations and the nongovernmental organizations;

Repeal of the Connally Amendment—which unduly restricts the jurisdiction of the World Court—without further delay;

Various efforts to strengthen and improve the decisionmaking process in our own government so that the United States can participate more effectively in multilateral diplomacy;

Upgrading radically the level and intensity of consultation on UN matters between the United States and this country's chief trading and security partners, as well as with the constructively inclined less developed countries;

A major statement by the president of the United States of a revised and strengthened U.S. policy toward the United Nations at the opening of the Thirty-Second UN General Assembly in September 1977.

HEARINGS ON INTERPOL AUTHORIZATION (H.R. 4641)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

Mr. EILBERG. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Citizenship, and International Law has scheduled one day of public hearings on Wednesday, March 30, 1977, to consider a bill, H.R. 4641, designed to remove the limitation on dues for U.S. membership in the International Criminal Police Organization—Interpol. The hearing will be held in room 2226 and will commence at 10 a.m.

Testimony will be received from governmental witnesses who will discuss the functions and activities of Interpol as well as the advantages and/or disadvantages of U.S. participation in that organization.

A recent GAO report criticized some of the operational procedures followed by the U.S. National Central Bureau, our working representative to Interpol. During the hearing the subcommittee will review the various findings and recommendations contained in that GAO report which was issued December 27, 1976, in an effort to determine whether this country should continue to participate as a member of Interpol.

PROCUREMENT LEGISLATION TO PROVIDE FOR EQUITABLE COMPENSATION OF PROFESSIONAL EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FUQUA) is recognized for 10 minutes.

Mr. FUQUA. Mr. Speaker, on behalf of myself and Congressman LOUIS FREY of the Ninth District of Florida, I have introduced H.R. 4873, a bill to provide for fair and equitable compensation of professional employees in the performance of technical support services contracts.

This bill amends titles 10 and 40 of the United States Code, to rectify in the Federal procurement laws governing competitive negotiation procedures, what has been referred to as "wage busting" of professional employees working under technical support services contracts. The problem, which affects engineers to a larger extent than other professionals, arises primarily from the fact that technical support services contracts are awarded on a short-term basis under a competitive negotiation system followed by periodic recompetition. In order for a competing contractor to offer a lower price proposal during the recompetition period the most pragmatic approach has been for the competing contractor to pay lower salaries to the employees required for the technical services involved. The result is obvious. A number of engineers, and some other professionals, working under these contracts, are paid significantly lower salaries for the same work and level of responsibility than they received under the predecessor contract. This is a serious problem of immediate concern in several areas of the country, especially Cape Canaveral, Fla., and Huntsville, Ala.

It is important to recognize that while this procurement problem places the most hardship on engineers, it is also true that it has had to some extent detrimental consequences to the Government in terms of lesser qualified professionals of all kinds being available for the important services they must render for adequate performance of the Government's needs. Everyone we have talked with agrees that this problem must be solved, and I particularly want to emphasize that the service contract industry groups are as anxious as the engineering community to eliminate the procurement procedures which invite this problem.

Congressman FREY and I have met with engineers and their representatives in an attempt to develop a legislative solution to the problem, and we believe H.R. 4873 to be a workable solution that can be supported by the technical service industry and their professional employees. A main objective in developing a bill—and a difficult one to achieve—was to avoid creating a Government bureaucracy or a host of other long-term problems just to eliminate this problem. We did not want a cure worse than the disease. The present problem clearly is rooted in the bidding procedures under the Federal procurement laws, and we believe that the most logical and expeditious solution is to amend those laws in as straightforward a manner as possible. Our bill, for instance, prevents support services contractors from engaging in bidding practices that result in lower salaries for the professional than previously paid by the predecessor contractors but would not involve the U.S. Department of Labor in salary determinations for professional employees. Government-established salaries for professionals by the Department of Labor or any other body are not the only answer to this problem; indeed, such an approach could be an unhealthy precedent, because it could destroy the recognized system under which professional employees are compensated for individual merit and contribution. It could also stifle professional creativity and performance.

There is a long body of precedent in other Federal laws which recognizes that professional employees should not be included under labor standards laws in which the Government dictates minimum wages and other compensation benefits. These laws recognize the necessity that professional employees have flexibility in performing their services. Thus, professional employees are not covered by the minimum wage determinations under the Davis-Bacon Act for construction workers or the Walsh-Healey Act for production employees. They are likewise exempt from the Fair Labor Standards Act requirements of minimum wages and overtime payments after a specified number of hours of work per week. Our bill preserves this recognition of the longstanding exemption of professional employees from rigid employment classifications and standardized salaries. In short, it preserves the essential merit system applicable to professional employees.

Instead of authorizing an executive agency, or any other body, to set professional salary ranges, it seemed to make good sense to us for the procuring agency to determine whether the salaries proposed for professional employees by competing contractors are consistent with appropriate levels of professional responsibility and achievement. H.R. 4873 gives

the head of the procuring agency the responsibility to review salary levels to insure that they reflect the abilities, professional status, responsibilities, and value of the education and experience of the employee. As a part of this review, the agency head must take into account published salary surveys and studies of public and private organizations. So there will be no misunderstanding, we intend to give the agency head clear and specific authority to award contracts only if he determines, using the specified criteria, that the salary levels for professional employees are equitable and commensurate with their individual position classifications and level of professional performance as proposed by the contractor. This approach preserves the merit system and flexibility on the part of Government and industry.

Finally, I should add that to eliminate concern that a solution to this problem would have a broader than necessary impact, we have included in the bill a definition of "technical support services contracts." A specific objective with this bill is to avoid misinterpretation of its impact and not to legislate in those nontechnical support services areas.

In the next few weeks, I will be writing each of my colleagues to solicit their cosponsorship of H.R. 4873. For clarification, I should add that the repetition of specific language in the bill and the dual referral—to the Government Operations Committee and the Armed Services Committee—was necessary because the military operates under procurement laws separate from the civilian agencies.

Both Congressman FREY and I are confident that early passage of our amendments to the Federal procurement law will establish fair and equitable compensation for professional employees in the performance of technical support services contracts.

TESTIMONY ON LUKFATA DAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. WATKINS) is recognized for 10 minutes.

Mr. WATKINS. Mr. Speaker, today I presented testimony at a hearing conducted by the U.S. Army Corps of Engineers on Lukfata Dam, a project on the Glover Creek in McCurtain County, Okla., which was authorized by Congress many years ago. Although planning for the dam is virtually complete and the Corps of Engineers was ready to move forward on construction of the dam in the near future, this vital project has ground to a virtual halt, because President Carter has directed a special task force to review Lukfata Dam, along with 29 other Federal water projects. Today's hearing was necessitated, because of that recent Presidential decree.

At the same time my testimony was being presented in Broken Bow, Okla., this mornong, God was presenting testimony of his own on the need for a dam on Glover River. Not 5 miles from the site of the hearing, Glover River was roaring out of its banks at more than 5 feet above flood stage, once again wreaking thousands of dollars of damage and destruction to crops, livestock, valuable farm land, and personal property, and threatening lives.

Although today's flood was bitter irony, it is not an unusual circumstance in McCurtain County. According to data compiled by the Corps of Engineers, the Glover River floods an average of more than three times a year, causing $963,000 damage annually. The Corps estimates that if the largest flood of record, which occurred in December 1971, were to be repeated, it would incur about $4 million damage at today's prices.

The text of my testimony presented at today's hearing follows:

STATEMENT OF CONGRESSMAN WES WATKINS, 3D DISTRICT, OKLAHOMA

As a long-time resident of Southeastern Oklahoma, I formerly lived in McCurtain county and spent many days of my younger years in the Broken Bow area. Consequently, I have had first-hand knowledge of most of the flow characteristics of the Glover River.

On many occasions the Glover River did not flow for weeks, and what little water was there was stagnate. On the other hand, after a sizable rain I have witnessed torrents of water flowing wildly down this stream, rushing over the banks and destroying valuable farm land, livestock, farm buildings and homes, and threatening human life. This unpredictable river has cost the economy of this area thousands of dollars in personal property, homes, livestock and agricultural holdings.

For these personal, and not political reasons, I believe a dam should be built on Glover River. However, others who have not been personally affected by this dangerous and unpredictable river have questioned such construction. Their viewpoint was based on three main criteria: safety of the dam construction, the cost-benefit ratio of the project, and environmental considerations.

In the re-evaluation of this vital project ordered by President Carter, Lukfata Dam has proved feasible and viable from the safety and cost-benefit standpoints, along with meeting the requirements of three environmental areas defined by the President's Review Task Force.

Only one environmental area remains to be resolved. The Task Force has broken down that area into four categories of possible environmental impact: upland wildlife habitat, wetlands, fisheries and a species of fish identified as Percina pnatherina, or leopard darter. Each of these four categories should be addressed separately.

EFFECT ON UPLAND WILDLIFE HABITAT

The Presidential Task Force reviewing the Lukfata project has stated in its initial review that the dam would impact 5,200 acres of upland wildlife habitat. Upon closer observation, however, it is learned that approximately 88 percent of the land in question is forest land which will likely be cleared by the timber industry. Therefore, the upland wildlife habitat of the area in question would be affected even if Lukfata Dam were not built. However, the U.S. Army Corps of Engineers' construction plans for Lukfata Lake call for acquiring, by fee purchase, 15,150 acres of land, plus an additional 1,500 acres in scenic easement land. Additionally, the Corps of Engineers has proposed acquisition of an additional 4,100 acres of land for future enlargement of the conservation pool. Acquisition of the required land, plus the land proposed for future enlargement, totals 20,750 acres. Of this total, only 1,680 acres, or only 8.1 percent, would be inundated. This is less than 1.8 percent of the forest land of McCurtain County. The remaining 91.9 percent would be subject to the forestry practices that would also affect wildlife habitat. In fact, the wildlife habitat in this uninundated area would actually be enhanced, because the Corps of Engineers has indicated its intention to initiate wildlife management practices.

Therefore, it can only be concluded that, if the Corps acquires the full 20,750 acres, wildlife habitat would actually be preserved and enhanced on 19,070 acres. In fact, the Corps of Engineers concluded in its Final Environmental Impact Statement on the project:

"Some fish and wildlife losses will occur as a result of the project. However, other fish and wildlife values will be gained and some even enhanced. If present land use trends continue into the future at the rate at which they are now occurring, this proposal would in fact preserve many of the remaining fish and wildlife values of the area."

Further, the wildlife habitat to be affected by the project must be put into perspective by consideration of the entire habitat in the McCurtain County area.

The Presidential Task Force specifically cited quail as one of the animals to be affected by the project. Again referring to my first-hand experiences in this area, I have hunted in the McCurtain County area, and I know that the quail habitat to be affected by this project is only a minute portion of the natural habitat in McCurtain County. Similar statements can be made of the other wildlife to be affected. Because environmental considerations are rightly an emotional issue, we often jump to improper conclusions without putting the actual overall impact in proper perspective.

EFFECT ON WETLANDS

The Presidential Task Force, in its initial review of the project, found that Lukfata Lake would affect 940 acres of wetlands. This issue also must be placed in perspective. The Little River system includes thousands of acres of wetlands. The Lukfata project would affect only a minimal portion of the total wetlands in this river basin.

But the issue must be defined even further. Of the 940 acres of wetlands identified in the initial review, only 340 would actually be inundated by Lukfata Lake.

The Task Force's initial review also referred to the effect of the loss of wetlands on waterfowl. Although I have not yet had an opportunity to personally inspect the Task Force report, the logic of this conclusion escapes me. Hunters of this area feel that Lukfata Lake would actually enhance waterfowl's habitat. As mentioned earlier, Glover River is a highly unpredictable and vastly-fluctuating channel, ranging from a dried-up stream at one period to a raging torrent at other times. Construction of Lukfata Lake would stabilize this body of water. It would appear that the proposed lake would actually enhance the habitat for waterfowl, especially ducks.

EFFECT ON FISHERIES

The Task Force concluded in its initial review that the project would affect fisheries which support the smallmouth bass. It concluded that the area of impoundment would not support smallmouth bass.

At the expense of being accused of belaboring a point, I think this issue must also be placed in perspective. Occurrence of smallmouth bass is widespread throughout McCurtain County and Southeastern Oklahoma. If one accepts the Task Force's conclusion that the lake would not support smallmouth bass, it must still be pointed out that the area of Glover River, both above and below the lake impoundment, would continue to support this fish. The area that would actually be affected includes only 8 miles of the river at normal lake operations and a maximum of 15 miles of the river during full flood-control operations during the

historic 100-year flood conditions. Once again, we're talking about only a minimal portion of the habitat of this rather abundant fish.

Further, one must consider the trade-off that the project would create for sport fishermen. Lukfata Lake would actually increase the occurrence of largemouth bass, white crappie and channel catfish.

However, I do not concur with the Task Force's conclusion that Lakfata Lake would not support smallmouth bass. Nor does the Corps of Engineers, which reported in its Final Environmental Impact Statement:

"Three well-known ichthyologists were asked to independently make predictions. All three agree that the smallmouth bass probably will maintain populations in the lake and in the creek upstream and downstream of the lake if populations currently exist in these areas. Based on that and other available data Tulsa District believes the lake will produce a small mouth bass fishery."

Further, the State of Texas has been successful in stocking smallmouth bass in lakes which subsequently supported the fish. Similar experiments are underway in Arkansas, and all evidence indicates that the smallmouth bass can and does live in such lakes and can continue to propagate in this environment.

EFFECT ON THE LEOPARD DARTER

Finally, we come to the issue of the leopard darter, an elusive and mysterious minnow-like fish whose beneficial ecological aspects, if any, are difficult, if not impossible, to determine.

The Corps of Engineers concluded in its Final Environmental Impact Statement that existing, under-construction and authorized impoundments in this river system will only affect 8 to 12 percent of this fish's habitat. Obviously, the sum total of all the project will not threaten the extinction of the leopard darter.

The Task Force has concluded that the leopard darter could not exist within a lake impoundment or immediately below the dam. Based on some findings by the Corps of Engineers I must respectfully disagree. The Corps' Final Environmental Impact Statement reported in Paragraph 4.23 of Page 4–18 that more recent investigations have found populations of leopard darter *within the floodpool* of Broken Bow Lake and *below* Gillham Lake on the Cassatot River. The Corps of Engineers in its Final Environmental Impact Statement stated:

"... Recent collecting in Arkansas and Oklahoma has revealed a much wider distribution of P. pantherina in the Little River system than was previously known ... The Tulsa District does not concur that the species is endangered based on field studies ... Based on the data obtained by the Tulsa District, this proposal (to list leopard darter as an endangered species) appears unfounded and should not be carried further unless the proposal can be substantiated."

In addition to the leopard darter issue, any review of the Lukfata project should also address the beneficial effects the project would have on the habitat of two animals already on the endangered species list. I am refering to the red cockaded woodpecker and the Southern bald eagle, both of which populate the area.

The Corps of Engineers determined that the Lukfata project could actually enhance the environment of these two endangered species. I would go one step further and assert that the project would enhance the habitat of these two fowl. The construction of Lukfata Dam could insure the preservation and enhancement of 19,070 acres of habitat for the red cockaded woodpecker and the Southern bald eagle. In addition, eagles feed on fish, and the Corps of Engineers has determined that Lukfata Lake would increase the fish population provided by the lake and the stabilization of stream flows by construction of the dam would actually spread a bigger table for this endangered species.

CONCLUSION

The Presidential Task Force has reviewed at least 340 federal water projects in a period of a few brief weeks, and concluded that questions threatening the construction of 30 projects, including Lukfata Dam, remain unresolved at this point. I would remind both the Task Force and the President that the Corps of Engineers has studied the Lukfata project inside-out through intensive investigations over the past 10 years. As pointed out in my testimony this morning, I believe the Corps has already addressed all the questions outlined by the Task Force and has already satisfactorily resolved them.

In conclusion, there is no question in my mind concerning even the single remaining environmental consideration which was raised by the Task Force. All of us involved in this project realize that there is not an environmental equation or formula that will justify not buildnig the Lukfata Dam.

In the final analysis, the decision concerning the construction of the Lukfata Dam will have to be a "judgment decision." I hope that my judgment and the judgment of thousands of citizens who for many years have experienced the unpredictability and destruction of this river will be weighed and fully considered.

IN THE INTEREST OF NEW HOUSING LET US PUT AN END TO RENT CONTROL IN NEW YORK CITY, BUFFALO, AND OTHER CITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

Mr. KEMP. Mr. Speaker, the New York State Legislature is presently debating an extension of rent control in New York for yet another year. I think it is time that we ended this counterproductive farce—which has gone on annually since the end of World War II—and abandon these absurd controls once and for all in the interest of consumers.

Rent control began as part of the overall Federal price regulations during World War II. By the 1960's, these controls had been abandoned virtually everywhere except New York State, where they are primarily confined to New York City, though 105 other cities including Buffalo also have such controls to greater and lesser degrees. In New York City rent control now covers about 525,000 apartments. In addition, a newer program of rent stabilization, enacted in 1969, covers another 750,000 apartments.

Now, as in the past, the crux of the rent control debate has centered on such things as fair rent and the increased cost of heating and maintenance. Neither of these concepts come close to the fundamental issue, which is simply the artificial interference with normal supply and demand. The results are precisely what would be predicted under the circumstances. Interestingly, even a doctrinaire Socialist like Swedish Economist Assar Lindbeck has recognized the consequences of interfering with the market mechanism. As he wrote in "The Political Economy of the New Left":

Maybe the most effective way to teach the noneconomist about the issue of allocation and the functioning of the market system is to describe the problems which occur when markets have been more or less removed from the mechanism of allocation, such as, for example, when rigid price controls have been introduced. The general experience of rent control in various countries is, I believe, instructive. The effects of rent control have in fact been exactly what can be predicted from the simplest type of supply-and-demand analysis—"housing shortage" (excess demand for housing), black markets, privileges for those who happen to have a contract for a rent-controlled apartment, nepotism in the distribution of the available apartments, difficulties in getting apartments for families with children, and, in many places, deterioration of the housing stock. In fact, next to bombing, rent control seems to be the most efficient technique so far known for destroying cities, as the housing situation in New York City demonstrates.

Perhaps even more interesting is the recent admission by Mayor Beame of New York that rent control has in fact contributed to a decline in real estate values, though he continues to support rent control nevertheless—see the New York Times, February 17, 1977. Thus it is not surprising that New York City's property tax base dropped by $829 million in 1976 and is expected to drop by another $400 million this year. And, of course, these are very conservative estimates based only on assessed value, rather than true property value—see the New York Times, February 8, 1977.

Likewise, it is clear that rent control is responsible for a vast amount of abandonment and brought about a virtual halt to any apartment construction in New York City. For example, in 1975 exactly 3,810 dwelling units—only a handful privately financed—were started in New York City—down 75 percent from only the year before. Over the same period, between 35,000 and 50,000 units were abandoned or destroyed. Assuming a conservative replacement cost of $50,000 a unit, this represents a loss to the city of some $2 billion in capital investment annually.

Thus it is clear that rent control has had severe adverse effects. If the goal is to provide adequate housing at moderate cost, how can this be accomplished when there is virtually no new housing being built, when landlords are unable to get enough rent to even cover their costs, thus leading to abandonment and a deteriorating in the quality of existing housing?

It is, of course, true that if rent controls were immediately removed there would be a huge increase in rents. But this is only because they have been kept artificially low for so many years. As a result, landlords are forced to bear the burden of criticism for policies which they are not responsible for. Had rents not been controlled, any increases that would have taken place would have been spaced out gradually over many years and would have been kept down by the increased supply of housing which would have come into existence under normal circumstances.

The real tragedy of rent control—as it is with all price controls—I think may not even be in the economic hardship it causes for so many people, but rather in the deterioration of morality which results when classes of people are pitted against each other. Landlords blame tenants and tenants blame landlords for the deteriorating situation and politicians simply count up the votes and determine that tenants outnumber landlords. That is why the controls have remained in effect.

Perhaps it is a waste of time to continue to point out the adverse effects of price controls. The simplest commonsense ought to be enough for anyone to be able to see how they will work to produce results which are virtually the opposite of those promised. As the great economist Frank H. Knight once observed:

> If educated people can't or won't see that fixing a price below the market level inevitably creates a "shortage" (and one above it a "surplus") it is hard to believe in the usefulness of telling them anything whatever, in this field of discourse.

Mr. Speaker, Senator MOYNIHAN, of New York, has called for a study of rent controls, I agree totally because I am convinced that any dispassionate study of the results will prove them to be counterproductive and do nothing but cause shortages of housing.

THE ASSASSINATIONS COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House the gentlewoman from California (Mrs. BURKE) is recognized for 5 minutes.

Mrs. BURKE of California. Mr. Speaker, I am asking for this special order in view of the statements which have been made by the Honorable HENRY GONZALEZ, the gentleman from Texas, because he has raised a few issues which I believe, in all honesty, should be clarified.

First, I would like to explain why the resolution adopted on September 17, 1976, by the House establishing the Select Committee on Assassinations came before the House in the manner that it did. Following a series of meetings with the leadership of the House and with a number of the Members of the Congressional Black Caucus, and on one occasion with Mrs. Coretta King, a request was made that the House consider a resolution to investigate the assassination of Dr. Martin Luther King.

After a number of meetings and discussions, it was decided that an attempt would be made to revive the resolutions which had been voted on in the Rules Committee some months before on the subject of an investigation of the assassination of President Kennedy. Therefore, the reason for the impromptu consideration of the resolution by the House late in the session was due to the unusual information that was brought to the attention of the House not only by the Black Caucus, but by some of those associated previously with Dr. King.

Also, I would like to clarify how the chief counsel for the committee was selected. After the resolution was adopted and the Select Committee on Assassinations was established, in the early meetings of the committee each member was asked to make suggestions of possible candidates for the position of chief counsel for the committee. A number of names were suggested; in fact, Stewart Udall was one of those names. There was great concern that there might be appointed as counsel someone who had been publicly projected as an advocate for a reinvestigation of either the Kennedy or the King assassination. We did not want to give the impression that we were going to have a chief counsel who had already made up his mind and who was, in fact, an advocate of one theory or another.

So, the committee discussed this matter in great detail. Many names were submitted. One individual's name was submitted by at least three members of the committee. That was the name of Richard Sprague. In view of the fact that his name had been submitted by three members, it was suggested that the chairman, Mr. Downing, meet with Mr. Sprague to determine whether, in fact, he might be interested in serving as temporary counsel. We then authorized Chairman Downing to tentatively appoint the staff he felt necessary, subject to the selections being confirmed by the full committee at a later time. And this, in fact, happened. The chairman appointed temporary counsel and other staff. Then, we met later and affirmed the staff that he had submitted.

Now, many of the charges which were made today by Congressman GONZALEZ have come to the attention of the committee. The committee discussed these matters with Mr. Sprague in closed session, and specifically questioned him on the various charges. A transcript of Mr. Sprague's answers to many of the allegations—or perhaps I should say to all of the allegations—that were presented to the House today is available to any Member who would like to see it, and, at the pleasure of the House, it can be introduced into the RECORD.

I would like to at least address a couple of issues that have been raised. One is the matter of long distance phone calls. Mr. Sprague has repaid to the House $114, the amount that was determined to be personal and business and all phone calls made by him that were charged to the committee.

Another question relates to outside work as an attorney by anyone who was on the staff of the committee. It is true the rules of this House require that all staff of standing committees have no outside earnings or employment. However, this does not apply to select committee staff.

In addition, we realized that the former chairman, Mr. Downing, reached an understanding or agreement with Mr. Sprague when he was hired which suggested that he could continue serving as a professor of law in Philadelphia and in fact continue with his law practice.

I would like to also address the question of salary. We have been informed by the Committee on House Administration that all vouchers are in order and that the committee is operating within the budget as established by the 90-day resolution.

It is true that in order to achieve the compliance with that resolution, the members of the staff have taken a cut of 40 percent. But the decision was made by those staff members that they would rather take a cut rather than see some of the members of the staff fired, many of whom had given up their employment to come to Washington under the belief that this committee had been established by the House. Some of them had uprooted their families to come here. The committee determined that it would be unfair to terminate them, and that we should at least grant their option of taking a large cut during this 90-day period.

All of these matters which have been raised which relate to private matters between Mr. Sprague and the gentleman from Texas (Mr. GONZALEZ) I cannot address. But what I have attempted to do is at least enlighten the House concerning those matters which did take place in the presence of the committee.

This committee is very dedicated. We were present at the Committee on Rules when the resolution was adopted by that committee which established the Select Committee on Assassinations for the first time and also for the 90-day period from January 4 to March 31. I know I testified before the Committee on Rules, as did the Delegate from the District of Columbia (Mr. FAUNTROY), the gentleman from North Carolina (Mr. PREYER), and many other members of that committee. The gentleman from Ohio (Mr. DEVINE) testified. We sat there at the Committee on Rules with the chairman, the gentleman from Texas (Mr. GONZALEZ), during the entire deliberations.

I regret that the gentleman does not feel he had our support, because he did, in fact, have our support. We made that very clear to the Committee on Rules, the press, and all concerned.

THE CONGRESSIONAL BUDGET FOR FISCAL YEAR 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. GIAIMO) is recognized for 10 minutes.

Mr. GIAIMO. Mr. Speaker, on behalf of the Committee on the Budget, and as called for by the Congressional Budget Act, I am reporting to the House on the status of the fiscal year 1977 congressional budget under the third budget resolution.

Since my last report to the House on March 3, 1977, the current level for budget authority and outlays has changed due to three actions by the Congress—House Resolutions 305–307, ERDA deferrals; House Joint Resolution 269, the supplemental appropriation for disaster relief; and H.R. 3839, second budget rescission bill for shipbuilding. There have also been reestimates of budget authority or outlays in five areas of the budget made as a result of President Carter's February 22 budget revisions. The attached table summarizes these changes to the previous current level of March 2.

As the Congress moves through the budget cycle for fiscal year 1978 with consideration of the first resolution, we shall continue to monitor changes in the economy, and take appropriate steps in the areas of spending and revenue legislation. However, for fiscal year 1977, several important items remain to be enacted by the Congress, notably the economic stimulus appropriation and the general spring supplemental, which will bring the Congress closer to the spending limits set in the third budget resolution. Therefore, it must be stressed that there is little room for additional initiatives by either the President or Congress within the limits set by the third resolution.

I include the following:

CHANGES TO CURRENT LEVEL BETWEEN MAR. 2 AND 23, 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level as of Mar. 2, 1977	429,328	407,091	356,500
Changes to the current level:			
H. Res. 305, 306, and 307—Energy research and development deferrals		18	
H.J. Res. 269—Urgent supplemental appropriation for disaster relief	200	200	
H.R. 3839—2d budget rescission bill	−664	−47	
Reestimates:			
Federal Home Loan Bank Board		−379	
Investment in fund anticipation notes	−70		
Community development block grants		−137	
Unemployment insurance trust fund (technical accounting change)	−546		
Regional rail transportation protective account	25	25	
Outer Continental Shelf receipts	1,000	1,000	
Current level as of Mar. 23, 1977	429,273	407,771	356,500
3d concurrent resolution	472,900	417,450	347,700
Amount remaining	43,627	9,679	8,800

WASHINGTON, D.C.,
March 28, 1977.

Hon. THOMAS P. O'NEILL, JR.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedures which it had adopted in connection with its responsibilities under Sec. 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under Sec. 1 of S. Con. Res. 10, the Third Budget Resolution for FY 1977. This report reflects completed action on spending and revenue measures as of close of legislative business Wednesday, March 23, 1977.

Sincerely yours,

ROBERT N. GIAIMO,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1977 CONGRESSIONAL BUDGET ADOPTED IN S. CON. RES. 10

REFLECTING COMPLETED ACTION AS OF MAR. 23, 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	472,900	417,450	347,700
Current level	429,273	407,771	356,500
Amount remaining	43,627	9,679	8,800

BUDGET AUTHORITY

Any measure providing budget and entitlement authority which is not included in the current level estimate and which exceeds *$43,627* million for fiscal year 1977, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 10 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding *$9,679* million for fiscal year 1977, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 10 to be exceeded.

REVENUES

Since the current level for revenues is *$8,800* million below the appropriate level for fiscal year 1977 as set forth in S. Con. Res. 10 any measure that would result in a revenue loss for fiscal year 1977, if adopted and enacted, would be subject to Sec. 311 of the Congressional Budget and Impoundment Control Act of 1974.

WASHINGTON, D.C., *March 24, 1977.*

Hon. ROBERT N. GIAIMO,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for these items contained in the most recently agreed to concurrent resolution of the 1977 budget. The current level estimates are as of close of business March 23, 1977.

The only change from my previous report is the Urgent Supplemental Appropriation for Disaster Relief (P.L. 95–13) which is now enacted.

TABLE A

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	420,926	401,370	356,500
2. Entitlement authority and other mandatory items requiring further appropriation action	4,220	4,628	
3. Continuing resolution authority	4,791	1,820	
4. Conference agreements ratified by both Houses	−664	−47	
Current level	429,273	407,771	356,500
1. 3d concurrent resolution	472,900	417,450	347,700
Amount remaining (under appropriate level)	43,627	9,679	8,800

Sincerely,

ALICE M. RIVLIN,
Director.

PARLIAMENTARIAN STATUS REPORT SUPPORTING DETAIL FISCAL YEAR 1977, AS OF CLOSE OF BUSINESS MAR. 23, 1977

[In millions of dollars]

	Budget authority	Outlays
I. ENACTED		
Permanent appropriations and trust funds	211,161	195,232
Offsetting receipts	−55,882	−55,882
Previously enacted (94th Cong., 2d sess.)	265,488	261,796
Enacted this session:		
Urgent power supplemental (Public Law 95-3)	6	6
Energy research and development deferrals (H. Res. 305, 306, and 307)		18
Budget rescission bill, 1977 (Public Law 95-10)	−48	
Urgent supplemental appropriation for disaster relief (Public Law 95-13)	200	200
Total, enacted	420,926	401,370
II. ENTITLEMENT AUTHORITY AND OTHER MANDATORY ITEMS REQUIRING FURTHER APPROPRIATION ACTION		
Function 050: Defense agency civilian and military pay raises	1,476	1,449
Function 500: Social services	196	196
Function 550: Medicaid	947	947
Function 600:		
Special benefits disabled coal miners	48	48
Food stamps	671	473
Special benefits, Labor Department	19	19
Advances to unemployment trust fund	240	240
Offsetting receipts	−240	−240
Housing payments		208
Regional rail transportation protective account	25	25
Function 700: Veterans benefits		454
Function 800: Claims and judgments:		
Estimated requirements	127	127
Offsetting receipts (Indian claims)	−83	−83
Undistributed by function: Civilian agency pay raises	794	765
Total, entitlement authority	4,220	4,628
III. CONTINUING RESOLUTION AUTHORITY		
Labor-HEW items not considered:		
Function 500:		
Education items	2,912	552
Temporary employment assistance	1,384	1,165
Function 550: Health items	495	104
Total, continuing resolution	4,791	1,820
IV. CONFERENCE AGREEMENTS RATIFIED BY BOTH HOUSES		
2d budget rescission for fiscal year 1977 (H.R. 3839)	−664	−47
Total current level, as of Mar. 23, 1977	429,273	407,771
3d concurrent resolution	472,900	417,450
Amount remaining:		
Over ceiling		
Under ceiling	43,627	9,679

Note: Detail may not add due to rounding.

CELEBRATION OF INDEPENDENCE FOR GREECE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MIKVA) is recognized for 5 minutes.

Mr. MIKVA. Mr. Speaker, last Friday, March 25, marked the 156th year of Greek independence. On this date in 1821, the Greek people united to free themselves from 400 years of Turkish domination. The struggle for freedom and sovereignty was long and arduous, but it demonstrated the deep commitment of Greece to freedom and independence.

Americans have cause to join in celebration of Greek independence, for we are all heirs to the unparalleled contributions which Greeks have made in every sphere of human endeavor. The ancient Greeks were both innovators—originating many of the institutions which have become the basis of western civilization—and refiners, converting and altering many cultural institutions which they borrowed from the Middle East and passed on to the West.

The legacies passed on to us from ancient Greece are found in such diverse fields as architecture, drama, philosophy and politics. We are inspired daily in this city by national monuments such as the Treasury Building and the Jefferson and Lincoln Memorials whose designs bear the influence of Greek architecture. The scope of Greek influence is enormous. Dramatists like Aeschylus and

Aristophones, philosophers like Aristotle and theorists in medicine, mathematics and astronomy have affected and guided us through the ages.

But the greatest contribution for which we are indebted to the people of Greece is their creation of democracy. Not only was the first democratic form of government instituted in Greece, but Greeks have been among the most ardent champions of democracy, even under the most adverse conditions.

The American Bicentennial was a celebration of 200 years of uninterrupted freedom from foreign oppression under a democratic form of government. But our enjoyment of the rights to life, liberty and the pursuit of happiness for two centuries, must not leave us complacent in the belief that these rights are inviolable. The Greek experience since 1821 reminds us that the blessings of democracy are to be cherished and guarded. Many times since creation of the first democracy, the Greek people's dedication to democratic self-rule has been threatened and even denied. Yet, each time the spirit of the Greek prevailed and democracy was restored. But the Greek experience is a reminder to all of us in the United States about the great pressures of democracy, and the importance of remaining sensitive to those trials.

Americans and Greeks are heirs to the same past and defenders of the same principle. I would like to join with all Americans on the happy occasion of Greek independence. And, I know that my colleagues in the House will join me in offering best wishes to the people of Greece and the Greek-American community in the United States as they celebrate the 156th anniversary of their independence.

GRADUATE PROGRAM IN INTERNATIONAL MANAGEMENT

(Mr. MEEDS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MEEDS. Mr. Speaker, I have recently learned that the Georgetown University School of Business Administration is studying the establishment of a new masters in international management. As I review the proposal, it seems to me that there is a great deal of merit in it. I take this time to acquaint my colleagues with its general thrust.

GRADUATE PROGRAM IN INTERNATIONAL MANAGEMENT

In response to the worldwide environmental changes that shape international corporate management, the school of business administration is proposing a graduate program in international management designed to provide a sound educational foundation for future corporate managers. This proposal is within the philosophy and commitment of Georgetown University to meaningful education in the liberal arts and sciences as they apply to all areas of human endeavor. This philosophy and commitment require the development of new programs to provide students with the sound educational foundation they need to become better and more productive citizens of the world.

Recent changes in the international economic, technological, political, legal, and ethical forces that shape the global corporate environment provide a strong impetus for a new type of international manager; a manager who not only can recognize these forces and their impact on corporations, but can deal with these forces in day-to-day decisionmaking. The new international corporate manager will have to recognize the impact of increasing world economic interdependence on corporate operations, the growing governmental involvement in corporate affairs, and the increasing sophistication of the type of information available to international corporations.

The school of business administration is in an inherently advantageous geographic location to educate the international corporate managers who will be qualified to make the types of decisions that should result in a better and more stable international environment. The school of business administration has a diversified group of specialists on its faculty, well qualified in areas of international management. The courses offered in the functional areas of marketing, finance, management, and accounting already provide the kind of foundation that is needed on an undergraduate level to develop a successful graduate program. In cooperation with the school of foreign service and other departments on the University level, the school of business administration can assemble courses and expertise to deal successfully with specialized issues in international corporate management education.

MASTERS IN INTERNATIONAL MANAGEMENT

The masters in international management—MIM—will be a 2-year full-time graduate program of 48 credit hours offered by the school of business administration. The program has three basic components: First, course instruction of approximately 24 credit hours; second, language requirement of approximately 12 credit hours, and third, internship abroad of approximately 6 credit hours. The specific purpose of the program is to provide a sound education for future managers in international corporations. The graduate program would provide a strong conceptual, theoretical, and empirical foundation to enable the future managers to operate successfully in the dynamic arena of international management.

The overall objective of the graduate program demands that the student have a substantial understanding of the traditional functions of corporate management—including marketing, finance, and management; have the necessary conceptual and quantitative tools to allow him or her to make realistic decisions—such as economics, statistics, and decisionmaking and have a well-rounded background in the relevant areas influencing corporate operations—such as politics, history, sociology, or law.

To meet this objective, each student would be required to major in corporate management and would be required to develop a minor in areas outside of corporate management. The development of the major will be accomplished through course work, experience abroad, and a research paper; the minor would be developed through course work only. A total of 30 credit hours would be devoted to the development of the major, 6 credit hours would be devoted to the development of the minor, and 12 credit hours would be set aside for the language requirement. Experience abroad would account for 6 credit hours.

The courses for the graduate program in international corporate management are classified into three categories:

1. REQUIRED COURSES—LOWER DIVISION

International Business (3).
International Finance (3).
International Marketing (3).
International Economics (3).
Language (12).

2. REQUIRED COURSES—UPPER DIVISION

Comparative Business Systems (3).
International Financial Management (3).
International Marketing Management (3).
International Corporate Planning (3).
Intergovernmental Relations (3).

3. ELECTIVES

International Product Policies and Strategies (3).
International Promotional Policies and Strategies (3).
International Physical Distribution (3).
International Marketing Research (3).
Transfer of Technology (3).
International Consumer Behavior (3).
International Nonprofit Marketing.
World-Wide purchasing (3).
International Financial Markets (3).
International Accounting (3).

THE SACCHARIN BAN

(Mr. MEEDS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MEEDS. Mr. Speaker, 2 weeks ago the Food and Drug Administration announced that it intends to ban saccharin from food and beverages starting in July of this year, based on the requirements of the so-called Delaney amendment which allows no leeway if research proves any link between cancer in man or animal and a given substance.

It seems to me we have reached the point where we need to reexamine the Delaney clause. On the one hand, we have a substance which has made life easier for millions of Americans for 80 years and which has never been proven to cause cancer in humans. On the other hand, we have a test on rats given 800 average doses a day which does come up with a cancer link. I do not say we should ignore the evidence. I do believe we need to bring public benefit and public risk into balance. For that reason I provided testimony at the oversight hearings on the saccharin ban held earlier this week by the Subcommittee on Health and Environment. I would like to share that testimony with my colleagues:

TESTIMONY BY CONGRESSMAN LLOYD MEEDS

(Before the Subcommittee on Health and Environment Oversight hearing on advisability of withdrawing saccharin from the market, Mar. 23, 1977)

Mr. Chairman, members of the subcommittee, I appreciate this opportunity to express my concern for the recent Food and Drug Administration's announced intention

to ban the use of saccharin in foods and beverages beginning in July. Further, since FDA's action is in response to the language in the so-called 'Delaney Amendment', our basic concern should be with the language. With that provision in the law, Congress has put FDA in the position of squashing a cockroach with a sledgehammer. FDA deserves better alternatives.

FDA's announcement has brought a stormy response from two groups—diabetics and weight-watchers—and this represents an astonishing large portion of our population.

The Washington State division of the American Diabetes Association estimates there are 70,700 diabetics in the state. For these people, it is more than giving up an occasional bottle of pop. Let me quote from a constituent letter: "Five years ago our eldest son was diagnosed as a diabetic before he was five years old. He lived only until he was thirty. Because the artificial sweeteners were not available, it was a very critical problem in providing him a proper diet.

"We have a grandson who was diagnosed as a diabetic also when he was five, and he is now sixteen years of age. The artificial sweeteners have been a tremendous help to diabetics, both juvenile and adult—especially to the juvenile! . . . There is no way of rationalizing this action while leaving cigarettes and hard liquor available to the people!"

The problem of obesity hits our population even harder. Obesity has a strong connection with high blood pressure, heart disease, tooth decay and myriad physical problems. We've got data all over the place and data based on humans—not rats. The Senate Select Committee on Nutrition last month released its report linking diet and disease. One major recommendation was that Americans reduce their individual intake of sugar by 40%. It's true that saccharin is a kind of crutch—but one that millions of fat-fighters will have trouble walking without.

The Delaney Clause needs to be re-examined and modernized. We must be more consistent in our approach to protecting the health of consumers. To put a warning on cigarette packages when there is a proven link between "normal" smoking patterns and cancer while banning the use of saccharin when the link depends on rats consuming the equivalent of 800 cans of diet pop a day simply makes no sense.

We need to bring public benefit and public risk into balance. I urge the committee reconsider the Delaney Clause.

BAIL REFORM ACT NEEDS REVISION

(Mr. McCLORY, asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. McCLORY. Mr. Speaker, today I will reintroduce bipartisan legislation aimed at amending the Bail Reform Act of 1966. My bill would provide judges in the Federal system with the opportunity to consider factors other than simply a defendant's ties to his community when setting bail. Current law permits them to consider the potential safety of witnesses and the community in determining bail only in capital cases; similar discretion is not permitted in cases where defendants are charged with less serious offenses. Our bill simply provides it.

When I first introduced this legislation on March 3, I was joined by some 17 of my colleagues. Since that time, this city has been graphically exposed to the problem this bill seeks to cure. You will all doubtless recall that 2 weeks ago Hanafi Muslim terrorists took over three sites in this city. For 2 days over 100 hostages feared for their lives. Then, finally it was over; an agreement had been reached and Hamaas Khaalis, the Hanafi leader, was freed pending trial. So were 3 of his 11 comrades. While Khaalis' release was the product of an agreement between local authorities and the Hanafis, the release of the others was the product of the bail act we seek to amend. On March 15 the Washington Post had some interesting editorial comments. Among them were the following:

> Given the bail act's requirement that a previously "clean" suspect be freed unless he is likely to flee, he [Khaalis] might have won release even if it hadn't been promised to him. The other three released men, similarly rooted in the community, were the three at the Islamic Center, where the hostages, except for being held, were not harmed. There is an agreement, which we ourselves have made and would make again here and now, for amending the bail act to provide judges more latitude to detain suspects considered to be dangerous. But the law, whatever it is, must be observed.

Early last week, the same three terrorists found themselves back in jail; their bail revoked. The court had determined that their allegiance to Khaalis was so total that, if advised by him to leave this jurisdiction, they would do so.

Further, on March 23, during testimony before the House Judiciary Subcommittee on Criminal Justice, Judge Alfonso Zirpoli, representing the Judicial Conference of the United States, endorsed bail reform. I should note that the conference similarly supported reform as long ago as 1971.

In reintroducing this important legislation, I should also bring to your attentention another school of thought, to which I adhere, which contends that courts have the inherent constitutional right to consider such vital factors as the safety of the community and of future witnesses when setting bail. This view was advocated by the U.S. Court of Appeals for the Sixth Circuit in 1975. In *United States* v. *Wind*, 527 F. 2d 672, the court decided that—

> In a pretrial bail hearing in a non-capital offense, a judicial officer may consider evidence that the defendant has threatened witnesses and is a danger to the community in determining whether the defendant should be released. . . . 527 F.2d 672, 675.

It also held that:

> This power should be exercised with great care and only after a hearing which affords the defendant an ample opportunity to refute the charges. . . . Id.

Unfortunately, the Wind case is not yet universal law in the Federal system. It is for that reason that I have sought to encourage action in the Congress. In the final analysis, it is our responsibility to deal with this problem; the mandated release of the Hanafi terrorists merely underscores the need for it.

VOYAGEURS TRIUMPHANT ARRIVAL IN NEW ORLEANS

(Mr. McCLORY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. McCLORY. Mr. Speaker, as I reported to the House previously, the La-Salle: Expedition II is nearing New Orleans. This authentic recreation of Robert Cavelier Sieur de LaSalle's 1682 canoe voyage from Montreal to the Gulf of Mexico is being carried out by an intrepid group of 23 young men, many of whom are from my 13th Illinois Congressional District.

Mr. Speaker, appropriate welcoming ceremonies have been scheduled this weekend in New Orleans. I am pleased that our distinguished colleague, the gentlewoman from Louisiana (Mrs. BOGGS), who served so ably as chairwoman of the Joint Bicentennial Committee, has invited me, to join her for these events.

Over 150 of my constituents from Elgin, Ill., hometown of many of the Voyageurs, will be in New Orleans for the culmination of this truly inspiring Bicentennial journey.

The Voyageurs will be guests of honor at a riverfront festival in Kenner, La., just north of New Orleans, on Saturday night.

On Sunday, they will paddle down the river to New Orleans, arriving at Audubon Park at 2 p.m. for ceremonies sponsored by the Louisiana Historical Society.

Following that event, there will be a variety of public gatherings honoring them and their remarkable achievement.

Mr. Speaker, I am certain that all of my colleagues will want to follow these events and rejoice with LINDY BOGGS and me in the successful completion of this historic journey of the Voyageurs.

CONGRESSMAN ALLEN ERTEL OF PENNSYLVANIA COMMENDED

(Mr. O'NEILL (at the request of Mr. KILDEE) asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. O'NEILL. Mr. Speaker, I want to commend the Honorable ALLEN ERTEL of the 17th Congressional District of Pennsylvania for his work on the National Study Commission on Records and Documents of Federal Officials. Although only recently appointed to fill a vacancy on the Commission, Congressman ERTEL immediately and vigorously assumed the duties attendant to service on the Commission and conscientiously executed his responsibilities as a member of the Commission.

As many Members of this Chamber will remember, the Commission was created as a result of the controversy surrounding the disposition of the Nixon tapes. Although the genesis of the Commission can be traced to the events of 2 years ago concerning the dispute over the ownership and control of the tapes, the Commission's mandate included the study of the records and documents of all Federal officials, including those of Members of Congress. In an age where the creation and accumulation of records has reached astounding proportions, the question of who should control and have access to such records is of paramount interest to the public and the community of scholars who look to such records for guidance and insight into the political and legislative process.

In this regard, Congressman ERTEL's dedication to the task served to enlighten the Commission with respect to the unique quality of the records of Members of Congress, as well as the nature and extent of the institutional records of Congress. I understand that the Commission has completed its job and will be reporting to Congress shortly its findings and recommendations. I am also aware that due to Congressman ERTEL's hard work, understanding, judgment, and his ability to quickly grasp complex issues, the report will reflect both a realistic and meaningful approach to the subject of congressional papers. At the same time, Congressman ERTEL demonstrated a firm commitment to the principles of openness and accountability which are the cornerstones of our democratic government. On behalf of the House, I want to extend my thanks and appreciation to the freshman from Pennsylvania and congratulate him on his fine contribution to the National Study Commission on the Records and Documents of Federal Officials.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. MICHEL (at his own request), for today, on account of illness in the family.

Mr. WRIGHT (at his own request), for today, on account of a necessary absence.

Ms. COLLINS of Illinois (at the request of Mr. WRIGHT), for today, on account of official committee business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KASTEN) to revise and extend their remarks and include extraneous material:)

Mr. CONABLE, for 5 minutes, today.

Mr. JEFFORDS, for 60 minutes, March 29, 1977.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. EDWARDS of California, for 20 minutes, today.

Mr. RYAN, for 5 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

Mr. GIAIMO, for 10 minutes, today.

Mr. MIKVA, for 5 minutes, today.

Mr. EILBERG, for 5 minutes, today.

Mr. FUQUA, for 10 minutes, today.

Mr. WATKINS, for 10 minutes, today.

Mr. FLOOD, for 60 minutes, March 31, 1977.

(The following Members (at the request of Mr. TRIBLE) and to revise and extend their remarks and include extraneous matter:)

Mr. KEMP, for 5 minutes, today.

(The following Members (at the request of Mr. PEASE) and to revise and extend their remarks and include extraneous matter:)

Ms. HOLTZMAN, for 30 minutes, today.

Mrs. BURKE of California, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. STEIGER and to include extraneous matter.

(The following Members (at the request of Mr. KASTEN) and to revise and extend their remarks:)

Mrs. PETTIS.

Mr. ROBINSON.

Mr. SARASIN.

Mr. BAUMAN in 10 instances.

Mr. DERWINSKI in four instances.

Mr. STEIGER.

Mr. EMERY.

Mr. MADIGAN.

Mr. DEVINE.

Mr. COLEMAN.

Mr. WHALEN.

Mr. WALKER.

(The following Members (at the request of Mr. TRIBLE) and to include extraneous matter:)

Mr. KEMP.

Mrs. HOLT.

Mr. MADIGAN.

Mr. RINALDO.

(The following Members (at the request of Mr. KILDEE) and to include extraneous matter:)

Mr. DELANEY in three instances.

Mr. NOLAN.

Mr. ANNUNZIO in six instances.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. BROWN of California in 10 instances.

Mr. FARY in two instances.

Mr. RODINO.

Mr. YOUNG of Missouri in two instances.

Mr. MAZZOLI.

Mr. DRINAN in 10 instances.

Mr. HARRIS in 10 instances.

Mr. BINGHAM in 10 instances.

Mrs. LLOYD of Tennessee.

Mr. JOHN L. BURTON in three instances.

Mr. FRASER in four instances.

Mr. ECKHARDT.

Mr. MIKVA.

Mr. ERTEL.

Mr. WIRTH.

Mr. WATKINS.

Mr. HANNAFORD in two instances.

Mr. MINETA.

(The following Members (at the request of Mr. PEASE) and to include extraneous matter:)

Mr. BAUCUS.

Mr. JOHNSON of California in two instances.

Mr. WON PAT.

Mr. WEISS.

Mr. TEAGUE.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1025. An act to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977; to the Committee on Interstate and Foreign Commerce.

ADJOURNMENT

Mr. PEASE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 8 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 29, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1097. A letter from the President of the United States, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961, and for other purposes (H. Doc. No. 95–112); to the Committee on International Relations and ordered to be printed.

1098. A letter from the President of the United States, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purpuoses (H. Doc. No. 95–113); to the Committee on International Relations and ordered to be printed.

1099. A letter from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend chapter 5 of title 37, United States Code, to make permanent the special pay provisions for reenlistment and enlistment bonuses, and for other purposes; to the Committee on Armed Services.

1100. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to provide for increased participation by the United States in the International Development Association; to the Committee on Banking, Finance and Urban Affairs.

1101. A letter from the Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed criteria for selection of applicants for fiscal year 1977 for exemplary projects in vocational education, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1102. A letter from the Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final amendments to the regulations for State adult education programs, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to the order of the House on Mar. 24, 1977, the following reports were filed on Mar. 26, 1977*]

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 4974. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs (Rept. No. 95–116). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 4975. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs; with amendment (Rept. No. 95–117). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 4976. A bill to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes; with amendment (Rept. No. 95–118). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted Mar. 28, 1977*]

Mr. STOKES: Select Committee on Assassinations. Report of the Select Committee on Assassinations of the U.S. House of Representatives, 95th Congress (Rept. No. 95–119). Referred to the Committee of the Whole House on the State of the Union.

Mr. ULLMAN: Committee on Ways and Means. H.R. 1680. A bill to relieve taxpayers from liability with respect to certain underpayments of estimated tax, underwithholding, and interest on underpayments of tax attributable to the application to 1976 of the sick pay and other provisions of the Tax Reform Act of 1976 (Rept. No. 95–120). Referred to the Committee of the Whole House on the State of the Union.

Mr. ULLMAN: Committee on Ways and Means. H.R. 1828. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; with amendment (Rept. No. 95–121). Referred to the Committee of the Whole House on the State of the Union.

Mr. ULLMAN: Committee on Ways and Means. H.R. 4090. A bill relating to the withholding on the proceeds of certain wages with respect to horse races, dog races, and jai alai; with amendment (Rept. No. 95–122). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. H.R. 2992. A bill to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended (Rept. No. 95–123). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. Report on subdivision of budget allocation to subcommittees for fiscal year 1977 (Rept. No. 95–124). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. H.R. 2521. A bill to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes; with amendment (Rept. No. 95–125). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. H.R. 3416. A bill to amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of flue-cured tobacco acreage-poundage marketing quotas after June 15 of any year be permitted only between farms on which at least 80 percent of the farm acreage allotment was planted for such year (Rept. No. 95–126). Referred to the Committee of the Whole House on the State of the Union.

Mr. MAHON: Committee on Apropriations. House Joint Resolution 351. Joint Resolution making further continuing appropriations for the fiscal year 1977, and for other purposes (Rept. No. 95–127). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AMMERMAN (for himself, Mr. BAUCUS, Mr. BEDELL, Mr. CARR, Mr. CLEVELAND, Mr. DOWNEY, Mr. EDWARDS of Oklahoma, Mr. FINDLEY, Mr. GLICKMAN, Mr. GORE, Mr. JENRETTE, Mr. JONES of Tennessee, Mr. KINDNESS, Mrs. LLOYD of Tennessee, Mr. PANETTA, Mr. PATTISON of New York, Mr. PRITCHARD, Mr. RAHALL, Mr. STOCKMAN, and Mr. STANGELAND):

By Mr. UDALL (for himself, Mr. AKAKA, Mr. AUCOIN, Mr. COHEN, Mr. D'AMOURS, Mr. EDGAR, Mr. EVANS of Colorado, Mr. FRASER, Mr. HAWKINS, Mr. HUGHES, Mr. KASTENMEIER, Mr. KOCH, Mr. MAZZOLI, Mr. MOORHEAD of Pennsylvania, Mr. PIKE, Mr. PRICE, Mr. PRITCHARD, Mr. RANGEL, Mr. SCHEUER, Mrs. SPELLMAN, Mr. STUDDS, Mr. VANIK, Mr. WALKER, Mr. WAXMAN, and Mr. WIRTH):

H.R. 5663. A bill to provide for the cooperation between the Secretary of the Interior and the States with respect to the regulation of surface coal mining operations, and the acquisition and reclamation of abandoned mines, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. UDALL (for himself, Mr. BAUCUS, Mr. BOLAND, Mr. BONIOR, Mr. BRODHEAD, Mr. CARNEY, Mr. CONYERS, Mr. CORNELL, Mr. DOWNEY, Mr. DRINAN, Mr. FASCELL, Mrs. FENWICK, Mr. FORD of Tennessee, Mr. HARRINGTON, Mr. KREBS, Mr. LEHMAN, Ms. MIKULSKI, Mr. MURPHY of Pennsylvania, Mr. PANETTA, Mr. REGULA, Mr. RODINO, Mr. ROYBAL, Mr. SIMON, Mr. THOMPSON, and Mr. WHALEN):

H.R. 5664. A bill to provide for the cooperation between the Secretary of the Interior and the States with respect to the regulation of surface coal mining operations, and the acquisition and reclamation of abandoned mines, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WEAVER:

H.R. 5665. A bill to provide that adjustments in rates of pay for Members of Congress may take effect only after approval by the Congress and not earlier than the beginning of the Congress next following the Congress in which such adjustments are approved; to the Committee on Post Office and Civil Service.

By Mr. WHALEN:

H.R. 5666. A bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by

the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. WHITEHUHST:

H.R. 5667. A bill to provide that individuals who retired on disability before October 1, 1976, shall be entitled to the exclusion for disability payments under section 105(d) of the Internal Revenue Code of 1954 without regard to the income limitation in such section, and for other purposes; to the Committee on Ways and Means.

By Mr. WHITEHURST (for himself, Mr. CONABLE, Mr. COUGHLIN, Mr. GEPHARDT, Mr. GILMAN, Mr. HARRINGTON, Mrs. MEYNER, Mr. NEAL, Mr. PURSELL, Mr. RICHMOND, Mr. RYAN, and Mr. STARK):

H.R. 5668. A bill to require the Secretary of the Interior to make a comprehensive study of the wolf for the purpose of developing adequate conservation measures, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. WHITEHURST (for himself, and Mr. STEERS):

H.R. 5669. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for State and local public utility taxes; to the Committee on Ways and Means.

By Mr. WHITEHURST (for himself, Mr. CONABLE, Mr. COUGHLIN, Mr. GEPHARDT, Mr. GILMAN, Mrs. MEYNER, Mr. NEAL, Mr. PURSELL, Mr. RICHMOND, Mr. STARK, and Mr. WAXMAN):

H.R. 5670. A bill to prevent the unnecessary large-scale killing of birds or mammals; to the Committee on Ways and Means.

By Mr. WHITEHURST (for himself and Mr. VANDER JAGT):

H.R. 5671. A bill to amend the Internal Revenue Code; to the Committee on Ways and Means.

By Mr. ADDABBO (for himself, Mr. FLOOD, and Mr. MARKS):

H.J. Res. 355. Joint resolution authorizing the President to proclaim September 8 of each year as National Cancer Prevention Day; to the Committee on Post Office and Civil Service.

By Mr. DRINAN:

H.J. Res. 356. Joint resolution to designate February 22, May 30, and October 12 as Washington's Birthday, Memorial Day, and Columbus Day, respectively, and to make such days legal public holidays; to the Committee on Post Office and Civil Service.

By Mr. WHITEHURST (for himself, Mr. BAUCUS, Mr. BEILENSON, Mr. EDGAR, Mr. EDWARDS of California, Mr. FRENZEL, Mrs. MEYNER, Mr. PICKLE, Mr. RICHMOND, Mr. SCHEUER, Mr. WAXMAN, and Mr. CHARLES WILSON of Texas):

H.J. Res. 357. Joint resolution calling for a wildlife preserve for humpback whales in the West Indies; to the Committee on International Relations.

By Mr. WHITEHURST (for himself, Mr. CONABLE, Mr. COUGHLIN, Mr. GEPHARDT, Mr. GILMAN, Mr. GRASSLEY, Mrs. MEYNER, Mr. NEAL, Mr. PURSELL, Mr. RICHMOND, and Mr. STARK):

H.J. Res. 358. Joint resolution calling for an immediate moratorium on the killing of the eastern timber wolf; to the Committee on International Relations.

By Mr. WHITEHURST (for himself, and Mr. MILLER of Ohio):

H.J. Res. 359. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. PEASE (for himself, Mr. STEERS, Mr. KOCH, Mr. CAVANAUGH, Mr. EDWARDS of California, Mr. BENJAMIN, Mr. WAXMAN, Mr. MAGUIRE, Mr. WEISS, Mr. MICHAEL O. MYERS, Mr. EDGAR, Mrs. KEYS, Mrs. MEYNER, Mr. FLOOD, and Mr. NEAL):

H. Con. Res. 178. Concurrent resolution reaffirming the commitment of the United States to obtain full compliance with the human rights provisions of the Helsinki Accords and to press for global commitment to human rights; to the Committee on International Relations.

By Mr. WHITEHURST (for himself, Mr. BAUCUS, Mr. BEILENSON, Mr. EDGAR, Mr. EDWARDS of California, Mr. FRENZEL, Mr. HARRINGTON, Mr. HORTON, Mr. LONG of Maryland, Mrs. MEYNER, Mr. PICKLE, Mr. RICHMOND, Mr. SCHEUER, Mr. STEERS, Mr. VENTO, Mr. WAXMAN, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. WIRTH, and Mr. YOUNG of Florida):

H. Con. Res. 179. Concurrent resolution calling for a regional conservation treaty to protect Northern Hemisphere pinnipeds; to the Committee on International Relations.

By Mr ROSE:

H. Res. 442. Resolution providing funds for the expenses of the House Information Systems staff of the Committee on House Administration to provide for the development, operation, maintenance, and improvement of ongoing computer services for the House of Representatives, for the investigation of additional computer services for the House of Representatives, and to provide computer support directly to the committees, Members, and administrative offices of the House of Representatives; to the Committee on House Administration.

By Mr. MINETA (for himself, Mr. BEDELL, Mr. LAGOMARSINO, Mr. RANGEL, Mr. ROSENTHAL, Mr. WHITEHURST, Mr. LLOYD of California, Mr. BEILENSON, Mr. KEMP, Mr. KREBS, Mr. PATTISON of New York, Mr. PANETTA, Mr. VAN DEERLIN, Mr. LEVITAS, Mr. KOCH, Mr. EDGAR, Mr. RYAN, Mr. FRASER, Mr. BURGENER, Mr. HANNAFORD, Mr. DOWNEY, Mr. WAXMAN, Mr. MURPHY of Pennsylvania, Ms. MIKULSKI, and Mr. SOLARZ):

H. Res. 443. Resolution expressing the sense of the House of Representatives with respect to the recent deaths in Uganda; to the Committee on International Relations.

By Mr. MINETA (for himself, Mr. COLLINS of Texas, Mr. GILMAN, Mrs. SPELLMAN, Mr. DODD, Mr. QUIE, Mr. LONG of Maryland, Mr. ERTEL, Mr. BURKE of Florida, and Mr. BAUCUS):

H. Res. 444. Resolution expressing the sense of the House of Representatives with respect to the reecnt deaths in Uganda; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred to as follows:

62. By the SPEAKER: Memorial of the Legislature of the State of Utah, relative to funding for the Bonneville unit of the Central Utah Project; to the Committee on Appropriations.

63. Also, memorial of the House of Representatives of the State of Arizona, relative to construction of the Hualapai Hydroelectric Dam; to the Committee on Interior and Insular Affairs.

64. Also, memorial of the Senate of the State of Hawaii, relative to the electric utility industry; to the Committee on Interstate and Foreign Commerce.

65. Also, memorial of the Legislature of the Commonwealth of Virginia, requesting Congress to call a convention for the purpose of proposing an amendment to the Constitution of the United States to provide the President with the power to veto any particular item or items of any appropriations bill; to the Committee on the Judiciary.

66. Also, memorial of the Legislature of the State of North Dakota, relative to reconstruction of locks and dam 26 on the Mississippi River at Alton, Ill.; to the Committee on Public Works and Transportation.

67. Also, memorial of the Legislature of the State of North Dakota, relative to proposals for the vertical and horizontal divestiture of American oil companies; jointly, to the Committees on Interstate and Foreign Commerce, and the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FISHER:

H.R. 5672. A bill for the relief of John S. Barry; to the Committee on the Judiciary.

By Mr. FLOOD:

H.R. 5673. A bill for the relief of Marieta Bulaoy Tolentino; to the Committee on the Judiciary.

By Mr. RAHALL:

H.R. 5674. A bill for the relief of Dr. Cipriano Medina de los Reyes, Jr.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

67. The SPEAKER presented a petition of Iowa's 1976 Presidential Electors, relative to abolition of the Electoral College, which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5045

By Mr. WALKER:

(Amendment in the nature of a substitute.)

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Reorganization Act Amendments of 1977".

POLICY AND PURPOSE

SEC. 2. (a) The Congress hereby finds and declares that—

(1) the Government of the United States has attained a size and complexity which makes it inaccessible to many of its citizens and unmanageable by their leaders;

(2) such size and complexity have reduced the efficiency and increased the costs and other burdens of the Government upon such citizens; and

(3) a thorough and exhaustive review of the structure and function of the Government and the preparation of comprehensive means to its improvement are required if that Government is to retain the loyalty and respect of those citizens.

(b) Congress declares that the public interest therefore requires that the preparation and submission of reorganization plans pursuant to the Reorganization Act of 1949 (5 U.S.C. 901 et seq.) be authorized immediately by enactment of legislation extending the authority of that Act.

EXTENSION OF AUTHORITY

SEC. 3. Subsection (b) of section 905 of title 5, United States Code, is amended by striking out "before April 1, 1973" and inserting in lieu thereof "before December 31, 1980".

METHOD OF TAKING EFFECT

SEC. 4. (a) Subsection (a) of section 906 of title 5, United States Code, is amended to read as follows:

"(a) Except as provided under subsection (c) of this section, a reorganization plan shall be effective upon approval by the Pres-

ident of a resolution (as defined in section 909) which has been adopted, within the first period of 60 calendar days of continuous session of Congress after the date on which the plan is transmitted to it, by the House of Representatives and the Senate. Failure of either House to act upon such resolution by the end of such period shall be the same as disapproval of the resolution.".

(b) Section 909 of title 5, United States Code, is amended to read as follows:

"§ 909. Terms of resolution

"For the purpose of sections 906 through 913 of this title, 'resolution' means a joint resolution, the matter after the resolving clause of which is as follows: 'That the Congress of the United States approves the reorganization plan numbered , transmitted by the President on 19 , including such changes as may have been subsequently proposed by the President in accordance with section 910 of title 5, United States Code', the blank spaces therein being appropriately filled; but does not include a resolution which specifies more than one reorganizational plan.".

SEC. 5. (a) Section 910 of title 5, United States Code, is amended to read as follows:

"§ 910. Introduction and reference of resolution

"(a) On the day on which a reorganization plan is transmitted to the House of Representatives and the Senate under section 903, a resolution, as defined in section 909, shall be introduced (by request) in the House by the chairman of the Government Operations Committee of the House, or by a Member or Members of the House designated by such chairman; and shall be introduced (by request) in the Senate by the chairman of the Government Operations Committee of the Senate, or by a Member or Members of the Senate designated by such chairman.

"(b) A resolution with respect to a reorganization plan shall be referred to a committee (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be. The committee to which the resolution is referred shall consider the reorganization plan for 30 calendar days of continuous session of Congress and shall make its recommendations to the House of Representatives or the Senate, respectively, within 45 such days following the date of such resolution's introduction. Any time within 30 such days after the submission of a reorganization plan to the Congress, but before such resolution has been ordered reported in either House, the President may make modifications or revisions of the plan, consistent with the provisions of sections 903 through 905 of this title, which modifications or revisions shall thereafter be treated as part of the reorganization plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this chapter.".

(b) Section 911 of title 5, United States Code, is amended to read as follows:

"§ 911. Discharge of committee considering resolution

"If the committee to which a resolution with respect to a reorganization plan has been referred has not reported it at the end of 45 calendar days of continuous session of Congress after its introduction, such committee shall be deemed to be discharged from further consideration of such resolution and such resolution shall be placed on the appropriate calendar of the House involved.".

(c) Subsection (a) of section 912 of title 5, United States Code, is amended to read as follows:

"(a) When the committee has reported, or has been deemed to be discharged (under section 911) from further consideration of, a resolution with respect to a reorganization plan, it is in order at any time thereafter (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.".

(d) Section 912 is further amended by adding at the end thereof the following new subsection:

"(c) If, prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same reorganization plan from the other House, then—

"(1) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(2) the vote on final passage shall be on the resolution of the other House.".

(e)(1) Section 913(a) of title 5, United States Code, is amended to read as follows:

"(a) A motion to postpone, made with respect to the consideration of a resolution with respect to a reorganization plan, is not in order, and it is not in order to move to proceed to the consideration of other business.".

(2) The heading of section 913 is amended to read as follows:

"§ 913. Motions to postpone and proceed; decisions of the Chair".

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House Rule X. Previous listing appeared in the CONGRESSIONAL RECORD of March 17, 1977, pages 7915–7921:

H.R. 601. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exempt farming vehicles from the highway motor vehicle excise tax, excepting vehicles owned by corporations with gross annual receipts exceeding $950,000, or which derive more than 50 percent of their gross receipts from nonfarming activities.

H.R. 602. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for expenses for department care services while the taxpayer performs volunteer work for civic and charitable organizations.

H.R. 603. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to require that benefits be computed on the basis of the worker's three years of highest earnings, and for the recomputation of such benefits to reflect the changes required by this Act.

H.R. 604. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the time at which eligibility for Medicare benefits on account of kidney failure commences and terminates. Revises the conditions applicable to payments for services and supplies required by self-dialysis patients.

H.R. 605. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Exempts, temporarily, certain rural hospitals from the professional requirement standards review, utilization review, and utilization control requirements imposed on hospitals participating in the Medicare, Medicaid, and Maternal and Chid Health Services programs.

Directs the Secretary of Health, Education, and Welfare to study alternative methods of utilization review and utilization control for rural hospitals.

H.R. 606. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XI (General Provisions and Professional Standards Review) of the Social Security Act to assure the participation by registered professional nurses in the peer review and related activities authorized under such Title.

H.R. 607. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) and title XIX (medicaid) of the Social Security Act to include the services of licensed practical nurses under the coverage provided pursuant to such titles.

H.R. 608. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) and title XIX (medicaid) of the Social Security Act to include in the coverage provided under such programs the services of licensed (registered) nurses.

H.R. 609. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) of the Social Security Act to require the allowance of an inpatient routine nursing salary cost differential as a reimbursable cost of inpatient nursing care.

H.R. 610. January 4, 1977. Ways and Means. Amends the Internal Revenue Code with respect to the tax treatment of small business. Establishes a Committee on Tax Simplification for Small Business to suggest changes in the Code with respect to small business. Requires the Secretary of the Treasury, with the assistance of a new office of Small Business Tax Analysis, to submit recommendations for structural changes in the Code relating primarily to small business to the House Committee on Ways and Means and the Senate Committee on Finance.

H.R. 611. January 4, 1977. Post Office and Civil Service; House Administration. Reduces retirement benefits for Members of Congress by 10 percent for every year they remain in office after attaining 70 years of age.

H.R. 612. January 4, 1977. Rules. Amends the Congressional Budget Act of 1974 to require Congress to review each Federal program at least every 6 years as though it were being proposed to be enacted for the first time. Prohibits the extension of budget authority for any such program beyond such 6-year period until the congressional committees with jurisdiction over such programs conduct such reviews.

H.R. 613. January 4, 1977. Education and Labor. Amends the Older Americans Act by establishing in any State real property tax relief programs by the Secretary of Health, Education, and Welfare for qualifying persons age 65 years or older.

H.R. 614. January 4, 1977. Ways and Means. Amends the Internal Revenue Code and the Social Security Act to exempt employees over age 65 from tax under the Federal Insurance Contributions Act, and to reduce the self-employment tax rate for persons who have attained the age of 65.

H.R. 615. January 4, 1977. Agriculture. Amends the Food Stamp Act of 1964 by revising: (1) eligibility standards; (2) the method of determining the amount of the coupon allotment; (3) administration of the program by State agencies, including the eligibility certification procedure and duties imposed on issuing agents; and (4) the method of computing the Federal share of program costs and of making payments to the States. Transfers the functions of the Secretary of Agriculture under the Food Stamp Act of 1964 to the Secretary of Health, Education, and Welfare.

H.R. 616. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to establish a National Diabetes Advisory Board to insure the implementation of a long range plan to combat diabetes. Authorizes the Secretary to make grants to scientists who have shown productivity in diabetes research for the purpose of continuing such research. Authorizes, under the Public

Health Service Act, the appropriation of specified sums for the purposes of making grants to centers for research and training in diabetic related disorders.

H.R. 617. January 4, 1977. Public Works and Transportation. Amends the Federal-Aid Highway Act of 1976 to increase and extend the appropriations authorized under such Act for the Federal-aid primary system. Increases the Federal share of the cost for construction projects financed with primary funds on the Federal-aid primary system.

H.R. 618. January 4, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to plan and establish wetlands areas in connection with dredging activities required for water resources development projects.

H.R. 619. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to establish graduated corporate income tax rates. Creates an estate tax exemption and establishes a new rate schedule for the estate tax. Increases the gift tax exclusion and establishes a new gift tax rate. Provides special treatment for the sale of stock in a closely held corporation when sold to pay estate taxes. Redefines a subchapter S corporation. Allows tax credits for the hiring of new employees. Redefines section 1244 stock (small business stock, losses on which are treated as ordinary losses).

H.R. 620. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to increase to $4,800 the amount of outside earnings which is permitted an individual each year without any deduction from benefits.

H.R. 621. January 4, 1977. Agriculture. Amends the Food Stamp Act of 1964 by revising: (1) eligibility standards; (2) the method of determining the amount of the coupon allotment; (3) administration of the program by State agencies, including the eligibility certification procedure and duties imposed on issuing agents; and (4) the method of computing the Federal share of program costs and of making payments to the States. Transfers the functions of the Secretary of Agriculture under the Food Stamp Act of 1964 to the Secretary of Health, Education, and Welfare.

H.R. 622. January 4, 1977. Agriculture. Excludes from eligibility for food stamps under the Food Stamp Act of 1964 any household whose principal wage earner is on strike for the duration of such strike. Excepts a household from this exclusion if it was participating in the food stamp program immediately prior to the start of such strike, or if any of its members is subject to an employer's lockout.

H.R. 623. January 4, 1977. Agriculture. Exempts from the inspection requirements of the Federal Meat Inspection Act, the custom slaughtering of livestock by any person not engaged in selling or buying meat or meat products when such livestock is delivered by the owner thereof, there is no change of ownership in such livestock, the meat and meat food products are to be used exclusively by the owner, and the premises and slaughtering meet the sanitation requirements of the State.

H.R. 624. January 4, 1977. Armed Services. Makes it unlawful for any individual or entity to solicit to enroll or enroll any member of the armed forces in any labor organization or for any member of the armed forces to join, or encourage others to join any labor organization. Sets forth penalties for violations of this act.

H.R. 625. January 4, 1977. Banking, Finance and Urban Affairs. Eliminates transactions entered into for agricultural purposes from the definition of a consumer credit transaction under the Truth in Lending Act.

H.R. 626. January 4, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of the Treasury to strike a suitable medal commemorating the 200th anniversary of the drafting of the Virginia Statute for Religious Freedom.

H.R. 627. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to require the Secretary of Labor to review the standards promulgated under that Act to insure that such standards are effective and capable of being implemented; to authorize the Attorney General to enforce such standards, and to permit consultative inspections of work sites by the Secretary.

H.R. 628. January 4, 1977. Education and Labor. Amends the Occupation Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty under such Act shall be awarded a reasonable attorney's fee and other reasonable litigation costs.

H.R. 629. January 4, 1977. Education and Labor. Amends the National Labor Relations Act and the Railway Labor Act to prohibit an employer from discriminating against an employee who is enrolled in a full-time program of secondary, vocational, or higher education for nonmembership in or failure to provide financial support to a labor organization.

H.R. 630. January 4, 1977. Education and Labor. Amends the National Labor Relations Act and the Railway Labor Act to repeal provisions allowing an employer and a labor organization to enter into an agreement to require membership in such organization as a condition of employment.

H.R. 631. January 4, 1977. Government Operations. Requires the Secretary of the Treasury to prepare and make public annual consolidated financial statements for all expenditures of the United States, utilizing the accrual method of accounting.

H.R. 632. January 4, 1977. House Administration. Prohibits travel at Government expense outside the United States by Members of Congress after adjournment sine die of the last session of a Congress if such Member is not a candidate for reelection in the next Congress or a Presidential nominee for some other office of the United States.

H.R. 633. January 4, 1977. Interior and Insular Affairs. Conveys all mineral interests of the United States in specified lands in Madison County, Virginia, to the surface owners thereof.

H.R. 634. January 4, 1977. International Relations. Restricts payments of the United States to the United Nations to the ratio of the population of the United States to the total population of member nations.

H.R. 635. January 4, 1977. Interstate and Foreign Commerce. Amend the Clean Air Act to prohibit the Administrator of the Environmental Protection Agency from requiring an indirect emission source review as part of any applicable clean air implementation plan.

H.R. 636. January 4, 1977. Interstate and Foreign Commerce. Prohibits refiners or distributors of petroleum products from cancelling franchises without prior notice. Prohibits distributors and refiners from cancelling petroleum franchises without cause.

H.R. 637. January 4, 1977. Interstate and Foreign Commerce. Amends the Communications Act of 1934 to exempt from the requirement of obtaining a certificate of public convenience and necessity an interstate trunk line owned by a telephone company serving subscribers in a single State.

H.R. 638. January 4, 1977. Interstate and Foreign Commerce. Amends the Comprehensive Drug Abuse Prevention and Control Act of 1970 to increase penalties and to impose mandatory minimum sentences for the commission of certain crimes involving drugs.

Sets forth procedures and standards for: (1) pretrial and posttrial release of persons charged with or convicted of certain crimes involving drugs; and (2) pretrial release and treatment of narcotics addicts charged with noncapital Federal crimes.

Amends the Controlled Substances Act to subject to forfeiture all money used, or intended for use, in manufacturing, distributing, or acquiring controlled substances in violation of Federal law.

H.R. 639. January 4, 1977. Interstate and Foreign Commerce. Prohibits any agent of the United States from acquiring or inspecting medical or dental records of patients whose care is not provided by Federal funds without the patient's authorization.

H.R. 640. January 4, 1977. Interstate and Foreign Commerce. Establishes a National Commission on Regulatory Reform to study and make recommendations on the activities and effect on the economy of certain Federal regulatory agencies.

H.R. 641. January 4, 1977. Judiciary. Requires specified minimum prison sentences for any individual who uses or carries a firearm during the commission of a Federal felony and for whoever is convicted by a State court of a crime punishable by a term of imprisonment exceeding one year and used or carried a firearm transported in, or affecting, interstate or foreign commerce during the commission of such crime.

H.R. 642. January 4, 1977. Judiciary. Amends the Hobbs Act to impose penalties for interfering with commerce by willfully causing property damage of at least $2,000 at or near a factory, construction site, or other place where work or business of an employer or owner is carried on or where such employer or owner transports, stores, or maintains property.

Stipulates that a violation of such provision or of the provision prohibiting interference with commerce through robbery, violent acts, or extortion shall not be nullified or mitigated by certain factors.

H.R. 643. January 4, 1977. Judiciary. Establishes a United States Court of Labor Management Relations to have jurisdiction over labor disputes in industries substantially affecting interstate commerce that have resulted or threaten to result, in a converted work stoppage which adversely affects or potentially adversely affects the general welfare of the nation.

H.R. 644. January 4, 1977. Post Office and Civil Service. Amends the Federal Salary Act to postpone the effective date for recommended adjustments in pay made by the Commission on Executive, Legislative, and Judicial Salaries until the first pay period after the first period of 30 calendar days of continuous congressional session. Provides rules for considering legislation to disapprove such salary adjustments within such 30-day period including procedures to limit debate on such measures and to force such a measure out of committee ten days after its introduction.

H.R. 645. January 4, 1977. Post Office and Civil Service. Provides, under the Legislative Reorganization Act, that pay adjustments for Members of Congress may take effect no earlier than the beginning of the Congress next following the Congress in which they are approved.

H.R. 646. January 4, 1977. Post Office and Civil Service. Requires the Postal Service, before constructing a new facility, to notify and consult with any State or local government agency responsible for the administration of laws relating to the use of land upon which such construction is proposed. Authorizes such agencies to conduct hearings with respect to such proposals. Requires the Postal Service to hold such hearings if the appropriate agencies fail to do so within 90 days after notification of proposal. Prohibits the Postal Service from undertaking such construction prior to such hearing.

H.R. 647. January 4, 1977. Post Office and

Civil Service. Changes the time period during which Members of Congress and certain Federal officers, whose terms have expired, may send franked mailings, to the 90-day period immediately following the date on which they leave office.

Restricts the purpose of such mailings to the closing of official business.

H.R. 648. January 4, 1977. Post Office and Civil Service. Prohibits collective bargaining agreements between the United States Postal Service and labor organizations recognized as exclusive bargaining representatives for their respective postal employee units from containing procedures which would preclude employees from being represented in grievance and adverse actions arising under such agreements by representatives of their own choosing.

H.R. 649. January 4, 1977. Post Office and Civil Service. Declares that all Federal employees have the right to form, join, and assist a labor organization or to refrain from any such activity without fear of penalty or reprisal.

H.R. 650. January 4, 1977. Post Office and Civil Service. Makes American Business Day a legal holiday to be observed on the last Monday in April.

Changes the date of Veterans' Day from November 11 to the fourth Monday in October.

H.R. 651. January 4, 1977. Public Works and Transportation. Amends the Federal Water Pollution Control Act to authorize the Administrator of the Environmental Protection Agency to accept certification by State water pollution control facilities of responsibility for treatment projects within such State.

Authorizes financial assistance to State programs so certified in an amount not to exceed two percent of the Federal allotment for waste treatment works projects.

H.R. 652. January 4, 1977. Rules. Amends the Congressional Budget Act of 1974: (1) to provide that Federal revenues and outlays shall not exceed Federal revenue and budget outlay limits with specified exceptions; and (2) to require that when they are introduced all bills or joint resolutions contain a "fiscal note" disclosing the fiscal impact of the bill on Government finances.

H.R. 653. January 4, 1977. Rules. Amends the Congressional Budget Act of 1974 to require that every public bill or resolution introduced in either House of Congress contain an estimate of the average cost for each taxpaying family if the bill or resolution were enacted into law. Requires the Director of the Congressional Budget Office to keep tabulations on the average cost to each taxpaying family of the bills passed during each session and directs that the tabulations be printed in the Congressional Record.

H.R. 654. January 4, 1977. Rules. Requires review of Federal programs to determine if they warrant continuation. Directs the President to conduct such review of the programs covered by the annual budget. Requires Congress to make such review every four years.

H.R. 655. January 4, 1977. Small Business. Amends the Small Business Emergency Relief Act to provide emergency relief to small business concerns in connection with fixed-price Government contracts for the lease of real property.

H.R. 656. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to require an automatic cost-of-living adjustment in the income tax rates, the amount of the standard deduction, personal exemption, and depreciation deduction, and the rate of interest payable on certain obligations of the United States.

H.R. 657. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a deduction for State and local taxes imposed on the furnishing or sale of electrical energy, water, sewage disposal services, gas, or telephone services.

H.R. 658. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited deduction for adoption expenses.

H.R. 659. January 4, 1977. Ways and Means. Amends Title I (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that an individual who would be fully qualified for benefits at age 62 may qualify for disability benefits under such program if such individual has 40 quarters of coverage, regardless of when such quarters were earned.

H.R. 660. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 661. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act to reduce the 5-month waiting period which is presently a prerequisite of eligibility for disability insurance benefits to 1 month.

H.R. 662. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that attorneys' fees allowed in administrative or judicial proceedings under that program or under Title XVIII (Medicare) of such Act, in cases where claimants are successful, shall be paid by the Secretary of Health, Education, and Welfare rather than deducted from the amounts awarded claimants.

H.R. 663. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited tax credit for savings deposits and stock and bond purchases. Excludes stock dividend payments from income. Allows a deduction under the estate tax for an interest in a family farm. Alters the corporate tax normal rate and the procedure for computing adjusted basis. Increases the investment credit, corporate surtax, and the permissible variance from class life. Creates a new amortization option for pollution control facilities. Provides for the tax treatment of employers and employees participating in an employee stock ownership plan.

H.R. 664. January 4, 1977. Judiciary. Sets forth hearing and appeal procedures for resolving claims and disputes relating to Government contracts awarded by executive agencies. Establishes a Small Claims Board of Contract Appeals to hear contractor appeals when the amount in controversy is equal to or less than $25,000.

H.R. 665. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to increase the requirements of prior residence or physical presence in the United States in the naturalization proceedings for any person who is the surviving natural or adoptive parent of a person who dies during a period of honorable active duty service in the United States Armed Forces during the war in Vietnam or subsequent hostilities.

H.R. 666. January 4, 1977. Judiciary. Amends the Speedy Trial Act of 1974 to stipulate that no member of the planning groups convened by each United States district court thereunder shall be deemed, by reason of such member, an officer or employee of the United States.

States that no member of the Board of Trustees of an experimental pretrial services agency shall by reason of such membership be deemed such an officer or employee.

H.R. 667. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to exempt a person from the requirement of an understanding of the English language, if on the date of his petition for naturalization such person is of 50 years of age and has been living in the United States for a period totaling at least 20 years.

H.R. 668. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to raise the age for conferral of automatic citizenship upon foreign-born children of naturalized aliens from 16 to 18 years.

H.R. 669. January 4, 1977. Judiciary. Permits military service performed by an individual after December 1955 to be included in determining the aggregate period of service on which a civil service annuity is based, even though such individual is eligible for social security benefits. Requires the Civil Service Commission to exclude from such annuity an amount equal to that portion of the monthly benefit attributable to the individual's military service.

H.R. 670. January 4, 1977. Judiciary. Establishes criteria for the imposition of the death penalty for specified explosive related offenses.

H.R. 671. January 4, 1977. Judiciary. Amends the Gun Control Act of 1968 to impose additional penalties for the commission of certain offenses with the use of, or while unlawfully carrying, a firearm. Specifies conditions under which a court may waive the additional sentence imposed by this Act. Prohibits the suspension of the additional penalty once imposed and the granting of probation.

H.R. 672. January 4, 1977. Rules. Requires under the Congressional Budget Act of 1974, that the Federal budget deficit for fiscal years 1978–80 be a specified decreasing percentage of the deficit for fiscal year 1977. States that beginning with fiscal year 1981 Congress may not consider a Federal budget which includes a deficit.

H.R. 673. January 4, 1977. Judiciary. Increases the number of district judges authorized for the southern district of Florida from 7 to 12. Stipulates that the President shall appoint one additional judge for such district and that the first vacancy occurring in the office of district judge in that district shall not be filled.

H.R. 674. January 4, 1977. Ways and Means. Amends title II (Old-age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 675. January 4, 1977. Armed Services. Makes it unlawful for any individual or entity to solicit to enroll or enroll any member of the Armed Forces in any labor organization or for any member of the Armed Forces to join, or encourage others to join any labor organization. Sets forth penalties or violations of this act.

H.R. 676. January 4, 1977. Education and Labor. Repeals the Occupational Safety and Health Act of 1970.

H.R. 677. January 4, 1977. Interstate and Foreign Commerce. Repeals the Emergency Petroleum Allocation Act of 1973.

H.R. 678. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from gross income of interest on savings deposits paid or accrued by an individual taxpayer.

H.R. 679. January 4, 1977. Post Office and Civil Service. Makes the appointment of the Postmaster General and the Deputy Postmaster General subject to confirmation by the Senate.

H.R. 680. January 4, 1977. Post Office and Civil Service. Abolishes the use of franked mail. Establishes a system for the use of postage meters for Congressional mail. Restricts the kinds of mail matter which may be transmitted as Congressional mail to material directly related to Congressional business. Prohibits the transmission by Congressional mail of material laudatory to a Member of Congress, mass mailings, newsletters, reprints from the Congressional Record, news releases, voter registration materials, agricultural reports, mailgrams, and other specified classes.

H.R. 681. January 4, 1977. Post Office and Civil Service. Terminates the authority of

any Federal agency to require any person, State, or local government to provide such agency information for statistical purposes five years after such authority was given to such agency or five years after the enactment of this Act whichever is later.

Requires that any bill or resolution reported by a committee of either House of Congress which confers authority to require such information from persons, States, or local governments be accompanied by a statement describing the information sought and the costs to be incurred in processing such information by such agency or by such respondents.

H.R. 682. January 4, 1977. Post Office and Civil Service. Directs the Secretary of Commerce to reduce the overall burden on respondents in the 1979 census of agriculture, drainage and irrigation to no more than one-half the burden on respondents in the 1974 census.

Requires the statistical classification of farms in the 1979 census not exclude any establishment which would normally sell more than $250 of agricultural products during the census year.

Directs the Department of Commerce to improve the collection, analysis and publication of data about the ownership structure of American farms.

H.R. 683. January 4, 1977. Judiciary. Amends the Clayton Act to prohibit specified concentrations of control in the energy-producing industries. Prohibits joint ventures between large producers, transporters or refiners of petroleum, petroleum products, or natural gas.

H.R. 684. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for optometric and medical vision care under the supplementary medical insurance program.

H.R. 685. January 4, 1977. Agriculture. Amends the Commodity Exchange Act to require the Commodity Futures Trading Commission to revoke the registration of any future commission merchant or floor broker who accepts an order in violation of the Act. Requires any person who sells a commodity for export to inform the Secretary of Agriculture as to the facts concerning the sale, and requires the Secretary to make such information public.

H.R. 686. January 4, 1977. Education and Labor. Authorizes the Commissioner of Education to make educational assistance loans to students at nonprofit institutions of higher learning.

H.R. 687. January 4, 1977. Interstate and Foreign Commerce. Amends the Natural Gas Act to exempt sales by independent producers from regulation by the Federal Power Commission. Establishes procedures for establishment of national ceiling prices for sales of new natural gas to non-exempt producers.

Directs the Commission to prohibit the curtailment of natural gas supplies for essential agricultural purposes. Restricts the use of natural gas as boiler fuel.

H.R. 688. January 4, 1977. Post Office and Civil Service. Transfers the duty of taking agricultural, irrigation, and drainage censuses from the Secretary of Commerce to the Secretary of Agriculture. Requires the Secretary of Agriculture to collect such information every five years using the sampling method and to institute measures to reduce the burden on respondents to such censuses, and to make such data available to small businesses and other agribusiness organizations on a timely and useful basis. Directs the Secretary to confine the statistical classification of farms in effect on January 1, 1975, for purposes of such census.

H.R. 689. January 4, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to construct a replacement lock and dam on the Mississippi River. Withdraws all authority with respect to channel construction and modification on the Upper Mississippi River.

Directs the Upper Mississippi River Basin Commission to prepare a master plan for the management of the Upper Mississippi River.

H.R. 690. January 4, 1977. Judiciary; Ways and Means. Prohibits a State from imposing a tax on income earned by a nondomiciliary unless the income was earned in that State. Permits the State taxation of income earned by domiciliaries outside the State to the extent that such taxation exceeds the tax imposed by the State in which the income was earned.

H.R. 691. January 4, 1977. Agriculture; Public Works and Transportation. Establishes a National Land Resources Protection Commission to protect the quality of existing topsoil in all federally assisted projects. Establishes minimum requirements governing the stockpiling and replacement of soil of all such projects.

H.R. 692. January 4, 1977. Small Business. Amends the Small Business Act and the Small Business Investment Act of 1958 to increase specified appropriations for loans made pursuant to such Acts. Changes the loan authority of the Small Business Administration to allow loans to finance residential and commercial construction or rehabilitation. Expands the coverage of disaster loans to small business concerns.

H.R. 693. January 4, 1977. Armed Services. Makes it unlawful for any individual or entity to solicit to enroll or enroll any member of the Armed Forces in any labor organization or for any member of the Armed Forces to join, or encourage others to join any labor organization. Sets forth penalties for violations of this act.

H.R. 694. January 4, 1977. Armed Services. Makes specified pay and eligibility adjustments in the retired servicemen's family protection plan and the survivor benefit plan of the Armed Forces.

H.R. 695. January 4, 1977. Interstate and Foreign Commerce. Repeals Titles XV (National Health Planning and Development) and XVI (Health Resources Development) of the Public Health Service Act.

H.R. 696. January 4, 1977. Judiciary. Amends the provision of the Gun Control Act of 1968 imposing penalties for the use of a firearm during the commission of certain crimes to: (1) cover the commission of specified felonies with the use of any firearm which has been transported in commerce rather than only the commission of Federal felonies; (2) increase terms of imprisonment; and (3) prohibit suspended and probationary sentences for first convictions.

H.R. 697. January 4, 1977. Public Works and Transportation. Directs the Secretary of the Army to issue a permanent easement to the owner of any boat dock or similar structure which the Secretary of the Army permitted to be constructed on property under the Secretary's jurisdiction prior to enactment of this Act.

Subjects such docks to rules and regulations promulgated by the Secretary.

Declares it the sense of Congress that the Corps of Engineers make every reasonable effort to allow the construction of such docks.

H.R. 698. January 4, 1977. Science and Technology. Authorizes appropriations to the Environmental Protection Agency for fiscal years 1977 for environmental research, development, and demonstration programs. Imposes limitation on the transfer of funds from one area to another without Congressional consent.

Directs the Chairman of the Council on Environmental Quality to conduct a continuing inventory of environmental research and development programs.

H.R. 699. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow charitable deductions for a limited portion of the value over basis of certain types of short term capital gain property.

H.R. 700. January 4, 1977. Ways and Means. Amends Title IV (Child Support and Establishment of Paternity) of the Social Security Act to allow the payment of lump sum or periodic payments to a spouse or former spouse as required by a decree of separation or divorce from moneys due from, or payable by, the United States.

H.R. 701. January 4, 1977. Government Operations. Requires any Federal agency proposing a new rule or any committee of Congress reporting legislation which may have a significant impact on costs to the public to prepare a Regulatory Cost/Benefit Assessment.

Sets forth procedures for preparing such Assessment.

H.R. 702. January 4, 1977. Government Operations. Establishes an Office of Consumer Protection. Creates the office of Consumer Counsel of the United States. Places the Consumer Counsel in charge of the Office of Consumer Protection. States that the duty of the Consumer Counsel will be the representation and protection of the interests of consumers before the Federal Government.

H.R. 703. January 4, 1977. Armed Services. Authorizes the recomputation at age 60 of the retired or retainer pay for members or former members of the uniformed services whose retired or retainer pay was computed on the basis of pay scales in effect prior to January 1, 1972 in order to reflect any retired or retainer pay increases for other members which was based on changes in the Consumer Price Index since that date.

H.R. 704. January 4, 1977. Interior and Insular Affairs. Establishes a national historic park on the Island of Guam to commemorate the bravery of those who participated in the campaigns of the Pacific theater in World II.

H.R. 705. January 4, 1977. Judiciary. Prohibits the State income taxation of any nonresident commuters who work in Federal areas but do not reside in the area or in the State, unless the State provides the individual material and proportion benefits and protection.

H.R. 706. January 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to extend from 8 to 24 months the period in which domesticated animals, which are sent across a contiguous international boundary for temporary pasturage or which stray across such boundary, shall be accorded duty-free status upon reentry.

H.R. 707. January 4, 1977. Interstate and Foreign Commerce. Increases from three to five years the term for which a license to operate a radio broadcasting station may be issued, and for which such licenses may be renewed under the Communications Act of 1934.

H.R. 708. January 4, 1977. Rules. Requires any rule proposed by any Government agency to be submitted to Congress with a full explanation of such rule. States that such rule shall become effective no later than 60 days after submission to Congress unless either House adopts a resolution disapproving such rule.

H.R. 709. January 4, 1977. Education and Labor. Amends the Randolph-Sheppard Vending Stand Act (providing for vending facilities for the blind in Federal buildings) to exempt from the Act's regulations Federal real property not accessible to the general public and cafeterias and vending machines therein operated by the General Services Administration primarily for Federal employees.

H.R. 710. January 4, 1977. Education and Labor. Establishes a career education program to assist States and local educational agencies in increasing the emphasis they place in elementary and secondary education on job awareness, exploration, decisionmaking, and planning.

H.R. 711. January 4, 1977. Merchant Marine and Fisheries. Amends the Ports and Water-

ways Safety Act of 1972 to require that bulk cargo vessels subject to the Act be equipped with the best available pollution control equipment and that certain United States oil tankers be equipped with a segregated ballast capacity.

H.R. 712. January 4, 1977. Merchant Marine and Fisheries. Amends the Merchant Marine Act of 1936 to direct the Secretary of Commerce to require that a specified percentage of United States oil imports be transported on United States-flag vessels.

H.R. 713. January 4, 1977. Armed Services. Revises the method of computing retired pay for regular enlisted members of the Army, Navy, Air Force and Marine Corps in order to include in such computation the number of years of such individual's non-regular service and certain other years of service.

H.R. 714. January 4, 1977. Armed Services. Revises the method of computing retired pay for regular enlisted members of the Army, Navy, Air Force and Marine Corps in order to include in such computation the number of years of such individual's non-regular service and certain other years of service.

H.R. 715. January 4, 1977. Armed Services. Stipulates that warrant officers of the uniformed services who accept appointments as commissioned officers shall be paid the greater of: (1) the pay and allowances the individual was previously entitled to as a warrant officer; or (2) the pay and allowances to which the individual would be entitled to as a commissioned officer.

H.R. 716. January 4, 1977. Armed Services. Removes the present restrictions which prohibit enlisted members of the armed forces on active duty from engaging in a civilian pursuit or business or prohibit members of the Army, Navy, Air Force, or Marine bands from remuneration for furnishing music outside of a military base where such activities are in competition with local civilians.

H.R. 717. January 4, 1977. Armed Services. Permits members of the reserve components of the armed forces and members of the National Guard to receive retired pay at age 55 for non-regular service.

H.R. 718. January 4, 1977. Armed Services. Allows surviving spouses of members of the uniformed services who were widowed before the effective date of the Survivor Benefit Plan and who are eligible to receive an annuity under the Retired Serviceman's Family Protection Plan or the contingency option plan to elect to receive, in lieu of such annuity, an annuity based on the retired or retainer pay to which the deceased spouse would have been entitled as of the effective date of such plan.

H.R. 719. January 4, 1977. Armed Services. Entitles surviving spouses of members of the uniformed services who were widowed before the effective date of the Survivor Benefit Plan and whose spouse was entitled to retired or retainer pay at time of death, to an annuity as computed under this Act, regardless of whether such individual is entitled to other specified death benefits with the exception of the Survivor Benefit Plan.

H.R. 720. January 4, 1977. Post Office and Civil Service. Repeals the requirement that the retirement pay of retired officers of the uniformed services who are employed in civilian positions in the Federal Government be reduced.

H.R. 721. January 4, 1977. Veterans' Affairs. Provides an alternative method for computing dependency and indemnity compensation in order that in certain instances the survivors of deceased veterans may elect to receive an amount of compensation equal to that to which they would have been entitled if such veterans had been civil service employees killed while performing job-related functions.

H.R. 722. January 4, 1977. Veterans' Affairs. Permits certain veterans with service-connected disabilities who are retired members of the uniformed services to receive compensation concurrently with retired pay, without deduction from either.

H.R. 723. January 4, 1977. Armed Services. Authorizes the recomputation at age 60 of the retired or retainer pay for members or former members of the uniformed services whose retired or retainer pay was computed on the basis of pay scales in effect prior to January 1, 1972, in order to reflect any retired or retainer pay increases for other members which was based on changes in the Consumer Price Index since that date.

H.R. 724. January 4, 1977. Post Office and Civil Service; Rules. Amends the Federal Salary Act of 1967 to change the date when recommendations of the President to Congress, regarding salary adjustments for certain Federal employees, become effective.

Sets forth rules of procedure to be followed in the House of Representatives with respect to resolutions disapproving the recommendations of the President under the Act.

H.R. 725. January 4, 1977. Armed Services. Directs that the retired pay of any member or former member of the armed forces who was on active duty or in active status before May 31, 1958, be computed at current active duty rates and be increased to reflect later changes in applicable pay rates due to increases in the Consumer Price Index.

H.R. 726. January 4, 1977. Post Office and Civil Service. Directs the Secretary of Commerce to reduce the overall burden on respondents in the 1979 census of agriculture, drainage and irrigation to no more than one-half the burden on respondents in the 1974 census.

Requires the statistical classification of farms in the 1979 census not exclude any establishment which would normally sell more than $250 of agricultural products during the census year.

Directs the Department of Commerce to improve the collection, analysis and publication of data about the ownership structure of American farms.

H.R. 727. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to authorize reduced air fares for persons 60 years of age or older and for handicapped individuals and their attendants.

Authorizes specified air carriers in California to enter into agreements with other air carriers to establish joint fares, routes, and services.

Authorizes the Civil Aeronautics Board to grant exemptions for all-cargo operations under specified circumstances.

Directs the Board, in determining the compensation for any local service air carrier for mail for 1966, to apply a specified rate schedule and to disregard any decrease in the Federal income tax liability resulting from any net operating loss carryback.

H.R. 728. January 4, 1977. Veterans' Affairs. Provides that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 729. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited income tax credit for the tuition paid to a private, nonprofit elementary or secondary educational institution for the education of a dependent.

H.R. 730. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books, and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 731. January 4, 1977. Ways and Means. Increases to $10,000 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

H.R. 732. January 4, 1977. Ways and Means. Amends title IV (Aid to Families with Dependent Children) and title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act, and the law relating to veterans' pensions to provide that recipients of supplemental security income benefits, recipients of aid or assistance under the various Federal-State public assistance and medicaid programs, and recipients of assistance or benefits under the veterans' pension and compensation program and specified other federally assisted programs including the food stamp programs and the public housing program, will not have the amount of such benefits, aid, or assistance reduced because of post-1973 increases in monthly social security benefits.

H.R. 733. January 4, 1977. Interstate and Foreign Commerce; Judiciary. Amends the Federal Trade Commission Act to prohibit the application of a per se rule of illegality under the antitrust laws in the case of territorial market allocation agreements made as part of a licensing agreement: (1) for the manufacture, distribution, and sale of a trademarked soft drink product; or (2) for the distribution or sale of a trademarked private label food product.

H.R. 734. January 4, 1977. Interior and Insular Affairs. Directs the Secretary of the Interior to conduct a study of the feasibility of establishing the Santa Margarita National Recreation Area, in the area which is now Camp Pendleton, California.

H.R. 735. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to make eligible for registration, as being of United States nationality, aircraft owned by a citizen of a foreign country who has been lawfully admitted for permanent residence into the United States.

H.R. 736. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to direct the Administrator of the Civil Aeronautics Board to issue regulations allowing the operation of aircraft during the period when the emergency locator transmitter has been removed from the aircraft for inspection, repair, modification, or replacement.

H.R. 737. January 4, 1977. Interior and Insular Affairs. Provides for establishment of the Jacob Estey National Monument at Shaw University, Raleigh, North Carolina.

H.R. 738. January 4, 1977. Education and Labor. Repeals the Davis-Bacon Act.

H.R. 739. January 4, 1977. Requires Members of Congress, Congressional candidates, and employees of Congress to file financial disclosure statements revealing: (1) the amounts and sources of income including gifts, honorariums, or compensation for publication of written works; (2) the cash value of all assets held by such person individually or jointly with his or her spouse; and (3) any business transaction involving such person.

Requires such statements to be made annually to the Comptroller General who is directed by this Act to make them available to the public.

H.R. 740. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to increase the limitation on corporate deductions for charitable contributions to the lesser of 10 percent of the corporation's taxable income, or five percent of its taxable income plus $100,000.

H.R. 741. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 742. January 4, 1977. Education and Labor. Amends the National Labor Relations Act to: (1) permit certain persons and groups to request strike referenda and prohibit calling or continuing a strike contrary to such a referendum; (2) prohibit the National Labor Relations Board from requir-

ing certain proof in connection with an employer's petition relative to recognition of a collective bargaining representative; and (3) set forth procedures for court of appeals review of Board decisions with respect to certification of bargaining representatives.

H.R. 743. January 4, 1977. Ways and Means. Directs that two percent of all income taxes collected within a State or territory on individual incomes under Federal statutes be transferred as revenue to such State or territory to be utilized for educational purposes, free of any Federal control.

H.R. 744. January 4, 1977. Agriculture. Amends the Agricultural Adjustment Act, as amended by the Agricultural Marketing Agreement, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes.

H.R. 745. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an individual an investment tax credit for farm and ranch equipment purchased from an ancestor or a closely held business of which an ancestor owns more than half.

H.R. 746. January 4, 1977. Ways and Means. Levies a variable import duty fee, under the Agricultural Adjustment Act, upon all milk, which may be entered, or withdrawn from warehouse, for consumption. Requires a monthly adjustment in the variable import duty fee.

H.R. 747. January 4, 1977. Armed Services. Amends the National Security Act of 1947 to declare specifically that the jurisdiction of the Central Intelligence Agency encompasses only foreign, as opposed to domestic, intelligence activities. Makes the Agency responsible for protecting sources of foreign intelligence under the guidance of the National Security Council. States that such responsibility shall be limited to lawful means to protect disclosure.

H.R. 748. January 4, 1977. Armed Services. Reduces or eliminates certain payments by members of the uniformed services and their dependents for medical services under the civilian health and medical plan of the uniformed services (CHAMPUS).

H.R. 749. January 4, 1977. Armed Services. Makes persons who were widowed during the 18 month period following the effective date of the Armed Forces Survivor Benefit Plan eligible for annuities under such program.

H.R. 750. January 4, 1977. Armed Services. Entitles specified enlisted members of the reserve components of the uniformed services to special pay as computed under this Act if such an individual agrees to remain in the Ready Reserve.

H.R. 751. January 4, 1977. Armed Services. Entitles specified members of the armed forces reserves to retirement pay.

H.R. 752. January 4, 1977. Armed Services. Includes foster children, as defined in this Act, within the definition of dependents of members of the uniformed services.

H.R. 753. January 4, 1977. Banking, Finance and Urban Affairs. Repeals the existing exemption, under the Bank Holding Company Act of 1956, of bank holding companies which are labor, agricultural, or horticultural organizations, from the prohibition under such Act of ownership or control by bank holding companies of any company which is not a bank and which engages in activities other than banking.

H.R. 754. January 4, 1977. Education and Labor. Authorizes the Commissioner of Education to make grants to State educational agencies to assist them in establishing and carrying out programs for instructing public elementary and secondary school students in citizenship and ethics.

H.R. 755. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 by directing the Secretary of Labor to: (1) render on-site consultation and advice to any employer, upon the request of such employer, concerning compliance with the Act; and (2) establish programs for the education and training of employers and employees concerning hazards in particular industries.

H.R. 756. January 4, 1977. Government Operations. Requires that all contracts financed in whole or in part by Federal funds shall be awarded to the lowest qualified bidder.

H.R. 757. January 4, 1977. House Administration. Establishes six regional Presidential primary election districts and sets dates for primary elections to be held in such districts for the purpose of electing delegates to the national political conventions. Prohibits any State from conducting a Presidential primary election except in accordance with this Act.

H.R. 758. January 4, 1977. Interior and Insular Affairs. Authorizes the establishment of the Revolution's Southernmost Battlefields National Park in Florida.

H.R. 759. January 4, 1977. International Relations. Establishes a United States Agency for World Peace within the Department of State to research problems relating to achieving peace. Requires the Director of the Agency to establish a Laboratory for peace to administer and develop its research programs. Requires the Director to make recommendations to government agencies concerning United States efforts for peace.

H.R. 760. January 4, 1977. Interstate and Foreign Commerce. Establishes a health insurance benefit program under the Social Security Act by providing for Federal payment of health insurance premiums on behalf of eligible individuals.

Establishes a Health Insurance Advisory Board to develop guidelines for administering this program.

H.R. 761. January 4, 1977. Judiciary. Abolishes diversity of citizenship as a basis of civil jurisdiction of United States district courts.

H.R. 762. January 4, 1977. Judiciary. Makes it unlawful for a parent to kidnap his minor child.

H.R. 763. January 4, 1977. Judiciary. Subjects nationals or citizens of the United States who are employed by, or are members of, the Armed Forces to the jurisdiction of the United States district courts for their crimes committed outside the United States. Provides for the apprehension, restraint, removal and delivery of such persons.

H.R. 764. January 4, 1977. Judiciary. Prohibits former Federal employees who participated in a contract formulation the value of which exceeded $10,000 from being employed, for a period of two years, by anyone who has direct interest in the contract.

H.R. 765. January 4, 1977. Judiciary. Designates 30 days as the maximum period which an individual accused of a Federal crime may be held for examination in order to determine whether such person is insane or otherwise so mentally incompetent as to be unable to stand for trial.

Revises the procedures to be taken upon a finding of mental incompetency to direct, where possible, commitment of the accused to State or local authorities for hospitalization according to State or local law.

H.R. 766. January 4, 1977. Judiciary. Requires lobbyists and other legislative agents to file with the Comptroller General: (1) a notice of representation; and (2) activity reports.

Repeals the Federal Regulation and Lobbying Act.

H.R. 767. January 4, 1977. Post Office and Civil Service. Permits military service performed by an individual after December 1955 to be included in determining the aggregate period of service on which a civil service annuity is based, even though such individual is eligible for social security benefits.

Requires the Civil Service Commission to exclude from such annuity an amount equal to that portion of the monthly benefit attributable to the individual's military service.

H.R. 768. January 4, 1977. Science and Technology. Requires that all Federal agencies submit to the appropriate Congressional committees a prospectus concerning any proposed research grants with a value greater than $25,000 at least 30 days prior to the commitment of Federal funds.

H.R. 769. January 4, 1977. Veterans' Affairs. Authorizes and directs the Administrator of Veterans' Affairs to establish a national cemetery in Duval County, Florida.

H.R. 770. January 4, 1977. Veterans' Affairs. Authorizes and directs the Administrator of Veterans' Affairs to construct a Veterans' Administration general medical and surgical hospital at Jacksonville, Florida, and to secure the cooperation of the University of Florida College of Medicine in its training and education of medical students in Jacksonville.

H.R. 771. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide that no individual shall pay an income tax of less than 10 percent of his adjusted gross income which exceeds $30,000 ($60,000 for married individuals filing jointly).

Provides that for purposes of this Act adjusted gross income shall be computed without regard for the exclusion for interest on government obligations.

H.R. 772. January 4, 1977. Ways and Means. Authorizes a taxpayer, under the Internal Revenue Code, to elect to treat qualified architectural and transportational barrier removal expenses which are paid or incurred during the taxable year as expenses which are not chargeable to capital account. Deems such expenses so treated as allowable tax deductible expenditures.

H.R. 773. January 4, 1977. Education and Labor. Authorizes the United States Commissioner of Education to award a scholarship for full-time undergraduate study to any child who was a dependent of a public safety officer killed in the performance of duty and who has been accepted for enrollment or is enrolled in an institution of higher education.

H.R. 774. January 4, 1977. International Relations. Prohibits the Nuclear Regulatory Commission from licensing, and the Energy Research and Development Administration from engaging in or allowing, any export of nuclear fuel or technology to any country which is not a party to a nuclear nonproliferation treaty and which develops any nuclear enrichment or reprocessing plant without concluding an agreement with the International Atomic Energy Agency or Euratom against diversion to a country not a party to a nuclear nonproliferation treaty, unless the President waives such prohibition in the interests of national security and so reports to Congress 90 days prior to such licensing or authorization.

H.R. 775. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 776. January 4, 1977. Merchant Marine and Fisheries; Public Works and Transportation. Establishes a fund for the purpose of paying for otherwise uncompensated losses resulting from oil pollution.

Imposes, within certain monetary limits, joint, several, and strict liability on the owners and operators of each pollution source. Requires petroleum facilities and certain vessels to maintain evidence of financial responsibility in an amount equal to applicable liability limits.

Sets forth procedures for identifying and publicizing pollution sources.

H.R. 777. January 4, 1977. Education and Labor. Amends the National Labor Relations Act to include as employers for the purposes of such Act States and political subdivisions thereof.

H.R. 778. January 4, 1977. Government Operations. Requires the Office of Management and Budget to study the efficiency and effec-

tiveness of each Federal agency every 10 years and to recommend the President and Congress reorganization or abolition of each such agency as may be necessary to improve such efficiency and effectiveness. Abolishes each such agency upon the due date of such report unless during the 10-year period since the last report Congress has passed legislation continuing such agency.

H.R. 779. January 4, 1977. Government Operations. Requires the Office of Management and Budget to study the efficiency and effectiveness of all Federal agencies every 10 years.

Terminates each such agency 10 years after the submission of such report to the President and Congress unless Congress acts to continue such agency.

H.R. 780. January 4, 1977. Armed Services. Requires that, upon request, members or former members of the uniformed services or their dependents be given essential medical and dental care in any facility of the uniformed services. Allows such individuals to receive nonessential care subject to the availability of space and facilities and the capabilities of the medical and dental staff.

EXTENSIONS OF REMARKS

HELSINKI ACCORDS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DERWINSKI. Mr. Speaker, recognizing the growing interest in the issue of human rights in relationship to the provisions of the Helsinki accords, I wish to insert a statement given by Anna M. Faltus of the Czechoslovak National Council of America. Mrs. Faltus addressed the Commission on Security and Cooperation in Europe on March 15, on the effects of the violations of the Basket III provision in Czechoslovakia:

STATEMENT BY ANNA FALTUS ON BEHALF OF THE CZECHOSLOVAK NATIONAL COUNCIL OF AMERICA

Mr. Chairman, the Czechoslovak National Council of America welcomes the opportunity to testify before the Commission on Security and Cooperation in Europe. Our testimony will concern the area of divided families.

Permit me first to say a few words about our organization. The Council was founded in 1918. It is a national organization of Americans of Czech and Slovak descent. It also serves as an umbrella organization for other similar associations, representing several hundreds of thousands of Americans of Czech and Slovak origin.

Since the Soviet invasion and occupation of Czechoslovakia in August, 1968, tens of thousands of Czechoslovak citizens fled their homeland. The Council has been assisting those who came to the United States. It helped them to get established and offered assistance and guidance in obtaining American citizenship and in other matters where language was a barrier.

Many of those who fled Czechoslovakia, left their minor children in the care of grandparents or other relatives. In some cases the wife stayed behind. The exiles and refugees hoped that they would be able to bring their families out of Czechoslovakia, once they got established in a western country. Unfortunately, the Czechoslovak authorities decided otherwise—claiming, that the husbands, father or parents—as the case may be—had left Czechoslovkia illegally, and that it was not in the state's interest to allow its citizens to leave the country to join them.

In 1970 the Czechoslovak authorities have restored to blackmailing the refugees, exhorting them to pay so-called legal fees to lawyers in Czechoslovakia who were assigned to them by the government as counsels for defense, as they faced criminal proceedings for their "illegal" presence abroad. The refugees were informed that should they decide to ignore this demand, their relatives in Czechoslovakia would be required to pay the fees. Others, in order to "legalize" their stay abroad, were ordered to pay up several thousands of dollars for their education in Czechoslovakia. There actions of the Czechoslovak government were aimed at instilling fear into the refugees for their own persons and for their relatives left behind, and to compel them to return to Czechoslovakia.

To our knowledge only very few refugees submitted to this pressure. The great majority of them stayed abroad, haunted by the uncertain prospect of ever seeing their families again, but with a resolve to try and try again, in the hope, that somehow, sometime in the future, the Czechoslovak government would be persuaded to let their families go.

The Helsinki Accords, signed on August 1, 1975, were condemned by many of us, as we felt that the Soviet Union scored another point at the expense of the nations of Central and Eastern Europe. However, as it turned out, Basket III of the Accords has given the millions of people behind the Iron Curtain something solid to hold onto in their quest for more individual freedom. It has also given them hope for a better world and, among other things, for the reunification of families, forced by government policies to live apart.

Unfortunately, the continuous flow of information which we receive testifies to the fact that the Czechoslovak government is not living up to the promises it made at Helsinki. The instances where permission to emigrate is granted are few and far between. And even though at the close of 1976, the Czechoslovak authorities allowed some children to join their parents who made their home abroad, hundreds of families are still waiting for a more humane attitude on the part of the Czechoslovak government.

The delaying tactics used by the Czechoslovak authorities concerning permission to emigrate and the issuance of an exit permit are too numerous to list here. Few examples below will illustrate the point we wish to make.

Every applicant for permission to emigrate, for example, is required to attach to the application 10 documents, none of which may be more than 30 days old at the time the application is submitted for approval. These documents include: (a) written consent from the applicant's place of employment to the effect that his employer—(local, regional or state authority or a party functionary in a factory, as there is no private enterprise in Czechoslovakia)—has no objection to his emigration; (b) similar certification from the military administration; (c) extract from the Penal Register; (d) information as to paid taxes or any other obligations the applicant may have to socialist institutions; (e) curriculum and a statement giving his reasons for his desire to emigrate. This document has to contain information on the applicant's education, salary, other benefits, property status and a declaration whether he will request release from Czechoslovak citizenship. With delays artificially created by local, regional and state authorities, the stipulation that none of these documents be more than 30 days old at time of application is almost impossible to meet.

When and if the applicant succeeds in obtaining permission to emigrate, then another application has to be executed, this time for the issuance of an exit permit, to which another set of documents has to be attached. This form contains 106 questions which the applicant is obligated to answer. These questions inquire also as to whom the applicant plans to visit—or join— abroad; that person's address, occupation, address of his employer, his last visit to Czechoslovakia; his reasons for staying abroad and whether he left the country without the permission of Czechoslovak authorities.

Older persons, receiving social security pensions, who are granted permission to emigrate, have to sign a statement renouncing their right to this benefit and/or to any other benefit that may be due them. Under these adverse conditions, the emigration of older persons, who wish to join their relatives abroad, is generally not opposed, as their departure means fewer recipients of social security pensions and fewer "unproductive" persons making demands on the country's health services.

However, younger people, or young families, who apply for permission to emigrate to join their parents or other close relatives abroad, are not only encountering difficulties, they actually become vicitms of reprisals—such as dismissal from a job and/or denial of higher education to their children. This is happening despite the fact that many of the applicants cite in their applications the Helsinki Accords and the promises made by all the signatories—the Czechoslovak goverment included—to facilitate emigration and the reunification of families.

There are hundreds of cases of divided families but because many of the applicants are afraid to talk, we know of only about 65 applications with relatives living in the United States. Only a few of them have been resolved satisfactorily. In some cases permission to emigrate has been denied repeatedly. Appeals were allowed with a chance of submitting a new application. This, however, resulted in another refusal that led to another appeal and another application. The resulting merry-go-round presents great hardships for the people concerned. In several cases permission to emigrate was refused by the highest authority with no further appeal permitted.

May I ask your indulgence for a few moments more.

All the obstacles I have described here are applied also when Czechoslovak authorities want to prevent visits here to relatives who fled Czechoslovakia. There are many Americans of Czech and Slovak descent in this country who are willing to pay the cost of a visit here by a relative from Czechoslovakia. Many do come. But many others cannot. A few years ago an official policy was adopted by Prague which explicitly stated government intention to force expatriates back to Czechoslovakia by refusing to let their relatives there come here for a visit. As far as we know that policy is still in force.

What may not be realized is that, since 1928, a legal treaty between the United States and Czechoslovakia says that if a citizen from one country gains citizenship in the other, he loses the first citizenship automatically. Despite the treaty, which both countries, recognize as in force, Czechoslovak officials maintain that the naturalized American is still a Czechoslovak citizen until he applies for a release from his Czechoslovak citizenship. Exit permits have, therefore, been refused with the excuse that the relative in the United States is still a Czechoclovak citizen and that he may want to come back. The authorities take forever to process an application for release from Czechoslovak citizenship and they retain the option to turn it down. Thus, in these instances, not only is Czechoslovakia acting in contradiction to the Helsinki Final Act, but it is violation of a treaty with the United States.

The Council has submitted to the Commission for evaluation four volumes (about

450 pages) of documentation on the violations by the Czechoslovak government of Basket III of the Helsinki Accords. Today we would like to make part of the hearings "Charter 77", the Human Rights Manifesto, which was signed in Czechoslovakia—despite threats of violence and incarceration—by close to 500 individuals from all walks of life, requesting the Czechoslovak government to abide by its Constitution and by the Accords it signed in Helsinki.

SELLING ARMS TO THE ENEMY

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BAUMAN. Mr. Speaker, though it is an event unpleasant to remember, my colleagues should recall that it was 9 years ago when the Soviet Union invaded Czechoslovakia to "liberate" it from the Czechoslovakians. Only days after the United States and Soviet representatives celebrated a "renewed partnership" between the United States and the U.S.S.R. in recognition of the Soviets' peaceful intentions in Europe, Soviet troops by the thousands poured over the Czech borders for 7 days until the Czechs were beaten.

When the Soviets came, they came in great numbers. They came in such large numbers, in fact, that there were not enough troop transport carriers to bring them into Czechoslovakia, and Life and Time magazines of that fateful week reported instances of Russians traveling on bicycles and in milk wagons in order to bring off their strategic offensive.

With the construction of Ford and Mack truck plants in the Soviet Union, invading Russian troops will not be burdened by such logistical problems in the future. Along with these profitable ventures by private American companies which have improved the U.S.S.R.'s armored motorpool, companies like IBM have peddled technologically advanced computers and air-traffic control equipment which the Soviets are using on their observation units at Russian military bases. IBM is not alone. Many other American based multinational corporations have been less American than multinational in their pursuit of dollars in the market of a totalitarian society dedicated to the principle that in the final analysis, America must and will be destroyed.

A sober and timely analysis of this incredible situation has just been written by Miles Costick, a Washington, D.C., foreign affairs and trade analyst. His major study, "United States-Soviet Computer Capabilities," is scheduled for spring publication by the Georgetown University Center for Strategic and International Studies. Highlights of his observations are included in an article which appeared in the March issue of the Conservative Digest. It concerns a subject which will become increasingly discussed as American policymakers are asked to give a more frank and realistic assessment of Soviet military and strategic intentions and estimate how far American companies may go in possibly financing our own future national peril.

The article follows:

SELLING ARMS TO THE ENEMY

(By Miles Costick)

During the last four years American companies have sold the Soviet Union more than $300 million worth of advanced computer equipment—material crucial to modernizing the Soviet military machine.

The giants of our computer industry, including Control Data, IBM, Sperry-Rand and General Electric—have sent Russia and East Europe computers, peripheral equipment, software and manufacturing know-how, and have even built computer component plants for Iron Curtain countries.

And a major new deal that will further erode U.S. security is in the works. Late last year Control Data received permission from the National Security Council, after intervention by Henry Kissinger, to sell very sophisticated computers to America's two biggest enemies.

The Soviet Union will receive the Cyber 7300, a large scientific computer ideal for military applications and about 15 years ahead of current Soviet computer capability.

And Communist China will acquire the Cyber 172, used in the U.S. for antisubmarine warfare, nuclear weapons calculations, and large phase-array radar systems that track ICBM's.

Computers are essential to modern warfare. Computers themselves are used for both navigation and weapons guidance in modern missiles, aircraft, tanks, high-performance satellite-based surveillance systems, ABM defense systems and submarines.

And without computers modern weapons systems could not be built, integrated, tested, deployed, kept combat-ready or operated.

All technologies revolutionizing warfare, such as giros, lasers, avionics, nucleonics, propulsion and computers themselves, are dependent on computers.

For example, the world's most advanced computers (ILLIAC IV, CDC STAR-100, Texas Instruments' ASC and Goodyear's STARAN IV) were built with the aid of several large computers.

In short, today's emerging technologies are as dependent on computers as the technologies of the first industrial revolution were dependent on energy.

In the present era of technological competition with the Soviet Union, the United States enjoys now and is expected to maintain a 10 to 12 year advantage in computer technology, provided there are no ill-considered exports to the Soviet Union and other communist countries.

HENRY SAID YES

Computer technology in the Soviet Union is almost totally dependent on Western imports, and there are several significant features of Western computer technology that the Soviets have failed thus far to acquire.

The first is mass production of high-quality computer components, subsystems, and systems. The second is reliability engineering and quality control. The third is the creative dynamism characteristic of the Western computer scene.

The fourth is computer software: Soviet software today is no further advanced than Western software was in 1960. However interesting Soviet work on the theory of automatic programming may be, it has not led to software that economizes programming time and makes computers more accessible to users.

The fifth area of weakness in Soviet computers is memory storage, both internal and external. Even the most advanced computers produced in the Soviet Union and East Germany have acute memory problems.

The Soviets are making every effort to close these gaps by buying them from us. And they scored notable successes with this strategy. (They also continue to steal or illicitly buy secrets from private citizens.)

Control Data has been one of the Soviets' richest sources. The company recently agreed to develop jointly with Moscow the next generation of large high-speed computers, the Cyber series, and to build a plant that can manufacture them.

The Cybers are high-speed, large-volume scientific computers, suitable for military and intelligence operations. Only 12 such installations exist in the world, and they belong to such organizations as the Atomic Energy Commission, the U.S. Air Force, NASA and the National Security Agency.

This Control-Data-Soviet venture would create a serious competitor for U.S. computer sales overseas and would sharply upgrade Soviet military potential. American sources in Moscow put the agreement's ultimate worth at more than $500 million.

In the last dozen years Control Data has sold communist countries about 40 computer systems, and has established a joint operation with Romania, which it is now expanding to produce peripheral equipment, integrated circuits and software.

The company's strategy is to increase its share of the communist bloc computer market, and, in combination with communist computer producers, to increase penetration of the developing countries' markets.

And Control Data has an agreement pending to manufacture 100-megabit disk memory units in the Soviet Union, which would considerably enhance Soviet computer capabilities.

The granddaddy of computer companies, IBM, has frequently sold advanced computers to the Soviet Union and its satellites. It sold the USSR what is believed to be the largest industrial computer in the world for use at the Kama River truck plant, and in 1974 it sold Hungary the advanced 370-155.

This sale, which required the personal approval of Kissinger, violated U.S. policy in that the computer was more powerful than the buyer required, was unknown in the East, and could be copied or diverted for military purposes.

IBM has several other pending computer orders from the Soviet Union, including a triplex 36065 computer system for Soviet air traffic control, which would have obvious military uses.

Other firms selling computer equipment, know-how or manufacturing capability to the Soviet bloc include Singer, Dataproducts and Willi Passer.

While America would never consent to give complex military technology directly to the Soviet Union, we have entered into commercial and scientific agreements which have the same effect.

As former Deputy Defense Secretary William Clements has said, "There have been some significant losses of advanced technology to the communist countries, particularly in electronic and very exotic, sophisticated machine tools."

And Britain's NATO envoy, Sir John Killick, recently stated, "Clearly something is amiss when the Soviet Union's all-consuming military machine continues to gather speed and strength, while its economy is increasingly dependent on Western exports."

Yet six high-technology trade associations have warned Congress against permitting the Department of Defense to control transfer of strategic technologies.

"In a civilian government such as ours, the control and administration must reside apart from the military," recently demanded Peter F. McCloskey, president of the Computer and Business Equipment Manufacturers' Association.

Control Data's William Norris puts it more bluntly, "Our biggest problem isn't the Soviets, it's the damn Defense Department!"

MINIMUM WAGE

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mrs. HOLT. Mr. Speaker, President Carter proposes increasing the minimum wage from $2.30 to $2.50 per hour, the organized labor chiefs are angry at the proposal, because they want a minmum wage of $3 an hour, and many Members of Congress are talking about compromising at a figure somewhat in between.

The real issue is: How much more unemployment do you want to create? President Carter's proposal would eliminate or prevent the creation of a modest number of jobs; the unions recommend a level that would cost many jobs.

When we speak of the minimum wage, we are referring to the wage level paid to the unskilled—teenagers and others whose productivity cannot justify higher pay. They are in entry-level jobs, which are essential for the work experience necessary for later employment in higher-paying jobs.

If the young worker learns discipline in his first job, if he accepts difficulty and makes a good record, he builds a solid foundation for future employment opportunities at higher pay. And he often works at an entry-level job to raise money for further education.

These jobs are important, and one of the most alarming problems facing this Congress is the extremely high rate of youth unemployment. There are insufficient jobs for the young people entering the labor market. The unemployment rate for teenagers remains at 18 to 19 percent of those seeking work. This is a real tragedy.

In Background Paper No. 13 published by the Congressional Budget Office on September 21, 1976, there is a useful discussion on the impact of minimum wage legislation. The paper, entitled "Policy Options for the Teenage Unemployment Problem," makes this point:

> There is a general consensus that the minimum wage reduces employment somewhat below what it would otherwise be; but there is no consensus on the magnitude of its effect on employment or on the availability of training and experience.

This much is clear: When the cost of a job exceeds its value to the employer, the job will be eliminated and no employer will create a job that would cost more than it would be worth.

Some people argue that the minimum wage must be raised to relieve the economic hardship caused by inflation, but what about those who would be unemployed, because of a higher minimum wage? Their joblessness would be subsidizing the employed who benefited from the raised minimum wage.

Then, with cries of alarm about the unemployment rate, the Congress would rush in to create more public service jobs, adding many billions to Federal deficit spending and causing more inflation. Legislating a higher minimum wage is not an answer to any problem.

Let us be very clear about the problem we are attending when we discuss the minmum wage. We are not discussing the overwhelming majority of American workers who are earning considerably more than the minimum. The problem is that of young people and the unskilled generally, who need work experience in entry-level jobs.

Mr. Speaker, I am very concerned for these people, and raising the minimum wage would not help them.

INDEPENDENCE DAY OF THE BYELORUSSIAN REPUBLIC

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DELANEY. Mr. Speaker, last Friday, March 25, was a day of joyous celebration and inspiration to all. On that day in 1918 the freedom loving people of Byelorussia threw off the yoke of Russian imperialism and declared themselves a free and sovereign people and republic. Sadly, the reemergence of this proud and ancient state after nearly 150 years of tsarist domination was short lived.

The type of scourge and oppression which swept the new republic within months was far worse than any it had previously known. The infant democracy had barely taken its first exhilarating breath of freedom when the Bolshevik armies poured across its borders and stifled it under a blanket of repression.

But the preserving spirit of the Byelorussian people, the driving force behind the independence movement, could not and will not be quelled. In World War II, the Byelorussians had to repel two invaders, the Germans and Soviets, in order to protect the borders of their homeland. For this brave defense of their democratic ideals more than 2,000,000 of them paid with their lives. Once the Germans were expelled the Soviets reverted to well-tried methods to control the Byelorussian people: Execution squads, mass deportations, and many forms of political and religious repressions.

Even now, the Byelorussians continue to resist vigorously. There is minimal membership in the Communist Party despite the many advantages rendered a member. The farm workers resist authority on the collective and state farms, as demonstrated by the chronic deficiencies in Soviet agricultural production.

The many efforts by Moscow to destroy the national spirit and longing for independence of the Byelorussian people have met with dismal failure. To this day, they have never renounced their deep desire for the restoration of democratic government, as embodied by the Republic which the Soviets overthrew in 1920.

Mr. Speaker, let us congratulate all Byelorussians and commend them for their spirit, courage, and resolve on this 59th anniversary of their independence proclamation. Let us also join them in hoping that very soon Byelorussia may truly reestablish the glorious republic whose founding we commemorate today.

BYELORUSSIAN INDEPENDENCE

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. SARASIN. Mr. Speaker, 59 years ago on March 25 the Byelorussian people achieved national independence and regained their freedoms which had been lost to czarist Russia at the end of the 18th century. The Byelorussian Democratic Republic was proclaimed in the capital of Minsk while still under Austro-German occupation. However, this freedom was shortlived, and ended when the Central Powers were defeated during the First World War. The nation was split between the Poles and the Russians, but soon fell under Soviet domination which continues today.

The Byelorussian people have endured much since that time. During World War II, Byelorussia was ruled under German hegemony for 3 years. During that time, the Nazis tried to "restore" Byelorussian nationalism and destroyed everything that was Soviet-influenced. When the Soviets regained power, they reversed this process. Several million Byelorussions were killed as the Soviets reasserted themselves.

Despite this oppression, the Byelorussian people have managed to excel in many fields. Most notable is the Byelorussian folklore, among the finest and most colorful in Eastern Europe. For their daily livelihood, the Byelorussian people work the land. Despite its unsuitability for agriculture, they have produced potatoes, fodder, flax, wheat, rye, and barley. Urban industries are developing also, especially in farm-related production.

The Byelorussian people have endured a great deal under Soviet domination, and yet they have managed to maintain their hopes for eventual freedom. On this day of the 59th anniversary of the Declaration of Independence of the Byelorussian Democratic Republic, we raise our voices with those of other Americans of Byelorussian descent for the future self-determination of their mother country.

At this time, we can also implore the Soviet Union to stand by the commitments they made under the Helsinki Agreement and allow the Byelorussian people greater freedom of movement, greater access to new ideas, and renewed contacts with relatives and loved ones.

TV CAMERAMAN-REPORTER COMPILES IMPRESSIVE LIST OF FELONY ARREST ASSISTS

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mrs. LLOYD of Tennessee. Mr. Speaker, an outstanding television photographer-reporter, Butch Manning, of channel 12–WDEF TV in Chattanooga, Tenn., has for some time been aiding police in that city in apprehending criminals to such an extent that Associated Press writer Eric Newhouse deemed it appropriate to write a feature story on the activities of Mr. Manning. The story was carried on the AP State wire and subsequently carried by a number of the newspapers in Tennessee.

Because of the uniqueness of the story, Mr. Manning's devotion to the cause of humanity and the promotion thereof, and the style of Mr. Newhouse's writing, I would like to offer this story to my colleagues attesting to the result of citizens who go beyond the call of duty in helping their fellow man:

(By Eric Newhouse)

CHATTANOOGA, TENN.—Like another mild-mannered reporter, roving television newsman Butch Manning catches crooks.

But instead of swooping down from tall buildings, Manning alerts police on a two-way radio to the location of a getaway car. Then, as they make the pinch, Manning is on the scene industriously filming.

In the past year and a half, he has been responsible for 12 felony arrests.

"Good Lord, that's a better record than many of our officers," exclaims one veteran police officer. A police spokesman says the department is considering some sort of award for Manning.

Shortly after joining WDEF-TV here, Manning logged his first arrests. After two men robbed a convenience store at knifepoint, Manning spotted the getaway pickup truck and flagged down officers to make the arrests.

Then he helped police break up a major shoplifting ring, followed a hit-and-run driver until police arrived on the scene, and spotted two more armed robbers downtown getting into a getaway car.

"He was also responsible for arresting five people who robbed a stop 'N' Go store here recently," says Patrolman Joe Stansifer.

"He didn't have to do it—he's a civilian—but he took it upon himself to follow that car for about four miles, reporting his location and direction at various times."

When Stansifer made the arrests, Manning was ready.

"I parked about 100 feet back and got my camera out," he says. "We got good footage of them being searched and the police finding the weapons in the car."

In addition to his arrest record, Manning has a better than average record as a rescue worker.

Late last summer, he responded to a call that a boy had been bitten by a copperhead atop Signal Mountain and found that the town's only ambulance was in service downtown.

"The boy's hand had begun to swell up real good so I volunteered to take him to the hospital because we had radio communication," he says. "So we turned on the emergency flashers and the headlights and ran into town."

On another occasion last summer, Manning helped county police carry a shooting victim and an incapacitated officer down a mountainside on a brutally hot day.

"I know the police and rescue workers quite well, and I consider most of them my friends," he says. "I help them all I can because then I don't feel so bad about asking them to take a couple of minutes to help me out—and I hope they don't feel so bad about it either."

THOROUGHBRED RACING

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. JOHN L. BURTON. Mr. Speaker, the following letter from Mr. George Andros, an acknowledged expert on the subject of thoroughbred racing, deals with H.R. 4090.

I believe the Members will be interested in Mr. Andros' views on that important subject matter:

DEAR JOHN: This Monday before Congress who's who in racing will be present to oppose House Bill H.R. 4090 which proposes a 20 per cent withholding on racetrack winnings of $1,000.00 or more.

As Northern California's number one racing patron I believe this bill will not only kill racing in the entire U.S. at costs of hundreds of millions annually to the govt. but it will be very costly to the taxpayers who will have to be burdened with additional tens of millions, for all the employees who will have no alternative but to apply for Unemployment checks as it will throw out some two hundred thousand persons out of work and possibly more.

Because I am a tremendous taxpayer indirectly due to racing and have absolutely no ties with management or the racing industry, I am very concerned about the procedures in raising taxes for our government when a bill like this is allowed to pass which could only be detrimental to the people who are the ones who will suffer when poor management on the part of our government is not protected for its citizens. Horse racing is more than a 17 billion dollar industry which employees hundreds of thousands throughout the United States and possibly close to a million indirectly as it helps the farmers, the soft drink industry, the beer industry, the meat, poultry, fish, bakery, farmers producing fruit, vegetables, grain, hay, oats, barley, in addition to many other industries, but it also helps the printing industry and circulates monies to radio, television, newspapers, magazines and many other forms of advertising as well as bringing in more money to the govt. than all the other sports combined by a very large percentage. In addition to all this most of the race tracks in the United States are privately owned and not subsidized by the govt. as are most of all the other sports, so under these conditions I feel as our representative here in Northern Calif. and a close personal friend of mine, I know you will understand what I am saying is a fact, and I appeal to you John to address the Congress before the meeting this Monday to enlighten our Representative throughout the United States so they could understand the problems that could and would appear if H.R. 4090 is permitted to stand. As one who has been acquainted with racing for over 38 years I believe my knowledge of this industry is well known here in Northern California and my main concern is to upgrade the so-called King of Sports while at the same time maximizing as much income for the govt. as is possible, but this bill would only destroy this sport and tremendous income the govt. is receiving not help it.

Sincerely,

GEORGE D. ANDROS.

H.R. 5644

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. NOLAN. Mr. Speaker, today I am pleased to introduce H.R. 5644, a bill designed to adapt the Federal food stamp and commodity distribution programs to the unique realities of American Indian tribal life. This bill is identical to legislation introduced in the Senate today and similar to legislation S. 3235 which passed the Senate 3 years ago, only to be deleted by this Chamber in conference. Since that time the failures of the food stamp program on Indian reservations have repeatedly required the specific extension of the commodity distribution program authority, which expires September of this year. Therefore, in the absence of legislative action such as H.R. 5644, in a few months our Indian people will be left with only the Federal food stamp program to meet their basic food subsistence needs.

The problems which contribute to the failures of State operation of the current food programs include: First, the great distances Indian people must travel on poor roads to certification and issuance centers; second, the unresponsiveness of State-administered programs to the unique food problems of Indian people; and third, the great distances needy Indian people must travel, without the availability of public transportation, to reach food stores offering nutritious foods at affordable prices. In my home State of Minnesota, for example, the range of round trip distances which some people must travel on six Minnesota reservations to the nearest food stamp certification and issuance center is from 10 to 260 miles.

There are several aspects of this bill which are intended to build flexibility into the Federal food programs available to our Indian people. First, it provides each tribe with a choice of electing which family food programs they prefer. Second, it provides for Federal payment of 100 percent of the costs necessary to administer the programs. This modest but necessary increase in Federal administrative costs shall be available to either the State or tribal administrative agencies. Third, the bill provides for tribal administration either separately or concurrently of the food stamp and commodity distribution programs with adequate support and technical assistance to assure program administration in a responsible fashion.

The time is long overdue for adjusting food stamp and commodity distribution program operation in a manner geared to the special geographic and cultural circumstances existing on Indian reservations. I request your support of this bill to assist in accomplishing this end.

A TRIBUTE TO COL. PETER ECONOMY

HON. SHIRLEY N. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mrs. PETTIS. Mr. Speaker, on March 31, 1977, Col. Peter Economy, U.S. Air Force Commander of the Sacramento Air Logistics Center, detachment 51 at Norton Air Force Base, will retire from active duty after 35 years of military service.

Colonel Economy has had a distinguished military career beginning with his enlistment in the U.S. Air Corps following the outbreak of World War II and throughout his advancement through the ranks to his present grade.

During World War II, he was designated as instructor and liaison officer to Brazilian Air Force cadets who were training in the United States. Following this assignment, Colonel Economy was responsible for the training of the 201st Mexican Air Force Fighter Squadron personnel. Accompanying the squadron to the Philippines, Ie Shima, and Okinawa, Colonel Economy was awarded Mexico's second highest decoration by the President of Mexico. He is the only American officer on active duty to be so honored.

In 1951, Colonel Economy served with the T-6 Mosquito Squadron in Korea, including a front-line assignment with the French-Canadian Royal 22d Regiment. While on a later assignment to Taiwan, the colonel was again responsible for the training of Air Force personnel from the Republic of China.

Mr. Speaker, in addition to a most distinguished military career, Colonel Economy has a most admirable background in civic and community service.

During his assignment in Korea, Colonel Economy organized a permanent home for the provision of food on a regular basis to the multitude of refugee orphans in the town of Pyon-Paek, South Korea.

In 1955, Colonel Economy spearheaded efforts to raise funds for the building of an annex to a public school and the acquisition of needed school supplies for the village of Tepotzlan, Mexico. In honor of Colonel Economy's efforts, the people of that village have placed a brass plaque on the wall of the wall of the school bearing his name.

In addition to the above activities, Mr. Speaker, Colonel Economy has further distinguished himself by winning eight awards from the Freedom Foundation at Valley Forge, Pa., for his letters and essays on specific topics relating to the basic constitutional rights and responsibilities inherent in the American way of life.

Mr. Speaker, I am sure that my colleagues join me today in congratulating this fine officer on his many achievements and in commending him on his demonstrated respect and love for our country.

INCREASING THE INDEPENDENCE OF REGULATORY AGENCIES

HON. BOB ECKHARDT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. ECKHARDT. Mr. Speaker, I have today introduced with Mr. Moss the Independent Regulatory Agencies Act. The purpose of this legislation is to increase congressional oversight over independent regulatory agencies and to consequently reduce the executive dominance over such agencies.

Beginning in 1889, with the Interstate Commerce Commission, the Congress has created a number of agencies to regulate highly sensitive aspects of our economic system and to protect the public health and safety. Each of these agencies was established as a subordinate arm of the Congress to undertake assigned legislative and judicial functions within general statutory standards. However, under both Democratic and Republican administrations, these agencies have become increasingly subject to executive control and dominance.

Meanwhile, the importance of congressional oversight and the need for agency accountability to the public has been emphasized in recent years. For example, a comprehensive report on "Federal Regulation and Regulatory Reform" published in 1976 by the Subcommittee on Oversight and Investigations of the House Interstate and Foreign Commerce Committee stressed that—

> A government truly of and for the people must be accountable to them. An important part of this accountability is oversight by the Congress which, in turn, is answerable to the citizens its members collectively serve.

The Independent Regulatory Agencies Act which we have introduced today would implement many of the recommendations of the report on "Federal Regulation and Reform" and would thereby expand congressional oversight and the accountability of regulatory agencies. This legislation would strengthen the independence of the Federal Communications Commission, the Federal Power Commission, the Securities and Exchange Commission, the Consumer Product Safety Commission, and the Environmental Protection Agency by:

First, requiring Senate confirmation for appointments of agency chairmen;

Second, requiring the simultaneous submission of agency budget requests to the Congress and the Office of Management and Budget;

Third, authorizing the independent regulatory agencies to control all civil litigation through their own attorneys;

Fourth, terminating the requirement of clearance of agency legislative proposals by the Office of Management and Budget; and

Fifth, by affording prompt access to the records of independent regulatory agencies by appropriate congressional committees.

RURAL WATER PROGRAM ASSESSMENT ACT

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. MADIGAN. Mr. Speaker, I have today introduced—together with Mr. JONES of Tennessee—a bill cited as the Rural Water Program Assessment Act of 1977.

The Subcommittee on Conservation and Credit of the Committee on Agriculture recently held hearings on the drought situation in the United States. While it is obvious from those hearings that there is a great deal of work being done by a number of Federal, State, and local governmental agencies—including regional commissions and authorities—on various aspects of water resources, it appears that there is no single place, repository, or document that one may refer to which contains information about water resource studies, reports, data, et cetera. Nor does it appear that water resource information regarding conservation and usage, water tables, water sedimentation, et cetera, is being made available—at least in the form and to the extent it should—to potential users of that information. The users would include legislative bodies such as the U.S. Congress.

I am well aware that Federal agencies such as the U.S. Geological Survey, the Bureau of Reclamation, the Corps of Engineers, the Department of Commerce, and the Water Resources Council conduct water resource studies of one kind or another and publish considerable information which may be of great interest to a great number of people. However, I seriously doubt that much of the information collected at substantial cost to our taxpayers—Federal, State, and local—is reaching many of those who can and should be using it.

This bill is no far-reaching piece of legislation. It authorizes only $25,000 for something which I would hope could be done with existing funds available in the Department of Agriculture. Moreover, it calls for the information to be made available in 90 days, because the task should be one which is manageable within that time span. Moreover, I would hope that we could have this kind of information available as we consider other legislation pending before the Subcommittee on Conservation and Credit which relates to watersheds, water resources, water sedimentation, and even land use.

Given the drought conditions which exist in this country and the pessimistic prospects forecast for the next couple of years, I believe this information should be available.

If in the course of hearing on this bill it turns out that the Department—alone or in conjunction with other Federal agencies—can or will provide this information without legislation, certainly

that would be acceptable in lieu of enactment of this bill. However, I believe the information should be submitted promptly and in usable form.

IN PRAISE OF GREECE

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DELANEY. Mr. Speaker, as far as we free people of the world are concerned, the Greek people were the first to conceive, experience, and appreciate the value of independence, thus we look upon their beautiful country as the birthplace of democracy and many of our most cherished principles.

More than 2,000 years ago the gifted and insightful ancestors of the Greek people founded their model state in which freedom with all its blessings reigned supreme. That was their age of grandeur and glory. But by the beginning of the Christian era their country was in turmoil: fell under the domination of the Roman Empire and was never free of tyrants again until the beginning of the 19th century.

On March 25, 1821, the inevitable revolt occurred as the Greek people, led by Prince Alexandros Ypsilantis and Archbishop Germanos of Patras, rose up to throw off the yoke of suppression affixed by the Ottoman Turks more than four centuries before. A national assembly met the following year at Epidaurus, independence was proclaimed and a constitution drafted.

Since 1821 Greece has been a sovereign state, and the Greeks in their mainland have been masters of their own fate. But that is not to say that their society and their very lives have not been subjected to serious threat from abroad.

Mr. Speaker, I think we do well to remember not only the war of 1821, but also the courageous and unfaltering Greek resistance staged against the Fascists during the Second World War, and the successful struggle against the Communists following that war.

Thus, the friendship Greece and America have enjoyed for so many years is founded on the principles we both stand for: freedom, virtue, and integrity. For this reason I am sure that friendship will continue for many years more. In the words that President Eisenhower said in 1953, after Greece had defeated the Communists, at the ceremonies conferring the Legion of Merit on King Paul:

> . . . Greece asked no favor except the opportunity to stand for those rights in which it believed, and it gave to the world an example of battle . . . a battle that thrilled the hearts of all free men and free women everywhere.

On this day of joyous celebration, I join all my countrymen in wishing Greece well, and sincerely thank all those of Greek ancestry, in my district as well as the rest of America, for their many invaluable contributions to our history and our culture.

THE 59TH ANNIVERSARY OF THE BYELORUSSIAN DECLARATION OF INDEPENDENCE

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. RINALDO. Mr. Speaker, March 25 marked the 59th anniversary of the Byelorussian Declaration of Independence.

Like our own Declaration of Independence, the Byelorussian proclamation was a daring venture, an affirmation of national self-determination in the face of formidable odds.

Unfortunately, within 9 months of the creation of the independent Byelorussian Democratic Republic, the Soviet Union declared it would replace that independent state with a puppet nation known as the Byelorussian Soviet Socialist Republic.

To their shining credit, the Byelorussians held the massive and relentless Soviet forces at bay for more than 2 years. In 1921, however, the valiant Byelorussian troops finally succumbed to the brute strength of the Soviet aggressors.

Since 1921, Byelorussia has been only a colony in the vast Soviet empire. Yet the independent spirit of the Byelorussian people still finds expression. Resistance to Soviet oppression has been so vigorous that, according to the Byelorussian Congress Committee of America, the Soviet Government has relentlessly pursued, imprisoned, and persecuted over 6 million Byelorussians in an effort to dampen their libertarian spirit. This month, under the pretext of an anticorruption campaign, the Soviets have replaced more than 60 Byelorussian Communist Party officials with individuals more responsive to the will of Moscow. Clearly, Soviet imperialism has still not crushed the yearning for self-determination among the Byelorussians.

The battle for Byelorussian independence is also waged in this country. Two distinguished organizations—the Byelorussian American Association and the Byelorussian Congress Committee of America—continue to focus the spotlight of world opinion upon the Soviet subjugation of Byelorussia.

Mr. Speaker, Byelorussian independence is a dream that was realized too briefly. Soviet imperialism has deferred that dream, but has not defeated it.

The struggle for restoration of Byelorussian independence continues. It is a cause that merits the sympathy, and the support, of all who cherish liberty.

THE BOUNDARY WATERS WILDERNESS ACT—THE NEED FOR CONGRESSIONAL ACTION

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. FRASER. Mr. Speaker, in January I introduced the Boundary Waters Wilderness Act, a bill to extend full wilderness protection to the 1-million-acre Boundary Waters Canoe area in northern Minnesota. Forty-five Members of the House have since joined me as cosponsors of the bill, H.R. 2820.

The Boundary Waters Canoe area—BWCA—has been embroiled in controversy since its inclusion in the national wilderness preservation system in 1964; we have witnessed a proliferation and intensification of disputes in the courts and in the media. At root is the question of what activities and uses should be allowed to continue in an area which has been designated as a national wilderness. Motorboating, snowmobiling, and commercial timber harvesting have been permitted during the last 13 years despite the BWCA's wilderness status. The threat of mining and mineral exploration continues to cloud the area.

The 95th Congress will have the opportunity to consider two bills quite different in their approach to resolving the BWCA issue. My bill would forbid motorboating, snowmobiling, logging, and mining in the entire 1 million acres. A bill to be introduced soon by Representative JIM OBERSTAR would establish a 600,000-acre Boundary Waters Wilderness Area and a 500,000 acres Boundary Waters National Recreation Area in which motorboating, snowmobiling, and logging on a limited basis would be allowed.

It is critical that Congress act on the issue this session. The courts have stated on a number of occasions that the ambiguities of the 1964 Wilderness Act regarding the management of the BWCA must be clarified by the Congress or the Executive, not by the courts. In addition, the U.S. Supreme Court refused earlier this month to review a decision of the Eighth Circuit Court of Appeals which opened certain stands of virgin timber within the BWCA to logging. A voluntary agreement to suspend logging will expire in September. Timber companies will begin cutting this fall unless Congress acts.

A number of articles have recently appeared in Minnesota newspapers calling attention to the responsibilities Congress must shoulder. Speaking of the timber problem, an editorial in the March 9 St. Paul Pioneer Press noted:

> Those who want the state's—and one of the nation's—last stands of virgin timber saved and the quality of the BWCA as a wilderness preserved must look to the Congress—to a statutory ban on logging among other things.

The editorial concludes by observing:

> There are millions of acres in Minnesota outside the BWCA open to snowmobile trails,

thousands of lakes and streams open to motorboats. The logging industry will survive without the last virgin pines in the state. Industry will not crumble under a BWCA minnig ban.

Don Fraser's bill is not the expression of dreamy, impractical ideals of armchair conservationists. It is an attempt, quite practical from a scientific standpoint and altogether reasonable from a recreational and esthetic standpoint, to set aside, for this and generations succeeding, something of our heritage not dedicated to private aggrandizement.

I commend the editorial and the other articles to my colleagues' attention. I would also like to insert the list of 45 cosponsors. The materials follow:

[From the Minneapolis Tribune, Mar. 8, 1977]

BWCA Logging Cleared by Court

(By Dean Rebuffoni)

The U.S. Supreme Court Monday ended the 4½-year legal battle to halt logging on certain virgin-timber tracts of the Boundary Waters Canoe Area (BWCA) of northeastern Minnesota.

Without comment, the court denied a request by the Minnesota Public Interest Research Group (MPIRG) that it review the decision of a lower court allowing logging on those tracts, which cover about 2,700 acres of the BWCA's Portal Zone. The denial means that MPIRG has lost its last opportunity for judicial review of the case.

Technically, the supreme court's denial opens the door to logging on those tracts, which include stands of virgin jackpine, black spruce and red and white pina. However, the four logging companies that have federal contracts to log there have agreed to delay, at least until June, any harvesting of that timber.

That agreement was made in December at the request of Rep. James Oberstar, the Minnesota Democrat whose Eighth District includes the million-acre BWCA. He had asked the loggers to postpone cutting until Congress has acted on a bill he is introducing that would greatly affect the wilderness area.

By their agreement with Oberstar, the four logging companies in effect will delay most of their timber cutting until next winter. Most logging activity in the BWCA's Portal Zone occurs in the winter, when there is adequate snow cover to construct logging roads.

Oberstar is sponsoring a bill in Congress that would enlarge the BWCA, then divide it into two management zones—a wilderness area, where logging would be prohibited, and a recreational area, where it would be permitted.

MPIRG and about a dozen other environmental groups oppose Oberstar's basic proposal, and instead are lobbying in Congress for a bill introduced by Rep. Donald Fraser, D-Minn. Fraser's bill would end logging in the BWCA by providing the million-acre area with full wilderness status.

MPIRG initiated the BWCA logging case in late 1972, suing the U.S. Forest Service for allegedly violating federal environmental laws by allowing logging in the Portal Zone. The forest service manages the BWCA.

MPIRG was soon joined in its suit by the Sierra Club. Several logging companies with logging contracts—called "timber sales"—from the forest service joined the case on the side of the federal agency.

The lawsuit was directed at timber sales covering more than 10,000 acres, although MPIRG and the Sierra Club wanted to ban any logging in the BWCA. The forest service eventually modified those timber sales so that they now apply to about 2,700 acres.

As part of its management plan for the BWCA, the forest service has divided the wilderness area into two zones: the 618,000-acre Interior Zone, where logging is prohibited, and the 412,000-acre Portal Zone, where it is allowed under certain restrictions.

The 2,700 acres in question are part of about 160,000 acres of virgin timber within the Portal Zone. The Interior Zone contains 354,000 acres of virgin timber.

In early 1973, U.S. District Judge Miles Lord, who heard the case, halted logging on the virgin-timber tracts. His injunction remained in effect for 3½ years, until it was lifted last Aug. 30 by the U.S. Court of Appeals for the Eighth Circuit.

Judge Lord had ruled that Congress intended to ban logging on the virgin-timber tracts. But the St. Louis-based appeals court said Congress wanted the BWCA to be managed in a manner that would maintain its primitive character without unnecessarily restricting logging.

The appeals court said that "if a substantive policy change is to be made with respect to virgin timber cutting in the BWCA," then that decision "must come from Congress or the responsible executive agency, not from the courts."

MPIRG then asked the supreme court to review the case, contending that logging would inflict "irreparable damage . . . upon a unique and irreplaceable natural resource."

In its order yesterday denying that request, the high court said Associate Justice Harry Blackmun did not take part in its decision. This means that he apparently disqualified himself from hearing the case because of a possible conflict of interest.

Before being named to the high court, Justice Blackmun was a private attorney with the Minneapolis law firm now named Dorsey, Windhorst, Hannaford, Whitney & Halladay. It represents several of the logging companies involved in the BWCA case, including the Boise Cascade and Potlatch corporations.

At present, limited logging is under way on some state-owned lands within the Portal Zone.

[From the St. Paul Pioneer Press, Mar. 9, 1977]

BWCA Fate Up to Congress

After years of legal battling, the fate of the Boundary Waters Canoe Area is, apparently, now out of the courts for good, and its fate is up to Congress.

Monday, the Supreme Court refused to review a decision of the Eighth Circuit Court of Appeals which had reversed a lower court (Miles Lord's) ruling against logging of certain stands of virgin timber in the "portal" area of the BWCA. By prior agreement of the logging companies, cutting will be delayed at least until June to allow Congress to decide the issue.

The situation is a complicated one and requires some detailed explanation:

When BWCA was established in its present form in 1964 by act of Congress, it was divided into two areas, roughly equal. One was the so-called Interior Zone. This zone contained around 350,000 acres of timberland that has never known the loggers' saws. The other is called the Portal Zone, and it also contains stands of virgin timber—about 160,000 acres.

The present controversy involves only the Portal Zone, and only about 2,700 acres of that virgin timber.

Back in 1972, environmental groups charged that by allowing logging in the Portal Zone, the U.S. Forest Service was violating federal environmental laws. MPIRG (Minnesota Public Interest Research Group) brought suit in federal court. In 1973 Judge Lord ruled that Congress had intended that all the BWCA virgin timber should be protected and placed a ban on logging. The ban applied specifically to about 2,700 acres involved in logging contracts the Forest Service had with timber operators.

Last summer the appeals court lifted the ban. Its effect of course, would be to open the rest of the Portal Zone (and, absent specific rulings by the Forest service, the Interior Zone) to logging.

This is where Congress comes in. The appeals court said that "if a substantive policy change is to be made with respect to virgin timber cutting in the BWCA (it) must come from Congress or the responsible executive agency, not the courts." The responsible executive agency is the Department of Agriculture (Forest Service), but it already has come down on the side of logging, at least in the Portal Zone. So those who want the state's (and one of the nation's) last stands of virgin timber saved and the quality of the BWCA as a wilderness preserved must look to Congress—to a statutory ban on logging, among other things.

That's where two Minnesota congressmen come in. Rep. James Oberstar, in whose sprawling 8th District the BWCA exists, and Rep. Donald Fraser, representing the 5th District (Minneapolis) have re-introduced bills on the BWCA which failed passage in the last session. The bills differ significantly.

Oberstar would retain the division of BWCA into two zones. One would be designated the Recreational, the other the Wilderness. In the Recreational, logging would be permitted. So would the use of recreational vehicles such as snowmobiles (now banned by an administrative order) and motorboats. Hunting, fishing and trapping would be allowed. The rest of the BWCA would be left as is. Presumably this means logging would be possible there, too, should the Forest Service change its mind.

Fraser's bill, on the other hand, would make the entire BWCA a wilderness area, banning logging, use of motorized pleasure vehicles, mining and mineral exploration.

Fraser and his backers argue that logging would destroy the ecosystem of an irreplaceable natural treasure. They contend that exploiting the BWCA for its virgin timber is not economically necessary (the area constitutes only a tiny percentage of available U.S. timber resources) and that whatever loss of revenue to private persons may be involved it is more than balanced by the scientific and recreational value of preserving this last canoe-country wilderness within the contiguous 48 states.

To those who argue that timberlands, virgin or otherwise, require the modern management techniques of selective harvesting Fraser responds, altogether reasonably, that nature has "managed" the area quite well indeed for eons. He is not deterred by the argument that a virgin forest "wastes" resources and maybe destroyed by fire. Indeed he and other conservationists see natural fires as the ally of primitive forest lands. Cutover pine forests tend to be replaced by birch, aspen and other less desirable species, while a fire in a pine forest actually speeds the process of pine reforestation because the heat opens the seed pods. Millions of acres of cutover land in northern Minnesota, once covered by white and Norway pine and now by "popple" and birch, attest to the truth of this.

There are millions of acres in Minnesota outside the BWCA open to snowmobile trails, thousands of lakes and streams open to motorboats. The logging industry will survive without the last virgin pines in the state. Industry will not crumble under a BWCA mining ban.

Don Fraser's bill is not the expression of dreamy, impractical ideas of armchair conservationists. It is an attempt, quite practical from a scientific standpoint and altogether reasonable from a recreational and esthetic standpoint, to set aside, for this and genera-

ations succeeding, something of our heritage not dedicated to private aggrandizement.

[From the Duluth (Minn.) News-Tribune, Mar. 8, 1977]

BWCA LOGGING NOW FALLS TO CONGRESS—SUPREME COURT WON'T HEAR APPEAL

MINNEAPOLIS.—The battle over preserving virgin timber in Minnesota's Boundary Waters Canoe Area leaped Monday from the Supreme Court to Congress, where battle lines already are drawn.

The court refused to review a decision which allowed timber companies to log in the wilderness areas. The refusal ended nearly five years of litigation by the Sierra Club and the Minnesota Public Interest Research Group, and in effect, gave the loggers the go-ahead to harvest virgin timber.

However commercial loggers have voluntarily refrained from logging until July to give Congress time to consider the issue.

"It means that legislation to protect the boundary waters has become that much more urgent because no longer is any court action possible to halt logging in the virgin forests," said Michael Milgrom, an attorney for MPIRG, which first filed suit to stop logging in November 1972.

Milgrom's group and the Sierra Club now will begin lobbying for a bill introduced by Rep. Donald Fraser to ban logging throughout the boundary waters.

The logging industry, which cheered the high court decision, is backing a compromise bill introduced by Rep. James Oberstar to declare 625,000 acres as wilderness and 527,000 acres as recreation. The recreation area would be open to logging, snowmobiling and seaplane and boat traffic. The Oberstar bill also prohibits mining in the whole boundary area.

Logging in the BWCA was first suspended in 1973 when a federal court ruled that the Wilderness Act of 1964 prohibited logging in the virgin forest land. The 8th U.S. Circuit Court of Appeals reversed that decision last summer.

In urging the Supreme Court to block further logging, the research group said logging could cause "irreparable damage . . . upon a unique and irreplaceable natural resource."

The BWCA is visited annually by thousands of people for a variety of recreational purposes on its many lakes and waterways in the Superior National Forest.

The U.S. Forest Service, which manages the entire national forest, has divided the BWCA into two zones—prohibiting commercial logging in a 600,000 acre "interior" zone but allowing it in a 400,000 acre "portal" zone. About 150,000 acres of the portal zone are virgin forest.

The appeals court ruling has no effect on future sales. The district court's ban on future sales will remain in effect pending preparation by the Forest Service of a Superior Forest Timber Management Plan and its accompanying environmental impact statement.

The Supreme Court's decision ends four years of litigation and makes preservation legislation "that much more urgent," said Michael Milgrom, an attorney for the research group.

He said logging was under a moratorium pending the outcome of two bills now before Congress which would prohibit logging to one degree or another in the Boundary Waters area.

Fraser said over the weekend he has 38 sponsors in the House on a bill to ban logging in the entire BWCA.

[From the Duluth (Minn.) Herald, Mar. 7, 1977]

LOGGERS WIN BWCA BATTLE

WASHINGTON.—An appeal aimed at blocking renewed commercial logging in Minnesota's huge Boundary Waters Canoe Area was turned down by the United States Supreme Court today.

The justices refused to review a decision by the 8th U.S. Circuit Court of Appeals that logging designated under existing timber sales may be resumed.

Logging in the one-million-acre BWCA, located within the Superior National Forest, has been suspended since 1973 when a federal court ruled that the Wilderness Act of 1964 prohibited logging in the virgin forest land of the BWCA.

The appeals court reversed that decision last summer.

In urging the Supreme Court to block further logging, the Minnesota Public Interest Research Group said the lower court's decision could cause "irreparable damage . . . upon a unique and irreplaceable natural resource."

The Boundary Waters Canoe Area has been visited by millions of persons for a wide variety of recreational activities centered on the area's many lakes and waterways.

The U.S. Forest Service charged with managing the entire national forest, has divided the BWCA into two zones—prohibiting commercial logging in a 600,000-acre zone but allowing it in a 400,000-acre zone. About 150,000 acres of the smaller zone are virgin forest.

Commercial logging, carried out under six separate sales contracted between 1959 and 1968, continued through 1973. The remaining timber to be logged is on about 5,500 acres of virgin forest, less than one per cent of the BWCA's total virgin forests.

The research group told the high court that extensions of the logging contracts were not adequately reviewed under requirements of the National Environmental Policy Act which require environmental impact statements, and that all logging in virgin forest land is prohibited by the Wilderness Act.

The appeals court ruling allowing continued logging carried no effect for future sales. The district court's ban on future sales will remain in effect pending preparation by the Forest Service of a Superior National Forest Timber Management Plan and its accompanying environmental impact statement.

[From the St. Paul Pioneer Press, Mar. 8, 1977]

CONGRESS MULLS BWCA ISSUE

The battle over preserving virgin timber in Minnesota's Boundary Waters Canoe Area leaped Monday from the Supreme Court to Congress, where battle lines already are drawn.

The court refused to review a decision that allows timber companies to log in the wilderness areas. The refusal ended nearly five years of litigation by the Sierra Club and the Minnesota Public Interest Research Group (MPIRG), and in effect, gave the loggers the go-ahead to harvest virgin timber.

However, commercial loggers have voluntarily refrained from logging until July to give Congress time to consider the issue.

"It means that legislation to protect the boundary waters has become that much more urgent because no longer is any court action possible to halt logging in the virgin forests," said Michael Milgrom, an attorney for MPIRG, which first filed suit to stop logging in November 1972.

Milgrom's group and the Sierra Club now will begin lobbying for a bill introduced by Rep. Donald Fraser, D-Minn., to ban logging throughout the boundary waters.

The logging industry, which cheered the high court decision, is backing a compromise bill introduced by Rep. James Oberstar, D-Minn., to declare 527,000 acres as recreation. The recreation area would be open to logging, snowmobiling and seaplane and boat traffic. The Oberstar bill also would prohibit mining in the whole boundary area.

Logging in the BWCA was first suspended in 1973 when a federal court ruled the Wilderness Act of 1964 prohibited logging in the virgin forest land. The 8th U.S. Circuit Court of Appeals reversed that decision last summer.

In urging the Supreme Court to block further logging, MPIRG said logging could cause "irreparable damage . . . upon a unique and irreplaceable natural resource."

The BWCA is visited annually by thousands of people for a variety of recreational purposes on its many lakes and waterways in the Superior National Forest.

The U.S. Forest Service, which manages the entire national forest, has divided the BWCA into two zones—prohibiting commercial logging in a 600,000 acre "interior" zone but allowing it in a 400,000 acre "portal" zone. About 150,000 acres of the portal zone are virgin forest.

GEORGE L. BURGER

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. JOHN L. BURTON. Mr. Speaker, I would like to call the attention of the Members to the passing of a great human being. George L. Burger, a self-made man, began his career 62 years ago by

hawking newspapers as a kid in front of the Ferry Building and ended it as the commercial king of the waterfront.

Mr. Burger died Friday of a heart attack at Peninsula Hospital in Burlingame, where he was undergoing treatment for a blood clot in his leg.

Mr. Burger grew up in San Francisco's Mission district. His father died when he was 11 years old, and he went to work selling papers to help support his mother and five brothers and sisters.

Mr. Burger eventually went into the potato business with an initial stake of $6.32. He parlayed that stake into a big enterprise that grows and buys potatoes throughout California.

Along the way, he acquired leases that made him the dominant entrepreneur on Port of San Francisco lands. He ended up running the Franciscan Restaurant in Fisherman's Wharf, parking lots, gasoline stations, and an office complex.

More importantly, after having become a success himself, George Burger never lost his identity with the downtrodden or common people. His charity and generosity is legendary throughout California.

He donated tremendous sums of money in the traditional sense to traditional charities. Additionally, however, he gave countless tens, twenties, and even hundreds of dollars to individuals who were either down and out or "temporarily on shorts." He is responsible for the college education for several young persons whom he knew were in need of financial support that would enable them to continue their education.

Mr. Burger is survived by his wife, Helen, who resided with him in San Mateo; his son, Kenneth, of Salinas; his brother, Louis, of San Francisco; his sisters, Florence Bassett of Los Gatos, Eileen Burger, of San Francisco, and Kate Colbert, of Sacramento, and three grandchildren.

He will be missed not only by his family, but by people in all walks of life. I am sure that the Members would like to join me in expressing sympathy to his family.

BYELORUSSIAN INDEPENDENCE DAY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. RODINO. Mr. Speaker, on March 25 we recalled with pride and sadness the brief but valiant attempt by the people of Byelorussia to gain their freedom from Russian domination.

Following the Communist revolution, the Byelorussians acted quickly to secure their liberty, proclaiming their independence on March 25, 1918. The newly established Byelorussian Democratic Republic soon adopted a constitution which provided for free elections and guaranteed basic human rights. Within a matter of months, however, troops of the Soviet regime crushed the new government and self-determination became little more than a dream for the Byelorussian people.

Mr. Speaker, I join with all Americans of Byelorussian descent, and all freedom loving people throughout the world, in the hope that the day will arrive when these courageous people attain the liberty they so fervently desire.

WASPS

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. WHALEN. Mr. Speaker, I am pleased to join with a number of my colleagues in introducing today a bill which would grant official recognition to the Women's Air Forces Service Pilots, commonly known as WASPS. The effect of this legislation, besides commending their fine service to the Nation during the Second World War, would deem such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration. Benefits applicable to other World War II servicemen would become available to them; however, payments for periods previous to enactment of the act would be prohibited.

Congress and the Nation are deeply indebted to the millions of veterans who have worn the uniform of their country, and I believe our gratitude is rightfully shown in the various forms of assistance provided through our laws.

Mr. Speaker, I do not think this gratitude and recognition should be denied to the more than 800 present survivors who also courageously served their country during wartime in such a unique and effective fashion.

During their brief existence, from September 1942 until December 1944, the 1,000 WASPS ferried 12,600 aircraft a total of 9,200,000 miles to different parts of the United States and Canada, and served as instructors and technicians in special training operations. They flew every military aircraft manufactured at the time, from the smallest trainer to the Superfortress B29 and the early jet. Some of their major training duties included towing target sleeves behind planes so fighter pilots and antiaircraft batteries could practice shooting live ammunition at a moving target, test-flying a range of new aircraft, and breaking in newly rebuilt or repaired engines. For these dangerous duties they received $250 per month and one dress uniform, work uniform, and overcoat.

I am priviledged to have three former WASPS living in my district, and I am indebted to one of them, Mrs. Codye Gwen Linder—WASP Class 44-5—of Centerville, Ohio, for supplying me with background information on the WASPS. Mrs. Linder served in the Training Command during the Second World War and was stationed in various parts of the country. At Egland Air Field in Florida she ferried planes to auxiliary bases and in Greenwood, Miss., she flight-tested rebuilt planes. One of her most dangerous jobs included towing target sleeves for antiaircraft battery practice in Laredo, Tex.

According to Mrs. Linder, many WASPS attended officers training school and took military courses along with male military pilots without any special treatment. They were on 24-hour duty call and were required to live in official military housing, subject to military rules, regulations, and discipline, and were required to march in reviews. Of the 38 WASPS who gave their lives in service, it is known that one was flying copilot with a male military pilot. The dead pilot's family received the normal benefits—military burial with full honors and insurance—while the WASP copilot was awarded none of them. Her family did not even have the right to display a Gold Star.

The legislative effort to accord recognition to the WASPS as active duty personnel began in 1943 with the introduction of a bill which would have provided for the militarization of the WASPS by commissioning them into the Army Air Forces. The bill failed to pass, and the WASPS were disbanded in 1944. Little was heard from the women pilots until last year when a bill was introduced by Senator BARRY GOLDWATER, himself a former Air Corps overseas ferry pilot, which would have provided certain health and hospital benefits to the WASPS. The provisions, which passed the Senate, were stricken from the final version of the act.

To date, Mr. Speaker, three national veterans groups support this legislation; The Retired Officers Association, the Reserve Officers Association, and the Air Force Association.

I hope the Veterans' Affairs Committee and the whole House will act favorably on this legislation as soon as possible to extend the honor and recognition owed these brave women.

UNIVERSAL VOTER REGISTRATION QUESTIONED

HON. J. KENNETH ROBINSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. ROBINSON. Mr. Speaker, the Goochland Gazette published in Manakind-Sabot in my congressional district, has studied President Carter's universal voter registration proposal and has concluded that it "would only allow for voter fraud which would wipe out and eliminate any benefits derived from easier registration."

I insert the editorial in full for the benefit of my colleagues:

ARE ALL DRIVERS' LICENSES VALID?

Voter registration will be virtually nonexistent under a plan President Carter will propose to Congress this week. Voters would be able to register for Federal election on

the voting day, simply by showing either an identification card or a valid driver's license, or another acceptable form of identification.

There is many a teenager around today with a valid driver's license, but with a false date of birth, in order to allow that teenager to buy beer. With this type of driver's license, would it allow someone under 18 years of age to vote in a national election?

Illegal aliens can easily obtain social security numbers, unemployment compensation and welfare payments. Even though they are in this country illegally, would their identification cards allow them to vote in a national election, even though they are citizens of another country? If universal registration is to come, maybe it would be better to use as an identification, the BankAmericard or Master Charge. The banks, which issue these cards, are certainly more exact in obtaining dates of birth, residency, or whether the person, to whom the card is issued, is actually a U.S. citizen.

Universal Voter Registration would only allow for voter fraud which would wipe out and eliminate any benefits derived from easier registration.

VOTING RECORD OF CONGRESSMAN JONATHAN B. BINGHAM

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BINGHAM. Mr. Speaker, over the past 2 months, I have missed, or have not been recorded, on several rollcall votes. I wish to record here what my positions would have been had I been recorded as voting:

Rollcall No. 12, motion to take up House Resolution 222 establishing a Select Committee on Assassinations; "yea."

Rollcall No. 13, amendment to House Resolution 222 to delay full scope investigations by the Assassination Committee until it makes recommendations; "no."

Rollcall No. 14, motion to pass House Resolution 222; "yea."

Rollcall No. 17, House Joint Resolution 240, to give congressional approval to certain international fishery agreements; "aye."

Rollcall No. 19, House Resolution 252, instructing Committee on Standards and Conduct ascertain whether Members accepted valuable gifts from Republic of Korea; "yea."

Rollcall No. 20, H.R. 692, amending the Small Business Act to increase bond guarantee authority; "yea."

Rollcall No. 24, motion to authorize a special gold medal to be awarded to Miss Marian Anderson; "yea."

Rollcall No. 46, motion to provide for consideration of H.R. 2846 to amend the John F. Kennedy Center Act to authorize funds for certain repairs; "yea."

Rollcall No. 47, motion to recommit H.R. 2846 to Committee on Public Works with instructions to report it back containing an amendment that would reduce the authorization by $1.4 million; "no."

Rollcall No. 48, motion to pass H.R. 2846; "yea."

SHIP AND CREW ENJOY MAINE HOSPITALITY

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. EMERY. Mr. Speaker, no one would dispute that relations between military personnel and the people of communities neighboring their installations or where they work have not always been rosy. And both sides must be complimented for "going the extra mile" to improve relations in this "town and gown" relationship between the military and their civilian neighbors.

Bath, Maine, is not the home of a military base, as such, but has the Bath Iron Works Corp., a private shipyard which constructs and overhauls many naval vessels. As you and my colleagues will note from the following article written by an enlisted sailor who serves aboard the U.S.S. *Detroit* presently undergoing overhaul at Bath, relations between the crew of the *Detroit* and the local community could not be better.

Mr. Speaker, I commend to your attention the article, "Life in the Yards: From Detroit to Bath * * * And Back Again" by JO1 Jerry Atchison, which appeared in the November 1976, issue of the U.S. Navy magazine All Hands as an example of a situation which is becoming the rule rather than the exception. This is an excellent account of how a shipyard, its workers, local citizens, and businesses have welcomed the officers and men of a Navy vessel, and of how the hospitality and warmth of the town has been received and appreciated by the sailors.

The article follows:

LIFE IN THE YARDS

(By JO1 Jerry Atchison)

Every morning at 6:45 AM, CWO 3 Richard Church, USN, commutes from Bath, Maine, to Detroit. And, every evening he makes the return trip. It's a routine he'll follow until next March or April.

Church isn't a millionaire traveler nor has he discovered the ultimate TAD ripoff. He's the ship's Bosun aboard the fast combat support ship USS *Detroit* (AOE 4) which can be found these days berthed at the Bath Iron Works, adjacent to cranes, buildings and equipment—a ship in the middle of overhaul.

A ship overhaul, technically, is an extensive period of time set aside for major ship repair and refurbishing. But, for the sailor who experiences one—and most do—overhauls conjure up a mixed bag of emotions. Borrowing from Dickens, overhauls have been described as "the best of times . . . the worst of times."

"They may not be the best or the worst times," said one *Detroit* sailor, "But they sure are *different* times."

And so they are. During an overhaul, the familiar seagoing routines give way to controlled pandemonium as civilian shipyard workers swarm over the decks, ripping out the old and installing the new.

Bath, Maine, is only a 19-minute flight north from Boston, but a world away from the big city hustle and noise. Nestled between the Kennebec River and the low, pine- and birch-covered hills of Maine, it is a town of 18th and 19th century homes.

In the middle of town is the Bath Iron Works and towering over both the Iron Works and the town is USS *Detroit*. The Navy ship has become an important member of the community—a kind of long term houseguest.

Detroit's skipper, Captain Guy Crane describes the relationship: "In my book the difference (between this and some other overhauls) has been the great attitude on the part of the Bath community regarding *Detroit* . . . It's a family and 'hometown' kind of feeling that best describes the situation."

Friendly relations between sailors and townspeople are not a mere dividend—they are essential. The ship is shut down—no air-conditioning, fresh water or waste disposal—so much of the crew must live in the small local community and all go on liberty there.

Officers and chiefs have been put up in local motels. Other senior petty officers stay at two-men-per-room barracks at nearby Naval Air Station, Brunswick. Although the remainder may live aboard a refurbished berthing barge tied alongside *Detroit*, many have opted for apartments in town.

"We've joined in—become a part of the community," said Church. "When the call went out from the local hospital for emergency donations of blood, the crew turned out in force. That's one example of the town needing us just as we need the town."

The relaxed mix of sailors and civilians is highlighted at the main gate to the shipyard.

Early every workday morning, shipyard workers and sailors mingle as they head from town to *Detroit* and the day's work.

Seaman Keith Wiley is one of those. "I'm sharing an apartment with others in town," he said. "We get a bit crowded sometimes, but it's nice to get off the ship in the evening, particularly after the long hours we put in at work."

Three times a day sailors can be seen strolling to a nearby church. The building enjoys this unusual daily popularity because it has been converted, by the shipyard, into a chow hall. The stained glass windows help counter the typical Navy galley atmosphere.

As sailors make their way to the church-turned-galley, Bath residents greet them from the steps of large old seafaring captains' homes built during the 1800s.

The friendly feelings are not lost on the sailors. *Detroit* is undergoing a complex overhaul which means a lot of hard work and long hours for all. Friendly people, however, make the job much easier.

When at sea, *Detroit's* job is as complex as the multifarious overhaul she is now undergoing. She is a multimission ship, almost the size of an aircraft carrier—with a crew of only 600. Operating at high speeds, the ship furnishes rapid, simultaneous delivery of petroleum products, ammunition, freight, provisions and mail to "customer" ships while steaming close alongside.

"We do the jobs of stores ships, ammo ships and oilers, all rolled into one—with only a fraction of the crew," said Church, who is also one of the men responsible for seeing supplies get passed successfully from ship to ship.

In only a minute, *Detroit's* equipment can transfer enough fuel to fill the tanks of 1000 family cars. She completely resupplies the Navy's largest aircraft carriers, furnishing everything from food to fuel, in four to six hours. And, she can do all these things at speeds up to 30 knots.

The six-year-old ship has performed all these tasks at a considerable pace. Her many deployments with the 6th Fleet in the Mediterranean have taken their toll on men and machinery. It was time for her maze of winches and rigs to be repaired or replaced, her miles of wiring to be inspected and her bulkheads to be chipped, primed and painted.

"When you realize that many pieces of our equipment had only an estimated five years between overhaul requirement under normal usage and then consider we've had

more rigorous than normal operating schedules, you come to appreciate why its time for *Detroit's* overhaul," Church said.

He speaks over the deafening noise of the shipyard. All around, chipping and jackhammers, winches and other equipment together create a battering sound that subsides only at the end of the day.

Decks are stewn with cables and lines running from ship to shore, worklights are strung through passageways and up ladders. The huge shipyard crane gingerly lifts a bulkhead that had been cut away earlier and sets it on the pier.

And over the whole ship swarm sailors and shipyard workers. Hundreds of tasks must be performed by hundreds of men in only a few months. Jobs are broken down into the number of manhours required for each. The manhours are matched up against the time remaining in the yard and the work effort increases.

The ship, once so familiar to the crew, is undergoing a rapid transformation. Well-known passageways between work spaces are sealed off as work continues, leaving some sailors momentarily puzzled, looking for a new route to their jobs. The elevators, normally used to haul supplies from storage areas below deck up to staging areas, are filled with the debris of the job at hand.

Sailors facing many days of hard work ahead find some consolation. Weekly hops have been scheduled between nearby NAS Brunswick and Norfolk—*Detroit's* home port. Those who have not brought their families to Bath look forward to these weekend trips. Sailors have enrolled in evening classes at nearby colleges and technical schools. Spectator events are offered in the area which provide reduced admission to *Detroit's* crew.

"And a lot of guys have their cars here so they can zip down to Boston for a weekend or over to Brunswick," Church said.

The work being accomplished in *Detroit* represents more than two years of planning by hundreds—both on the ship, in Bath and in Washington, D.C. Millions of dollars are being spent to ensure the ship can perform her mission at peak efficiency.

It is work that requires long hours on the job, separations from family and friends and life in a different environment. But it is necessary work, for *Detroit* and for all Navy ships. Although the inevitable overhaul will probably never win a popularity poll among Navy people, it does represent a unique experience, and produces an equally unique life style.

And, like all experiences, it has some advantages. As SN Wiley put it, "You know, I've never been to Maine before. I'm kind of enjoying this."

BILL PROVIDES A SECOND CHANCE

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. HANNAFORD. Mr. Speaker, I would like to call to the attention of my colleagues an error that appears in the synopsis of my bill to provide a second chance for civil service retirees to elect a survivor annuity. On page 8742 of the RECORD of March 23, H.R. 5486 and H.R. 5487 are described as granting civil service retirees a second chance to elect a survivor annuity within 1 year from the date of retirement. Although this is true, the thrust of the bill is to permit all retirees to elect a survivor annuity within 1 year of enactment of the bill or 1 year of retirement, whichever is later, if they neglected to do so at the time of retirement.

I refer any of my colleagues who are interested in this legislation to my statement on page 8876 of the March 23 CONGRESSIONAL RECORD, which outlines the major provisions of my bill.

I regret any inconvenience this has caused.

PUBLIC'S BEST INTEREST IS TO KEEP FARMERS IN BUSINESS

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. COLEMAN. Mr. Speaker, the Congress and the administration are busy reviewing the Agriculture and Consumer Protection Act of 1973, in search of proper review and extension of the basic farm legislation of our Nation.

We have completed many hours of hearings in the House Agriculture Committee, which I am honored to serve on, and the administration has now provided the Congress and the people of the country with its views on the extension of the farm legislation.

As we prepared to undertake the important task of moving from study to legislation action, it way well serve all consumers and farmers for us to read and remembered the suggestions offered by the Kansas City Star in its most recent Sunday editorial. So that other Members of the Congress can have an opportunity to peruse that editorial, a copy is hereafter provided:

PUBLIC'S BEST INTEREST IS TO KEEP FARMERS IN BUSINESS

What does it cost a farmer to grow a bushel of wheat? And how much of that, if any, should be guaranteed by the federal government, which is to say taxpayers? Above all, it seems to us, the answers to those questions are fundamental to the debate over the form and substance of new farm legislation now before Congress.

The two questions also serve as a fountainhead for additional discussion. The question of whether the United States, Canada and possibly other wheat exporters should band together to fix a world price for wheat springs from them. So does the matter of grain reserves, which would be mostly wheat in so far as the U.S. is concerned. There are other considerations involved, but they all go back to those bases.

Some Kansas wheat growers among others argue that, with costs soaring as they have and with uncertain prices, grain growers before planting should be assured of a price floor on grain so they will not be wiped out financially in a year like 1977, when there is an abundant wheat supply and reduced demand, which have pushed prices very low. Bob Bergland, agriculture secretary and a Minnesota farmer who grows some wheat, said the time may have arrived when the nation has a responsibility, call it moral or economic, to prevent basic food producers from going broke. His reasoning is that the U.S. and the world eventually will need that wheat and that Congress and the President should take steps to guarantee that production will continue. A commodity price agreement would help, Bergland believes.

Conversely, the grain trade and many other farmers and their organizations argue with equal volume that U.S. and world wheat prices should and will find their own level through the marketplace. That level will signal producers whether to seed more, less or the same wheat acres. That is the philosophy embodied in the 1973 Farm Bill expiring with this crop year.

The facts are that no one knows what it costs to produce a bushel of wheat, because of land costs. Actual production costs—that is, seed, tillage, fuel, fertilizer and so on—can be tallied readily and generally apply across the board. But those who clamor to recover costs of production run into problems quickly when one farmer, who purchased his land cheaply years ago, or, perhaps, inherited it, compares his land costs with those of a neighbor who paid hundreds of dollars an acre more in recent years for the same kind of land, perhaps just across the road. Thus, production costs vary legitimately as much as $1.50 or $2 a bushel even in the same Kansas county.

Further, it may be argued that it is in the public's best interest to keep all of those rural businessmen, who are the farmers, in business if the public wants to continue eating. But is it a responsibility to insulate them from financial catastrophe? There have been well-publicized exceptions, but as a rule the individual business entrepreneur is left to swim or sink on his own merit. Some farmers say that shouldn't apply to their activities because their production switches cannot be turned on and off quickly and that is true. Hence, that argument continues, once the public calls for all-out production, there is a public obligation to protect those who respond.

Bergland, in attempting to unravel those threads and weave them back into a new fabric, has added at least two more factors: Weather and the possibility of international agreements. He is of the opinion that the latter will work and already has held preliminary talks with the Canadians to join in a new international wheat agreement. He also believes weather is the final key, that sooner or later the world is going to need all the wheat North America can produce and that a cash market will exist for it. Meanwhile the excess over demand for a year, or two, or three should be stored, preferably on the farm under publicly financed storage and loan provisions of new farm legislation.

However, the United States already has in plain sight its largest carry-over of wheat in more than a decade, something over 1 billion bushels. Canada has one-half as much in storage. Soon, in a matter of weeks, combines will begin cutting a new crop, starting in Texas. The size of the 1977 crop, of course, is yet to be determined by weather in Kansas and the Southwest between now and June. Regardless of that, this country is not—nor is it likely to be—short of wheat. Thus looms the big question again: Should U.S. farmers be guaranteed protection to continue unrestricted production of a crop for which there is no demonstrated demand?

The new agriculture secretary may be correct in his assumptions on weather and the possibility of workable international agreements. The major flaw in that approach, it seems to us, is that its net effect would be to set prices artifically for a quantity of product for which there may not be buyers. That involves a huge gamble, which could prove costly to producers and consumers alike.

REORGANIZATION ACT OF 1977

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. WALKER. Mr. Speaker, I introduced an amendment today, in the nature

of a substitute for H.R. 5045, the Reorganization Act of 1977, which the House will consider tomorrow. Quite simply, the amendment I will offer during tomorrow's debate is identical to the reorganization bill, H.R. 3131, originally proposed by my distinguished colleague, the chairman of the House Government Operations Committee, Representative JACK BROOKS.

My amendment will be offered because of my profound belief that H.R. 5045 as reported by the Government Operations Committee is unconstitutional. As a member of that committee, I feel compelled to offer my colleagues an alternative to voting for a bill that "stands the Constitution on its head."

H.R. 5045 will delegate legislative authority to the Executive. Such a delegation of authority usurps the constitutional lawmaking power of Congress and corrupts the principle of separation of powers.

To say that the House of Representatives should not pass unconstitutional legislation sounds like a statement of the obvious; yet, that is what is being proposed tomorrow. I will offer an alternative that fits within our constitutional framework. I urge my colleagues to consider the choices carefully.

CONVENTION ON CULTURAL PROPERTY ACT

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. MIKVA. Mr. Speaker, there is an increasingly serious problem of illegal international trade in national art treasures. The expanding and worldwide market for objects of archeological and ethnological interest has led to wholesale pillage in some countries.

Almost 5 years ago the Senate gave unanimously—79 to zero—its advice and consent to the United States ratification of the UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property. However, since implementing legislation of this convention is required prior to deposit of the instrument of ratification and since no such legislation has been enacted, American ratification is not yet complete. So today I am introducing a bill to implement the operative articles of that convention.

The purpose of the convention is to combat this increasing illegal international trade in national art treasures. The State parties to the convention undertake to protect their own cultural heritage. In addition, they are also required to prohibit the importation of cultural property stolen from museums, public monuments, or similar institutions, and to take appropriate steps, upon request, to recover and return such cultural property. They also agree to take what measures they can, consistent with existing national legislation, to prevent its museums and similar institutions from acquiring cultural property which has been illegally exported from the originating country after the convention has been put into force.

I should point out that the 25 countries who have accepted the convention are generally those countries whose national treasures were being pillaged. If this bill is enacted, the United States would be the leader among those countries who have been the recipients of these treasures in the past. We ought to do no less.

"A LETTER TO THE COMMISSIONER OF BASEBALL—LET THE NEW YORK YANKEES PLAY IN CUBA, WHEN CUBA STOPS SUBVERTING HUMAN RIGHTS IN AFRICA AND LATIN AMERICA"

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. KEMP. Mr. Speaker, there is a controversy underway concerning the disapproval by Mr. Bowie Kuhn, commissioner of baseball, of a proposed exhibition baseball trip by the New York Yankees to Cuba. In this period of manifold Cuban aggression against the third world, particularly on the continent of Africa, I would like to present for the RECORD the text of a letter that I have sent to Mr. Kuhn. It also includes excerpts from an editorial by Marvin Stone, editor of U.S. News and World Report which I think are well worth repeating:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 28, 1977.

Mr. BOWIE KUHN,
Commissioner of Baseball,
New York, N.Y.

DEAR COMMISSIONER KUHN: I want to commend and congratulate you on your reported opposition to a trip by the New York Yankees to Cuba. We should not lose sight of the long-term behavior of the Castro regime.

Cuban forces in Angola were the principal cause of the pro-Soviet forces winning there. They are now aiding the Katanga insurgency against neighboring Zaire. Cuban troops are known to be present in at least six other African nations. Premier Castro has just completed a personal swing through seven countries on that continent to drum up support for a coordinated assault against the interests of the free world.

Since 1959 the Castro government has carried on serious aggression against at least four Latin American states together with lower level efforts against at least six others.

Let me quote from an editorial by Mr. Marvin Stone in the March 28 U.S. News and World Report:

"Cuba still resolutely exports violence and revolution. Not only do Cuban troops remain in Angola, but it is now clear Castro and Russia's Brezhnev are teaming up to wipe out American influence in all of Africa.

"Cuba refuses to renounce its anti-U.S. crusade in this Hemisphere, including support for the independence movement in Puerto Rico.

"Cuba gives no evidence that it will free the handful of U.S. citizens it has jailed, much less the possibly 15,000 Cuban political prisoners.

"Cuba gives even less indication that it will pay off the 1.8 billion dollars in compensation claimed by Americans for property that was seized after Castro came to power in 1959.

"Cuba under Castro is still a bad neighbor. It is ironic that we should be aiming to remove the trade embargo against Cuba at the very time we are tightening one against Rhodesia."

Mr. Commissioner, we are not talking about just any Eastern European bloc state, but about the country that is directly active in communist aggression in the Third World. And we are not talking about just any American business enterprise, but about the game of baseball, which has a very special place in America's heart (second only to football).

Once again, I applaud your stand.

Yours very truly,

JACK KEMP,
Member of Congress.

A FRESH LOOK AT THE WORK INCENTIVE PROGRAM

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. FRASER. Mr. Speaker, in the midst of the current debate on welfare reform we cannot forget that the majority of people about whom we are talking are women with young children.

The framers of welfare policy have long taken an ambivalent view of this population, unsure if these women should be encouraged to stay home to care for their children or be forced into work to get off welfare.

The work incentive program, WIN, requires all AFDC recipients with children over 6 years of age to register for work. The wisdom of this requirement has been debated since the program's inception, growing particularly intense when WIN evaluations revealed an unacceptable number of unsuccessful job placements.

Esther Wattenberg, an associate professor at the University of Minnesota's school of social work recently wrote a guest column for the Minneapolis Star outlining her objections to the mandatory work requirement of the AFDC program. I believe her statement is insightful and appropriate and submit it here for my colleagues to consider as we move forward in our examination of the relationship between work and welfare:

ABOLISH FORCED-WORK RULE

(By Esther Wattenberg)

Should all welfare mothers be required to work?

Like many questions raised in social policy debates, values, myths and misperceptions confuse the facts.

Consider these items:

Almost a third of the women on AFDC do work and the reason they are on welfare is that their jobs do not produce a livable wage. (The median wage for divorced women in 1975 was $5,600; most of their jobs were at the lowest end of the labor market, without advancement opportunities and without benefits as health for the workers and their children.) These are women, chiefly, who are eager for work and training and will work even when it is not to their economic advantage to do so.

Another third of the women on welfare are in a revolving door, caught between combinations of work and welfare. Typically,

these are women whose expectations and experiences were those of being absorbed in child rearing and homemaking. "Fired" from their jobs when abandoned by husbands, or "voluntary quits" when they terminated impossible marriages, they find themselves unprepared and unable to cope with the world of paid work. They try, and the case records bulge with painful evidence of their failures. Breakdowns, depression and health problems alternate with their attempts to make a go of it in the work and training projects designed by the Work Incentive (WIN) program.

Yet another third of the welfare caseloads are older women, generally with large families, minimum education and almost no experience either before or after marriage in paid work outside of the home. Their lives are riddled with the domestic despair of troubled family lives, recurring crises of one sort and another and an unusually high incidence of personal poor health.

Summing up, then, we see that women on welfare are as diverse as the general population. Their potential for paid work in the labor market varies enormously.

It is one thing to say that not all women have the capacity to become economically independent. It is quite another matter, however, to deal with an ideology that believes that all women on welfare are lazy and willfully incompetent.

This strongly held belief fostered the coercive WIN program which, beginning in July 1969, mandated that all women on welfare with children over 6, with few exceptions, must register for work and training even if it costs the taxpayers more than letting them stay at home.

A small mountain of studies has looked into the perplexing questions of women, work, welfare and the work requirement features of the WIN program. Researchers agree that the WIN program with its forced work requirement is costly, impractical and ineffective. (Fewer than 5 percent of the women have been placed in jobs which have led to economic independence.)

The overwhelming conclusion is that a forced-work requirement which overlooks the harsh realities of a recession and the varying potential for paid work among women is based on assumptions which are factually incorrect and strategically a disaster. We have seen the spectacle of limited resources spent shuffling women who are unprepared for the rigors of the labor market in and out of training programs and makeshift jobs. Meanwhile, women who are ready and eager for work are denied the education and training that could upgrade their marketable skills.

Work expectations and work behavior have changed dramatically for women over the past few years. Paid work outside of the home has a high value among most women, including those on welfare. Forced work requirements are inappropriate. Women turn to AFDC when they have no other alternatives. They cannot support themselves for three primary reasons: Their work in the home is not perceived as having economic value and therefore they are not tied to a Social Security system which could come into play when the income through a marriage is cut off; the economic system is not creating enough jobs at a livable wage for all those who want to work and the occupationally segregated labor market keeps women in poor jobs at poor wages with poor benefits; and finally, there are large groups of women whose life-style and life experiences have not prepared them for work outside of the home, i.e., taking care of themselves, economically speaking, when they are no longer cared for by a man.

The problems are serious and formidable. By the year 1985 the female population of child-bearing age (20-29) will have increased by 36 percent over that of 1970 and if divorce proceeds at the present rate, we can predict that 4 million women taking care of 9 million children will end up at some time or another on public assistance.

If, as a nation, we decide not to allow women with children over 6 the option of remaining in their homes to do the work of child-rearing and homemaking, then the least we can do is to provide a whole range of contemporary support services that will enable women to move from the confines of home to the rigors of the labor market: confidence, marketable skills, and the coping strength to manage home and paid work. Of course, it will all be meaningless unless there are available jobs with livable wages attached to them.

The guideline for welfare reform should be self-selection. There are more than enough women ready and able to take advantage of the meager resources of training, education and available work. For those who are not ready, a new set of services can be offered. Abolish the forced work requirement.

CENTER FOR THE ARTS

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BYRON. Mr. Speaker, last week was a happy week for my hometown, Frederick, Md. An unselfish family there presented the city with a valuable gift to be enjoyed by current and future generations of Fredericktonians.

Dan and Alyce Weinberg and their children, Danyce and Aldan presented the city and its fine arts council with the keys to the magnificent Tivoli Theatre to be used as permanent center for the performing arts.

The beautiful Tivoli Theatre opened in 1926 and boasts a rare inplace concert theater organ. The Weinberg's wonderful gift is a source of pride to Frederick and a lasting tribute to the Weinberg family. theater organ. The Weinberg's wonderful

So they may share my excitement over this wonderful gift, I wish to share with my colleagues this editorial which appeared in the Frederick Post:

CENTER FOR THE ARTS

"The reaction has been tremendous!"

This is the immediate response to the announcement made Tuesday by Mayor Ronald N. Young that Frederick City may soon have its very own "arts center"—a long-time dream given reality by the generosity of a local family.

Mr. and Mrs. Daniel H. Weinberg (Dan and Alyce) and their children, Danyce and Aldan, have handed the keys to the Tivoli Theatre over to the City and its Fine Arts Council to be used as a permanent center for the performing arts.

The "Tivoli" stands on one of the most valuable pieces of property in Downtown Frederick, 20 W. Patrick St., just west of the "Square Corner."

There is only one "string" attached to this offer by the Weinberg family, and that "String" favors the community. That is, the agreement (which must be ratified by the Board of Aldermen at its next meeting) is to continue indefinitely, "as long as the Tivoli is utilized for the purpose for which it is intended"—as a center for the arts. It should be no other way.

The offer by the Weinbergs also includes a "purchase price" for the "building and its contents." The "price" of $19,500—and this amount has already been more than "covered" by pledges of contributions from arts patrons eager to energize the project—is so insignificant in contrast to the value of the property, that it should be considered only a "token"—an expression from the community that it is, in fact, dedicated to the task of turning this rare gift into a most successful center for the performing arts.

President Fred Stenger of the Fine Arts Council said the offer by Mr. and Mrs. Weinberg—Mrs. Weinberg has worked with the Arts Council since it was created—has been "in the mill" for nearly two years. Many community organizations have supported the idea and have pledged to it their wholehearted support.

Preliminary plans call for county-wide use of the facility for drama, concerts, the dance, pageants, conventions, town meetings, exhibitions and other uses related to the performing arts.

The center will be operated by the Arts Council, with a permanent "oversight" committee of three—one designee of the Weinberg family, the Mayor of the City of Frederick, and the president of the Arts Council—responsible for major decisions relating to the center.

Further planning calls for "total civic involvement in repair, restoration and beautification" of the Tivoli, and plans are being made for a community-wide fund-raising drive to support the renovation program.

The Tivoli, which in 1976 marked the golden anniversary of its opening on Dec. 23, 1926, boasts the only "in-place concert theatre organ in the State of Maryland."

The Tivoli Organ is considered by the great concert organist Ray Brubaker of Baltimore and the national organ society as one of the "rare treasures" of its kind still in use. The organ was a "victim" of the Oct. 9, 1976 flood, and Mr. Brubaker and his fellow organ afficionadoes—including Richard F. Kline Jr. of Frederick—"have moved pretty well along toward total restoration" of the organ at their own investment of time and labor—"a labor of love."

There is swelling up in the community an exciting enthusiasm for this unique undertaking. Plans for a major fund-raising effort for the arts center will soon be announced, and public support in terms of both "dollars now" and "usage later" will be needed.

The generosity which has made this project such a possibility has marked it for certain success. And we are sure, and those many groups and individuals who have been involved to date are confident, that the Frederick Community will join hand-in-hand in making the arts center dream come true—the only fitting tribute we can give "in kind" to match the spirit of generosity being shown by Dan and Alyce Weinberg and their children.

RESOLUTION IN OPPOSITION TO ACTIONS OF THE GOVERNMENT OF UGANDA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. MINETA. Mr. Speaker, my colleague, Representative BEDELL, and I have introduced a resolution condemning the actions of the current Government in Uganda and further stating that it is the sense of the House that these actions deserve the condemnation of the entire world community. We have obtained 32

cosponsors for the resolution, and I think this already demonstrates the widespread concern within this body.

President Carter has clearly stated his concern for human rights in our world. If we in the Congress share this concern—and the signatures on this resolution demonstrate that we do—then it would seem clear that we should make our concerns known. The purpose of this resolution is to voice those concerns as clearly as possible.

We hope that the Government of Uganda will recognize the growing worldwide concern over the reports of repression and actions which are repulsive to all people, and that the government of that country will adopt policies which recognize the importance of human rights and decency.

HILLIARD SCHULBERG

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert an article which appeared in a recent Beverage Journal concerning my good friend Mr. Hilliard Schulberg who, for many years, was the executive director of the Retail Liquor Dealers Association here in Washington, D.C.

Hill, as he is affectionately known around the Halls of Congress has already retired and has been doing some public service work with the Commission on Paperwork in the Federal Government. He has done an excellent job with this Commission.

The article follows:

NLSA COUNSEL TO BE HONORED UPON RETIREMENT AT CONVENTION

Hilliard Schulberg, who has retired as general counsel of the National Liquor Stores Association, will be honored at the organization's annual convention in the Hilton Hotel, Las Vegas, Nevada, April 24–28.

Mr. Schulberg served in his post for 25 years and acted not only as the attorney for the Association, but as its spokesman in the halls of Congress and with Federal agencies.

Largely through his efforts, legislation detrimental to the industry was defeated, beneficial legislation was enacted, including the elimination of the retail $200 excise tax, crime insurance, the limitation of tax-free alcoholic beverages which might be brought into the country by tourists and the elimination of overseas ordering of beverages by consumers. Also were the removal of the restriction against the industry to obtain small business loans and the curtailment of package goods sales at military installations, were also projects spearheaded by Mr. Schulberg. He also played a prominent part in defeating legislation at the national level which would have banned the can and non-returnable bottle.

Mr. Schulberg's efforts have been lauded in the Congressional Record and in letters from members of Congress.

A native of Brooklyn, New York, Mr. Schulberg presently resides in Rockville, Md. with his wife, Nettie. He is looking forward to moving to Florida, playing golf, fishing and doing public service work.

APRIL MEMORIES OF 1917

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. HANNAFORD. Mr. Speaker, with the Vietnam war behind us but fresh in our memories, it is seldom that we consider the significant sacrifice of the World War I veterans. The reluctance of past Congresses to award these distinguished patriots a modest pension in recognition of service to their Nation has disturbed me greatly.

I have cosponsored H.R. 1459, a measure which would partially remedy this obvious slight. It is hoped that my colleagues will, too, realize the injustice done to World War I vets and support this legislation when the opportunity presents itself.

In the meantime, Mr. Speaker, I would like to submit for the consideration of this Congress the following editorial remarks which appeared in the April 1977 edition of the Torch, the official monthly of the Veterans of World War I, U.S.A., Inc. I found the reflections quite moving and would like to publicly congratulate the author, Mr. Harold B. Say, who edits the Torch. His comments and persuasive and I daresay that all of us should spend a moment with the editorial and think about the World War I veteran:

APRIL MEMORIES OF 1917

Many World War I veterans forget how old they are until they regard their roster of war day comrades who are gone—about five out of six. Of the more than four and a half million who went to the colors in 1917–18, less than 800,000 of them are alive today.

It is not a cheering fact but April is a logical month to think of those vanished days of youth. And April is a month of new hope for us of the northern half of the world welcoming another Spring of new promise.

Sixty years ago this month, a woefully unprepared United States declared war on Germany. The Germans, who had generally triumphed against the Western Allies in months just passed, now had at hand a vast reservoir of troops by virtue of Russia's collapse. The Kaiser and few of his military chiefs were worried by America's entrance into the war. Our Regular Army could muster only 70,000 men. With a scantly trained National Guard the total uniformed strength was around 196,000.

Our primary Allies, the British and French too, were doubtful that our aid could come in time to count.

With a staff of 60 officers and 67 enlisted men, General Pershing sailed for France on May 29. In just a year later the United States had nearly a million men in France. Search as one may, he cannot find a military feat in modern times to equal this mighty achievement.

Many young Americans of raw courage and determination watching the battle immediately in their sector were sure when the Armistice came that America had won the war. Our forces had a mighty hand in shifting the balance, but they alone only helped defeat Germany.

The late Lidell Hart, outstanding historian of World War I, probably sums the case up best with this paragraph:

"The United States did not win the war, but without their economic aid to ease the strain, without the arrival of their troops to turn the numerical balance, and, above all, without the moral tonic which their coming gave, victory would have been impossible."

In retrospect it is an unbelievable task these boys from farm, school and factory accomplished, when half prepared, set forth across the seas to meet the world's most powerful fighting machine.

It is good, this April to reflect back on their miraculous accomplishment. Too, it is a good time for members of the Congress to weigh again their accomplishment and to consider how little a great country rewarded them for their task so courageously performed as compared with benefits or rewards bestowed on later veterans.

A modest general pension would mean perpetual Spring and hope to many of them. They have only a few years left.

WORLD FREEDOM DAY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DERWINSKI. Mr. Speaker, I have just received a copy of the documents of the 1977 World Freedom Day, which was held on January 23, before 15,000 people in Taipei, Taiwan, Republic of China.

Freedom Day activities commemorate the positive decision in 1952 in Korea, of over 14,000 Chinese POW's to renounce communism and establish themselves on Taiwan rather than to return to Red China.

I wish to insert the translated text of the addresses given by the President of the Republic of China, His Excellency Yen Chia-kan, and Dr. Ku Cheng-kang, honorary chairman of the World Anti-Communist League, and followed by the rally declaration of the 1977 World Freedom Day:

ADDRESS BY HIS EXCELLENCY YEN CHIA-KAN

Chairman Ku, Distinguished Guests, Ladies and Gentlemen:

World Freedom Day is a shining symbol of the triumph of freedom over slavery and justice over evil. It is highly significant that the Republic of China has convened this World Freedom Day Rally attended by anti-Communist leaders, youth representatives and freedom-seekers of the world. The message of freedom and anti-Communism will be carried behind the Iron Curtain and around the globe. I want first of all to extend a heartfelt welcome to the distinguished guests who have come from faraway lands.

Twenty-three years ago on the Korean battlefield, more than 22,000 Chinese and Korean prisoners of war renounced Communism and chose freedom. Their aspiration was fulfilled. The 14,000 Chinese swore to "return to Taiwan with their whole hearts and devote their entire lives to the destruction of Communism." They adamantly turned their backs on the cajolery and coercion of the Chinese Communists and fearlessly returned to the embrace of their free motherland. Their courageous act shook the Peiping regime and inspired the oppressed people behind the Iron Curtain to oppose tyranny and seek freedom. To perpetuate this dauntless spirit of determined struggle, the Republic of China designated January 23—or "123" for short—as Freedom Day, an occasion which has won worldwide response and support. In 1968, the World Anti-Communist League unanimously decided to

designate January 23 as World Freedom Day, thereby augmenting the movement's dynamic momentum in opposing slavery and upholding liberty, and forging a spiritual prime mover in the struggle against Communist despotism.

The present world situation involves a basic confrontation between free democracy and Communist totalitarianism. All of the turmoil is to be attributed to Communist provocation. Free democracy and Communist totalitarianism are totally incompatible; they cannot coexist for long. Farsighted people have clearly understood that the Communist system of thought and way of life contradict humanitarianism and must be excised. At the same time, the aggressive expansionism of the Communists has increasingly exposed their vicious intention of communizing the world and enslaving humankind. Free world "peaceful coexistence" with Communism is out of the question. If the free world countenances the Communists' export of violence, is seduced by their smiling faces and harbors illusions of "balance of power," "détente" and "neutrality" in the hope of temporary peace, it will fall straight into the enemy's trap of disunity. This will give the Communists further opportunities for infiltration and subversion and for winning the world by defeating the free nations one by one. The Communists have no love for any free nation and will never really change their hostile stance against the free world.

President Chiang Kai-shek often said: "Communism is the cause of aggressive wars and the Chinese Communist regime is the chief culprit in all aggressive wars." We have always adhered to anti-Communism in our national policy. We have nothing in common with the Communists and will never accept "accommodation" nor "détente" with them. Our ongoing struggle in this bastion of national recovery is aimed at lighting the torch of hope for freedom cherished by our compatriots on the mainland and eradicating the source of the danger facing all mankind. This rally is calling upon the world to "Distinguish friend from foe! Fight against Communism through unity!" We want to rouse the free world, help everyone understand the evil nature of Communism and bring together all of the forces upholding freedom and justice. The free world will then be able to cast aside the illusion of reconciliation with the Communist bloc, provide positive support to enslaved peoples and, through joint efforts on both sides of the Iron Curtain, destroy Communism and Communist tyranny so as to assure a free and democratic way of life and reach our goal of a peaceful and stable world.

Since Mao Tse-tung's death and Hua Kuo-feng's appearance on the stage, the Chinese Communist factional struggle for power has become increasingly violent. The course of struggle has produced a cul-de-sac of death and desperation.

This situation is completely out of control and further struggle can lead only to greater confusion. The Peiping regime is actually an embodiment of violence, endless conflict and contradiction. It recently made public a Maoist document entitled "The Ten Major Relations," a revealing account of sharp internal antagonisms portending the imminent collapse of the Chinese Communist Party. Our compatriots on the mainland are facing a storm of bloody persecution and massacre. Every Communist cadre and every soldier is caught up in fearful awareness of his personal danger. All are waiting the opportunity to rise up. This will be the moment that triggers all-out heroic struggle against Communism and tyranny on behalf of freedom. Today we are sounding our own summons to "mobilize for combat and fight against Communist tyranny in the name of freedom." All the people of our country must seize this opportunity and create a new horizon through their combined endeavors. We must rally behind the banner of the *San Min Chu I* National Revolution, mobilize our whole strength and support the anti-Communist uprisings of our compatriots. We should build a force of righteousness to liberate our compatriots soon and thus hasten the destruction of Chinese Communist tyrannical rule.

World developments bear out the truth that mankind's freedom quest is an irresistible common aspiration. The triumph of freedom and the vanquishing of despotism are ordained by history. Let all peace-loving people of the world unite and join hands for the shoulder-to-shoulder march toward this great and shining goal. I pray that success will quickly crown our struggle against Communism and slavery and for freedom and peace.

Thank you.

THE SITUATION CONDUCIVE TO VICTORY FOR FREEDOM AND THE NECESSARY ENDEAVOR TOWARD THAT VICTORY

(By Dr. Ku Cheng-kang)

Distinguished Guests, Ladies, Gentlemen and Young Friends:

World Freedom Day is a brilliant symbol that stands for man's opposition to Communist tyranny and enslavement, effort to restore the enslaved to freedom, and endeavor to safeguard the freedom of those who are free. The present vigorous awakening of freedom forces—a striking contrast to the confusion of divided Red regimes—is fully in line with the rule of history that tyranny cannot escape the fate of replacement by freedom.

THE FUNDAMENTAL TENDENCY OF STRUGGLE BETWEEN FREEDOM FORCES AND RED TYRANNY

In the struggle of free democracy against Communist tyranny, two fundamental characteristics are now apparent:

One is the definite further rise and growth of freedom forces.

The other is the irretrievable withering and fall of Red tyranny.

The Chinese mainland situation provides a most powerful testimony. In the more than 20 years of their mainland rule, the Chinese Communists have persistently resorted to cruel means in their attempt to destroy freedom forces and determination to win freedom. But the forces and the determination have kept on their growth, development and expansion. Before Mao Tse-tung's death, the cycle of Peiping's internal power struggle was already malignant enough. His death was immediately followed by the explosion of struggle by Hua Kuo-feng against Chiang Ching's "gang of four" and furthermore by a wide-spread opposition to Hua kuo-feng. The power struggle is not just an internecine quarrel. It is a reflection of the confusion resulting from the regime's administrative failure under pressures from those who stand against tyranny.

Communist rule elsewhere is not any better. The Red rule in Russia has lasted half a century, but forces of freedom are increasingly stronger as demonstrated by the continuous rise of Russian intellectuals against Kremlin rulers in the recent years.

East Europe has been under Russian control for more than three decades and Moscow has repeatedly used its bloody fist against freedom-lovers in those satellite states. But the stream of freedom-seekers from Eastern Europe continues and rulers of the nations there have been attempting to free themselves from the Russian grip. Forces for freedom and determination to win freedom can never be stifled.

The tyrannical rulers of North Korea, Vietnam, Cambodia, Laos and Cuba are likewise facing strong opposition from the enslaved masses. Anti-Communist revolutions are possible everywhere at any time now that the determination of those in fetters to win freedom is growingly stronger.

The global confrontation between freedom forces and Communist forces has already entered a new stage.

In this new stage, freedom forces are pulling themselves together to check Communist expansion. Steps are being taken and will continue to be taken against Communist tyranny.

The present new stage will see further continuous rise and growth of freedom forces. Communist forces will be split further and fall farther into oblivion.

TWO LESSONS AND THREE PRINCIPLES

The lessons of past setbacks are that Communist expansion and rampancy had resulted from free world willingness to make compromise, not from any failure of freedom forces. The lessons also are that Communist forces are always posed for expansion by taking advantage of weaknesses on the part of freedom forces.

These lessons furthermore are that although the anti-tyranny revolution behind the Iron Curtain is not yet successful, this does not mean that Communist rule has been accepted by the enslaved people or that Red regimes are solid and strong. The fact is that the present situation is a result of the free world indifference to the Iron Curtain people's fight against tyranny and to their being trampled by the Communists.

Because of the Communist expansion, more than a billion people still are kept in chains and exposed to possibilities of willful killing. This is a serious threat to the freedom of mankind and should never be forgotten or ignored by us. We should firmly grasp the present trend that is highly advantageous to the rise of freedom against Communism. All the free nations and all those who are now free should persist in the following three principles for the preservation of freedom:

First, we cannot hope that freedom can be safeguarded through negotiation with the Communists, for peace thus gained can only be precarious. We must in the name of justice bring forth strength against expansionist Communists.

Attempts to check the Communists through negotiation have made the free world suffer a series of heavy losses and humiliating defeats beginning with the fall of the Chinese mainland and continuing all the way to the communization of Indochina. Free nations should never repeat such mistakes and must understand that negotiation is an indirect Communist approach to expansion. Our call is: Beware of this Red trick!

Second, we cannot hope to preserve freedom through arrangement of multipolar check and balance, for this can bring nothing but a stalemate of contradictions. We must strengthen the freedom camp and bring it against the united front Red schemes.

Even though the Red bloc is plagued by its own multifront contradictions, the goal is same: communization of the world, burying of free nations and enslavement of mankind. Internal contradictions do not stop the Communists from stretching their hands out everywhere. Any attempt to win one group of Communists over as checkmates against another group or to make one group strong enough for the control of another will only accelerate the Communist race for power and expansion against the free world. Tactics of multipolar check and balance are all highly dangerous.

Third, we must never, in our attempt to protect freedom, tolerate Communist tyranny and seek further coexistence of freedom and slavery. We must support the anti-tyranny revolution waged by the enslaved masses behind the Iron Curtain.

In order to safeguard freedom, we must

work simultaneously in two directions: enhancement of freedom forces outside the Iron Curtain for the dealing of blows to Red expansionists and injection of strength into Iron Curtain people so that they can effectively oppose Red tyranny. Growth of freedom forces outside the Iron Curtain is a must, but such forces behind that curtain should not be left to wither. We should not, in our effort to foster the unity of freedom forces, permit the strength of the captive freedom-lovers to be drained. When we strive to check Communist expansion, we cannot let the Communists use the manpower of more than a billion captive people as capital for expansionist moves. To protect freedom, we must see to it that no infringement upon freedom is permitted and that no one is barred from access to freedom.

WHAT THE FREE WORLD HOPES THE UNITED STATES WILL DO

Because of the need to safeguard freedom against Communist expansion and the necessity to aid the captive Iron Curtain people's struggle for freedom, all the free nations and people of the world are now eagerly hopeful that the new U.S. Administration will give full play to America's traditional stand for freedom and justice, firmly abide by its commitment to promote human freedom, thoroughly implement its policy of peace and freedom through strength, and enhance the unity of freedom forces in all the world for a final defeat of the Red forces of enslavement.

In the 200 years since her founding, the United States of America has time and again involved herself in global struggles against totalitarian forces and has thus made important contribution to world peace and human freedom. This record commands the respect of all freedom-lovers. In the recent few years, however, American's prestige and the free world trust in her have been greatly damaged because of the mistaken U.S. attempt to deal with Communist expansion through talks about dente. The fall of Indochina resulted from the serious defeatist policy of compromise in the face of Communists. The Russian and Chinese Communist competition for greater spheres of influence also shows that the road to multipolar check and balance ends with a dead alley. President Carter emphasizes a stand for morality and human rights and has made it clear that Americans can never be indifferent to the fate of freedom elsewhere. We earnestly hope that his government will firmly uphold this lofty principle for freedom, squarely face the Communist crimes against human rights, immediately abrogate the Shanghai Communique that contradicts the international law and goes against the wishes of the majority of Chinese people, halt all moves toward so-called "normalization of relations" with the Chinese Communists, abandon the thought that Peiping may be used as a check against Moscow, brush aside the hope that assistance to the Red Chinese may bring about a better control of the Russians, and never again entertain the idea that Peiping's power struggle may produce a moderate faction that can be befriended. The United States must be constantly aware that she should abide by treaty obligations and defense commitments for her friends and allies, strive to strengthen the free camp, provide assistance to the concerned free nations for the establishment of island chains of defense and common security systems for the defense and advancement of freedom, and encourage these nations to join forces for a final defeat of the Communist forces of enslavement.

MAKE FULL USE OF THE ADVANTAGEOUS SITUATION AND WIN A FINAL VICTORY FOR FREEDOM

Ladies, Gentlemen and Young Friends:

Mankind must win and safeguard freedom and therefore has to continue the struggle against tyranny and totalitarianism. This struggle is now in a new stage beneficial to the attainment of a final victory. Especially encouraging is the spreading anti-tyranny campaign of the 800 million people on the Chinese mainland. Workers, peasants and young people are actively taking part nad more and more soldiers and cadres also are responding. An all-out anti-Communist revolution is in the making as the regime is bogged down in an unprecedented confusion of power struggle.

In this connection, it should be recalled that Red scourges in Asia and the turmoil started by global Red expansion stem from the Communist usurpation of the Chinese mainland. At present, however, the anti-Communist revolution on the mainland is about to start a chain reaction of angry campaigns for liberation everywhere behind the Iron Curtain.

In the current struggle to preserve freedom, free nations must place priority on aid to the Chinese mainland people's anti-Communist revolution so as to touch off an all-out action of enslaved Iron Curtain masses to free themselves. Elimination of Red Chinese tyranny must come first if a breakthrough is to be achieved for the destruction of the entire Communist camp. This is the historical mission of the "World Freedom Day" Movement that we are promoting. We must positively bring about the unity of freedom forces abroad and here on the Republic of China's national reconstruction base with those on the Chinese mainland, combine cultural anti-Communism behind the Iron Curtain with armed action against tyranny, and furthermore reinforce the Iron Curtain people's self-effort through provision of strong support from the free world. Let us remain unwaveringly confident that freedom will triumph and tyranny will perish. Let us make full use of the present favorable situation, hew a bright future for the victory of freedom, and usher in a new era of freedom before long.

DECLARATION: 1977 WORLD FREEDOM DAY RALLY OF THE REPUBLIC OF CHINA

As a shining symbol of the global stuggle against slavery and for freedom, this World Freedom Rally of the Republic of China today has once again demonstrated the continuously stronger action and combat strength of those who take part in this surging anti-Communist movement of historical mission.

We the rally participants feel very much encouraged by the vigorous rise of growingly vigilant freedom forces the world over, by the steady decline of the confused international Communists, and particularly by the worsening power struggle of the badly split regime on the Chinese mainland where an all-out revolution can explode at any moment against Communism and tyranny. We firmly believe that this rally will exert powerful influence to bring about and further promote a grand unity of all those behind and outside the Iron Curtain who stand for freedom.

All of us present at this rally deeply and bitterly regret that millions of people have been deprived of freedom as a dire consequence of the free world power politics, secret diplomacy and policy of detente in the face of Communists in the first half of the 1970s. As President Carter of the United States has just been inaugurated and the world situation is entering a new stage, mankind is facing a crucial moment of decision to see if the future is to be secure and blessed or torturously precarious. But we are confident that the distinct sound of the World Freedom Day bell and the roar of people everywhere calling for the winning and safeguarding of freedom will keep the new U.S. Administration vigilantly awake for the thorough implementation of the lofty principle that President Carter has advanced in his inaugural address. This way, all threats to freedom will be removed, man's dignity will be enhanced, and a world of justice and peace fully in line with the spirit of human rights and completely free from wilful control by any individual will finally be created.

The rally participants are aware that absolutely no one can ignore the enslavement, oppression, hunger and painful death suffered over the years by the countless millions under Communist rule in Asia, Europe and Latin America. The governments and peoples of free nations must realize once and for all that they will also lose freedom unless they help the enslaved ones shake off their fetters. It must be understood by all that the correct path to lasting feedom is to restore the captive masses to freedom and that self-survival is possible only through mutual assistance.

The participants firmly believe that Peiping's malignant cycle of savage power struggle has now reached a stage where the mainland freedom forces are ready for a final battle against Communism and tyranny. This struggle of the people will before long be enhanced through the participation of those soldiers and cadres who have turned or will turn against Communism as a result of disenchantment in Communist rule. The combined forces will explode in the form of an ever more powerful all-out anti-Communist action, and the regime, exposed to impacts from within and outside, will finally collapse and die. Free nations must closely watch such future developments and provide timely push for an early arrival of that day.

We also know that the fanatic Russian expansionist attempts in the free world and the multifront advances of Asian and African Communist forces have been prompted by America's one-way policy of detente and desire to pit the Chinese Communists against the Russians. Free nations must squarely face this harsh fact, bring out strength against the Red schemes of global aggression and subversion, and positively support the campaigns for freedom now going on in Soviet Russia, Eastern Europe, North Korea, Indochina and Cuba so that the captive masses will be finally freed fom chains.

With the above-mentioned common understanding in mind, we the rally participants solemnly urge our fellow countrymen and all those others in free quarters and Iron Curtain areas who similarly stand for freedom and against slavery to pay due attention to the following needs and expectations:

We want all the free world governments and peoples to take keen note of the fact that the international Communists, be they split or standing together, are unchangeably bent on world communization and human enslavement. Free people of all races, nations, regions, religions and occupations should be closely united for the establishment of an international anti-Communist frontline through common defense for regional security as well as through cultural intercourse and economic cooperation. In this decisive battle of freedom-lovers versus Communist forces, we must strive on shoulder to shoulder for the final victory of freedom.

We sincerely hope that President Carter will give full play to the stand for freedom the United States of America has maintained since her founding, live up to his solemn declaration that the Americans can never be indifferent to the fate of freedom elsewhere, resolutely cast aside the policy of detente with atrocious Communist slave-masters, establish a new foreign policy that respects humanity and freedom and can effectively preserve overall global security, abrogate the Shanghai Communique that contradicts the international law and goes against the wishes of the majority of Chinese people, stop moving toward so-called "normalization of relations" with the Chinese Communists and,

with sustained moral strength, strive to bring free nations strongly together for the winning of the sacred war that has to do with the very survival or discontinuation of world culture and human freedom.

We call upon all the anti-Communist fighters behind the Iron Curtain to rise at this moment as the Red forces are divided and withering, concentrate all the available strength, and fight ever more fiercely against slavery and for freedom. We support the liberalization campaigns waged by intellectuals, workers, peasants and others in Soviet Russia, support the struggles for freedom continued by East Europeans against their Communist rulers, support the Cuban people's action in the name of justice against Communism and tyranny, and support the anti-Communist national recovery efforts of South Vietnamese, Cambodians and Laotians. We will together take revenge on the Communists for their heinous crimes.

We demand that all those of the Republic of China, be they at home or abroad, to pool strength and for a thorough implementation of the anti-Communist national policy so as to regain the Chinese mainland and restore the enslaved compatriots to freedom. We furthermore urge a great unity of all those behind the enemy line on the mainland—coordination of the working masses with intellectuals, combination of rural and urban folks, and cooperation of soldiers and cadres with their anti-Communist fellow countrymen—for struggles to let workers follow lines of their own choice, permit farmers to have lands and enjoy the fruit of what they plant, free the intellectuals from bonds of academic and ideological endeavor, allow the people to manage their own enterprises, assure life and security, and enable every individual to choose his or her way of life. Our demand moreover is that all these struggles be combined in a rigorous unity of all freedom forces behind and in front of the enemy line for the final overthrow of Red tyranny.

Our late President Chiang Kai-shek once told the world that the Republic of China or any other nation for that matter absolutely could not tolerate the division of her land and people into free and enslaved portions. This World Freedom Day Rally therefore emphatically calls the attention of all those nations and peoples that are now free to observe the fact that the spring thunder of freedom has started shaking the Iron Curtain and that we should grasp the present opportune moment for redoubled joint endeavor to safeguard the existing freedom and free those who are not free. By removing Communist forces, the roadblock to human freedom, we shall build a new world entirely free from threats of enslavement!

FORCED RETIRMENT AT 70

HON. THEODORE S. WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. WEISS. Mr. Speaker, recently Congressman HENRY WAXMAN and I introduced H.R. 5226, legislation to amend the Age Discrimination in Employment Act. Our bill would extend coverage under the act to persons who are 65 years of ago and older and would prohibit seniority systems and employee benefit plans which require the retirement of persons who are 40 years of age and older.

On March 25, 1977, the New York Times ran an article which graphically illustrates the problem which our bill addresses. Dr. Kenneth T. Skelton, a 70-year-old State University of New York at New Paltz professor, is being forced to retire because of his age. The State University of New York has a mandatory retirement age of 70. Dr. Skelton has been on the New Paltz faculty for the past 14 years and is scheduled to be retired this August. Actually, Dr. Skelton was 70 last August but because of widespread support on campus his retirement date was extended 1 year.

To date, some 3,000, of 5,000, SUNY-New Paltz students have signed a petition calling for an end to mandatory retirement as a result of age in general and in Dr. Skelton's case specifically. Opponents of legislation such as Mr. WAXMAN and I are proposing claim that we must retire people out of our economic system in order to make room for those who will be entering the labor market. Apparently the students at SUNY-New Paltz do not believe this argument from which they are supposed to benefit. I think that the New Paltz students correctly see that two of the greatest problems in employment today concern young people and older Americans. Their alliance, therefore, has become an almost natural result of State and Federal employment policies.

We need a comprehensive employment policy which will allow the Dr. Skeltons to keep working, which will help the SUNY-New Paltz students find work when they enter the labor market and which will insure that there are jobs for people who fall between Dr. Skelton and his students as well. Currently, our system seems to be saying that those who are between the ages of 25 and 65 are acceptable employees and that those who do not fall within this range may not be totally acceptable. We must attempt to deal with the root of the problem: We must create more jobs. But, we must not develop a comprehensive employment plan which is complicated by age limits.

Mr. Speaker, I would like to share the article about Dr. Skelton's situation with my colleagues. Also, I would like to say that I am pleased by the actions of the students at SUNY-New Paltz. It is a refreshing sign to see once again student activism for a truly worthy cause. The article follows:

NEW PALTZ STUDENTS PROTEST A PROFESSOR'S FORCED RETIREMENT AT 70

NEW PALTZ, N.Y., March 24.—There have been no angry campus confrontations and, unlike the student demonstrators of the 1960's, they have not seized their classrooms or laid siege to the school administrators.

But with quieter tactics and no less determination, more than half of the 5,000 undergraduates at the State University here have taken up a cause of the 1970's—a campaign to prevent the forced retirement of a revered, 70-year-old sociology professor who calls himself a "conservative radical."

"An employable unemployed old person is just as unemployed as an employable unemployed young person," said Dr. Kenneth T. Skelton, who has taught here for 14 years and is slated to lose his job next August because of his age.

STUDENTS TAKE ACTION

"I simply enjoy teaching," he explained in an interview, adding: "I very much want to continue teaching."

On behalf of Dr. Skelton, who is described by his supporters as sensitive, dynamic, hard-working and scholarly, a student group calling itself the Committee Against Mandatory Retirement has done the following:

Collected the signatures of more than 3,000 New Paltz undergraduates on petitions urging an end to forced retirement because of age in general and in Dr. Skelton's case in particular.

Obtained the support of Assemblyman Maurice D. Hinchey, a Democrat-liberal of Saugerties, who has introduced a bill that would eliminate age as a basis for retiring state employees and has promised to introduce a special interest bill to save Dr. Skelton's job if the broader measure fails.

Sent a delegation of students to Albany to lobby for Assemblyman Hinchey's measure in the Legislature.

Sought the support of local senior citizen's groups and other civil organizations.

Scheduled a rally for Monday morning on the campus to provide a forum for various speakers, including a representative of the State Office for the Aging, faculty members and other supporters of Dr. Skelton.

University officials have taken no formal position on the question of Dr. Skelton's retirement, but there is strong support for him among faculty members and students alike.

"To judge a person on race, sex or age is discriminatory," said 21-year-old Richard Adler, a senior from New Paltz. "There should be other criteria to judge a person's competency."

Howard J. Fleischer, 19 years old, a freshman from Roslyn, L.I., who has gathered hundreds of signatures on petitions, considers Dr. Skelton more than merely competent. "He's equivalent to having almost five teachers," he said.

And in a sense, Vanderlyn R. Pine, the chairman of the university's sociology department, agrees. He noted that Dr. Skelton has a total of 370 students in his 12 lecture and seminar hours each week, more than four times the average of 87 students on the rosters' of State University faculty members.

By law, retirement for state employees is mandatory at age 65, but the policy of the State University's trustees makes the retirement of professors obligatory at 70. Dr. Skelton was 70 last Aug. 8, but with the help of campus supporters obtained a one-year extension.

PLEASED WITH SUPPORT

Dr. Skelton, who teaches Introduction to Sociology, Social Theory, and Sociology of Literature in addition to a teaching assistants' seminar, did not seek popular support on campus for another extension, but he is gratified by it.

"It's spontaneous student support with no encouragement from me," he said, sitting in an office with books heaped all around him.

He brushed away a question about his workload. "I'm a very fortunate man," he said. "My vocation is my avocation."

Dr. Skelton, who had been a teacher and dean at Briarcliff College for 14 years before joining New Paltz in 1963, described himself as "a conservative radical," which he defined as "someone who goes to the root of things—to the origins."

Assemblyman Hinchey, a graduate of the State University at New Paltz and a friend of Dr. Skelton, said the prospect of his mandatory retirement was "a blatant example of discrimination based on age."

Dr. Skelton's wife, Jeanette, put it another way: "He's a born teacher—born many years ago, unfortunately."

THE BLACK PRESS EMBATTLED TO SAVE BLACK YOUTH

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. JOHN L. BURTON. Mr. Speaker, I would like to call the Members attention to a speech given by Dr. Carlton Goodlett, president of the National Newspaper Publishers Association, Black Press of America.

Dr. Goodlett is a distinguished physician, publisher of the Sun Reporter, and a veteran of the Civil Rights movement.

His speech was given on the occasion of the sesquicentennial of the founding of the Black Press in America.

The speech follows:

THE BLACK PRESS EMBATTLED TO SAVE BLACK YOUTH

(By Carlton B. Goodlett, Ph.D., M.D.)

The three oldest organizations in Black America: the Prince Hall Masons, chartered in 1784, the African Methodist Episcopal Church, chartered in 1816, and the Black Press, founded with Freedom's Journal in 1827, were a necessary trio in the drive of Black freed persons to lead the struggle against human bondage, a curse endured by the new republic during its first 87 years. The gathering of free Black men into a fraternal order under the leadership of Prince Hall, followed by the establishment of the first organized Black Church under Bishop Richard Allen, were the primary ingredients which made necessary the development of a news journal to propagate and spread the coalescing demands of free Black persons for the end of slavery in America.

Slavery challenged John Russwurm, and to develop a voice to cry out against human bondage he published Freedom's Journal. Who was to foretell on that memorable day, March 16, 1827, that within 3¢ years the efforts of the Prince Hall Masons, the organized Black Church and Freedom's Journal were to be victorious, with the enunciation of Abraham Lincoln's Emancipation Proclamation?

THE LONG JOURNEY

In this hour of remembrance, we can more adequately prepare ourselves for the serious challenges facing Black America and its guardian press by sketching a mosaic of the 150 year journey from Freedom's Journal to the present, carrying high the torch to light the way along Freedom's Road.

From 1827 until 1863, the mission of the Black Press was the struggle successfully waged against slavery—that crime of indescribable inhumanity inflicted by the white majority upon the Black slave. Since the Civil War ended in 1865 until this very day, the Black freedom struggle has passed through three different periods of action and interaction, like the movements of a mighty, still unfinished symphony.

The first movement, "Accommodation," had Booker T. Washington as its maestro and was one in which the freed slaves eked out a bare existence by accommodating themselves to the vicious system swirling about them.

The second movement, "Adjudication," had a new concertmeister: W. E. B. DuBois, founder of the Niagara Movement which merged in 1909 into the National Association for the Advancement of Colored People. This second movement used the organic law of the land for the redress of grievances; from 1909 to 1954, including the landmark Supreme Court Decision outlawing discrimination and segregation in public education, the NAACP won between 50 and 60 victories for our people. But the wheels of justice turned too slow, which led inexorably to

The third movement, "Confrontation," whose first phase was nonviolent confrontation ushered in by the Montgomery Freedom Walk of 1955 led by Martin Luther King, Jr. At King's assassination, nonviolence died with him, and confrontation entered a second phase—one with no charismatic leader for guidance. The "Negro" disappeared and a new Black man emerged who "ain't scared of Whitey any more, and who don't trust him, either."

Since King's memorable "I Have a Dream" speech in 1963, the dream became, first, America's disillusionment, and then in the ensuing years of riots, America's nightmare. True, new Civil Rights Acts were placed upon the books; but laws without the commitment of men are empty rhetoric. What was really needed was the national will to enforce the 1866 post-Civil War statutes which already guaranteed to the freed men their civil rights, and were only reinforced by the Civil Rights Acts of 1964, '65 and '67.

THE BLACK PRESS

Throughout all the changing passages of this great symphony can be heard the steady drumbeat of the Black Press, faithfully attempting to prick the conscience of the nation, seldom forgetting the propelling dream of the founding fathers of a government guaranteeing to all men life, liberty and the pursuit of happiness.

It is claimed by some that the Black Press is on the decline and on its way out. This is far from the truth. The Black Press intends to blaze its torch up Freedom's Road, waging a continuing struggle against both overt and covert racism—a struggle in which the majority press has played a very negligible and uncommendable role. A study made by the Society of American Newspaper Publishers admitted five years after the Kerner Report that less than 3% of the personnel in mass communications are black, with the lowest percentage in the metropolitan dailies. It seems as though the publishers of White America's newspapers have never heard of racism, or if they have, plan to do nothing about it. This is indeed an indictment of the white majority press, and it strengthens the claim for the survival and viability of a Black Press.

The Black Press is a poor press, often on the brink of economic disaster; yet, despite many difficulties, we intend to become an increasingly strong, more unified and vital force, so that 25 million people can be served by their own fearless advocate.

For the lack of advertising (the life's blood of any free-enterprise newspaper) we are not able to operate at our full potential. In 1975, Blacks earned $70 billion and spent $64 billion, thereby generating more than $1.28 billion in advertising and public relations. For whom? Alas, for the white majority media, including TV, radio and the press!

In times of stress, the Black Press has been the sole conduit to convey the alarm or to structure the promise of hope. Each Black newspaper is as separate as the varied appendages of the body, but called upon physiologically, the Black Press is the arterial system which carries the life blood from the centers of Black power—the church, the institutions of higher learning, the civil rights organizations and the fraternal groups, to the grass roots, as the arteries carry blood from the heart to the tips of the fingers and the toes. This is not a one-way street: the Black Press, as the veinous system, carries back the messages from the grass roots—the farms, the villages, the black ghettos—to the united centers of Black power.

The Black Press is the matrix that gives form and substance to the mural depicting the interrelatedness of all the parts of Black America into a united, majestic whole. With Blacks distributed over the vast American landscape, concentrated in their Black city-states, who will unify them ideologically, who will send the alarm to man the defenses? Of course, the only solely black-owned communications medium, the Black Press!

BLACK YOUTH—AN ENDANGERED SPECIES

One precious thread is woven throughout the fabric of the Black experience: the fact that Black people have and belong to each other. Throughout their American experience, Black men and women have been caught up in the semantics of "individual freedom" as opposed to "freedom for the Black masses." Our unquestioning acceptance of the myth of individual versus mass freedom has permitted the white majority to deal with Blacks as the "tenth American," when in truth our strength lies in the collective concept that we are 11% or 12% of America, numbering millions.

On many occasions we have described 25 million Black Americans as larger in population than 55 nations of Africa, or 156 other nations in the world. Moreover, at this moment in history American Blacks are the most highly educated and professionally trained Black people in the world. While 650,000-odd of our young people are in institutions of higher learning, however, from 500,000 to 600,000 of our teenagers are found jobless, without education, many with police records, in the 25 largest American cities. While Blacks comprise 33.8% of the population of the nation's largest cities, 20% of the nation's unemployed teenagers are Black. More dramatically, 40.5% of Black teenagers find themselves out of school, unemployed, with 32% of these unfortunate youngsters lost irretrievably in the narcotics traffic.

Francis Ward cryptically addresses the subject, "Black Youth—an Endangered Species," in the initial January-February issue of First World Magazine; to quote him:

"The category 'endangered species' is usually reserved for animals or plants whose very survival on Earth is threatened by nature or man; it is used most by environmentalists in reference to wildlife whose existence they want to protect. A careful survey of social and political trends now developing in America, however, should make thoughtful Blacks consider whether our youth—just like the Bison buffalo or Bald eagle—are now threatened with extinction. This might sound like exaggerated scare talk to many . . . but it would not to Native ('Indian') Americans."

Even though 600,000 Black youths in college is an impressive figure, these numbers must be counterbalanced by the fact that probably two to three times that number of Black youth are not attending any school, anywhere—not subject to any discipline or authority, and lacking the skills, education or psychological maturity to become "productive citizens"—a description by the capitalist society of those who produce goods and services. Many of these jobless Black adolescents are still seeking nonexistent jobs. However, many who are at the end of the hope rainbow have simply given up.

To translate statistics: while the actual size is difficult to determine, it has been estimated that from 500,000–600,000 Black youths from 16 to 19 are continually out of work. If we include the under-class, ranging from 8 to 16, while too young to work, they must be counted because far too many of them are committing violent crimes and using narcotics. A conservative estimate of

these endangered Black youngsters would be about one million, living in the 25 largest U.S. cities. These youngsters live on the edge of civilized society. Their most immediate option is crime—first and foremost against other Blacks. The commander of the Homicide Division of the Chicago Police Department recently stated in an interview that the average person found guilty of murder is "male, Black, 18 and under." Louisiana probably is the only state in the nation where there are more young Blacks incarcerated in prison than young Blacks attending college.

Many Black adults, particularly women, are organizing into groups, like the Concerned Women in the War Against Crime in Chicago, to which the White establishment media give a tremendous play. These women are encouraging Blacks to cooperate more closely with the police. Seldom do they attempt to look for or address themselves to a solution of the deeper root causes of crime, which are poverty, miseducation, poor housing, all compounded elements of racism in the American society. The White establishment and increasing numbers of Black-organized anti-crime organizations are rapidly becoming the adversaries of these Black under-class youth who in India would be called "the untouchables." This contradiction of Blacks joining the establishment in pursuit of the wrong solution to the problem of Black crime against property and person is a glaring example of the cruel, vicious contradictions in White capitalist America. First, Samuel Yette in "The Choice: Black Survival—USA," and now Ward in his article "Black Youth—an Endangered Species," warn us that an entire generation of Black youth are becoming useless, expendable, nonfunctional, non-productive human waste material, because the system refuses to educate them or provide for them or their parents.

These young expendables have become the nation's number one social liability; the same system of racism and exploitation which created their despicable lot apparently is readying the machinery for their disposal.

We do not condone Black crime by any spectrum of the age cycle. Obviously, the fear of crime in the Black ghettos is warranted. However, just as Blacks exposed the chicanery and the diabolical nature of Moynahan's description of the Black Family, so must Blacks vigorously reject the White analysis of the Black crime problem, which consistently leaves out the first culprit and villian—America itself—and instead places the blame on young Blacks for not "boot-strapping" themselves out of their poverty. This is a classic American conundrum: the victim of racism, Black youth, is again made the scapegoat for his own victimization!

AGGRESSIVE USE OF ECONOMIC POWER

Despite the economic disparity between White and Black America, Black America is still the ninth wealthiest nation in the non-socialist world, with a residuum of economic power which can be used for internal growth and development.

There are two modalities by which people can change the sordid circumstances of their lives: political power and economic power. While many of the upper class Blacks seem to be making it, the Black masses endure a a wretchedness more desperate than at any time since the First Reconstruction. We must use our economic power to rescue the Black masses! Blacks have a common fate, a common destiny. If Black Americans were not the victims of economic racism, it is estimated that Black incomes would have been $35 to $55 billion more. Since we are the conspicuous consumers and our dollars in the marketplace are multipled by 3; and because of the two-edged sword of economic racism, the nation suffered a loss in the '75 gross national product of from $115 to $165 billion!

Which one of the Fortune Magazine 500 could successfully withstand an economic boycott brought to bear by Black USA as a reprisal against those who victimize us with their economic racism?

Three examples come to us from the Jewish experience by which Blacks might use our economic power to combat racism:

1) The Jews, early in the life of their progeny, as soon as a child develops the capacity to understand concept, identify for their progeny who they are and what they are: Jews are Semites; and the child is told of the great history of the Jewish people. Shortly after developing self-identity, the young Jew must be taught a lesson never to be forgotten: who the enemy is—the anti-Semite, and no means must be spared to destroy anti-Semitism. Blacks, similarly, at the age of conceptual development, must identify for young Blacks who they are. The importance of Alex Haley's "Roots" cannot be over-estimated. Its psychological impact involving a dramatic appreciation by Blacks of their origins and a discussion of the mythology of docile acceptance of slavery was accompanied by a deep sense of psychological awakening on the part of whites, who previously had lived with the myth that Blacks, even in slavery, were the White Man's Burden. Our Black progeny must be acquainted with the beauty of blackness, and the history of the Black man's contribution to world civilization and progress must be vividly pained—for example, the history of the mighty kingdoms of Africa, with its great universities and societies of culture; the domestication of animals, the mining and smelting of precious metals, are the contributions of Blacks to civilization. Next, our Black young must be taught that the eternal enemy of the Black experience is racism, and no means must be spared to destroy it.

2) Jews have always recognized and accepted their responsibility to use their resources to take care of their own. The National Jewish Welfare Appeal is a most important instrument with which internal needs of the national Jewish community are met; the needs of the international Jewish community are responded to in the Bonds for Israel drives. Blacks in 1975 earned $70 billion, while they spent $64 billion—more than any other identifiable group in the nation in terms of the expenditure of its gross annual income for goods and services. Blacks are the 9th wealthiest nation of the non-socialist world; as the Jews, we must use our economic resources in the development of a National Black Community Fund, so that blacks can undergird through self-help and financial support, the intra-group needs of Black America, not only giving aid and assistance to the needy of 25 million Black Americans but also providing leadership in the assistance and development of trade and commerce, and relief to the nations in Africa and other third world peoples.

3) Jews use their economic resources and their political power in forging opportunities for Jews as well as using political and economic means to punish their enemies. Similarly, 25 million Blacks, two-thirds of whom live in America's fifty largest cities, with a 1975 annual income of $70 billion, must use Black economic power and political power as instruments in developing intra-group opportunities for Blacks, on the one hand, and using this political and economic power, on the other hand, to punish the racists who thwart Black progress.

The profits of national and multinational corporations range between 9 and 14% of the gross income before taxes. The 25 largest cities contain more than 100,000 Blacks each, or 33.8% of their population; the 50 largest cities contain 22.7%. No national or mutlinational corporation could withstand the economic boycott of the urbanized Blacks of America. The departure of national merchandisers such as Penney's, Montgomery Ward and Sears from the Black core cities must be stopped. If Blacks withdraw their total patronage from Penney's for three months, while buying from Sears or Montgomery Ward, the corporate officers of Penney's would come to terms with core city Blacks who demand the return of J. C. Penney outlets, with their jobs and other merchandising advantages to the Black core cities.

Blacks in America must develop new techniques in our continuing struggle against racism, both institutional and individual. We must no longer bemoan our political and economic difficulties and plead for justice, but through our masses and our economic strength we must use political and economic sagacity against all enemies who practice overt and covert racism against us.

Those who believe that the fate of Black Americans is, after all, inextricably entwined with that of all the powerless, dispossessed and wretched of the American Earth must present to our youth, the inheritors and architects of tomorrow, their grand design for the raceless society! What are their means and timetables? What viable alternative do they propose now that the Kerner Report describes the USA as a divided society, with a white majority well fed, well clothed and comparatively happy, and a Black minority ill housed, ill educated, underemployed and progressively poorer?

Blacks and their allies must demand of the new occupant of the White House a firm commitment, to use the vast powers of the Presidency: (1) to extend for every citizen the boundaries of personal liberty, security and freedom; (2) to provide decent housing for every American citizen; (3) to provide the best possible education to all of our children; (4) to provide jobs for all; and (5) to provide equal protection under the law.

Blacks must expose and reject the current concept of excessive demand and short supply in the housing industry, which serves to enrich those who control it; Blacks must oppose a national commitment which spends more on pet food for our cats and dogs than on higher education for our sons and daughters. Blacks must expose and vigorously combat discrimination against Blacks in employment, because it costs the nation between $115 and $165 billion a year in lost gross national product. Blacks and their allies must expose and combat the present law enforcement system which favors the higher socio-economic levels of our society, and replace it with a system which makes all agents of the law, from the policeman on the beat to the highest judge, instruments for the protection of the innocent, the apprehension of the accused, and a fair trial for each citizen by a jury of his peers.

For too long, federal and state governments have been subsidizing the large corporate and agricultural interests, while those who desperately need help to escape from the slums, to get a job, to educate their children and to obtain decent medical care, are condemned for violating the "work ethic," while glorifying the "Welfare ethic." Blacks must expose once and for all the myths about poor people and welfare: that some people do not wish to work, that most Welfare recipients are Blacks who have moved to urban areas, just to draw Welfare, that all Welfare mothers do is have illegitimate children, that Welfare is the good life—color TV's and Cadillacs, that most Welfare recipients are cheaters, and that most of the tax revenues go to Welfare. These are all lies! The Welfare system is a cruel hoax that perpetuates the misery of the poor and guarantees that the children forced to rely on

it will never be able to escape the Welfare cycle and be given a fair chance to enjoy the promising, fruitful life, except vicariously on their TV sets.

Blacks must aggressively use the power of the people, the prestige of the Congress, and the refuge of the federal judiciary to protect the nation from any concerted effort to use the instruments of government to serve the expanding greed of the upper classes rather than the expanding needs of the masses.

How does the USA fare today in the four areas of racism cited eight years ago by the Kerner Report? For eight years we have been buffeted by the slogan: "Law and Order must be preserved!" without a clarion call for justice as a prerequisite for that Law and Order. If Black youth cannot find jobs there will be no Law and Order; if the nation continues to tolerate discrimination in housing by unscrupulous real estate brokers and federally and state supervised banks and home loan institutions, there will be no Law and Order; a U.S. Department of Education which fails to press for the elimination of "de facto" segregation in our public schools guarantees the nonexistence of Law and Order in the community; and a power structure which refuses to demand from its police departments and courts full respect for the dignity and equality of Blacks, which allows its police and courts to dispense Black and White justice, cannot enjoy a national community built upon Law and Order.

The continuing struggle in Boston, Los Angeles, Chicago and many of America's other great cities, and the limited victories achieved over the 23 years since the 1954 Supreme Court Decision, are far too meager. For over 23 years, Blacks have been on a treadmill of conversation with the federal, state and local power structures which has not led to any perceptible destination.

While the nation applauded the courageous efforts of South African Black teenagers in their summer of '76 rebellion against apartheid, how many of us recognize in the present violence of Black teenagers what is probably Black American youth's response to the hopelessness they face, in a society which placidly accepts a 40.5 percent Black adolescent unemployment, without any demonstrable concern for programs to relieve the economic racism which causes Black teenagers to rebel? If these Black teenagers-USA approach the final decision: if Black Americans are barred from leading creative, fulfilling lives by an oppressive White majority, Black youth are prepared even at the price of life itself to deny the American dream to their White oppressors.

GUNS VS. BUTTER

A nation must choose between guns and butter. Foreign policy is the mirrored image of domestic policy; the Black Press must combat racism in the international community with as much vigor as it wages the struggle against domestic racism. President Jimmy Carter must be supported in his efforts to end the annual squandering of the world's resources ($330 billion in 1977) on nuclear armaments and his ultimate determination to seek, first, nuclear disarmament and, second, conventional disarmament. 25 million Black voices must join the demands of the third world for food and not super bombers, for shelter and not inter-continental ballistic missiles, for medical care and not nuclear submarines, for education of the world's children and not inter-continental spy satellites.

Today, world peace is guaranteed by the reign of terror through the posturing of the USA and the USSR, the super nuclear giants. The Black Press must develop crusading editors who dare to challenge the status quo and give support to the masses of the have-nots, who are white, yellow, brown, red and Black, who know that there is something better than the present recurring cycle of depression, inflation, mass unemployment, restrictive education, health care and housing for the American masses.

SEARCH FOR A BLACK IDEOLOGY

The challenges of the future are as awesome as the challenges that faced John Russwurm, when he perceived the necessity of Freedom's Journal to challenge slavery; those who questioned his wisdom were unable to visualize that 36 years after the founding of the first Black newspaper, a great president would proclaim emancipation of the nation's slaves.

The Black Press must now marshal the intellectual genius, the fortitude, and the mass strength of 25 million Blacks, against the inequities which are ingrained in the fiber and substance of the American political and economic system. Therefore, the Black Press and Black Leadership must develop a new Black ideology, which will free both the Black masses and even the nation from the ravages of racism.

25 million Blacks and their millions of allies must become the vanguard of the new political process of this nation, providing input into the collective forum, out of which a dynamic new U.S. domestic policy and foreign policy may be forged. The Black Press must lead its constituency, as the spearhead of the people's revolt, to blunt the efforts of the nation's military-industrial-political complex and the multi-national corporations—which apparently are bent on leading us into a nuclear showdown with the USSR. Can it be that those who rule fortress America are determined, even at the price of their own destruction, to either rule America or destroy her?

Black publishers who would be the heirs of such giants as John Russwurm, Samuel Cornish and Frederick Douglass, the mighty trumpeters in the battle against slavery, face a struggle as great and threatening as these courageous predecessors. We must answer the call of tens of thousands of the Black masses who cry for help, the "endangered species" hopelessly enmired in the national racial quagmire.

Tonight, as we celebrate the 150th anniversary of the founding of the Black Press of America, let us not forget: Of each ten Black youths born twenty years after the founding of the National Newspaper Publishers Association—Black Press of America, today, the following startling results have obtained: One of these ten Black males has been convicted of murder, and one of these ten Black youths has been the victim of murder!

PROPOSAL TO BAN OFF-ROAD VEHICLES FROM PUBLIC LANDS

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BAUCUS. Mr. Speaker, on Friday, March 25, I inserted in the RECORD certain materials relating to the rumor that President Carter is about to ban snowmobiles and other off-road vehicles from public lands. Regrettably, a small but important portion of the proposed amendment to Executive Order 11644 was omitted from the RECORD. I am submitting today another copy of the amendment.

For those of my colleagues who would like to know more about this matter, please see pages 9150 and 9151 of last Friday's RECORD. Amendment to Executive Order 11644 on "Use of Off-Road Vehicles on Public Lands" follows:

AMENDMENT TO EXECUTIVE ORDER 11644 ON "USE OF OFF-ROAD VEHICLES ON THE PUBLIC LANDS"

ISSUE PAPER

Executive Order 11644 provides for the regulation of off-road vehicles on the public lands. Under section 3 of the Order, Federal agencies are required to designate specific areas and trails where such vehicles will be permitted to operate. While the Executive Order reflects an urgent concern over the environmental harm caused by off-road vehicles, it is now apparent that some agencies may not complete the designation process for at least another ten years.

It is generally agreed that the environment of the public lands may be seriously degraded during this lengthy implementation period. Indeed, in its "Draft Environmental Impact Statement, Departmental Implementation of Executive Order 11644 Pertaining to Use of Off-Road Vehicles on the Public Lands" ("Draft EIS"), the Department of Interior acknowledged that some "unique and fragile biophysical, archeologic, or historic resources . . . will have been damaged or destroyed irreversibly as a result of ORV use during the undesignated periods." Draft EIS at 56.

To eliminate this threat to the public lands, we propose to amend the Executive Order by adding a section 3A which reads:

SECTION 3A. PROTECTION OF THE PUBLIC LANDS

Notwithstanding the provisions of section 3, where the use of off-road vehicles may cause undue adverse effects on the soil, vegetation, wildlife, wildlife habitat or cultural or historic resources of particular areas of the public lands, the respective agency head shall immediately close such areas to the use of off-road vehicles.

This amendment is clearly consistent with the policies and objectives of the Executive Order. By requiring agencies to take immediate action to protect the public lands from environmental damage, it will insure that the Presidential mandate is fully implemented both before and after specific areas and trails have been designated under section 3.

We propose a second amendment to clarify the original intent of Executive Order 11644 and to resolve uncertainty within the Bureau of Land Management arising from the recent court decision in *National Wildlife Federation* v. *Morton*, 395 F. Supp. 1286 (D.C.D.C. 1975). The Bureau maintains that this decision limited the options available for managing the public lands under the Executive Order.

Prior to the court decision is a number of federal agencies, including the Tennessee Valley Authority, the Department of Defense and the Bureau of Reclamation, had adopted a policy to close all or portions of the public lands within their jurisdiction to use by off-road vehicles except those areas and trails specifically designated as open to such use. The Society of American Foresters, among others, favors this approach to regulating off-road vehicles and has taken the position that:

"In order that control be effective, off-road vehicles should be allowed only on forest roads, trails and areas . . . which are explicitly designated for off-road vehicle use. Experience shows this approach to be less costly, and easier to enforce than a restriction in which off-road vehicles are allowed on all forest roads, trails and areas except where designated to the contrary." [1]

[1] Society of American Foresters, "The Use of Off-Road Vehicles on Public Forest Lands: A Position of the Society of American Foresters" (Washington, D.C. Nov. 12, 1975).

While the Bureau itself has described this approach as the "most environmentally beneficial alternative", it maintains that, in view of the Court's opinion, "such a course of action would require modification of Executive Order 11644." Draft EIS at 65. The Council differs with this interpretation of the law, but proposes to adopt the Bureau's suggestion for resolving the matter by adding a subsection (d) to section 3 as follows:

(d) Each respective agency head shall be authorized to adopt the policy that all or portions of the public lands within its jurisdiction shall be closed to use by off-road vehicles except those areas and trails which are suitable and specifically designated as open to such use under subsection (a) of this section.

This amendment would clarify the original intent of the Executive Order and dispel the Bureau's uncertainty over this issue. With authority to close the public lands until specifically opened under the Executive Order, Federal agencies would retain an administratively sound and flexible option for regulating off-road vehicles.

DUTCH ELM DISEASE CONTROL EFFORTS IN MINNESOTA

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. FRASER. Mr. Speaker, the American elm is prominent in the Minnesota landscape. During the past few years, Dutch elm disease has established itself in these well-shaped shade trees. Dutch elm disease is caused by a fungus which grows in the water-conducting vessels of elms.

The disease is gradually spreading westward—virtually all States have now to some degree been affected by the disease.

The spread of the disease can be slowed down or contained by a control strategy of eliminating places where fungus-carrying beetles can breed. An effective control effort includes prompt removal of dead and dying trees and protective spraying of healthy trees with acceptable chemicals. The same degree of effort obviously must be applied to all trees in a given control area—regardless of whether they are privately or publicly owned.

And finally, the diseased elm problem requires restoration of the areas that lose their valuable trees. Restoration takes time. But, it will be less costly both esthetically and in dollars if a control program extends the lives of existing elms.

The Citizens League, a nonpartisan, nonprofit community group in the Minneapolis-St. Paul metropolitan area, recently prepared a report on the status of Dutch elm disease there. I would like to insert an abstract of this very informative report. In the report, the Citizens League takes a close look at the cost of an effective control program, the State role in controlling the disease, and the direction in which—according to the league—the State grants-in-aid program for shade tree disease control should move.

The article follows:

DISEASE INCIDENCE

1. . . . Dutch elm disease became an epidemic in the Twin Cities area in 1976—Although first discovered in Minnesota in 1961 in St. Paul (one tree) and near Monticello (seven trees,) the disease spread very slowly until about 1974.

The loss in the seven-county area in 1976, about 80,000 trees, was almost three times the level of 1975, which itself had been three times the level of 1974, according to the State Department of Agriculture. On a cumulative basis, the seven-county metropolitan area has lost between 2% and 3% of its original elm population of about 4.5 million trees. . . .

2. Losses in 1977 and subsequent years are projected to be much greater—

Metropolitan area losses in 1977 may reach 288,000 more than triple the number in 1976, according to a Metropolitan Council staff report. . . .

3. Projections of disease incidence.

If pre-1977 control practices continue, the Metropolitan Council projects that disease incidence in the seven-county metropolitan area will increase very rapidly over the next three years, reaching a loss of approximately 22% of the original elm population in 1980 alone, which would be about 1 million elms in that year. Only a residue of elms would remain after 1985, according to this projection.

Under an improved program, the maximum percentage loss would be 6.3% in 1989, according to the Council report.

Under what the Council calls the "best practicable control," losses would be 3.7% of the original elm population in the peak year, about 1997.

4. It's not too late to keep the disease at a tolerable level, in selected locations, if action is taken promptly.

Although Dutch elm disease has not been adequately controlled so far, there still is a chance to keep its incidence at a manageable level in those parts of the Twin Cities metropolitan area where the elm is valued most highly.

But unless major steps are taken in 1977, it is unlikely that much more than a mop-up job would remain. The pre-1977 control program is inadequate. . . .

PRIORITY AREAS FOR CONTROL AND COMMUNITY PARTICIPATION

Although Dutch elm and oak wilt diseases have established strong footholds in the Twin Cities metropolitan area, the battle by no means is lost, particularly if we select our priorities for control carefully.

Top priority areas for control should be (a) individual *elms and oaks* with unique historical qualities or in particularly valuable locations, such as Victory Memorial Drive or Summit Avenue, or the oldest and largest *elms and oaks* within a city; (b) residential areas and parks where *elms* make up a clear majority of shade trees and where their pattern of planting makes them esthetically pleasing; and (c) rural and urban forests and woodlots where *oaks* are dominant.

Assuring adequate support to grass-roots neighborhood control efforts—Because of the critical importance of a strong, small-area, private-citizen commitment to the success of a control program, we recommend that the Legislature give special recognition to neighborhood shade trees protection associations which meet certain requirements.

To achieve official recognition such an association first would need the agreement of at least 51 percent of the property owners in a given area, not to exceed a certain size, perhaps on the order of 10–30 square blocks. Many already-existing neighborhood associations would be expected to seek recognition as shade protection associations.

Encouraging cooperative control efforts at the neighborhood level—In addition to the ability to require governmental cooperation, a neighborhood shade tree protection association would be able to contract jointly on behalf of its resident/members for a variety of tree services, thereby taking advantage of economies of scale. Whatever arrangements of the city may have made for cost-sharing of removal of public trees could be handled through such an association, too.

PROJECTED EXPENSES

It's worth trying to control Dutch elm disease because of the elm's beauty and because it makes sense economically—

Residential streets and parkways lined with elms are, simply, just very beautiful. They lend irreplaceable character to neighborhoods. It would be an absolute tragedy if we failed to take advantage of the opportunity which still is present to gain another decade or two of their presence and, in the process give other types of newly-planted trees the chance to have 10 to 20 years of growth as the elm population is gradually declining.

It just makes good practical sense to lengthen the life of the elms. Whether the disease is controlled or not, the money will have to be spent. The only question is when. Dead trees must be cut down. That is very expensive in an urban area. If the disease is not controlled, very high expenses will be incurred in a very short time. With a control program in effect, the expenses can be spaced out over many more years. A U.S. Forest Service study indicates that the total expenses of no control actually exceed the costs of a control program.

We have other reasons for wanting to lengthen the life of the elms, such as the impact of trees on property values, their energy-saving shade in summer, their wind protection in winter, and their oxygen-producing qualities.

PROJECTED EXPENSES

Two recent studies indicate that heavy expenses will be incurred with or without a Dutch elm control program. Both studies agreed that the peak expenditures for a single year would be significantly higher under a no-control program. Regardless of the control program, trees die and must be removed from residential areas before branches fall off and cause property damage or harm to persons. One study projected that total expenses over a period of years would be slightly less under a no-control program; the other study projected that total expenses would be higher with no control.

One study was conducted by Thomas A. Rusin, who at the time was a commercial banking officer for the First National Bank of Minneapolis. * * * Rusin conducted the study for a Dutch elm disease conference sponsored by the bank in the fall of 1976.

Rusin projected total expenses in the seven-county metropolitan area at $217.9 million without any control; $221.0 million, minimum control, and $293.1 million, improved control. Under the no-control scenario, expenses reach about $45 million in the peak year; under minimum control, about $33 million, and under improved control, about $23 million.

Rusin's study was based on losses as projected by National Biocentric, Inc., in a study for the Metropolitan Inter-County Council in September 1976.

The other study was conducted by the U.S. Department of Agriculture Forest Service, Northeastern Forest Experiment Station, Upper Darby, PA, in 1976. That study did not provide expenditure estimates for specific locations; instead it estimated the cost of control and disposal over a 15-year period for a hypothetical area with 1,000 trees. With no control, the cumulative cost was projected at $132,000; with varying degrees of control, the cumulative cost was projected between $49,000 and $111,000.

STATE ROLE

Present state laws and regulations

In 1974 the Minnesota Legislature required that municipalities in the seven-county metropolitan area adopt shade tree control practices, consistent with rules and regulations of the Minnesota Department of Agriculture. This was the first involvement by the state in shade tree disease control.

In 1975 the Legislature expanded the state's involvement. It authorized $800,000 for the two years ending June 30, 1977, in state matching funds to cities for removal of diseased shade trees from residential property. These funds may be used only to help cities subsidize the expense of removal of trees from private property. They may not be used for removal of trees from public property. The state will reimburse a city for 50% of whatever a city agrees to pay for removal of private trees. For example, if a city requires the property owner to pay one-half the cost, with the city paying the other one-half, then the state will help the city with its one-half. As a result, the property owner would pay one-half, the city, one-fourth, and the state, one-fourth.

On the other hand, if a city pays the entire cost, then the state pays one-half, and the net cost to the city is one-half.

Or if the city requires property owners to pay the entire cost, without any city share, the state will not share either.

The 1977 Legislature is considering a governor's budget request for more than $20 million in state matching funds to cities for Dutch elm control in the biennium ending June 30, 1979. A State Shade Tree Advisory Committee to the Commissioner of Agriculture had recommended a $45 million program. Both proposals urge that the state matching funds be used to help cities with all shade tree disease control expenses, whether for public or private trees. Essentially state funds would be apportioned according to the size of local budgets.

Cities in the seven-county metropolitan area reported total Dutch elm control expenditures in 1976 at $4.8 million. These cities project their total expenditures in 1977 at $14.9 million. The cities of Minneapolis and St. Paul, combined, account for more than two-thirds of the projected expenditures for 1977. Each are projecting 1977 expenditure levels in excess of $5 million. This represents almost a tripling of expenditures by Minneapolis in 1977 over 1976, and more than a five-fold increase by St. Paul.

RECOMMENDATION

We recommend an increase in state grants for the 1977–79 biennium, provided the Legislature enacts sufficient protection so that state funds are used to finance a control program, not a mop-up program.

We further recommend that state grants for subsequent bienniums be reduced or eliminated for those localities where good progress is not made in 1977–79. We believe "good progress" would be made in a given locality if no more than 5% of the original elm or oak population becomes diseased in the year when the disease reaches its high incidence in that locality, which means the trees would be phased out over at least a 20-year period. The State Department of Agriculture should be instructed—in its budget request for the next biennium—to recommend a guideline for determining further eligibility for funds.

We believe that state grants-in-aid should be used to help control shade tree disease, not just to help cities pay the expenses of large scale removal. Should control be unsuccessful and if hundreds of thousands of residential shade trees must be removed promptly, we believe that state loans, rather than grants, would be the appropriate state vehicle for assistance.

A LAST WORD OF CAUTION

A one-time crash program of diseased tree control won't do the job. We will be fighting Dutch elm disease and oak wilt for as long as there are elms and oaks worth saving in this region.

If our cities do a thorough job of Dutch elm control in 1977, so as to reduce the number of beetle breeding sites to a minimum, we can't afford then to sit back and relax. Such an experience will demonstrate only that the disease can be controlled. The disease will always be with us. Only the highest degree of commitment to control in those areas where our shade trees are most valuable will do the job.

It won't be easy to be effective in any one year, let alone 15 to 20 years in a row, but that is the commitment which is required.

LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT ACT OF 1977

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. JOHNSON of California. Mr. Speaker, earlier in this session the Committee on Public Works and Transportation reported out by an overwhelming vote and the House passed the Local Public Works Capital Development and Investment Act of 1977, H.R. 11. This legislation has since passed the other body and they have named conferees.

Last Friday I had the opportunity to confer on this matter with Senator JENNINGS RANDOLPH, chairman of the Senate Committee on Environment and Public Works. He and I discussed the need to move this legislation. There are indeed differences in the two bills but those differences which concern the local public works legislation, in my opinion, can be expeditiously resolved. The other sections the other body has added to the bill and in particular those dealing with the water pollution program create a definite problem and one which calls for separate action insofar as the pollution program phase of the bill is concerned. Therefore, I have written a letter to Senator RANDOLPH today dated March 28, 1977, suggesting an approach to this problem.

Mr. Speaker, I insert the text of my letter to Senator RANDOLPH to be printed in the RECORD. May I conclude by saying that as the letter states, we the originators of the public works program are ready, willing and able to meet to confer with our colleagues in the other body to pass this legislation on to the President for signature before the Easter recess.

The letter follows:

COMMITTEE ON PUBLIC WORKS
AND TRANSPORTATION,
Washington, D.C., March 28, 1976.

Hon. JENNINGS RANDOLPH,
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, D.C.

DEAR JENNINGS: I appreciate our meeting and short conversation on Friday. I received your followup letter later that afternoon and have had an opportunity to read and reflect on its contents.

Let me say at the outset that I and the Members of the House Committee on Public Works and Transportation are ready, willing, able and eager to go to conference immediately on the Local Public Works Capital Development and Investment Act, known also as the Public Works Employment Act of 1977. We are proud of the fact that this legislation had its origin in the House in the last Congress and are appreciative further of the fact that you and your Members worked so well with us to get this bill enacted into law.

With the new Congress both Bodies immediately went to work on amendments to the Act and, as you have stated, bills have passed both Houses. The bill which we perfected and reported from the Committee and was later passed by the House was a bill limited to the specific subject of public works jobs. We put it together carefully so that it could be moved immediately to the President for signature after a brief, short conference to resolve the differences between the House and Senate passed versions.

The bill we received back from the Senate was a somewhat different version from the House-passed bill. It contained two additional titles having no relation to the subject of public works. One dealt with the funding for water pollution construction grants programs. The other dealt with the President's proposed water resources program as it affects projects under the jurisdiction of the Corps of Engineers, the Bureau of Reclamation, as well as those projects under the jurisdiction of the TVA and the watershed program of the Department of Agriculture.

Let me address myself immediately to Title II of your legislation—water pollution. In the last Congress we held lengthy hearings; then carefully marked up a water pollution bill which funded sewage treatment works and added amendments to the basic Act. This legislation failed of enactment into law because of the fact that it could not be properly considered in the closing days of the last session. We have since reported out an almost identical bill, H.R. 3199. We hope to have that legislation before the House in short order and then would be ready to meet almost immediately with you and your Colleagues in the Senate on the water pollution program.

I am well aware of the critical need for funding the sewage treatment works. I call to your attention that the legislation which we have just reported contains authorization for a three year period for such sewage treatment works totaling some $17 billion.

I feel that the inclusion of the water pollution amendments in the public works bill simply on a funding basis only, without giving consideration to legislation which passed the House in the last session and which has strong support in this session, places the water pollution program at a disadvantage. All aspects of the pollution program should be considered together. Both Bodies have passed a pollution bill. Let us take Title II from the public works bill and meet on it separately. This will expedite passage of the public works bill.

Let me conclude by saying I indeed intend to keep faith with the American people and so do the Members of the House Committee on Public Works and Transportation. All of us—you and I and our Colleagues have a commitment to ease unemployment as rapidly as we can. The most expeditious way, in my opinion, is to give attention to a Local Public Works Bill without the addition of extraneous matter.

I assure you once again I am ready, willing and able to meet with you today and tomorrow on the Local Public Works Bill. Let us try to finish this before the Easter Recess.

Sincerely,

HAROLD T. (BIZZ) JOHNSON,
Chairman.

ERRORS TAINT THE WASHINGTON POST

HON. TIMOTHY E. WIRTH
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. WIRTH. Mr. Speaker, when I opened my Washington Post last Monday I was astonished to see an article on page 1 headlined "Plutonium Taints Their Reservoir." The article, running some 1,200 words, told how leakage of radioactive material from the Rocky Flats nuclear weapons plant near Broomfield, Colo., "had left a plutonium blanket on the bottom of the city's 40-acre Great Western Reservoir" and thereby tainted the city's water supply. The article went on to quote a task force Gov. Dick Lamm and I had appointed as recommending that water in Great Western Reservoir not be consumed by the people of Broomfield.

The reason I was astonished to see the Post story was that the picture it painted was flatly untrue. While operations at Rocky Flats have resulted in radioactive and toxic material contamination of Great Western Reservoir, the Broomfield water supply has a small fraction of 1 percent of the present permissible plutonium concentration for public consumption and both the Colorado Department of Health and the Environmental Protection Agency have determined that the present level of contamination does not pose a threat to Broomfield's 13,000 residents. Furthermore, the Lamm-Wirth task force, quoted in the Post article, has never recommended that water in Great Western Reservoir not be consumed.

That is not to say that the risk of future contamination does not exist or that the Federal Government should not bear the cost of providing the city of Broomfield with an alternative water supply. But it is to say that the present level of contamination does not pose a health hazard to the city of Broomfield. So, for the Washington Post, one of the Nation's leading newspapers, to plaster an article titled "Plutonium Taints Their Reservoir" across its front page does a disservice to the people of Colorado, to the Post's readers, and to those of us who have been working for the past several years to provide Broomfield residents with a replacement water supply.

Being aware of the self-policing mechanism the Post has established, I called Charles Seib, the Post's ombudsman, to find out what steps could be taken to correct the story. Mr. Seib referred me to Richard Harwood, assistant managing editor of the Post. Mr. Harwood, in turn, asked that I send him a letter and any material I had bearing on the assertions in the Post article.

So Monday afternoon I had hand delivered to Mr. Harwood a letter with a file of material on the Broomfield water situation. I also asked the Environmental Protection Agency to review the Post article and prepare comments on it. EPA prepared a 6-page memorandum which I sent to Mr. Harwood on Wednesday.

Finally, last Thursday evening, after further calls from me, Mr. Harwood called back. Mr. Harwood asked what I thought the Post should do about the article, and added that perhaps there should have been a few qualifiers in the story. I told him that I believed my job was to point out the facts; his job was to deal with the facts in the newspaper. I also noted that the author of the Post story, Bill Richards, had never spoken to me, my office, or, as far as I could tell, anyone who really knew about the situation at Rocky Flats.

The Post article has now been reprinted in the Philadelphia Inquirer and I do not know in how many other papers.

Mr. Speaker, I believe very deeply in the first amendment and in the rights it grants the press in our society. And I would vigorously oppose any attempts by government to limit those rights.

It also seems to me that along with the rights conferred by the first amendment, the press has certain affirmative responsibilities, among them the responsibility of reporting the news as fairly and accurately as possible. In this instance, I believe the Washington Post has failed to exercise this responsibility. And this failure has been compounded by the fact that when apprised of errors in its front page article, the Post did not take any corrective measures.

With the consent of my colleagues, I would like to insert in the RECORD copies of the Post article, my letter to Mr. Richard Harwood, the EPA memorandum, and portions of the Lamm-Wirth Task Force report that address the Broomfield water situation:

[From the Washington Post, Mar. 21, 1977]

PLUTONIUM TAINTS THEIR RESERVOIR—SHOULD U.S. PAY FOR DENVER SUBURB'S NEW WATER SUPPLY?

(By Bill Richards)

BROOMFIELD, COLO.—Every Monday morning, the water man shows up here at Laverne Abraham's door carrying two five-gallon jugs, enough bottled water to make sure the Abrahams can go another week without taking a sip from Broomfield's plutonium-lined reservoir.

Over the last decade, leakage of radioactive material from the giant, accident-marred Rocky Flats nuclear weapons plant next door to Broomfield has left a plutonium blanket on the bottom of the city's 40-acre Great Western Reservoir.

Now local, state and federal officials have become embroiled in a controversy over who will put up an estimated $30 million to meet the city's demand for a new water supply.

The argument also has become a rallying point for nuclear opponents, who point to Rocky Flats and Great Western as a glowing example of the dangers that can occur from radioactive waste.

According to federal and state investigators, the plutonium that reached Great Western came from unshielded, nuclear contaminated wastes buried on the Rocky Flat site that seeped to the surface. The Environmental Protection Agency said in a 1975 report that the plutonium bearing wastes from the nuclear plant reached the reservoir through water runoffs down a stream alongside the plant and into the reservoir.

Like nearly everyone in this rapidly growing Denver suburb, Laverne Abraham said she has listened to officials who say the plutonium that has trickled into the city's reservoir from Rocky Flats is harmless—as long as it remains where it is, on the bottom. Other experts say plutonium isn't dangerous unless inhaled into the lungs.

But like most people here she is also aware that plutonium can cause cancer if it is ingested in even the tiniest amounts and that it is one of the most lethal nuclear products.

"They keep saying it isn't dangerous," Abraham said as she shopped for groceries with her 6-year-old daughter, Jennifer. "Well, even if it was, I don't think they'd tell us. We won't drink the water here until we get a new reservoir."

While the Abrahams may go to more extreme lengths than most of the 20,000 residents of Broomfield, they are hardly alone in their uneasiness about radioactive leaks from Rocky Flats.

The nuclear facility has been sharply criticized in several studies for lax procedures that allowed radioactive material to escape into the surrounding area. A report issued by Colorado in October, 1975, noted that the original developers of the plant in 1951 misjudged local wind patterns so that the prevailing wind flows from the plant over areas now being developed or already settled. In addition, the report said there have been at least two plutonium fires at the plant that released radioactivity into the atmosphere; a 10-year, slow leakage of plutonium from buried drums of radioactive contaminated motor oil, and the tritium incident. The report also said the plant accidentally released plutonium directly in 1974 in a discharge of untreated air.

Several doctors here urge their patients to avoid Broomfield's water. Last fall, 10 Colorado newspapers carried a letter citing Great Western as a reason to vote against nuclear development in Colorado's unsuccessful anti-nuclear referendum. Federal and private operators of Rocky Flats are facing a $28 million lawsuit from nearby landowners citing plutonium pollution as having made their land worthless for development. And the city had demanded that the Energy Research and Development Administration, which owns the nuclear weapons fabrication facility, purchase a new water supply to replace the tainted one.

Even some supporters of nuclear development here are behind the demand for a new reservoir.

"I think a certain margin of safety has been used up and we should protect ourselves now with a new reservoir," said Dr. William Markel, a local physician who voted last fall in favor of continuing nuclear development.

The controversy over Rocky Flats goes back to 1970 when tests by the Environmental Protection Agency showed long-term plutonium leakage from the plant into Walnut Creek, which feeds the reservoir. A second series of EPA tests three years later showed 40 times the normal amount of plutonium in the sediment at the bottom of the water supply.

Federal experts quickly assured residents that plutonium is considerably heavier than water and will remain safely on the bottom indefinitely. Plutonium has a radioactive half life of 24,000 years. Local officials, however, are worried that the current drought will lower the reservoir so far that the bottom could become roiled up easily and pollute the city's water.

In 1973 state health department investigators also discovered that Rocky Flats had unknowingly flushed another radioactive substance tritium, into the city's water supply. Although the tritium level remained well below the danger point, alarmed residents flooded officials with calls. Only in the last month has the state health depart-

ment reported that tritium levels in the city's water were back to normal.

But the reservoir contamination incidents led to a study of Rocky Flats by a task force appointed by Colorado Gov. Richard D. Lamm and Rep. Timothy E. Wirth. The task force reported in 1975 that further accidents could occur and recommended that the plant be moved from a populated area. The report also suggested that water in Great Western reservoir not be consumed and that a new water supply be found for Broomfield.

In a point-by-point reply to the task force report, ERDA last year dismissed the possibility of moving the plant or building to a new reservoir. But the agency promised to study ways of providing alternative water sources to the city if another accident occurs. The reply also noted Rocky Flats' $47 million annual payroll and the contributions of its scientific employees to local activities.

"That was when we blew our stack," said George Di Ciero, Broomfield's city manager. "They had mistakes, accidents and incidents up there and they were in effect telling us we should take it because of their payroll."

While accidents have occurred at other government nuclear bomb facilities in the West such as at Los Alamos, N.M., and Hanford, Wash., Rocky Flats is different. Local communities around the other plants are relatively isolated and are, in effect, federal "company towns," which tend to provide unquestioning support for them. Broomfield, which serves as a bedroom community for Denver to the south and Boulder to the north, has little financial dependence on Rocky Flats.

Di Ciero and the 10-member Broomfield city council fired off telegrams to everyone from then-President Ford on down demanding a new reservior. Since then, Rocky Flats' former civilian contractor emlpoyee, the Dow Chemical Co., has moved and Rockwell International has taken its place, with pledges of more stringent safety measures. Di Ciero and other city officials say they have calmed down but still want a new reservoir.

"We've made our position known," said the city manager. "They seem to be paying attention, but if we don't get what we want we're going to sue everybody in sight."

That discomfort was not eased this month when EPA warned federal housing officials to proceed cautiously in making development loans in the Rocky Flats area. The warning was issued, according to Paul Smith, EPA's Denver regional radiation representative, because of remaining radioactive plutonium contamination in air and water near Rocky Flats.

The contamination comes from dust blowing off areas on the Rocky Flats grounds that show as much as 5,000 times the normal background radiation levels, Smith said. The areas, which were created by seepage from plutonium-contaminated waste buried there years ago, are in the process of being scraped and cleaned, Rockwell officials said.

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 21, 1977.

Mr RICHARD HARWOOD,
Assistant Managing Editor, The Washington Post, Washington, D.C.

DEAR Mr. HARWOOD: This is in further regard to phone conversations this morning between my office and the Washington Post concerning the article on page one of today's Post titled, "Plutonium Taints Their Reservoir."

As we indicated to you, we are concerned about the accuracy of a number of points in the article and about the overall impression the article creates.

Among the points we believe are in error are the following:

The statement that the Lamm-Wirth Task Force report "suggested that water in Great Western Reservoir not be consumed and that a new water supply be found for Broomfield."

The reference to a series of EPA tests in 1973 showing "40 times the normal amount of plutonium in the sediment at the bottom of the water supply."

The attribution to Paul Smith that EPA warned federal housing officials to proceed cautiously in making development loans in the Rocky Flats area "because of remaining radioactive contamination in air and water near Rocky Flats."

Together these statements create the impression that Broomfield's water is dangerously polluted and not safe for human consumption.

The facts, however, are that nowhere did the Lamm-Wirth Task Force suggest that "water in Great Western not be consumed." In fact, the Task Force noted that "studies by the Colorado Department of Health and the EPA have determined that the present level of contamination does not pose a threat to the people of Broomfield." The reason the Task Force recommended that Broomfield be given an alternative source of water was not because of any present health hazard but because the Task Force felt the potential of future contamination existed because of the closeness of Rocky Flats to Broomfield.

The reference to 1973 EPA tests is used in the article to buttress the references in the lead and second paragraphs to "Broomfield's plutonium-lined reservoir" and to the "plutonium blanket on the bottom of the city's 40-acre Great Western Reservoir." It is my understanding that these tests showed that the maximum concentration of plutonium found in the sediment was 40 times the baseline plutonium found in other front-range reservoirs—not, that the entire floor of the reservoir showed "40 times the normal amount of plutonium in the sediment."

While Paul Smith can speak for himself, the statement attributed to him appears inaccurate. Radioactive contamination in water has nothing to do with the guidance EPA has given to federal housing officials. EPA has been working on air and soil standards and I presume Smith was talking about radioactive contamination in air and soil near Rocky Flats. In the context of this article, there's a big difference between soil and water.

So you can read for yourself the full references to the Broomfield water supply in the Preliminary and Final Reports of the Lamm-Wirth Task Force, I am enclosing copies of both those documents, clipped to the appropriate pages.

Notably missing from the article is any mention of the study currently being done by a Denver engineering firm of possible alternative water supplies for Broomfield. On September 3, 1976, ERDA and Rockwell personnel met with Broomfield city officials to discuss an architectural-engineering study of the Broomfield Water problem proposed by Rockwell and ERDA. The Broomfield officials generally agreed with the scope of the study as outlined (a copy of which you will find enclosed). With the concurrence of Broomfield officials and the Denver Water Board, a contract was awarded to URS Engineering, a Denver firm. It is estimated that the study will take 6 to 8 months to complete.

As mentioned to you, EPA is preparing a memo commenting on the accuracy of the statements attributed to Paul Smith.

At your convenience, I would like to sit down with you, Mr. Seib or whomever else might be appropriate and discuss this at greater length. If I can be of further help, please let me know.

Sincerely yours,

TIMOTHY E. WIRTH.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Denver, Colo., March 23, 1977.

Hon. TIMOTHY WIRTH,
Cannon House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE WIRTH: This is in response to your telephone request to Paul Smith of my radiation control program staff that he review the March 21st *Washington Post* article on a Rocky Flats Plant-related matter.

After receiving the copy of the article you provided to us via magnafax, we excerpted those portions which we felt needed clarification. We then developed the enclosed comments which, hopefully, will facilitate any further discussions you may wish to pursue on the issues involved.

If there are further questions regarding the enclosure, feel free to pursue these with Mr. Smith via telephone. His number is (303) 837-2222.

Sincerely yours,

JOHN A. GREEN,
Regional Administrator.

STATEMENTS AND COMMENTS

STATEMENT

"Over the last decade, leakage of radioactive material from the giant, accident-marred Rocky Flats nuclear weapons plant next door to Broomfield has left a plutonium blanket on the bottom of the city's 46-acre Great Western Reservoir."

COMMENT

The implication of "plutonium blanket" is unsure—if we make a comparison with Great Western Reservoir (GWR) sediment concentrations of plutonium, these are lower than surrounding soil levels based on a dry weight basis. Furthermore, a "plutonium blanket" implies that there is a uniform distribution, of that radionuclide in the reservoir's bottom. This is not the case. EPA studies on sediments in GWR indicate that plutonium concentration varies widely.

STATEMENT

"According to federal and state investigators, the plutonium that reached Great Western came from unshielded, nuclear-contaminated wastes buried on the Rocky Flats site that seeped to the surface. The Environmental Protection Agency said in a 1975 report that the plutonium-bearing wastes from the nuclear plant reached the reservoir through water runoffs down a stream alongside the plant and into the reservoir."

COMMENT

Based on EPA's experience and on discussions with the Colorado State Department of Health (CSDH), the statement that "nuclear-contaminated wastes buried on the Rocky Flats Plant site seeped to the surface" is erroneous if it is intended to identify the source of plutonium that has reached Great Western Reservoir (GWR). Since operations began at Rocky Flats Plant (FRP), Walnut Creek was used to receive liquid effluent discharges from the plant's laundry, the plutonium reprocessing building, and the industrial waste treatment facility. These discharges, while being held on-site since December 1973, were monitored for plutonium to determine compliance with permissible U.S. Atomic Energy Commission (now the Energy Research and Development Administration—ERDA) discharge limits. The plutonium in GWR today has, for the most part, accumulated over the years, becoming "sorbed" to sedimentary debris in the reservoir's bottom. Walnut Creek flows from RFP to Great Western Reservoir.

STATEMENT

"But like most people here she is also aware that plutonium can cause cancer if it is ingested in even the tiniest amounts and

that it is one of the most lethal nuclear products."

COMMENT

To the best of our knowledge, the ingestion of plutonium dioxide, an insoluble material under normal circumstances, does not cause cancer if ingested in "tiny" amounts. Absorption of plutonium in the gastro-intestinal tract is estimated to be on the order of 10% (ten thousandths of a percent) for insoluble forms such as plutonium dioxide.

STATEMENT

"The nuclear facility has been sharply criticized in several studies for lax procedures that allowed radioactive material to escape into the surrounding area. A report issued by Colorado in October, 1975, noted that the original developers of the plant in 1951 misjudged local wind patterns so that the prevailing wind flows from the plant over areas now being developed or already settled. In addition, the report said there have been at least two plutonium fires at the plant that released radioactivity into the atmosphere; a 10-year, slow leakage of plutonium from buried drums of radioactive contaminated motor oil, and a tritium accident. The report also said the plant accidentally released plutonium directly in 1974 in a discharge of untreated air."

COMMENT

The "buried drums" identified above were actually stored above ground. Some of these became corroded with time and leaked their contents on the soil. Contaminated soil was then transported off-site via local wind action and local soil disturbance.

STATEMENT

"The controversy over Rocky Flats goes back to 1970 when tests by the Environmental Protection Agency showed long-term plutonium leakage from the plant into Walnut Creek, which feeds the reservoir. A second series of EPA tests three years later showed 40 times the normal amount of plutonium in the sediment at the bottom of the water supply."

COMMENT

The statement that EPA tests showed 40 times the normal amount of plutonium in the sediment at the bottom of Great Western Reservoir (GWR) is a true statement only in regard to *one* sample among 21 bottom sediment sampling points. Most of the other reported values were well below the reference used in the *Washington Post* article. Using this number to characterize the existing sedimentary contamination in GWR lacks validity.

STATEMENT

"Federal experts quickly assured residents that plutonium is considerably heavier than water and will remain safely on the bottom indefinitely. Plutonium has a radioactive half life of 24,000 years. Local officials, however, are worried that the current drought will lower the reservoir so far that the bottom could become roiled up easily and pollute the city's water."

COMMENT

The atomic weight of plutonium does not account for its settling to the bottom of GWR. In actuality, plutonium arriving in the reservoir becomes "sorbed" onto suspended solids in the reservoir which then settle to the bottom. In regard to the statement that a lowering of the reservoir due to a drought may cause plutonium in sediment to "become roiled up easily and pollute the city's water", it is not valid. Before the consumer drinks GWR water, it normally goes through: 1) floculation; 2) coagulation; 3) sedimentation; and, 4) filtration treatment processes which are designed to deliver clear, potable water. Roiled up sediments sometimes referred to as "muck" would inundate the treatment system if it was allowed into the process for any length of time. This alleged problem is therefore self-limiting and would not occur.

STATEMENT

"Di Ciero and the 10-member Broomfield city Council fired off telegrams to everyone from then-President Ford on down demanding a new reservoir. Since then, Rocky Flats' former civilian contractor employee, the Dow Chemical Co., has moved and Rockwell International has taken its place with pledges of more stringent safety measures. Di Ciero and other city officials say they have calmed down but still want a new reservoir."

COMMENT

According to information received from the Energy Research and Development Administration (ERDA) this week, a contract has been let to a Denver consulting engineering firm to conduct a feasibility study on providing the City of Broomfield an alternate emergency water supply. As we understand the proposed system, it will become operational in the event that Great Western Reservoir (GWR) is significantly contaminated as a result of RFP operations.

STATEMENT

"That discomfort was not eased this month when EPA warned federal housing officials to proceed cautiously in making development loans in the Rocky Flats area. The warning was issued, according to Paul Smith, EPA's Denver regional radiation representative, because of remaining radioactive plutonium contamination in air and water near Rocky Flats."

COMMENT

While preparing an Environmental Impact Statement for potential Federal Housing Administration (FHA) mortgage assisted housing near Rocky Flats Plant (RFP), officials of the Department of Housing and Urban Development (HUD) found conflicting information regarding the radioactive hazard in the area. As a result, HUD asked EPA to advise them on the conflict. EPA Region VIII then asked the EPA Headquarters Office of Radiation Programs for interim guidance on the matter of determining if a radiological hazard existed in three housing developments seeking FHA approval. Using the interim guidance, EPA advised HUD that the housing developments in question were in areas where existing plutonium contamination was below levels of concern.

EXCERPTS FROM REPORTS

"Plutonium contaminated sediment has been found in Great Western Reservoir with a *maximum concentration* approximating 40 times the baseline concentration of 0.10 picocuries per gram (dry weight) found in other uninvolved front range reservoirs. A total of 87.5 millocuries (1 millicure=1/1000 of a curie) of plutonium has been released to Walnut Creek from 1953 through 1974. *The Broomfield water supply has a small fraction of one percent of the present permissible standard for public consumption"* (emphasis added).

Preliminary Report, Lamm-Wirth Task Force on Rocky Flats, February 1975, p. 6.

* * * * *

"Regarding the Broomfield Water Supply, the Task Force investigation has revealed the following facts with respect to the Broomfield Water Supply from the Great Western Reservoir: Operation of the Federal facility at the Rocky Flats Plant has resulted in radioactive and toxic material contamination of the Great Western Reservoir. *However, studies by the Colorado Department of Health and the EPA have determined that the present level of contamination does not pose a threat to the people in Broomfield.* Notwithstanding plans by the Rocky Flats Plant to install a sophisticated water treatment and recycling plant, the Task Force believes no static water supply should be used for human consumption while it is still subject to potential contamination from the Rocky Flats Plant. (emphasis added)

Therefore, we recommend that Governor Lamm and Congressman Wirth request that the Federal government, in cooperation with the City of Broomfield and all appropriate County and State officials, provide the City of Broomfield with an alternate source of water to replace the water which Broomfield receives from the Great Western Reservoir. (Chapter III, Section A(a))."

(Lamm-Wirth Task Force Report on Rocky Flats, October 1, 1975, pp. 10–11.)

SUPREME COURT RULES ON CIVIL PENALTY PROVISIONS OF OSHA

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. STEIGER. Mr. Speaker, on March 23, the Supreme Court handed down its decision in the first constitutional challenge to the Occupational Safety and Health Act of 1970. The decision lays to rest the question of the Occupational Safety and Health Administration's authority to impose civil penalties on employers in violation of the act. The decision is noteworthy not only in the interest of occupational safety and health but also in that it reasserts Congress ability to grant administrative agencies the authority to enforce its laws by way of civil penalties.

I want to call my colleague's attention to the following excerpts, footnotes, and citations deleted, from the Court's decision:

U.S. SUPREME COURT DECISION

[In the Supreme Court of the United States, Nos. 75–746 and 75–748]

(75–746) Atlas Roofing Company, Inc., Petitioner, *v.* Occupational Safety and Health Review Commission et al., on Writ of Certiorari to the United States Court of Appeals for the Fifth Circuit.

(75–748) Frank Irey, Jr., Inc., Petitioner, *v.* Occupational Safety and Health Review Commission et al., on Writ of Certiorari to the United States Court of Appeals for the Third Circuit.

[March 23, 1977]

Mr. JUSTICE WHITE delivered the opinion of the Court.

The issue in this case is whether, consistent with the Seventh Amendment, Congress may create a new cause of action in the Government for civil penalties enforceable in an administrative agency where there is no jury trial.

* * * * *

III

The Seventh Amendment provides that "In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved. . . ." The phrase "suits at common law" has been construed to refer to cases tried prior to the adoption of the Seventh Amendment in courts of law in which jury trial was cus-

tomary as distinguished from courts of equity or admiralty in which jury trial was not. Petitioners claim that a suit in a federal court by the Government for civil penalties for violation of a statute is a suit for a money judgment which is classically a suit at common law; and that the defendant therefore has a Seventh Amendment right to a jury determination of all issues of fact in such a case. Petitioners then claim that to permit Congress to assign the function of adjudicating the Government's rights to civil penalties for violation of the statute to a different forum—an administrative agency in which no jury is available—would be to permit Congress to deprive a defendant of his Seventh Amendment jury right. We disagree. At least in cases in which "public rights" are being litigated—*e.g.*, cases in which the Government sues in its sovereign capacity to enforce public rights created by statutes within the power of Congress to enact—the Seventh Amendment does not prohibit Congress from assigning the factfinding function and initial adjudication to an administrative forum with which the jury would be incompatible.

Congress has often created new statutory obligations, provided for civil penalties for their violation, and committed exclusively to an administrative agency the function of deciding whether a violation has in fact occurred. These statutory schemes have been sustained by this Court, albeit often without express reference to the Seventh Amendment. Thus taxes may constitutionally be assessed and collected together with penalties, with the relevant facts in some instances being adjudicated only by an administrative agency. The Court said, in rejecting a claim under the Sixth Amendment that the assessment and adjudication of tax penalties could not be made without a jury: "the determination of the facts upon which liability is based may be made by an administrative agency instead of a jury." Similarly, Congress has entrusted to an administrative agency the task of adjudicating violations of the customs and immigration laws and assessing penalties based thereon.

In *Block* v. *Hirsh*, the Court sustained Congress' power to pass a statute, applicable to the District of Columbia, temporarily suspending landlords' legal remedy of ejectment and relegating them to an administrative fact finding forum charged with determining fair rents at which tenants could hold over despite the expiration of their leases. In that case the Court squarely rejected a challenge to the statute based on the Seventh Amendment, stating:

"The statute is objected to on the further ground that landlords and tenants are deprived by it of a trial by jury on the right to possession of the land. *If the power of the Commission established by the statute to regulate the relation is established*, as we think it is, by what we have said, *this objection amounts to little. To regulate the relation and to decide the facts affecting it are hardly separable.*"

In *Crowell* v. *Benson*, apparently referring to the above-cited line of authority, the Court stated that "the distinction is at once apparent between cases of private right and those which arise *between the Government and persons subject to its authority in connection with the performance of the constitutional functions of the executive or legislative departments*. . . . [T]he Congress in exercising the powers confided to it may establish 'legislative' courts . . . to serve as special tribunals 'to examine and determine various matters, arising between the government and others, which from their nature do not require judicial determination and yet are susceptible of it.' But '*the mode of determining matters of this class is completely within congressional control.* Congress may reserve to itself the power to decide, *may delegate that power to executive officers*, or may commit it to judicial tribunals.' . . . Familiar illustrations of *administrative agencies created for the determination of such matters are found in connection with the exercise of the congressional power as to interstate* and foreign *commerce*, taxation, immigration, the public lands, public health, the facilities of the post office, pensions and payments to veterans." (Emphasis added.)

In *NLRB* v. *Jones & Laughlin Steel Corp.*, the Court squarely addressed the Seventh Amendment issue involved when Congress commits the factfinding function under a new statute to an administrative tribunal. Under the Labor Act, Congress had committed to the NLRB, in a proceeding brought by its litigating arm, the task of deciding whether an unfair labor practice had been committed and of ordering back pay where appropriate. The Court stated:

"The instant case is not a suit at common law or in the nature of such a suit. The proceeding is one unknown to the common law. *It is a statutory proceeding.* Reinstatement of the employee and payment for time lost *are requirements [administratively] imposed for violation of the statute and are remedies appropriate to its enforcement.* The contention under the Seventh Amendment is without merit. [Emphasis added.]"

This passage from *Jones & Laughlin* has recently been explained in *Curtis* v. *Loether*, in which the Court held the Seventh Amendment applicable to private damage suits in federal courts brought under the housing discrimination provisions of the Civil Rights Act of 1968. The Court rejected the argument that *Jones & Laughlin* held the Seventh Amendment inapplicable to any action based on a statutorily created right even if the action was brought before a tribunal which customarily utilizes a jury as its factfinding arm. Instead, we concluded that *Jones & Laughlin* upheld "congressional power to entrust enforcement of statutory rights to *an administrative process or specialized court of equity* free from the strictures of the Seventh Amendment." (Emphasis added.)

Finally, in *Perness* v. *Southall Reality*, in discussing *Block* v. *Hirsh*, *supra*, and *Jones & Laughlin*, we stated:

"*Block* v. *Hirsh* merely stands for the principle that *the Seventh Amendment is generally inapplicable in administrative proceedings, where jury trials would be incompatible with the whole concept of administrative adjudication*. . . . Where the action involves rights and remedies recognized at common law, it must preserve to parties their right to a jury trial." (Emphasis added.)

In sum, the cases discussed stand clearly for the proposition that when Congress creates new statutory "public rights," it may assign their adjudication to an administrative agency with which a jury trial would be incompatible, without violating the Seventh Amendment's injunction that jury trial is to be "preserved" in "suits at common law." Congress is not required by the Seventh Amendment to choke the already crowded federal courts with new types of litigation nor prevented from committing some new types of litigation to administrative agencies with special competence in the relevant field. This is the case even if the Seventh Amendment would have required a jury where the adjudication of those rights is assigned instead to a federal court of law instead of an administrative agency.

* * * * *

None of the grounds tendered for so reinterpreting the Seventh Amendment is convincing. It is suggested that in some of the cases, the Seventh Amendment was not expressly put in issue. But these cases are clear enough that in the context involved, there was no requirement that the courts be involved at all in the factfinding process in the first instance. It is difficult to believe that these holdings or dicta did not subsume the proposition that a jury trial was not required. Furthermore, there are the remaining cases where the Court expressly held or observed that the Seventh Amendment did not bar administrative factfindings.

Second, it is argued with some force that some cases deal with the exercise of sovereign powers that are inherently in the exclusive domain of the Federal Government and critical to its very existence—the power over immigration, the importation of goods and taxation—and that the theory of those cases is inapplicable where the Government exercises other powers that petitioners apparently regard as less fundamental less exclusive and less vital to the existence of the Nation, such as the power to regulate commerce among the several States, the latter being the power Congress sought to exercise in enacting the statute at issue here. The difficulty with this argument is that the Court in these cases, and in others, did not appear to confine its holdings in this manner.

* * * * *

Third is the assertion that the right to jury trial was never intended to depend on the identity of the forum to which Congress has chosen to submit a dispute; otherwise, it is said, Congress could utterly destroy the right to a jury trial by always providing for administrative rather than judicial resolution of the vast range of cases that now arise in the courts. The argument is well put, but is overstates the holdings of our prior cases and is in any event unpersuasive. Our prior cases support administrative factfinding in only those situations involving "public rights," *e.g.*, where the Government is involved in its sovereign capacity under an otherwise valid statute creating enforceable public rights. Wholly private tort, contract, property and a vast range of other cases as well are not at all implicated.

More to the point, it is apparent from the history of jury trial in civil matters that factfinding, which is the essential function of the jury in civil cases, was never the exclusive province of the jury under either the English or American legal systems at the time of the adoption of the Seventh Amendment; and the question whether a fact would be found by a jury turned to a considerable degree on the nature of the forum in which a litigant found himself. Critical factfinding was performed without juries in suits in equity, and there were no juries in admiralty, neither was there in the military justice system. The jury was the factfinding mode in most suits in the common law courts, but it was not exclusively so: condemnation was a suit at common law but constitutionally could be tried without a jury, "[M]any civil as well as criminal proceedings at common law were without a jury." The question whether a particular case was to be tried in a court of equity—without a jury—or a court of law—with a jury—did not depend on whether the suit involved factfinding or on the nature of the facts to be found. Factfinding could be a critical matter either at law or in equity. Rather, as a general rule, the decision turned on whether courts of law supplied a cause of action and an adequate remedy to the litigant. If it did, then the case would be tried in a court of law before a jury. Otherwise the case would be tried to a court of equity sitting without a jury. Thus, suits for damages for breach of contract, for example, were suits at common law with the issues of the making of the contract

and its breach to be decided by a jury; but specific performance was a remedy unavailable in a court of law and where such relief was sought the case would be tried in a court of equity with the facts as to making and breach to be ascertained by the court.

The Seventh Amendment was declaratory of the existing law, for it required only that jury trial in suits at common law was to be "preserved." It thus did not purport to require a jury trial where none was required before. Moreover, it did not seek to change the factfinding mode in equity or admiralty nor to freeze equity jurisdiction as it existed in 1789, preventing it from developing new remedies where those available in courts of law were inadequate.

* * * * *

The Seventh Amendment was never intended to establish the jury as the exclusive mechanism for factfinding in civil cases. It took the existing legal order as it found it, and there is little or no basis for concluding that the Amendment should now be interpreted to provide an impenetrable barrier to administer factfinding under otherwise valid federal regulatory statutes. We cannot conclude that the Amendment rendered Congress powerless—when it concluded that remedies available in courts of law were inadequate to cope with a problem within Congress' power to regulate—to create new public rights and remedies by statute and commit their enforcement, if it chose, to a tribunal other than a court of law—such as an administrative agency—in which facts are not found by juries. Indeed, the "settled judicial construction" was to the contrary "from the beginning." That the Government could commit the enforcement of statutes and the imposition and collection of fines to the judiciary, in which event jury trial would be required, but that the United States could also validly opt for administrative enforcement, without judicial trials.

Thus, history and our cases support the proposition that the right to a jury trial turns not solely on the nature of the issue to be resolved, but also on the forum in which it is to be resolved. Congress found the common law and other existing remedies for work injuries resulting from unsafe working conditions to be inadequate to protect the Nation's working men and women. It created a new cause of action, and remedies therefore unknown to the common law and placed their enforcement in a tribunal supplying speedy and expert resolutions of the issues involved. The Seventh Amendment is no bar to the creation of new rights or to their enforcement outside the regular courts of law.

REMARKS OF HYMAN BOOKBINDER AT THE BROTHERHOOD CITATION-DINNER OF THE NATIONAL CONFERENCE OF CHRISTIANS AND JEWS

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BRADEMAS. Mr. Speaker, on the evening of March 10, 1977, I had the privilege of participating in the annual brotherhood citation dinner of the National Conference of Christians and Jews here in Washington, D.C.

One of the most moving responses delivered by the honorees was that of Hyman Bookbinder, a person known to many Members of the House of Representatives and Senate for his long career as a champion of brotherhood and justice for all the people of our country.

Mr. Speaker, I wish to insert at this point in the RECORD the remarks of Mr. Bookbinder on this occasion:

REMARKS OF HYMAN BOOKBINDER

First—a very personal note. Jerry Siegel called to tell me of this honor, it happens, only a few weeks after my wife had died. Perhaps the two things were related. In any case, I like to think now that if that call had come to me while my wife was still alive, that I might have had the good sense, and the honesty, to have said to Jerry, "But you are calling the wrong Bookbinder. It's my wife who deserves the honor much more than than I do." Whatever I might have said, at least tonight I want to say that because of her, I learned what brotherhood—or sisterhood, or "humanhood"—really means in practice. It has been my lot for many years now to be involved in activities that permitted me to advocate, to preach, to get public attention. But it was my wife who practiced—impressively, but quietly—what I was preaching.

For the last ten years of her life—including the last three when she knew she was on borrowed time—she gave much of that time as a volunteer in the 14th Street area. Thank God she lived long enough to see that magnificent Community Health Center that she helped make possible—and which now bears her name in its cornerstone.

At her services, one of the eulogies was delivered by that magnificent woman, Mrs. Ruth Webster, who has headed the poverty program in the Cardozo area and also this new Health Center. "I've come to pay tribute to our *sister*," Ruth said, "for the role she played in the life of our community, and for the love she shared with us . . . She crossed the barriers that society sets to separate man from his brothers and took up the cudgel . . . At a time when tensions were high in our predominantly Black community, Boshie Bookbinder was honored, loved, and welcomed there."

If you are looking for a definition of brotherhood, you have it there in Ruth Webster's words. So I hope you will allow me to share this honor tonight with the woman who was my wife and friend and partner for 38 years.

I wish my wife could have been with me the other night when I attended one of the really exciting events of recent years—the reunion of New Dealers. It brought back to me one of the most meaningful comments ever made by Franklin Roosevelt. It was around 1938 when the Congress was considering the enactment of a federal minimum wage—the fantastic sum of 25 cents an hour! And FDR said then:

"The test of our progress is not whether we add more to the abundance of those who already have much; it is whether we do enough for those who have too litte."

Surely that must continue to be the test for us today: Are we doing enough for those who have too little? In a way we have met that test. We are now talking about a possible $2.50 or $3.00 minimum wage. But in many more ways we have flunked the test badly. There are still 25,000,000 Americans below a poverty line that is a disgrace in a country as rich as ours—and another 50,000,000 slightly above that poverty line.

Our Judaic-Christian heritage imposes upon us this responsibility to do enough—which means to do more—for those 75,000,000 Americans who have too little.

I have often quoted Proverbs:

"He that giveth to the poor shall not lack; but he did hideth his eyes shall have many a curse."

A *society*, I have always felt, that closes its eyes to the poor is indeed cursed—cursed with anger and hatred, cursed with tensions and bitterness, and sometimes even with violence and chaos.

No group has known this better than the Conference of Christians and Jews. And so I'm so pleased to be recognized by such a group.

I'm pleased for another reason too. This is the period of *Roots*—of ethnic and religious racial identity and pride. I've been pleased to see this development—and am proud of the work of the American Jewish Committee in this area. But I must confess to a sense of unease that's developed along with the satisfaction. I fear that to some extent this particularity, this group identity and pride has been at the expense of our universality, our commonality, our shared values, or *brotherhood*. Let us honor and cherish and retain our group pride and loyalty—but let us never stop cherishing that common thread of compassion and humanity that cuts across all group lines.

Our Talmud tells us that "Charity knows neither race or creed." Our Midrash tells us "The non-Jew is your neighbor, your brother, to wrong him is to sin."

Tonight, we are here as Christians *and* Jews. As black *and* white. As native-born *and* as immigrants. Above all, I hope we are here as *brothers* and *sisters*.

You have done me great honor tonight. May I always be worthy of it.

A NEW APPROACH TO TAX INCENTIVES

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DELANEY. Mr. Speaker, the tight job market continues to be one of the major areas of concern to our constituents. Today, we are introducing legislation to encourage private manufacturing-related investment in areas where the unemployment rate exceeds 6 percent. This legislation was developed in cooperation with the Coalition of Northeastern Governors—CONEG—following their Saratoga Conference last November and similar bills are being introduced by the chairmen of our other CONEG congressional delegations.

The measure provides businesses with an accelerated depreciation allowance—double the present amount—when they make new investments in areas with unemployment rates of 6 percent or more. Under the proposal, tax payments to the Federal Government would not be reduced, but rather postponed, thus providing economically stimulating interest-free loans to companies willing to invest in stagnant economies. This approach would benefit States throughout the Nation.

A summary follows:

A NEW APPROACH TO TAX INCENTIVES

A PROGRAM OF MORE RAPID DEPRECIATION ALLOWANCES IN HIGH UNEMPLOYMENT AREAS

Summary

During the last few years a great deal of evidence has emerged that the economies of many of our older industrial areas, particu-

larly in the Northeast and Midwest, suffer from serious structural problems. Although the economic difficulties of these areas reflect in large part the recent national recession they are not recovering as well as the rest of the nation. The economic problems of these areas has resulted in higher unemployment and fiscal distress for many state and local governments. A wide variety of programs to revitalize older industrial areas has been proposed. Some of these programs would take considerable time to become operational. One approach which could be undertaken almost immediately is a program to stimulate private investment in older industrial areas by granting more generous depreciation allowances for tax purposes.

Specifically, firms investing in manufacturing equipment in states where the five years moving average of unemployment rates exceeds 6% could be allowed to calculate their federal tax liabilities using depreciation rates which are twice those presently allowed. A simple trigger mechanism would make all states whose rate is above 6 percent eligible when the national rate is above that level. Therefore, the program would be restricted to aiding those areas which are truly in economic difficulty and would phase out automatically as unemployment rates decline.

Accelerated depreciation alters the timing although not the absolute amount of a firm's tax liability. The firm pays less in the early years of an investment's life, more later; and by postponing some tax payments it is effectively granted an interest free loan from the Federal Treasury. The dollar benefit to the firm is the discounted present value of the stream of the change in tax liability. This benefit will vary from firm to firm and depends on a number of factors including the level of investment, asset life, the depreciation method currently employed, profit position and cost of funds.

HOW A PROGRAM ALLOWING MORE RAPID DEPRECIATION ON A REGIONAL BASIS WOULD WORK

Depreciation method

Depreciation deductions allow a company to recover tax free the cost of capital consumed in producing income. Under present law, equipment may be depreciated either on a straight line basis over its life or according to a variety of methods providing for a greater write off in the asset's early life. The total amount depreciated is the same regardless of method. However, by writing off a greater share of the asset's value sooner a firm can postpone some of its tax liability. The most favorable depreciation method currently allowed by the I.R.S. is the double declining balance method. This method can be applied only to certain assets, primarily those eligible for the investment tax credit. Under this method a firm can deduct 20 percent in the first year of the cost of an asset with a 10 year life span rather than a proportional 10 percent. A regional accelerated depreciation program could allow a further doubling of this allowance. The following example shows how this would work for a manufacturer buying a piece of equipment for $1,000,000 with a life span of 10 years—assuming the manufacturer is already using the double declining balance method of depreciation and is taxed at a 48 percent rate.

Manufacturer in area with more than 6 percent unemployment: $1,000,000 x 40 percent=$400,000 depreciation.

Manufacturer in area with less than 6 percent unemployment: $1,000,000 x 20 percent=$200,000 depreciation.

$200,000 difference x 48 percent (tax rate) =$96,000 tax savings.

Thus, a producer in an area with the accelerated depreciation allowance would "save" $96,000 in taxes in the first year. While the firm may have to pay these taxes in some future years in the interim it has benefited from an interest free loan.

Eligible property and industries

A regional accelerated depreciated allowance could use the same eligibility criteria currently employed by the I.R.S. for the double declining balance method. The double declining balance method can be applied to most tangible personal property with a life greater than three years; except in specific cases buildings are excluded. In general the same property is eligible for accelerated depreciation as for the investment tax credit.

In order to maximize its impact relative to cost to the Treasury an accelerated depreciation program should apply only to manufacturing. The purpose of this program is to offset some of the locational disadvantages of the older industrialized areas. While there are exceptions, manufacturing is the most mobile industrial sector. A substantial segment of the manufacturing industry sells to a national market and is not dependent on particular resources. Thus, these industries seek the lowest-cost production locations.

Area eligibility

The objective of regionally focused accelerated depreciation is to stimulate the economies of areas with chronically high unemployment. Determining area eligibility by a five year moving average unemployment rate would channel funds to regions which had long-run economic problems independent of the national business cycle. While several different measures of unemployment could be used, the use of five year moving averages has several advantages. Unemployment rates are very volatile in the short-run. A program based entirely on current data would make an area with a temporarily high unemployment rate resulting from a brief downturn in the local economy eligible for the assistance. This temporary downturn in local economic conditions could be a result of a heavy concentration in cyclically sensitive industries rather than long-term economic problems and the primary objective of this program is not to be countercyclical but to address longer-term imbalances between regions. Also, state unemployment rates are not as reliable as the national rate. Because of the relatively small sample sizes these rates, particularly for smaller states, are subject to significant statistical variation. However, this variation is not systematic and therefore will cancel out over several years.

Determining area eligibility by a long-run average of unemployment rates has the further advantage of increasing a firm's certainty about the applicability of the more accelerated depreciation schedule. Whether the investment qualifies for the more rapid depreciation rate will depend on the unemployment measure at the time the property is put on site. Unemployment rates can change between the planning stages of an investment and the actual acquisition. However, if a five year moving average is used, even a substantial change in an area's unemployment rate in one year is unlikely to make an area with generally high unemployment rates ineligible. Finally, a firm considering investing in an area may be concerned about eligibility in the future as well as today. Since long-run averages change slowly, they are a more reliable guide to future eligibility than are current rates.

Summary and conclusions

A regional accelerated depreciation allowance could be an effective way to stimulate private investment in high unemployment areas. This increased private investment would have a multiplier effect on the economics of distressed areas and by enhancing their competitive position could significantly improve their long-run economic growth. The primary thrust of this approach is to offset the locational disadvantages of manufacturing in certain regions. However, because more states or regions would become eligible when the national unemployment rate increases the program would also have a countercyclical feature.

THE ASSASSINATIONS COMMITTEE: TIME TO END IT ALL

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. BAUMAN. Mr. Speaker, newspapers and citizens all over America have been calling for the House to end one of the most unfortunate episodes of this parliamentary body's recent history. I am referring to the antics of the House Select Committee on Assassinations.

Next Wednesday we have a chance to end this spectacle by voting against House Resolution 433 which would authorize its continuance.

For your consideration I include an editorial from the Baltimore Sun which recommends, as have many editorials, that the committee be ended. I also include an article from the front page of the Dallas News of March 17 which describes only one of the many reasons this committee should be quietly laid to rest:

[From the Baltimore Sun, Mar. 27, 1977]

KILL IT

After engaging in its own comic opera, the House committee investigating the Kennedy and King assassinations seemingly set about frantically to produce sensational new "evidence" that would justify its existence beyond March 31. So far the public record shows no substantive results, though Speaker Thomas P. O'Neill endorses its extension.

But the committee and its chief counsel have so discredited themselves in their brief existence that whatever they ultimately produce may not be believable. If an investigation is needed, then it should be turned over to another committee with another chief counsel.

[From the Dallas News, Mar. 17, 1977]

AGENTS DISCOVER PLENTY OF NOTHING

Two representatives of the House Assassinations Committee slipped secretly into Dallas last weekend. Two days later, they left, empty-handed and a little red-faced.

Shortly after arriving, they went to police headquarters to examine files on the assassination of President John Kennedy. They found the files had been subpoenaed by the committee and were in Washington. Only a couple boxes of discards remained here.

Next they drove to the site of Jack Ruby's Carousel Club for a first hand look, only to find it had been razed and replaced by a parking lot.

From there, it was back to the police station to talk with officials. During the talk, a city wrecker hauled their rented car from a no-parking zone to the pound.

The two men—one a retired Washington, D.C., police lieutenant and the other a special committee counsel—paid a $20 towing fee and a $5 parking ticket and headed back to Washington.

End of secret visit.

THIRD WORLD MURDERS ARE HOLY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. DERWINSKI. Mr. Speaker, a great deal of attention has been focused on Africa in view of recent escalated incidents of terrorism. Father Andrew Greeley, the noted sciologist, discusses the diplomatic interest in that continent in an editorial of March 15, appearing in the Chicago Tribune. The editorial follows:

THIRD WORLD MURDERS ARE HOLY

(By Andrew Greeley)

It would be nice to think that the murder of the priests and nuns in Rhodesia would jolt Catholic religous leaders out of their Third World worship. But every white missionary [Protestant or Catholic] in Africa or Asia could be gunned down tomorrow and the Third World romanticism of church leadership will remain undaunted. The Third World is good, holy, virtuous, and true. We must expiate our "social guilt"—as Catholic scholar Philip Scharper recently remarked—to these pure new nations. So let the missionaries be killed.

One need not be an admirer of colonialism nor an advocate of a return to it to observe that in most of the countries of the Third World the ordinary people had much better lives under colonial rule than they do under their new masters. There are more political prisoners under Mrs. Gandhi than there ever were under the British Raj in India, and the English did not sterilize men by force. More Angolans are being murdered by their own government—and Cuban mercenaries—than were ever killed by the Portuguese. Most of the countries of what was once French West Africa have lower standards of living than they did under the French.

A citizen of Zaire was less likely to be beaten by Belgians than he is by the troops of the Great God Mobutu.

And for all the talk about "majority rule" in Rhodesia, not even Andrew Young can believe that a change will be anything more than a transfer of power from a white minority [which has no right to rule the country] to a black minority [which will also have no right to rule the country]—and probably one which will include the murderers of the missionaries. All hail the Third World.

Speaking of Young, did anyone notice that he praised the Cuban troops in Angola as bringing "stability" to the country? When Americans destroyed villages with flame throwers in Viet Nam it was a war crime. If Cubans do it in Angola it is in the name of stability. My Lai was a terrible international scandal. But there are scores, perhaps hundreds of My Lais in the southern part of Angola and its all right because it is Third World genocide.

Perhaps a third of the population of Cambodia has been killed by the country's new rulers [who rule courtesy of the United States Senate, which would not support aid to the old regime]. This is mass murder comparable to what Hitler did to the Jews. But Third World mass murder is not even to be mentioned among us. If the new rulers of a country want to kill a couple million peopeople, well that's their business. They are, after all, part of the virtuous.

Much of Africa, through which Young paraded recently with wide-eyed wonder, has reverted to barbarism and savagery—Central Africa, Ethiopia, Equatorial Guinea, Guinea Bisseau, Uganda, and, to some extent, Zaire and Nigeria. There are few countries with anything resembling political freedom. Some nations have relatively benign despotism—Kenya, Tanzania, Zambia. But there are thousands of political prisoners in Tanzania and political opponents or even ambitious allies of Jomo Kenyatta have a way of getting mysteriously killed. Still, it's the Third World and if you want to jail or kill your opponents that has to be all right. If we don't object to your gunning down white missionaries, we certainly can't object to your killing each other—as the officers do in Addis Ababa almost every week. It's nice that black folks will help white folks to expiate, I guess.

It is undoubtedly very difficult for the new nations to solve their economic, political, tribal, and religious problems. There was a lot of barbarism in Western Europe for a couple of millenia before that part of the globe settled down. And the richer countries of the world should do what they can to help the new nations.

But no help is given by pretense; and surely no help is given by those religious leaders who think that the colonialist sins of the past somehow legitimate the bloody barbarism of the present. Torture, repression, murder, genocide are wrong everywhere—in Chile, in Russia, in Cambodia, in Uganda, in Ethiopia, in Algeria, in India. If they are moral in one country, they are moral in every country, and we are but a step away from the stone age.

And the comparison may be unfair to the people of the stone age.

U.N. DEVELOPMENT PROGRAM

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. FRASER. Mr. Speaker, one of the most effective United Nations organizations has been the U.N. Development Program whose technical, economic, and social assistance has greatly contributed to the quality of life in many nations around the world.

It was therefore most appropriate that the first formal presentation by our United Nations Ambassador Andrew Young was made February 1, 1977, before the Governing Council of the UNDP.

I would like to share Ambassador Young's statement with my colleague, as it reflects the importance with which President Carter and his administration view UNDP's work and the U.S. participation in the organization. I would also like to take this opportunity to endorse the administration's praise for the good work of UNDP's present Administrator, and our former congressional colleague, Brad Morse.

Ambassador Young's statement follows:

STATEMENT BY AMBASSADOR ANDREW YOUNG

Thank you very much, Mr. President. It's certainly a distinct pleasure and honor for me to just spend a few minutes here with you and to have this, my first meeting in my service as a Permanent Representative of the United States to the United Nations. In many ways I think it's quite appropriate, because I see the work of the United Nations Development Program as really being the heart of the United Nations system. For it is you that actually do the work of helping people to really and truly be free—free from hunger, free from want, free from disease and poverty—and it's our commitment as a nation to join with you in your work. We do have a great deal of confidence in you, as President of this body, and certainly in the Administrator, Bradford Morse, who comes from our country. And the present Administration has assured me that they will be making every effort, not only to continue support at present levels, but do whatever we can in our approaches to the Congress to increase those commitments and to see to it that this work is not in any way impaired by a lack of the funds that are needed to do the work that has to be done around the world. I look forward to an opportunity of learning of this work. I want to make this an important part of my activities as the Permanent Representative. I see, in addition to the Security Council and the General Assembly, the job of actually doing things for people as a high priority in my agenda. And so I will be looking to you for guidance, for leadership, for help, and will not only represent my country to you, but will seek to represent you and the needs of the world to my country, to my friends in the Congress, to the President of the United States and the Secretary of State. And I've been encouraged, and I know you will soon be encouraged, by the dedication and the support for your work and the work of us all that you will find from this Administration.

Again, I say that it's my pleasure to be here. I'm very honored and humble that you would allow me the privilege of addressing you when I don't really know what I'm talking about. (Laughter) But, I want to assure you that I am a good student, and I will learn very quickly from you and I will work very hard. And, I am sure, together, we can begin to fulfill many of the hopes and promises that this institution has made to the peoples of the world. Thank you very much.

THE FIGHT FOR HUMAN RIGHTS

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. YOUNG of Missouri. Mr. Speaker, Congress is playing a crucial role in the fight for human rights by pressing for Soviet compliance with the provisions of the Helsinki agreement.

The action makes it clear to both the Soviet authorities, and to the Jews and other oppressed minorities, that Congress will not ignore the government's abuses. We are conveying the message that we will relentlessly put a spotlight on the beatings and tortures, the outrageous confinement of some dissidents to psychiatric institutions, and the refusal to allow minorities to emigrate.

We are putting the Soviet government on notice, too, that we do not take casually the Belgrade Conference in June that will review progress made since the 1975 Helsinki convention.

The Congress, by approving the resolution, is heightening awareness among other nations of the seriousness with which we treat the principles of the Helsinki accords.

And the Congress is providing a loud signal to the growing number of dissenters in other Communist nations—among them Hungary, East Germany, Poland, and Czechoslovakia—that the United States plans to speak out in support of the oppressed, if those rights are abridged, in any nation, no matter how powerful.

UNWISE USE OF TAX DOLLARS FOR CABINET OFFICER COMPENSATION

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 28, 1977

Mr. ERTEL. Mr. Speaker, as one who is concerned about saving taxpayer dollars wherever possible and making sure that tax dollars are spent wisely, I was upset by recent revelations that the Secretary of the Department of Health, Education, and Welfare may not have as close an eye on his expenses as we in Congress would like.

HEW is one Department that spends vast sums on programs vital to the people of the 17th District in Pennsylvania and throughout the Nation. From aiding pregnant mothers to helping set up meals for senior citizens, the Department assists many in our society who need help the most.

No one can deny that expenditures such as these are wise investments in the well-being of our country and our people, but recent reports of some expenditures by the Secretary of HEW can hardly be termed a wise investment of tax dollars.

I refer to recent reports in the press which relate that the Secretary has a personal chef on the Government payroll. While I feel it is important that those who head Cabinet Departments are given adequate compensation for their hard work, I do not feel that the taxpayers should be called upon to foot the bill for such personal services.

I understand that the President has had one talk with the Secretary about these highly questionable expenses I hope there is no need for any more. But just to make sure, I am announcing here today that I intend to offer an amendment to the next appropriations bill for the Department of Health, Education, and Welfare which will prohibit the Secretary from spending any public funds for chefs, or any other person providing essentially personal services for the Secretary.

If the Secretary feels such services are necessary, I have nothing against him paying for them out of his own pocket. But we must not allow tax dollars to be used for a totally needless personal entourage.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 29, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

MARCH 30

9:00 a.m.

Appropriations
Agriculture Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear Secretary Bergland.
1224 Dirksen Building

Energy and Natural Resources
To hold hearings on the nomination of Guy Richard Martin, of Alaska, to be an Assistant Secretary of the Interior.
3110 Dirksen Building

9:30 a.m.

Appropriations
To resume hearings on proposed budget estimates for fiscal year 1978 for the National Park Service.
S-126, Capitol

Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
235 Russell Building

10:00 a.m.

Agriculture, Nutrition, and Forestry
Subcommittee on Agricultural Production, Marketing and Stabilization of Prices
To hold oversight hearings on problems of flue-cured tobacco farmers.
322 Russell Building

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of the Export-Import Bank, and Overseas Private Investment Corporation.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Armed Services
Research and Development
To continue closed hearings on proposed military procurement authorizations for fiscal year 1978 for weapons programs.
224 Russell Building

Banking, Housing, and Urban Affairs
To mark up S. 305, to require issuers of securities to maintain records, and to prohibit the payment of overseas bribes by any U.S. business concern.
5302 Dirksen Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the Nuclear Regulatory Commission.
4200 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To continue hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Human Resources
Health and Scientific Research
To continue hearings on S. 705, to revise and strengthen standards for the regulation of clinical laboratories.
Until: 12:00 noon 6202 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on S. 717, to promote safety and health in the mining industry.
Until: 1:00 p.m. 4232 Dirksen Building

Joint Economic
To hold hearings to receive testimony on a study on food chainstores' profits and prices.
318 Russell Building

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

10:30 a.m.

Commerce, Science and Transportation
To consider the nomination of Michael Pertschuk, of the District of Columbia, to be a Federal Trade Commissoner.
5110 Dirksen Building

11:00 a.m.

Foreign Relations
Foreign Assistance Subcommittee
To consider proposed legislation authorizing funds for development assistance programs, and for contributions to international organizations.
4221 Dirksen Building

1:30 p.m.

Appropriations
Agriculture Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture, to hear public witnesses.
6202 Dirksen Building

2:00 p.m.

*Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Social Security Administration and Social and Rehabilitation Service.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Foreign Relations
Subcommittee on Foreign Economic Policy
To meet in closed session to receive a staff report on U.S. Foreign Economic Policy Issues· The United Kingdom, France, and West Germany.
S-116, Capitol

Rules and Administration
To resume consideration of S. Res.'s 5 through 12, proposing several changes in the Senate rules, principally with regard to Rule XXII (cloture), and to consider other committee business.
301 Russell Building

MARCH 31

9:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
332 Russell Building
Foreign Relations
Foreign Assistance Subcommittee
To mark up legislation on international financial institutions and bilateral development assistance.
4221 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Outdoor Recreation and the Land and Water Conservation Fund.
1318 Dirksen Building
Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building
Energy and Natural Resources
Business meeting, to consider the nominations of Guy Richard Martin, of Alaska, and Robert L. Herbst, of Minnesota, each to be an Assistant Secretary of the Interior.
3110 Dirksen Building
Human Resources
Handicapped Subcommittee
To resume oversight hearings on the implementation of the Developmentally Disabled Assistance and Bill of Rights Act (Public Law 94–103).
Until: 1 p.m. 6202 Dirksen Building
Human Resources
Health and Scientific Research Subcommittee

235 Russell Building

HOUSE OF REPRESENTATIVES—*Tuesday, March 29, 1977*

The House met at 12 o'clock noon.

Father William J. Moody, St. Mary's Roman Catholic Church, Cumberland, Md., offered the following prayer:

Give to the Lord, you sons of God, give to the Lord glory and praise. Give to the Lord the glory due His name, adore the Lord in holy attire.—Psalm 28.

Let us pray—

God our Father, You guide everything in wisdom and love. Help us walk in beauty, and make our eyes ever behold the sunset.

Make us wise so that we may understand the things You have revealed in Your Son.

Let us seek strength not to be greater than others; but to acknowledge Your Son present in them.

Hear the prayer we offer for this as-

sembly. You know the longings of Your people. Guide those in authority, so that they may seek: freedom, security, and peace for Your people. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On March 24, 1977:

H.R. 2647. An act to amend the Small Business Act and the Small Business Investment Act of 1958.

On March 25, 1977:

H.R. 3839. An act to rescind certain budget authority recommended in the message of the President of January 17, 1977 (H. Doc. 95-48), transmitted pursuant to the Impoundment Control Act of 1974.

FATHER WILLIAM J. MOODY

(Mr. BYRON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BYRON. Mr. Speaker, it is a privilege to have with us today, the Reverend Father William Moody to offer the prayer as we begin this session of the House of Representatives. Father Moody is my constituent and is assistant pastor of St. Mary's Catholic Church in Cumberland, Md.

Father Moody is a native of Maryland's Sixth Congressional District. He was born in Frostburg, Md., attended St. Michael's Parochial School and graduated from Beall High School before continuing his education. Ordained a priest in 1970, Father Moody has continued to serve western Maryland both as a priest and an outstanding citizen.

Father Moody served with the U.S. Navy in the Pacific during World War II. Then came 20 years of service as a teacher and principal with the Baltimore public school system.

As a priest, Father Moody has added duties as chaplain of a hospital and a nursing home. As a concerned citizen, Father Moody serves on the Allegany County Commission on the Aging.

I am sure my colleagues have received a blessing from Father Moody's words. I am proud to welcome Father Moody and his many senior citizen friends from Cumberland, and I thank him for his inspiring words.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORT ON H.R. 3199, FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1977

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight to file a report on the bill (H.R. 3199), the Federal Water Pollution Control Act Amendments of 1977.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

KUDOS TO MARQUETTE WARRIORS ON WINNING NCAA BASKETBALL CHAMPIONSHIP

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ZABLOCKI. Mr. Speaker, I am pleased and proud to take this time to congratulate the Marquette Warriors who last night won the NCAA basketball championship in a tough battle with a very fine North Carolina team. The game was a tribute to basketball, the players involved and their schools, the fans, and coaches, Al McGuire and Dean Smith. Although they possess different attitudes and coaching philosophies, Mr. McGuire and Mr. Smith are a tribute to the game and are to be congratulated for fine seasons.

Last night, however, belonged to Al McGuire and the Marquette Warriors. The score was 67-58, the game was close until the very end. I am proud to be an alumnus of Marquette University for many reasons, but it was especially enjoyable to have the team win the championship for the colorful gentleman who coached his last college basketball game. Foremost in anyone's perception of McGuire is his understanding sportsmanship, which was clearly evident in the game. McGuire will be greatly missed by Marquette University and by the sport of basketball. The championship is a fitting finish and we all wish Al well in his new career.

The victory in the championship game is one which is being celebrated by Marquette University and its fans in Milwaukee and the rest of the country, and I am proud to be able to add my congratulations to the team at this time. But I believe everyone who watched the game can celebrate the quality of the struggle between two talented and well coached teams, the spirit of two fine universities and their fans, and the sportsmanship and good feeling of a true championship game played by champions.

RECONSIDERING REORGANIZATION

(Mr. CONYERS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. CONYERS. Mr. Speaker, the constitutional issues involved in the vote today on granting reorganization authority to the executive branch are elementary. The organization of the executive branch is a matter of law and, therefore, cannot be changed unless substitute laws are passed by both Houses of Congress and either signed by the President or vetoed and returned for an overriding vote of two-thirds of both Houses. This procedure is unambiguously explained in article I, section 1 of the Constitution which states that "all legislative powers herein granted shall be vested in a Congress of the United States." Article I, section 7, further states that bills are passed by the Congress and sent to the President for his approval or disapproval.

H.R. 5045 contradicts this constitutionally proscribed procedure. In effect it proposes that laws are enacted by the President and become operative in the absence of a veto by either house of Congress. Indeed, if Congress remains silent, then the President's submissions become law without the Congress having acted at all. This stands traditional procedure upside down, and may quite possibly be unconstitutional by giving the Executive legislative powers reserved for Congress.

The bicameral legislative process ought not be so easily shunted aside with regard to the reorganization of the executive branch. The supposed advantage of H.R. 5045, and the proposal that originated from the Executive, is that of expeditiousness. Yet, given the present sympathies the Congress has for the President, including my own, it is unlikely that the President would encounter serious delay.

What has been proposed here is an unnecessary and unseemly abdication of legislative responsibility—a usurpation by the Executive with the cooperation of the Congress of our own legislative powers. The lawmaking role of Congress should be more fully exercised, not less so.

THE 1976 REPORT ON NATIONAL CANCER PROGRAM FOR CALENDAR YEAR 1975—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

Pursuant to the requirements of the National Cancer Act of 1971 (P.L. 92-218) as amended, I hereby transmit the Report of the Director, 1976 on the National Cancer Program for calendar year 1975. The period covered by the report precedes my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *March 29, 1977.*

FIFTH ANNUAL REPORT UNDER FEDERAL ADVISORY COMMITTEE ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Government Operations:

To the Congress of the United States:

In accordance with the provisions of Section 6(c) of the Federal Advisory Committee Act, the report on the status of advisory committees in 1976 is herewith forwarded.

This is the fifth annual report. It is organized to provide summary information about the activities of advisory committees, and public access to specific committees and the federal agencies to whom they provide advice.

With the current government-wide, zero-base review of all advisory committees, the number of existing committees should be sharply reduced. This reduction will be reflected in the next annual report.

JIMMY CARTER.

THE WHITE HOUSE, *March 29, 1977.*

RESIGNATION AS MEMBER AND APPOINTMENT AS MEMBER OF U.S. DELEGATION TO NORTH ATLANTIC ASSEMBLY

The SPEAKER laid before the House the following resignation as a member of the U.S. House of Representatives Delegation to the North Atlantic Assembly:

MARCH 29, 1977.

Hon. THOMAS P. O'NEILL,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I hereby submit my resignation as a member of the U.S. House of Representatives Delegation to the North Atlantic Assembly.

Sincerely yours,

CLEMENT J. ZABLOCKI,
Chairman.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

The SPEAKER. Pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, the Chair appoints the gentleman from Indiana, Mr. HAMILTON, as a member of the U.S. group of the North Atlantic Assembly, to fill the existing vacancy thereon.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

FURTHER CONTINUING APPROPRIATIONS, 1977

Mr. MAHON. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 351) making further continuing appropriations for the fiscal year 1977, and for other purposes.

The Clerk read the joint resolution, as follows:

H.J. RES. 351

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (c) of section 102 of the joint resolution of October 11, 1976 (Public Law 94–473), is hereby amended by striking out "March 31, 1977" and inserting in lieu thereof "April 30, 1977".

SEC. 2. Such joint resolution is further amended by adding at the end thereof the following new section:

"SEC. 113. Such amount as may be necessary for the quarter ending March 31, 1977, for payments to the State and Local Government Fiscal Assistance Trust Fund, as authorized by the State and Local Fiscal Assistance Act of 1972, as amended (31 U.S.C. 1221–1263).".

The SPEAKER. Is a second demanded?

Mr. CEDERBERG. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. MAHON. Mr. Speaker, I yield myself such time as I may consume.

Madam Speaker, this further continuing resolution which was approved by the Appropriations Committee yesterday is very simple and, insofar as I know, completely noncontroversial. It is a 1-month extension of the existing continuing resolution which expires at midnight Thursday, the day after tomorrow. A further continuing resolution is needed for two reasons.

First, it is necessary to allow the Secretary of the Treasury to make the next general revenue sharing payments to some 39,000 State and local governments. This is the payment for the calendar quarter ending March 31.

Second, a large number of programs traditionally funded in the appropriation bill for the Departments of Labor and Health, Education, and Welfare have been operated under the existing continuing resolution since last October and will be without further continuing authority at midnight on Thursday.

The committee recommends a further continuing resolution because the two appropriation bills which passed the House 2 weeks ago and which contain funds for the purposes I have mentioned, have not proceeded in the other body as rapidly as had been envisioned.

I would say, Madam Speaker, that in the closing days of the last session, the committee came forward with the original continuing resolution which basically provided interim financing for a variety of programs in the fields of manpower, education, and health. This interim authority was required because certain authorizations were not completed in time last year for the subsequent funding to be included in the regular annual appropriation bill. While most of these programs received funding in H.R. 4877, the supplemental appropriation bill which passed the House on March 16, that bill has been somewhat delayed in the other body and last week it became evident that we could not go to conference and clear the conference report within the time frame originally planned.

With respect to general revenue sharing, the State and Local Fiscal Assistance Act of 1972 prescribes that quarterly revenue sharing payments shall be made not later than 5 days after the end of each quarter. Presently there is no appropriation enacted into law from which to make such payments for the current quarter. The fiscal 1977 appropriation is contained in H.R. 4876, the so-called fiscal stimulus appropriation bill, which passed the House on March 15. Action has been delayed in the other body on this measure and last week we were advised that it would not be considered until sometime after Easter.

I think it is important to note that this resolution does not provide additional funds over and above the amounts already approved by the House. Any expenditures made under the authority of this resolution shall be charged to the regular appropriations once they are enacted. This requirement is contained in section 105 of Public Law 94–473.

So, Madam Speaker, it is in the interest of orderly government that the committee brings before the House this 1 month further continuing resolution. The reasons for it are perfectly valid and I urge its adoption.

Madam Speaker, I reserve the remainder of my time.

Mr. CEDERBERG. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I will take very little time because it is obvious that it is necessary to have this continuing resolution if we are going to provide the necessary funds for revenue sharing and in some of the other programs.

I will, however, take this time to observe that when we passed the Budget Control Act, we prided ourselves on the fact that we were going to move the fiscal year back from June 30 to September 30, and as a result we would do away with continuing resolution supplementals, and so forth. It obviously has not worked out that way at all. We are right back where we were with continuing resolutions. The fiscal year started October 1, and now we have a continuing resolution until April 30. It is still not a good way to run a railroad, but I do not know how else we can do it.

Madam Speaker, I yield back the remainder of my time.

Mr. MAHON. Madam Speaker, I yield 3 minutes to the gentleman from Massachusetts (Mr. BOLAND), chairman of the Subcommittee on HUD and Independent Agencies.

Mr. BOLAND. Madam Speaker, as the distinguished chairman of the full committee has indicated, this continuing resolution concerns only the payment for the first quarter of general revenue sharing—from January 1 to March 31 of this year. The Members will recall that we extended the general revenue sharing program for 3¾ years, and that the first payment is due by April 5. A failure to provide the money now for the first quarter would mean that those payments and checks could not be made by April 5. The total payment for the year is $4,991,-085,000, but this continuing resolution concerns itself only with satisfying the payment from January 1 through March 31 and totals approximately $1,663,000,-000.

Mr. MAHON. Madam Speaker, I have no further requests for time.

GENERAL LEAVE

Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the measure now under consideration.

The SPEAKER pro tempore (Miss JORDAN). Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. MAHON)

that the House suspend the rules and pass the joint resolution (H.J. Res. 351).

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the joint resolution was passed.

A motion to reconsider was laid on the table.

AUTHORIZING APPROPRIATIONS FOR COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Mr. PERKINS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2992) to authorize appropriations for fiscal year 1978 for carrying out the Comprehensive Employment and Training Act of 1973 as amended.

The Clerk read as follows:

H.R. 2992

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are authorized to be appropriated such sums as may be necessary for the fiscal year ending September 30, 1978, for carrying out the provisions of titles I to VII of the Comprehensive Employment and Training Act of 1973, as amended.

The SPEAKER pro tempore (Miss JORDAN). Is a second demanded?

Mr. SARASIN. Madam Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. PERKINS) is recognized for 20 minutes, and the gentleman from Connecticut (Mr. SARASIN) is recognized for 20 minutes.

Mr. PERKINS. Madam Speaker, I yield myself 5 minutes.

Madam Speaker, the purpose of H.R. 2992 is to extend the authorization for the Comprehensive Employment and Training Act—CETA—for 1 additional year, through fiscal year 1978.

The authorization of appropriations for all titles of CETA expires during fiscal year 1977. This bill simply allows the CETA program to continue until the committee has the opportunity to fully consider the various proposals which have been advanced for changes in the basic legislation.

The Subcommittee on Employment Opportunities, chaired by my good friend and distinguished colleague, Representative AUGUSTUS HAWKINS, has already held 6 days of oversight hearings on CETA during this session, and numerous additional hearings days have been scheduled.

H.R. 2992 will insure that this very important program continues without interruption while Chairman HAWKINS and his colleagues on the subcommittee carefully weigh the proposed changes to this most complex legislation. As is evident from the additional and supplemental views filed with the committee's report, my colleagues on the minority side agree with this approach, and the committee voted unanimously to report this bill to the House.

The CETA legislation is familiar to most of my colleagues:

Title I provides for a program of financial assistance to States and local prime sponsors to enable them to plan and operate comprehensive programs for training and employment services.

Titles II and VI authorize public service employment programs. Title II is designed to deal with structural unemployment problems, in areas where unemployment is running at a level of 6.5 percent or higher. Title VI is designed as a countercyclical program, where, as is the case now, unemployment is at a high rate nationwide.

The Economic Stimulus Appropriations Act, which cleared the House on March 15, provided enough funds to increase the number of job slots under these two titles from the present level of 310,000 to a total of 725,000 by the end of fiscal year 1978.

Title III of CETA authorizes the Secretary of Labor to operate manpower programs for special target groups and to conduct research, evaluation, and labor market information functions. The Economic Stimulus Appropriations Act provided an additional $1.5 billion under this title, most of it for programs dealing with the problems of youth unemployment.

The administration is proposing a number of new initiatives under Title III, including a program to establish rural youth conservation centers. I have discussed this with a number of administration officials and I heartily support this new initiative. We are awaiting the President's detailed proposals for the rest of this new package of proposals.

Title IV of CETA contains the authorizing legislation for the Job Corps. I believe the Job Corps to be one of the finest programs we have developed for our young people, and I applaud President Carter's decision to seek enough funds from the Congress to double its size.

While my colleagues and I might differ about this or that provision of CETA, I believe there is widespread agreement that the legislation is basically sound. Approval of this 1-year extension will give us the time we need to carefully consider whatever changes in the legislation may be called for.

Madam Speaker, I yield such time as he may consume to the gentleman from New York (Mr. WEISS), a member of the subcommittee.

Mr. WEISS. Madam Speaker, I thank the chairman for his courtesy in yielding.

Madam Speaker, I rise in support of H.R. 2992, legislation to extend the Comprehensive Employment and Training Act for fiscal year 1978. I know that many of the Members expressed a concern that this renewal of CETA should contain certain set-asides or preferences for groups which they feel are deserving or needy of special help through the CETA program.

As you know, the Committee on Education and Labor reported out a simple extension. I thought it would be helpful to explain to the Members why a simple extension was proposed by telling of the problems which the committee encountered in dealing with special set-asides. Perhaps the proposed amendment which best illustrates the questions which we had about changing the program concerned the proposed Vietnam-era veteran's preference.

Under the current CETA regulations, a veteran who served in Indochina on or after August 2, 1964, is given special consideration for CETA placement. Under this special consideration provision there are no conditions as to age of the veterans, his length of service, or where he served. The goal of the Labor Department has been to have roughly 35 percent of CETA spots filled with Indochina veterans. Under the present law, veterans are given a 48-hour advance for applying for positions. Local prime sponsors are encouraged to hire veterans but they are not required to do so.

The administration had proposed an amendment through which it was their intention to target with an absolute preference an area of great need: younger Vietnam veterans. The amendment would have established a preference for Vietnam-era veterans who are 27 years old and younger. Under their proposal a job would have had to be listed with a local public employment service and held open for 48 hours before it could be filled by a nonveteran. Under the proposal, the veteran would have been afforded the right of first refusal. In this sense it would have been an absolute preference, as officials of the Department of Labor told us: The ability to turn down a job is beyond a special consideration.

Even given the right of first refusal, there seems to be more direct targeting for the Vietnam-era veteran under the current special consideration provision of the law than there is under the proposed "Vietnam-era preference."

The proposed amendment would have limited preference under the act to those Vietnam-era veterans who are 27 years old and younger. If a Vietnam veteran who was wounded in combat and is 28 applies for a CETA position, he would not be eligible for the proposed preference.

Also, we were told that disabled veterans would be given a first preference under the proposed plan, that they would, in effect, move to the front of the line for CETA jobs. Unfortunately there is a catch: They would have to meet the income level and the terms of unemployment which are eligibility requirements of the proposal and be under age 27. This seems to me to be a meaningless gift to give somebody.

I could be making a set-aside or giving special preference to an individual who has contributed to our country by having served in Indochina at a time of hostilities. The proposal which we considered failed to address this. Considering the levels of unemployment among certain categories of our population including younger women, I do not think that we should have special categories for those who happened to have served

in the military, but who did not undergo any greater privation than somebody who may have been in the civilian market. Just to say that a person was in the military and that he be given a preference not as a result of where he served or what hardships he endured does not seem to hinge the preference which we considered to anything.

As you can see, set-asides can raise a great number of questions. We reported this bill with a simple extension in order that we could examine all of the problems—including the Vietnam-era veteran's preference—and come up with a plan which is not only workable, but which actually deals with the problems which we face. We are attempting in committee and in subcommittee to approach the problem of unemployment in a comprehensive manner. This simple extension will give to us the opportunity to examine the merits of every proposal concerning a change in CETA.

At this time, I would like to thank Chairman PERKINS and Subcommittee Chairman HAWKINS for their leadership on this issue.

Mr. PERKINS. Madam Speaker, I yield such time as he may consume to the gentleman from California (Mr. HAWKINS), the author of the bill.

Mr. HAWKINS. Madam Speaker, it is not really my intent to speak at great length on H.R. 2992, inasmuch as this bill is a simple extension bill to continue the comprehensive training and employment program 1 additional year. This is not to imply that the program is not without some problems. I certainly know the members of the subcommittee that I chair are well aware of the problems involved in this program.

Madam Speaker, the bill, H.R. 2992, is a simple authorization for the Comprehensive Employment and Training Act for fiscal year 1978. No substantive changes in the basic act are made. The bill merely authorizes appropriations for 1 additional year as the authorization under present law expires September 30, 1977.

H.R. 2992 was unanimously reported by the Education and Labor Committee on March 22. It has the strong support of both minority and majority members of the committee.

During the 94th Congress, the Education and Labor Committee conducted extensive oversight hearings on CETA throughout the country. These hearings indicated broad support for the Comprehensive Employment and Training Act. During these hearings and in 6 days of hearings conducted by the Subcommittee on Employment Opportunities this year, numerous proposals for substantive change were presented to the committee. Moreover, the administration has also indicated its intention to submit amendments later this year. It was the committee's view that reauthorization for all CETA programs should not be delayed while such proposals were reviewed. Therefore, the committee recommended a simple 1-year extension of CETA programs to allow the committee and the administration an opportunity to consider needed amendments in a thoughtful and deliberative manner.

Reauthorization of CETA is essential to the administration's program to stimulate the economy and relieve unemployment. The Economic Stimulus Appropriation Act, H.R. 4876, passed in the House on March 15, provided funding for 725,000 public service job slots to December 30, 1978, under titles II and VI of CETA. Moreover, the stimulus appropriation provided $1 billion to establish youth employment and training programs under title III, $250 million for a new skill training improvement program, and $120 million to establish a program to provide jobs for young veterans. In addition, the stimulus appropriation expanded the Job Corps under title IV of CETA from its current level of 22,700 slots to 30,000 slots by the end of fiscal 1977.

The Comprehensive Employment and Training Act which is extended by the measure before us today, establishes a flexible and decentralized system of Federal, State, and local programs to provide training, work experience, counseling and job referral, supportive services and employment opportunities for economically disadvantaged, unemployed, and underemployed persons. Briefly, CETA authorizes comprehensive manpower services to enable individuals to secure and retain employment at their maximum capacity; transitional employment in needed public services, special manpower services to segments of the population that are in particular need of such services, including youth, offenders, persons of limited English speaking ability, older workers, Indians, migrants, veterans and others; intensive programs of education and training in a job corps for low income, disadvantaged youth, and special unemployment assistance for workers who are unemployed during a period of aggravated unemployment and who are not otherwise eligible for unemployment allowances under any other law.

The bill before us today authorizes such sums as are necessary for fiscal year 1978. It authorizes no new programs or funding levels. The committee estimates that the cost for CETA in fiscal year 1978 will be $6 billion. This amount is the committee's recommendation to the Budget Committee based on reaching a total of 1.1 million public service jobs by the end of fiscal 1978. The CBO's estimates of cost is $8,286,000. CBO's estimate for outlays in fiscal year 1978 includes the spendout of the advance appropriation for titles II and VI authorized in the economic stimulus appropriation while the committee's estimates for outlays addresses only the authorization in this bill.

The administration submitted its proposal for extension of CETA in a letter from Labor Secretary Ray Marshall to the Speaker dated March 8, 1977. This proposal recommended extension of CETA for 1 year, but also proposed two substantive amendments. The first amendment would have repealed section 4(e) of the current law which restricts the level of funding for national programs under titles III and IV of the act to 20 percent of the total funding under the act. The second amendment would have provided a preference in public service employment programs funded under titles II and VI of the CETA first for disabled Vietnam era veterans and then for other unemployed veterans under 27 years of age.

Because these proposals were submitted after the committee had received testimony on the extension of CETA from prime sponsors and others, the subcommittee solicited the views of a number of organizations on the administration's porposals. The committee received responses from the National League of Cities, the U.S. Conference of Mayors, the National Governor's Conference, the National Association of Counties, and the U.S. Chamber of Commerce. All responses were in opposition to a repeal of the 20 percent limitation; all but the Chamber of Commerce expressed opposition to establishing a preference for any one segment of the population served. The chamber's response was silent on this issue.

It is my view that the question of the limitation of funding programs under titles III and IV is closely tied to consideration of a youth employment program. Presently, the greatest proportion of funding under these titles goes to youth. The administration has indicated that it will submit legislation within the next few days to authorize a comprehensive youth employment program. The Subcommittee on Employment Opportunities has begun hearings on various youth employment proposals and will be considering the administration's youth proposal when it is introduced. At that time, the committee will review the need for amendments relating to the limitation for funding titles III and IV.

With respect to the administration's proposal to establish a preference for Vietnam-era veterans under titles II and VI of CETA, it was the committee's view that the administration's proposal would actually aid only a limited number of veterans, and that provisions concerning veterans under current law were not being adequately administered by the Department of Labor. The administration proposed a preference for Vietnam-era veterans under the age of 27. According to estimates developed by the House information systems group from data in the March 1975 current population survey, approximately 20,000 veterans met the title VI eligibility requirement. A total of 27,000 veterans under 27 have 30 percent or more disability: it is not known how many of these veterans would qualify for CETA jobs.

The Comprehensive Employment and Training Act provides specific authority to the Secretary and to prime sponsors for special efforts to serve veterans. Section 104(b) of the Emergency Jobs and Unemployment Assistance Act of 1974 (Public Law 93-567) requires the Secretary in coordination with the Veterans'

Administration to provide outreach and public information assistance to maximize opportunities for veterans; section 12 of Public Law 94-444—Emergency Jobs Programs Extension Act of 1976—requires the Secretary to submit a report on such outreach and public information activities by January 1977. To date, no such report has been made. Section 205 (c) of CETA specifically requires prime sponsors to give "special consideration" in filling public service jobs to unemployed veterans who served in Vietnam. In addition, section 205(b)(2) requires prime sponsors to provide a plan for effectively serving on an equitable basis the "significant segments" of the population to be served, including data indicating the number of potential eligible participants and their income and employment status.

The unemployment of Vietnam-era veterans is unquestionably severe. For Vietnam-era veterans between the ages of 20 and 24, the unemployment rate is 15.8 percent, compared to 11.6 percent for nonveterans of the same age; disabled and black veterans are hit even harder. I believe that special efforts are needed to provide employment opportunities for these veterans. However, I believe that the Department must begin by implementing those provisions already in the law relating to veterans, particularly with respect to outreach and information to aid veterans in applying for existing CETA job slots. With the substantial increased funding in titles II and VI for public service jobs, the Department must make increased efforts to insure that eligible veterans are informed of the employment opportunities and to monitor the activities of the prime sponsors in making such positions available to veterans.

In summary, I urge all Members of the House to support this legislation before us today. It is urgently needed to provide the training and employment opportunities to address our severe unemployment problems. These programs are widely supported across the Nation and have enjoyed the bipartisan support of the members of the Education and Labor Committee.

Mr. BAUMAN. Madam Speaker, will the gentleman from California yield?

Mr. HAWKINS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Madam Speaker, I just wanted to observe to the gentleman from California that I looked over the figures offered to us by the Congressional Budget Office regarding this bill. They estimate—as I am sure the gentleman knows—that the actual outlays authorized by this "mere extension," as it has been described, in fiscal year 1978 will be $8.3 billion, including a carryover from the previous fiscal year for the public employment service program, and an additional spendout of $2.25 billion in fiscal year 1979.

It seems to me under the circumstances, when we are dealing with an $11 billion authorization, regardless of the fact that it is a so-called simple extension, that the least the Members of the House might expect from an authorizing committee is to bring a bill out under normal procedures, where amendments can be offered such as the gentleman from New York has mentioned, or any other amendments can be considered. The gentleman is giving us under suspension with only 40 minutes debate, a nearly $11 billion authorization bill, with no chance to amend it. I must say that I cannot blame the gentleman entirely. This seems to be the habit this year, to bring out major bills with no chance of amendment.

I think, despite the so-called noncontroversial nature and the few votes cast against it, that the House has a right to expect better of committees than this truncated procedure of authorizing a multibillion dollar bill. I thank the gentleman.

Mr. HAWKINS. May I say to the gentleman that this is not unusual. It is the usual procedure.

The second budget resolution provided for authority of around 500,000 slots in this program but that authority was never actually used. As a matter of fact, I think 320,000 was the closest we ever came to that. So I do not think we should be disturbed by the larger figure that is being recommended. I think it is mandatory upon authorizing committees which have the facts before them to present the facts to the body so that the body will know the extent to which the data presented to the authorizing committee indicate the level that potentially could or might under the circumstances be reached. As a matter of fact, before the Employment Subcommittee, the Conference of Mayors, the League of Cities, the Governors Conference and the other groups representing prime sponsors, indicated a need of around 1.2 million slots at this particular time. So the authorizing level that we suggested and recommended was lower than this particular one.

As I indicated, I think the question of the funding level in this instance should be left to the appropriations process. I think it is dealt with very well in that manner. All we can do, it seems to me, at this time is to grant the authorizing level and leave it to the appropriation process to work its will, and I am quite sure at that time that this question will be dealt with very thoroughly.

Mr. SARASIN. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 2992 and join with my colleagues on the committee who voted unanimously to report the bill in urging all the Members of the House to vote for passage.

As I indicated in my individual views to the report, I spent many long hours with former Congressman Dominick Daniels in an extensive oversight process of the Comprehensive Employment and Training Act—CETA—system in the latter part of 1976. We heard from hundreds of witnesses who compiled thousands of pages of testimony. If any one point was made throughout these hearings it was that despite specific complaints about Department of Labor regulations, failure to link with the private sector, problems of relating to the Employment Service and the like, CETA prime sponsors, local officials, employment and training professionals and the people themselves find the CETA system to be a far superior and more effective means of providing services to the unemployed than anything that had been enacted in the past.

The enthusiasm of local officials toward the CETA program was infectious. In Chicago, under the leadership of Mayor Daley, CETA was working hand in hand with the large corporations, the unions, the nonprofit organizations, and others in trying to meet the needs of the city's disadvantaged. In my home State of Connecticut, prime sponsors testified to the immense potential which CETA offered to draw together the community in providing jobs and employment services. In fact, nowhere did we receive testimony recommending that we return to the old way of doing things when we operated all employment and training programs out of the national office of the Department of Labor.

Unfortunately, the Carter administration seems to be going in that direction. One of their proposals was to repeal section 4(e) of CETA which limits the national programs to 20 percent of the entire appropriations for the whole act. By doing so we would have allowed free rein to turn the design of employment and training efforts to Washington. Passage of this bill will prevent that from occurring.

Further, I have a very real concern with the problems of youth unemployment, but I certainly am not at all enthusiastic about what I hear is being planned by the Department of Labor for youth under title III. This bill will allow the Congress in its wisdom to design an employment effort that best addresses the problems of youth.

And, finally, while I sympathize with the serious problems of Vietnam-era veterans, the Carter administration proposal to target title VI to Vietnam-era veterans between the ages of 20 and 27 is simply not the answer. We discovered in committee that there is only a universe of 20,000 such veterans who met this eligibility requirement and the other eligibility requirements of the targeted public service employment program. And we have received input from a considerable number of veterans' organizations who indicate that what Vietnam-era veterans really need is long-term job development leading to an unsubsidized job in the private sector.

In my view this simple extension will allow the committee time to carefully look at the problems confronting CETA, and, hopefully, to improve the program. For the past several months I have been working on a series of technical amendments designed to draw together the school systems and CETA, to resolve the conflict with the employment service and to more involve the private sector. But I would very much like to have more time to test these suggestions against the real-

ity of what is presently going on at the local level.

I would like to commend the chairman of the subcommittee, the Honorable GUS HAWKINS, for resisting efforts to change CETA in midstream and for his concern for the effective delivery of employment and training services under the act. I know that in the year ahead we will work together to assure that the CETA system is made even better.

Again, I call on all the Members of the House to vote for the extension.

Madam Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Madam Speaker, I rise in support of H.R. 2992, which provides a 1-year extension of the Comprehensive Employment and Training Act through September 30, 1978.

I strongly support enactment of this legislation.

The CETA program is now in its fourth year of operation but it is just beginning to develop its potential for the delivery of employment and training services. The CETA system has immense potential for drawing together the critical elements needed to provide job training employment to the unskilled and disadvantaged. Local administrators have begun to draw government, industry, labor, and the schools together in serving those in need, but this has not been an easy job.

Like so many other legislative vehicles, when we discover it is a worthwhile system we tend to load it up with all kinds of extraneous and burdensome duties. From the outset we have placed far too much emphasis on public service employment which has deterred CETA prime sponsors from their chief role which is job development. In my view the public service employment has provided little more than Federal dollars for local dollars and, because of the immense size of the public service employment efforts, CETA administrators spend much of their time if not all of it creating jobs for those who already have the skills to find employment in the labor market.

We have also allowed the DOL to nearly bury the CETA system in paperwork. During the oversight hearings on CETA, which we completed in December, prime sponsor after prime sponsor came before us with stacks of DOL requirements that often reach as high as 3 or 4 feet. And third, we have not allowed CETA prime sponsors sufficient time to plan. The history of the appropriations for CETA is replete with delays, urgent supplementals, continuing resolutions, and shortfalls.

Almost annually we could expect that the appropriations for the summer youth employment programs would come after the program actually was supposed to begin. It is amazing that under these circumstances prime sponsors have been able to do any planning at all. But local planning is critical to job development.

There are many areas where the CETA system could be improved. The linkage between Federal job training and the private sector could be enhanced. We could improve the relationship between the CETA system and our local education agencies and particularly with our vocational education community. We need to resolve the duplication of efforts and conflict between CETA and the employment service. And we need to provide a better means of Federal oversight without requiring the immense paperwork that seems to descend on local officials.

All these efforts demand careful attention and well-designed amendments. The committee has wisely chosen not to attempt to make any major changes to the law for at least another year, and to provide us with an opportunity to carefully work changes in CETA not to undertake a wholesale revision but to "fine-tune" the system. Hopefully, the massive increases in public service employment and the possibility of a youth program will not completely tear the system apart. We must assure that the CETA system is prepared for the immense new responsibilities we are about to give it.

The CETA system will be tested to the extreme in the coming year. In my view it need not be changed, for the tools to serve the unemployed and the underemployed are there. We simply need to keep our hands off and allow it to work.

I urge all the Members of the House to support passage of H.R. 2992.

Mr. HAWKINS. Madam Speaker, I yield 3 minutes to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Madam Speaker, I want to thank the gentleman for yielding me this time.

I will vote in favor of the legislation to provide a 1-year extension of CETA. Nonetheless, I regret that the exigencies of the congressional budget process require the Education and Labor Committee to bring this legislation to the floor without having time to make substantive changes which I feel are necessary to eliminate past abuses in the program, especially in title III.

I have just completed an indepth examination of four project sponsors in New York City operating last summer under title III of CETA. The program was supposed to provide summer employment for disadvantaged youths. My investigation revealed substantial abuses by these four sponsors and showed even worse abuses on the part of the prime sponsor, the city of New York, and on the part of the Federal Government.

Specifically, I found that the summer youth employment program in New York failed to accomplish its main purpose—to provide productive work experience for disadvantaged youths. In many instances, the youths simply were paid to do nothing. In addition, I discovered abuses ranging from poor planning and lack of project supervision to allegations of kickbacks, payroll fraud, and nepotism.

The city and Federal governments are ultimately to blame for these abuses. They did not seem to care if the youngsters were given meaningful work. Officials responsible for implementing and overseeing the program did not effectively monitor the sponsors and took no action when confronted with reports of serious problems from the field or in their own—usually tardy—audits. In addition, project sponsors for 89.4 percent of the job slots were selected on a nonmerit basis; these sponsors were picked solely because of prior participation in the program and regardless of the fact that their applications were often incomplete or patently illegal.

The young people were deprived of the opportunity for meaningful and productive work. I was disappointed and saddened to find that this program, instead of giving youngsters some hope that they would have employment in the future, instead of building up their employable skills, and instead of giving them a chance, in fact was depriving them of these opportunities. And I was angered to find that this occurred with the acquiescence of Federal agencies and with the connivance of the city of New York.

Madam Speaker, this legislation must be rewritten in the future to prevent such abuses. If employment and training programs are to be effective, if our tax dollars are to be wisely spent, it is critical that in drafting our laws we insure not only that our goals are worthy, but that there are administrative mechanisms for achieving these legislative goals as well.

I am glad the present CETA program will be extended only for 1 year. In the coming months, I would hope that the Education and Labor Committee would carefully review this program, especially those portions dealing with summer employment, and would take vigorous action to make sure that its objectives, which are worthy indeed, are actually accomplished.

Mrs. FENWICK. Madam Speaker, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Madam Speaker, I thank the gentlewoman for yielding.

I would like to identify myself with the comments of my distinguished colleague, the gentlewoman from New York (Ms. HOLTZMAN), and I would like to add further that we heard this morning from a Member of this House who used to be on the council of a large city; this is what was said:

> How do you sit on a council with $16 million of Federal funds from the CETA program, knowing that only 20 percent is going to be spent properly? Twenty percent of it is going to be spent according to the way Congress intended it to be spent, and the rest is just going to go down the drain.

The SPEAKER pro tempore. The time of the gentlewoman from New York (Ms. HOLTZMAN) has expired.

Mr. HAWKINS. Madam Speaker, I yield myself 1 minute.

Madam Speaker, may I simply say that this justifies certain things, this simple extension. We do intend to go into all the phases of the program.

We have indicated that we have this simple extension which means that no new programs are being added and no changes are being made. We have resisted even changes offered by the administration. We have not authorized a specific level of funding in this matter until such time as we have an adequate opportunity to look at all phases of the program.

Madam Speaker, I have no further requests for time.

Mr. SARASIN. Madam Speaker, I yield 2 minutes to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Madam Speaker, I thank the gentleman for yielding.

I wanted to continue my response to the gentlewoman from New Jersey (Mrs. FENWICK).

What I think is the most disturbing failure of the program is not that money is wasted, which is bad enough in itself, but that youngsters who need work and need skills are paid to sit around and do nothing. That situation breeds in them a terrible cynicism about Federal programs, about their own future, and about what society expects of them. It is counterproductive and undermines the objectives of this program.

I would certainly hope that we would not see a repetition this coming summer of the failure which I found in New York City and which has undoubtedly occurred elsewhere around the country.

Mr. SARASIN. Madam Speaker, I yield myself 1 additional minute.

Madam Speaker, I would assure the gentlewoman from New York (Ms. HOLTZMAN) that it is my strong feeling the entire subcommittee shares the concern which the gentlewoman has spoken about. This was one of the issues I tried to raise with the youth employment sponsors. How well they are handling the people? What are they paying them? What are they teaching them?

Madam Speaker, I think it is extremely important that we try to prepare the young people for the world of work and not for the "world of shirk," if I may coin such a phrase.

Mr. MICHEL. Madam Speaker, I am disappointed that this bill is being taken up under suspension of the rules, beamendment making a change very essential to the effective operation of the cause I would otherwise have offered an public service jobs section.

That amendment would have reduced the ceiling on the amount of wages which can be paid to public service jobholders. There is currently a ceiling of $10,000 per job annually, which I think is too high, because it would not provide sufficient incentive to the PSE jobholders to treat these jobs as transitory in nature and continually look for more permanent employment.

When one realizes that only 24 percent of the PSE jobholders end up on other jobs when they leave their PSE jobs, it is evident that this is a serious problem, because we want to avoid as much as possible having people simply stay in their PSE job until it expires, and then go back into the unemployment rolls.

According to figures from the Labor Department, some 23 percent of the public service jobs pay over $7,500 annually in wages, and some 39 percent pay over $6,700. So, while we are talking about a minority of the public service jobholders, we are talking about a significant number who may be finding their wages so satisfying they do not seek other work.

It should also be noted that 13 million Americans currently working full time on a year-round basis earn less than $7,000 annually, and an additional 7.6 million working full time for 27 to 49 weeks earn less than $7,000. It is clearly unfair to these people, who are not eligible for public service jobs, to have their taxes used to pay a substantial number of public service jobholders at higher wage rates.

The converse is that public service jobholders are not likely to seek some of these other jobs in the private sector if their PSE wages are higher than the rates in the other jobs.

I believe a lower ceiling is essential if we are to make this public service jobs program work effectively and really do what we intended for it to do, and hopefully there will be an opportunity at some future point to try and rectify this shortcoming.

Mr. KEMP. Madam Speaker, I have grave reservations about the CETA program.

I have equally grave reservations about passing an automatic, 1-year extension of it under a suspension of the rules. By dealing with the 1-year extension bill in this way, we are precluded from offering any amendments to correct the many shortcomings in the program.

The Committee on Education and Labor has had extensive information in front of it for the past several years on what is wrong with this program. The General Accounting Office has prepared a number of critical reports. A number of bills have been introduced to reform the program, including H.R. 4734, by Representative JOHN LAFALCE and me. And much testimony has been heard. As recently as mid-March, I presented a statement to the Subcommittee on Employment Opportunities of that Committee, detailing abuses in the program and detailing amendments to correct them.

As the holding of those hearings recognized, there is a constant need for Congress to review the successes and failures of its previously enacted policies and programs in the jobs creation area. The policies and programs which were right for last year may not be right for next year. This is important, for if Congress locks itself into a course and insists upon that course year after year, it will become a static force, a drag upon the evolution of policies and programs which arises from changed economic conditions, changed needs within the economy, and changed public opinion. Congress should be a dynamic force behind spurring the economy and creating and preserving job opportunities. I see no reason why we should not articulate new policies for new times and enact legislation in furtherance of them.

How best to maximize employment opportunities cannot be addressed through a single policy or a single program. Public works and public service cannot accomplish our objective. Tax reform can help or hinder it. So can regulatory policy. I know the jurisdiction of the Committee on Education and Labor is limited to employment in general, that it does not extend to taxes, to public works construction, or to Government regulation, but employment in general must be examined in the context of the overall picture, a context which includes these additional facets. I do not see what good it can do, for example, to extend the CETA program or establish a Youth Conservation Corps in the name of jobs, if Government at the same time is jeopardizing or actually destroying the same or greater level of jobs through misdirected tax or regulatory policies.

If Government is going to derive the maximum benefit from each tax dollar spent, Congress must have a clearly and emphatically stated goal with respect to employment. In my opinion, that goal ought to be jobs creation and jobs preservation. And we ought to reject those policies—offered in Congress or from the administration and its departments and agencies—which would frustrate such a goal.

In this context, we should look at public service and public works employment as temporary bridges to permanent, productive jobs in the private sector of the economy, as tax-consuming jobs which need to be transformed into tax-generating jobs.

And we should look at tax reforms in terms of jobs. When tax reforms are offered that jeopardize jobs, they must be defeated. When tax reforms are offered that create or preserve jobs, they should be enacted.

Let me deal with each of these.

NEW GENERAL ACCOUNTING OFFICE STUDIES SHOW WHY REFORM OF THE CETA PROGRAM IS ESSENTIAL

As I just indicated earlier in the session, I introduced a bill to reform the programs administered under the Comprehensive Employment and Training Act—CETA. A thorough reading of just-released studies by the General Accounting Office of CETA programs around the country underscores the importance of immediate consideration of this legislation. The GAO report on the city of Buffalo and county of Erie, N.Y., entitled "Employment Programs in Buffalo and Erie County Under the Comprehensive Employment and Training Act Can Be Improved," was released on February 18, 1977; its GAO document number is HRD-77-24. Additional studies which should be reviewed are "Progress and Problems in Allocating Funds Under Titles I and II—Comprehensive Employment and Training Act," GAO document No. MWD-76-22, of January 2, 1976; "Formulating Plans for Comprehensive Employment Services—A Highly Involved Process," GAO document No. 76-149, of July 23, 1976; and "Followup Report on Services to Veterans in Delaware Under Title VI of the Comprehensive Employment and Training Act," GAO document No. HRD-77-76, of February 16, 1977. There are other reports as well.

Several weeks ago, GAO released through me its 2-year study of the CETA program in the city of Buffalo and county of Erie, N.Y. I had requested that study on January 23, 1975, as news reports in the Buffalo area disclosed numerous, apparent violations of the CETA law and regulations. I am encouraged by the thoroughness of that report and its recommendations. Coupled with what we already know about other problems with the program, it gives Congress a clear picture of what it has to do to protect the taxpayer's investment in public service jobs. To their credit both the city of Buffalo and the county of Erie not only cooperated fully with GAO but also undertook steps to reform their own programs.

This report discloses there—

Were ineligible participants;

Were violations of Labor Department regulations on nepotism and political activities;

Were problems in Buffalo's reporting of administrative costs, including purchases of supplies and equipment;

Was a lack of formal procedures to make sure specific target groups received specific consideration;

Was a failure of sponsors to assure program participants obtained permanent, unsubsidized jobs in the private sector. Other GAO studies on the CETA program have shown similar and different problems. The bill we have introduced is addressed to correcting them.

QUESTIONS ABOUT CETA'S EFFECTIVENESS RAISED

In recent months there has been much discussion of significantly expanding this and other public service jobs programs. These are apparently seen as a means of counteracting some of the persistently high unemployment across the country. While the administration is increasingly expressing its preference for jobs creation through the mechanisms of the private sector of the economy, it continues to support these public service jobs programs, presumably because it sees them as a short-term bridge to more permanent jobs creation in the private sector.

We must be cautious about extensions of this and other public service job programs, however. Like all Government programs, funds to sustain it must come from the taxpayers. The well-meaning attempt here to put people back to work and to put some take-home pay in their pockets now may be at the expense of the long-term jobs creation which can come only through leaving more of the people's income with them.

My area of principal concern focuses on the kind of benefit provided to the program's enrollees.

The way the program is now being administered, the local price sponsors' public service employment programs do not provide adequately for training. Yet training is essential to enhancing job skills and to lessening future dependence on tax-supported assistance in general and public service jobs in particular. Stated another way, these programs are contributing very little to lessening future dependency on the programs themselves.

Most of these jobs today have the character of make-work with little genuine orientation to the long-range benefits needed by the community or to the person employed under the act. This is misleading to the community and the taxpayers, and it is outright cruel to the person employed or his or her family.

Unless these people are given sufficient training in skills related to jobs available within the private sector, there will be greater danger of them falling back into unemployment, underemployment, and other forms of public assistance at the end of the program. This, in turn, simply generates more pressures on the Congress to continue the program beyond its present termination date. Unless something is done by Congress to require program designs consistent with breaking such cycles of dependency, this temporary program could become like too many others—permanent.

Creating a higher level of employability for each person who is given a job under this program is essential. Logic demands these jobs ought to be oriented toward creating a more permanent employability of the participant. As a result of the program, the workers ought to be able to find and to keep a permanent job. This can be most effectively accomplished through on-job training within the private sector. The results would be manifold: Enhanced job skills, improved motivation, lessened dependence, less demand upon the public purse. In contrast, those types of public service jobs which have no, or little, private sector comparability are almost incapable of assuring a higher degree of employability. They give to the person little skill improvement. They do not lessen his or her dependence. And what it does to their motivation and morale borders on being immoral.

I am reminded of the old Chinese proverb:

> Give a man a fish and you have taken care of him for one day. But teach that man to fish, and you have taken care of him for the rest of his life.

Make-work, dead-end jobs give a man or woman that proverbial fish. They take care of today's needs, but do nothing about tomorrow's. Only when we teach him or her new skills with which to better assure their own chances of gaining private sector employment, do we do them the service we owe to our fellow man. The greatest charity of all is to help a person be able to help themselves.

After a thorough review of the act and its legislative history, I am convinced there is much latitude for providing training. The act allows it in instance after instance. Unfortunately, not enough emphasis has been put on that fact by the Federal headquarters and regional administrators in working with local sponsors. In my opinion, the Federal administrators ought to require—to insist—that training be given top priority before they approve plans submitted from the sponsors.

THE AMENDMENTS WHICH ARE NEEDED TO THE CETA PROGRAM

The basic program was authorized by the Comprehensive Employment and Training Act of 1973, Public Law 93–203, 29 U.S.C. 801 et seq. That was amended by Public Law 94–444. The amendments proposed in our legislation address themselves to the basic act, as amended. These are the amendments which could be offered to the bill before us, if it were being considered under anything other than a suspension of the Rules.

They are as follows:

Section 3 restates the purpose of the act, elevating the importance of job training and other services which will lead to maximum employment opportunity in the private sector and enhanced self-sufficiency.

Section 4 assures the opportunity for private organizations and associations to train persons by contract with the local sponsors.

Section 5 authorizes public school boards to act as additional prime sponsors.

Section 6 protects the autonomy of local governments as prime sponsors, principally against intrusions by State governments.

Section 7 establishes additional conditions for receipt of financial assistance, including maintenance records of expenditures accurately; maintaining records and reporting accurately on pension benefit costs accruing for program enrollees; and reviewing carefully job applications for completeness and accuracy, assuring the data on application forms are verified prior to any payment of funds.

Section 8 instructs the Secretary of Labor not to approve a comprehensive manpower plan or any amendment thereto until he determines, in addition to qualifications already set forth in the act, the description of the plan or amendment thereto describes and justifies adequately the activities funded under titles II and VI of the act. The Secretary shall also require the regional offices to review thoroughly sponsors' planned expenditures shown in grant applications and actual expenditures shown in quarterly financial reports in order to assure compliance with the act. These were among the principal recommendations of the GAO study in addressing itself to inadequate administrative oversight of local programs.

Section 9 restates the purpose of the public employment programs, elevating the role of training and manpower services designed to enable unemployed, underemployed, and economically disadvantaged persons to move into training or employment not supported by the act.

Section 10 prohibits a requirement from being imposed on local sponsors by the Labor Department or any other entity to maintain a percentage of persons paid through CETA funds after the expiration of the Federal funding on local public payrolls. The dollar drain such a requirement imposes on State and local government is often so overwhelming that property and other local tax increases become inevitable.

Section 11 states a preference for unemployed veterans, urging the local sponsors to assure the percentage of veterans served under the program is no less a percentage than that of veterans

among the total qualified population in the area.

Section 12 is designed to maximize the impact of public service expenditures by encouraging sponsors to concentrate most on those most likely to obtain permanent employment in the private sector within a reasonable time as a result of the assistance they receive under the act. This would be a 180° reversal from the present policy by which they are encouraged to concentrate on those least likely to obtain such permanent employment in the private sector.

Section 13 defines CETA's $15,000 maximum salary limitation for local participants, requiring any earned income from moonlighting jobs held simultaneously by such participants to count against that $15,000 ceiling. For example, if a person were earning $4,000 in a moonlighting job, the most he could receive from CETA funds would be $11,000.

Section 14 makes it very clear that there can be no requirement imposed on sponsors to make contributions from these funds to public retirement programs. This is a crucial point. The GAO report on Buffalo and Erie County zeroes in on this practice. Erie County officials told the GAO investigators that the State actively pushed for CETA participants to join the retirement system, because this was a means of putting funds into it, borne by CETA rather than local governments, and most of the participants would not be employed long enough with local government agencies to attain any vesting interest in the fund. Thus, the financial position of the retirement fund would be improved. Those officials said application blanks were mailed in bulk to the prime sponsor by the State comptroller. This amendment will stop this abuse.

Section 15 makes it clear that there shall be no assignment of public employment persons to the staffs of publicly elected officials.

Section 16 tightly defines nepotism, prohibits it within these programs, and sets forth penalties and forfeitures, first, for violations of the antinepotism provision and, second, for any failure by agreement to perform the service for which the person was hired—"no shows." These problems were dealt with in the GAO study on Buffalo and Erie County.

Section 17 incorporates persons employed through CETA funds at the local level within the coverage of the Hatch Act, prohibiting them from a wide range of political activities.

Section 18 sets forth the criterion for the maximization of employability within the private sector as a condition applicable to all programs under the act, not just the public service jobs program.

Section 19 sets forth additional conditions applicable to all programs, including, first, the recovery of funds authorized under the act and paid to program participants found by an instrumentality of the government or program sponsor under the act to have been ineligible for participation or assistance and, second, a limitation on the percentage of program costs which can be used for supplies and equipment—10 percent. These problems were brought out in the GAO report also.

Section 20 would prohibit the hiring of persons for the performance of functions which had been performed, at any time during the 180-day period immediately prior to the date on which such hiring would occur, by persons employed under applicable civil service laws of the State or unit of general local government involved. This is to prevent the "busting" of government employee unions.

Section 21 sets forth civil penalties—forfeiture of pay and a fine of not more than $1,000—for discrimination on the basis of political affiliation in the selection of participants.

Mr. Speaker, there is no better time than the present to harmonize this program with current economic conditions and needs; the amendments would go a long way to accomplishing that.

But reform of the CETA program is only a first step to alleviating the severe, persistent unemployment in the country today, an unemployment which has not dropped since last November's various election victories.

I am convinced tax reform—specifically across-the-board reductions in tax rates—is the only long-term, substantive answer to unemployment which can work.

TAX REFORM ALTERNATIVES TO GOVERNMENT-SUBSIDIZED JOBS

The Government needs to do much more for those now unemployed, underemployed, or in Government-subsidized jobs than merely extend the Government-subsidized jobs programs.

President Carter says repeatedly that decisions affecting Government programs should be made within functional categories. This is the basis for his Government reorganization effort, which appears as if it will be successful. Publicly subsidized jobs must be considered in the context of the totality of jobs. Inasmuch as jobs in the private sector are far greater in number, inasmuch as those jobs in the private sector provide the alternative to public service jobs, and inasmuch as tax rate reductions would create and preserve more jobs in the private sector, the role of permanent tax rate reductions on individuals and businesses thus becomes crucial to these job questions.

I am particularly encouraged by recent statements of Secretary of the Treasury W. Michael Blumenthal on this point. The Secretary has strongly emphasized the importance of increased capital investment, arising from tax rate reductions, as a means of creating and keeping jobs. Two recent articles in the Washington Post, "Treasury Chief Favors Uniform, Lower Income Tax Rates," by Hobart Rowen, and the March 10 column of Evans and Novak, underscore this. OMB Director T. Bertram Lance testified before the Joint Economic Committee on February 24 that permanent tax cuts are preferable to temporary tax cuts and that a permanent tax reduction will be incorporated in the President's tax reform proposals slated for transmittal in mid-August. I am very much encouraged by this.

Tax policy must be considered from the standpoint of its effect on the incentives of people to work and produce, to save and invest, to build and employ—all of which adds up to jobs. When tax rates go up and investment and employment opportunities in the private sector go down, it is not the rich who have been soaked. It is the unfortunate workers who either become unemployed or must work with less productive tools and machinery and the unfortunate would-be workers who remain unemployed.

Attempts to benefit the less fortunate and fight poverty by redistributing income through the tax code are ultimately counterproductive. Instead of dividing up a static economic pie, we need to expand the size of that pie, so everyone can partake more of it. The only real way to raise the standard of living for everyone, including those now dependent on Government-subsidized jobs, is to increase the amount of capital per capita by reducing the tax barriers to investment and employment.

The greater the tax, the greater the shrinkage in real growth. Conversely, lower tax rates produce growth. When tax rates were cut in the 1920's, 1950's and 1960's, jobs were created, people consumed more, output soared as workers had more incentive, small businessmen worked longer hours, professional people took shorter vacations—which meant they were more productive, people saved more, and invstment grew. No wonder tax revenues rose.

We must eliminate the tax bias against job creation, for taxes impact directly on hiring. A firm's total cost of hiring includes payroll and withholding taxes, while a worker's take-home pay is exclusive of both. As taxes rise, the cost of labor to the firm rises, and fewer workers are hired. Simultaneously, the take-home pay of those with jobs is reduced, causing many workers to lose incentive and opportunity. Those without work enter the ranks of the unemployed, at first drawing unemployment compensation. As the job market remains tight and unemployment benefits run out, the man or woman who once had a job enters the welfare system or a make-work job. There is no clearer way to see how jobs relate to welfare and other forms of public assistance and dependency.

I have pushed very hard over the past 4 years for reductions in tax rates—specifically to create and sustain jobs. The bill which I have introduced to accomplish this purpose in the Job Creation Act of 1977, most recently introduced as H.R. 4735. That legislation now has 114 cosponsors on the House side. It offers the administration and the Congress a means of carrying out Secretary Blumenthal's and Director Lance's emphases on tax rate reductions to create jobs, and coupled with the National Welfare Reform Act, H.R. 4679, and the Comprehensive Employment and Training Reform Act, H.R. 4734, it offers the administration and the Congress a means of carrying out substantive jobs reform and creation of alternatives to public dependency.

Mr. BIAGGI. Madam Speaker, as a member of the House Education and

Labor Committee where the CETA law originated, I rise in full support of H.R. 2992 which provides for a simple 1-year extension of the act. Passage of this legislation will represent another important component in our efforts to stimulate our sagging economy by reducing our No. 1 economic nemesis—unemployment.

H.R. 2992 will provide benefits for virtually all sections of the United States, for in addition to extending the act, significant increases in funding is provided. This increase will translate into an additional 12,500 jobs in my home State of New York bringing the total to 72,000 jobs which will be provided in the State under CETA by the end of fiscal year 1977.

I am pleased to note that language which I worked to have included in H.R. 12987 in the last Congress has been maintained in H.R. 2992. The language I refer to allowed cities and other prime sponsors to give a preference to the rehiring of laid off law enforcement personnel under title VI of CETA. This provision has allowed several hundred laid off policemen to be rehired in the city of New York. I consider it imperative that all Federal avenues be explored to aid cities in their efforts to rehire essential public safety personnel which are desperately needed to combat rising crime rates.

The 95th Congress thus far has been championing the cause of the workingman. We have passed several important bills designed to get Americans on the job. H.R. 2992 must be considered one of the most important of these proposals and it merits the full support of the House. I am hopeful that once this bill is passed, the committee will go back and review the overall CETA law to make certain necessary administrative revisions. I recognize the importance of the CETA program and fully support its continuation as provided in H.R. 2992.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and pass the bill H.R. 2992.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Ms. HOLTZMAN. Madam Speaker, I make a point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will advise the gentlewoman from New York (Ms. HOLTZMAN) that a point of order of no-quorum is not in order at this point, because there is no question being put to a vote at this time.

DOMESTICATED RABBIT MEAT INSPECTION

Mr. WEAVER. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 2521) to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2521

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, except as provided in section 2 of this Act, all the penalties, terms, and other provisions in the Poultry Products Inspection Act (71 Stat. 441; 21 U.S.C. 451–470) are hereby made applicable (1) to domesticated rabbits, the carcasses of such rabbits, and parts and products thereof, and to the establishments in which domesticated rabbits are slaughtered or in which the carcasses, or parts or products thereof, are processed, (2) to all persons who slaughter domesticated rabbits or prepare or handle the carcasses of such rabbits or parts or products thereof, and (3) to all other persons who perform any act relating to domesticated rabbits or other carcasses of such rabbits or parts or products thereof, and who would be subject to such provisions if such acts related to poultry or the carcasses of poultry, or parts or products thereof; and such provisions shall apply in the same manner and to the same extent as such provisions apply with respect to poultry and the carcasses of poultry, and parts and products thereof, and to persons who perform acts relating to poultry, the carcasses of poultry, or parts or products thereof.
